viveka. (T. dben pa; C. yuanli; J. onri; K. wŏlli 遠離). In Sanskrit and Pāli, “seclusion,” “aloofness,” “solitude.” In Buddhist meditative literature, viveka refers to the “aloofness” that occurs as a result of becoming increasingly focused on a meditative object and thus more “secluded” from the things of the sensual world. In the NIDDESA of the Pāli KHUDDAKANIKĀYA, three kinds of viveka are described: kāyaviveka, or “physical seclusion”; cittaviveka, or “mental seclusion;” and upadhiviveka, or “seclusion from the substrata of rebirth (UPADHI),” viz., the five aggregates (SKANDHA) and/or the afflictions (KLEŚA). Kāyaviveka is actual physical separation from family, friends, and distracting sense objects; cittaviveka is when meditative practitioners remain “aloof” or “secluded” from greed (RĀGA), hatred (DVEṢA), and delusion (MOHA). In some MAHĀYĀNA texts, the slavish pursuit of viveka is explained as a violation of the bodhisattva ideal, because the devotion to solitude impedes the bodhisattva’s vow to save others from their suffering. In Buddhist tantras, such as the GUHYASAMĀJATANTRA, the practice of the three isolations of body (kāyaviveka), speech (VĀGVIVEKA), and mind (cittaviveka) precedes the practice of illusory body (MĀYĀKĀYA), clear light (PRABHĀSVARA), and union (YUGANADDHA).

Vô Ngôn Thông. (無言通) (d. 826). Vietnamese monk regarded by tradition as the founder of the second principal school of THIỀN (CHAN) in Vietnam. According to the Vietnamese genealogical history, THIỀN UYỂN TẬP ANH, Vô Ngôn Thông originally came from Guangzhou (China) and entered the Buddhist order at Shuanglinsi in Wuzhou. Because he was known for his ability to silently comprehend and realize the nature of things, his contemporaries called him “Wordless Realization” (V. Vô Ngôn Thông; C. Wuyantong). He is reputed to have studied under BAIZHANG HUAIHAI. In 820, Vô Ngôn Thông came to Kiền Sơ Monastery in northern Vietnam and took up residence there to practice Chan. He generally sat facing the wall (see BIGUAN), without uttering a word. A disciple, Cảm Thành, served him for many years and received the transmission of his full teaching.

Vṛjiputraka. (P. Vajjiputtakā; C. Baqizi; J. Batsugishi; K. Palgija 跋耆子). In Sanskrit, “Sons of Vṛji”; a group of monks condemned at the second Buddhist council (SAṂGĪTI; see COUNCIL, SECOND), the council at VAIŚĀLĪ, for what were judged to be ten violations of the VINAYA, the most serious of which was accepting gold and silver from the laity. Other violations included carrying a provision of salt, using a fringed sitting mat, eating after noon, eating meals from two different villages on the same day, and performing an ecclesiastical act (SAṂGHAKARMAN) without a sufficient number of monks being present. According to Pāli sources, after their condemnation, these monks seceded to form the MAHĀSĀṂGHIKA school. See also VĀTSĪPUTRĪYA; YAŚAS.

Vulture Peak. See GṚDHRAKŪṬAPARVATA.

vyākaraṇa. (P. veyyākaraṇa; T. lung bstan pa; C. shouji/piqieluo; J. juki/bigara; K. sugi/pigara 授記/毘伽羅). In Sanskrit, “prediction” or “prophecy”; a statement made by a buddha indicating the course of future events, especially regarding when, where, and with what name a BODHISATTVA will become a buddha. The most famous instance of such prophecy in the MAHĀYĀNA sūtras appears in the SADDHARMAPUṆḌARĪKASŪTRA (“Lotus Sūtra”), where the Buddha makes predictions that the great ARHATs, beginning with ŚĀRIPUTRA, will all eventually achieve buddhahood. ¶ Vyākaraṇa is also used to refer to one of the nine (NAVAṄGA) (Pāli) or twelve (DVĀDAŚĀṄGA [PRAVACANA]) (Sanskrit) categories (AṄGA) of Buddhist scripture according to their structure or literary style, where it refers to prophetic teachings or expositions. In the ninefold Pāli division, BUDDHAGHOSA defines veyyākaraṇa as something of a default category, which comprises the entire ABHIDHAMMAPIṬAKA, all suttas that do not contain verses, and any teaching of the Buddha that does not fall into any of the other eight categories.

Vyākhyāyukti. (T. Rnam par bshad pa’i rigs pa). In Sanskrit, “Principles of Exegesis,” a treatise by VASUBANDHU preserved only in Tibetan translation. In the broadest sense, the text deals with scriptural interpretation, touching on a wide range of related issues, including the authenticity of the MAHĀYĀNA sūtras as the word of the Buddha (BUDDHAVACANA), which Vasubandhu upholds. The work is a companion to another work by Vasubandhu, the *Vyākhyāyuktisūtrakhaṇḍaśata* (“One Hundred Extracts from the Sūtras for the Principles of Exegesis”), a collection of 109 passages presented without identification and without comment, all of which derive from “mainstream” (that is, non-Mahāyāna) sources, in most cases from the canon of the MŪLASARVĀSTIVĀDA. These passages serve as the basis for the discussion in the *Vyākhyāyukti*, which states that sūtras are to be explained according to (1) their purpose, (2) their summarized meaning, (3) their sense, (4) their sequence, and (5) objections and responses. In discussing the sense or meaning of a sūtra passage, he considers thirteen terms that have multiple meanings, including DHARMA, RŪPA, and SKANDHA. In his explication of technical terminology, Vasubandhu explains four distinct aspects of “the meaning of the words” (padārtha): synonyms (paryāya), definition (lakṣaṇa), etymology (nirukti), and their subdivisions (prabheda; perhaps implying subsidiary meanings, or “connotations,” in this context). In the course of the discussion, several Mahāyāna sūtras are quoted. The work was influential in late Indian scholastic circles, eliciting a commentary by Guṇamati; it was also cited by such scholars as HARIBHADRA. It was highly praised by such luminaries as SA SKYA PAṆḌITA and BU STON in Tibet, where it was used to establish principles for the translation of Buddhist texts from Sanskrit into Tibetan. See also NETTIPPAKARAṆA; PEṬAKOPADESA; SANFEN KEJING.

vyāpāda. (T. gnod sems; C. chen; J. shin; K. chin 瞋). In Sanskrit and Pāli, “malice” or “ill will”; the ninth of ten unwholesome courses of action (AKUŚALA-KARMAPATHA), referring to the hateful wish that harm will befall another. The ten courses of action are divided into three groups according to whether they are performed by the body, speech, or mind. Malice is classified as an unwholesome mental action (AKUŚALA-KARMAN), and forms a triad along with covetousness (ABHIDHYĀ) and wrong views (MITHYĀDṚṢṬI). Only extreme forms of defiled thinking are deemed an unwholesome course of mental action, such as the covetous wish to misappropriate someone else's property, the harmful intent to hurt someone, or the adherence to pernicious doctrines. Lesser forms of defiled thinking are still unwholesome (akuśala), but do not constitute a course of action. ¶ "Malice" is also listed as one of the five hindrances (NĪVARAṆA) to DHYĀNA, obstructing the dhyāna factor of rapture (PRĪTI). Malice is fostered by unwise attention (AYONIŚOMANASKĀRA) to objects causing aversion and is removed through frequent wise attention to loving-kindness (MAITRĪ), developing the meditation on loving-kindness, and recognizing the fact that every person's actions are his or her own and acknowledging the futility of anger. Malice is countered by faith (ŚRADDHĀ), the first of the five spiritual faculties (INDIYA), and by the enlightenment factors (BODHYAṄGA) of physical rapture (prīti) and equanimity (UPEKṢĀ). "Malice" is also included among the ten fetters (SAṂYOJANA) and is completely overcome only upon becoming an ARHAT.

vyāpti. (T. khyab pa; C. bian/bianzhi; J. hen/henshi; K. p'yŏn/p'yŏnji 遍/遍至). In Sanskrit, "pervasion" or "concomitance"; a term used in logic to indicate the relation that obtains between the reason and the predicate in a correct syllogism (PRAYOGA). There is positive concomitance (anvaya) and negative concomitance (VYATIREKA). For example, in order for the syllogism (PRAYOGA) "Sound is impermanent because of being produced" to be correct, it must be true that whatever is impermanent must necessarily be produced. That is, the category of the reason must either be coextensive with or subsume the category of the predicate. In Tibetan monastic debate, the term figures in one of three answers that the defender of a position may give. When presented with a syllogism or consequence (PRASAṄGA) by the challenger, the defender may (1) accept the thesis ('dod), (2) state that the reason is not a quality of the subject (rtags ma grub), or (3) state that there is no pervasion between the reason and the predicate (ma khyab).

vyatireka. (T. ldog pa; C. lizuofa; J. risahō; K. ijakpŏp 離作法). In Sanskrit, in Buddhist logic, "exclusion" or negative concomitance, as compared with positive concomitance (anvaya); in the syllogism (PRAYOGA) "Sound is impermanent because of being produced," the negative concomitance is whatever is permanent is not produced; the positive concomitance is whatever is produced is impermanent. The term also is used in the discussion of "reverse" (vyāvṛtta; T. ldog pa), a term that occurs in epistemology and logic treatises to describe how thought (as opposed to direct perception, viz., PRATYAKṢA) apprehends its object via a negative route, whereby, for example, the idea of "chair" is arrived at through the exclusion of everything that is "nonchair." This "non-nonchair" would be called the "reverse" (vyāvṛtta) of chair and the object of the concept of "chair." See also APOHA.

vyavadāna. (P. vodāna; T. rnam byang; C. jing; J. jō; K. chŏng 淨). In Sanskrit, "purification" or "cleansing"; often contrasted with SAṂKLEŚA, meaning impurity, defilement, stain, or pollution. This vyavadāna/saṃkleśa dichotomy is used in a variety of ways. These are understood to be two distinct and opposite modes of causation that condition one's future—one leading to suffering and other to the end of suffering. A being's consciousness (VIJÑĀNA) is constantly entering into either the process of purification (vyavadāna) or defilement (saṃkleśa), depending upon actions and thoughts at any given moment. The process of purification may be undertaken by way of morality (ŚĪLA), concentration (SAMĀDHI), or wisdom (PRAJÑĀ). Purification is evidenced by the resultant presence of tranquillity (PRAŚRABDHI). In some MAHĀYĀNA texts, it is emphasized that the ultimate result of the process of purification is the realization that all phenomena (DHARMA) are ultimately devoid of any distinction between pure and impure. The term vyavadāna may also be used independently of saṃkleśa, as, for example, where a BODHISATTVA's understanding of the DHARMA is said to be vyavadāna—pure and without blemish.

vyavahāra. (T. tha snyad; C. sudi/yanyu; J. zokutai/gongo; K. sokche/ŏnŏ 俗諦/言語). In Sanskrit, "convention" or "designation"; often with the connotation of something superficial. Generally, this term refers to matters involved with the mundane or worldly realm, as opposed to those of the sacred or supramundane realm. Vyavahāra has two general applications in a Buddhist context. First, it is used to indicate the established social conventions, experiences, and practices of the quotidian world. In Buddhism, these conventions are contrasted with the strict moral practices that conform to the ultimate truth (PARAMĀRTHASATYA) perceived by noble beings (ĀRYA). In this sense of a "conventional truth," vyavahārasatya is synonymous with SAṂVṚTISATYA. Second, and rather more commonly, this term is used in the context of language and discourse to indicate those conventional words used by ordinary, unenlightened beings to designate reality as they (mis)understand it. Here, again, the terms and the objects that they designate are merely conventional truths (saṃvṛtisatya); the term vyavahārasatya sometimes is used as a synonym. Since, according to the doctrine of emptiness (ŚŪNYATĀ), all phenomena are devoid of any inherent, unchanging nature, the linguistic expressions used to designate the things of this world are purely conventional designations and cannot contain or communicate the true nature of those phenomena. Through the power of their practice, buddhas and BODHISATTVAS have an inherent understanding of all such linguistic expressions (see NIRUKTI; PRATIBHĀNA) and use that knowledge to communicate the DHARMA to unenlightened beings. Buddhas and bodhisattvas, however, understand both the true and ineffable nature of the language they use, as well as the phenomena that language is meant to describe.

Vyavahārasiddhi. (T. Tha snyad grub pa). In Sanskrit, "Proof of Convention"; a work attributed to NĀGĀRJUNA; it is no longer extant, but six stanzas are cited by ŚĀNTARAKṢITA in his MADHYAMAKĀLAṂKĀRAVṚTTI. The verses state that a MANTRA is composed of letters just as a medicine is composed of ingredients, but the mantra and the medicine are neither the same as nor different from the elements of which they are comprised. Because they are dependently arisen, they cannot be said to be either existent or nonexistent; instead, they exist conventionally. This fact is true of all phenomena, including cessation (NIRODHA), which were set forth by the Buddha for specific purposes.

vyaya. (T. 'jig pa; C. mie; J. metsu; K. myŏl 滅). In Sanskrit and Pāli, "disintegration" or "destruction"; a close synonym of ANITYA, viz., "desinence" or "impermanence." In the SARVĀSTIVĀDA ABHIDHARMA, "disintegration" or "desinence" constitutes the final of the four characteristics (CATURLAKṢAṆA) of compounded phenomena (SAṂSKṚTADHARMA), along with production or origination (JĀTI), continuance or maturation (STHITI), and "senescence" or decay (JARĀ). Vyaya refers to the inevitable tendency of all compounded things to disintegrate, once the cause and conditions that sustain them vanish. The various abhidharma systems disagree as to whether these four conditioned characteristics are natural qualities inherent in all compounded things; or whether they are external factors that act upon those things, such as through "forces dissociated from thought" (CITTAVIPRAYUKTASAṂSKĀRA). They also disagree as to whether the four occur successively over a period of time or whether they are four perspectives on a single instant (KṢAṆA).

W

Wachirayanwarorot. [alt. Wachirayan Warot] (Thai) (1860–1921). See Vajirañāṇavarorasa.

wajō. (和上). An alternate Japanese transcription of the Sanskrit term upādhyāya, or "preceptor," which is also pronounced kashō in the Tendaishū. This term is often interchangeable with oshō. See heshang.

wall contemplation. See biguan.

Wanfosi. (J. Manbutsuji; K. Manbulsa 萬佛寺). In Chinese, "Monastery of Myriad Buddhas"; located outside the western gate of the old city wall of Chengdu in Sichuan province; currently only an archeological site. The monastery was founded during the Eastern Han period (25–220 ce) and survived through the end of the Ming dynasty (1368–1644), changing its name several times in the course of its history. It was known as Anpusi during the Liang dynasty (502–556), Jingzhongsi during the Tang dynasty (618–907), Jingyinsi during the Song dynasty (960–1279), and Zhulinsi, Wanfusi, and, finally, Wanfosi, during the Ming dynasty (1368–1644), after which it fell into disrepair. Since the rediscovery of the site in 1882, some two hundred sculptures and other sacred objects have been uncovered during successive excavations, most of which are currently kept in the Sichuan Provincial Museum. The sculptures date mainly from the North–south Dynasties through the Tang periods. During the Tang, when the monastery was known as Jingzhongsi, it was the residence of the early Chan monk Chŏngjung Musang (680–756, alt. 684–762), a Korean monk from the Unified Silla dynasty (668–935), whose prosperous Sichuan Chan lineage came to be known as the Jingzhong zong line. His toponym Chŏngjung (Jingzhong) comes from this monastery of Jingzhongsi.

Wangnyunsa. (王輪寺). In Korean, "Royal Wheel Monastery"; a major doctrinal (Kyo) monastery located on Mt. Songak in the Koryŏ capital of Kaesŏng. It was one of the ten monasteries built in the capital in 919 by Wang Kŏn (T'aejo, r. 918–943), the first king of the Koryŏ dynasty, in conjunction with his policy to establish his new state on the foundations of the religious power of Buddhism. This monastery was the site for the ecclesiastical examinations (sŭngkwa) for monks in the Doctrinal (Kyo) school, which were established during the reign of King Kwangjong (r. 949–975). Such important Koryŏ Kyo monks as the state preceptor (kuksa) Chigwang Haerin (984–1067) and the royal preceptor (wangsa) Hyedŏk Sohyŏn (1038–1096) were appointed to their positions after taking the examinations at Wangnyunsa. Although Wangnyunsa seems not to have been as heavily patronized by the royal family as some of the other monasteries in Kaesŏng, the *Koryŏsa* ("History of Koryŏ") notes a number of religious ceremonies that were held there during the dynasty. The monastery burned to the ground in 1236 during the Mongol invasion of the Korean peninsula and was subsequently rebuilt in 1275 by King Ch'ungnyŏl (r. 1274–1308). Wangnyunsa seems to have received special patronage during the reign of King Kongmin (r. 1351–1374). After his queen Noguk's (d. 1365) death, Kongmin sited her memorial hall of Inhŭi chŏn at Wangnyunsa; his own memorial hall, Hyemyŏng chŏn, was built in 1376 at the west of the campus, the last reference to the monastery to appear in Korean historical materials. See also Kwangmyŏngsa.

Wang o Ch'ŏnch'ukkuk chŏn. (C. Wang wu Tianzhuguo zhuan 往五天竺國傳). In Korean, "Memoir of the Pilgrimage to the Five Regions of India"; composed by the Korean monk-pilgrim Hyech'o (d.u.; c. 704–780). After being ordained in Korea, Hyech'o left for China sometime around 721 and spent perhaps three years on the mainland before departing for India (the Ch'ŏnch'ukkuk of the title) via the southern sea route in 724. After landing on the eastern coast of the subcontinent, Hyech'o subsequently spent about three years on pilgrimage to many of the Buddhist sacred sites, including Bodhgayā, Kuśinagari, and Sārnāth, and on visits to several of the major cities in north central India. He then traveled in both southern and western India before making his way toward the northwest, whence he journeyed on into Kashmir, Gandhāra, and Central Asia. Making his way overland across the Central Asian Silk Road, Hyech'o arrived back in Chinese territory in December of 727, where he spent the rest of his life. Like other pilgrims before him, Hyech'o kept detailed notes of his pilgrimage, and his travelogue does not differ significantly in terms of style and content from the earlier and more famous records left by Faxian and Xuanzang; unfortunately, unlike their works, only fragments of his account survive. His text is largely organized according to the kingdoms, regions, and pilgrimage sites that Hyech'o visited. Hyech'o offers a general description of the geography, climate, economy, customs, and religious practices of each place he visited, and, when necessary, he clarifies whether MAHĀYĀNA, HĪNAYĀNA, or some combination of the two traditions was practiced at a specific site. Although Hyech'o is known to have been the disciple of VAJRABODHI and AMOGHAVAJRA, considered by some as patriarchs of esoteric Buddhism, he makes no mention in his travelogue of tantric texts or practices. Hyech'o does note the dilapidated state of some major STŪPAS and monasteries, the advance of the Turkic tribes into Buddhist areas, and the absence of any Buddhist practice in Tibet at that early date. In these and other respects, Hyech'o's memoir serves as a valuable resource for the study of Buddhism and regional history along the Silk Road.

Wang Rixiu. (王日休) (d. 1173). Chinese lay Buddhist during the Song dynasty (960–1279), who played an important role in revitalizing the PURE LAND (JINGTU) tradition, also known by his Buddhist name of Longshu. Although Wang was an accomplished Confucian scholar, he renounced all aspiration for civil office and instead devoted himself to pure land devotions, charitable activities, and a daily regimen of one thousand prostrations. Wang is best known as the author of *Longshu zhengguan jingtu wen* ("Longshu's Extended Writings on the Pure Land"), written in 1160, an extensive compendium of materials on the SUKHĀVATĪ pure land of AMITĀBHA, drawn from sūtras, commentarial writings, and biographical materials, with Wang's own exegeses. The collection offers practical instructions on how to have faith, and achieve rebirth, in the pure land, as well as a series of edifying tales about the successful rebirths and miracles that others generated through their own devotions.

wangshen. (J. bōshin; K. mangsin 亡身). In Chinese, lit., "loss of body," viz., "self-immolation." See SHESHEN.

wangsheng. (J. ōjō; K. wangsaeng 往生). In Chinese, "going to rebirth"; referring especially to rebirth in AMITĀBHA's PURE LAND of SUKHĀVATĪ. In its broadest sense, the term is sometimes used to refer to rebirth in either the three realms of existence (LOKADHĀTU) or other buddhas' or BODHISATTVAS' pure lands, such as the ABHIRATI pure land of the buddha AKṢOBHYA or the TUṢITA heaven of the bodhisattva MAITREYA. The term has a distinctive usage in the East Asian PURE LAND traditions, however, where it refers specifically to rebirth in sukhāvatī. The seminal pure land sūtra, the SUKHĀVATĪVYŪHASŪTRA, regards this kind of rebirth as the achievement of the stage of nonretrogression (S. AVAIVARTIKA), one of the stages of the BODHISATTVA path. The *Wangshenglun zhu*, a commentary by TANLUAN on VASUBANDHU'S WULIANGSHOU JING YOUPOTISHE YUANSHENG JI (**Aparimitāyuḥsūtropadeśa*), says that rebirth in sukhāvatī is to be distinguished from the cycle of rebirth in the three realms of existence, because birth in the pure land frees one from any prospect of subsequent rebirths in SAṂSĀRA. In order to go to rebirth in sukhāvatī, the pure land tradition offered the simple practice of chanting the buddha Amitābha's name (C. NIAN FO; K. yŏmbul; J. NENBUTSU; see also NAMU AMIDABUTSU). Ritual practices associated with taking rebirth in the pure land also include the deathbed recitation of the name of Amitābha, which is introduced in the *Sukhāvatīvyūhasūtra* as the eighteenth of the forty-eight vows that DHARMĀKARA made before he attained enlightenment. According to this vow, a person may be reborn in sukhāvatī by sincerely calling out Amitābha's name a mere ten times. The quality of rebirth in the pure land will be dependent on the practitioner's level of achievement, viz., as superior, average, or inferior. Superior disciples are those who arouse the thought of enlightenment (BODHICITTA) and maintain mindfulness of Amitābha, while cultivating meritorious qualities. Average disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who do not cultivate meritorious qualities to the same extent as do superior disciples. Inferior disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who have not yet consistently begun to cultivate meritorious qualities. Several collections of testimonials regarding the efficacy of wangsheng practice exist in China, including the seventh-century *Wangsheng zhuan* by Jiacai (fl. c. 627) and the FAYUAN ZHULIN by Daoshi (d. 683).

Wangsheng Jingtu zhuan. (往生淨土傳). In Chinese, "Biographies of Those Who Have Gone to Rebirth in the Pure Land." See JINGTU ZHUAN.

Wang Wei. (J. Ō I; K. Wang Yu 王維) (701–761). Chinese poet, painter, and musician during the Tang dynasty and close associate of masters in the early CHAN school; his cognomen was Mojie. In 721, Wang Wei passed the imperial civil service examination and was appointed as assistant director of the Imperial Music Office. By 759, shortly after the An Lushan rebellion, he had risen to the high bureaucratic rank of right assistant director of the Department of State Affairs. Wang Wei is known to have maintained close relationships with several major figures in the thriving Chan tradition and wrote the funerary inscriptions for such monks as JINGJUE (683–c. 760), author of the LENGQIE SHIZI JI, and the sixth patriarch (LIUZU) HUINENG. Although there is no direct evidence of Buddhist influences in his writing, it is commonly asserted that his close relations with these Chan figures contributed to Wang Wei's subtle and reflective descriptions of nature in his landscape poetry.

wangxiang. (J. mōzō; K. mangsang 妄想). In Chinese, "deluded thoughts," "fantasies," viz., thoughts that arise from ignorance (AVIDYĀ), craving (TṚṢṆĀ), conceptualization (VIKALPA), or inverted views (VIPARYĀSA), which must be eliminated in order to achieve enlightenment. The Chinese term corresponds variously to such Sanskrit terms as PARIKALPITA (imaginary), VIKALPA (thought or conception), and KALPANĀ (conceptual construction). In Korean SŎN Buddhism, distracting thoughts or fantasies that arise during meditation practice, no matter how salutary, are denigrated as mangsang. The term has also entered vernacular Korean to mean "daydreaming," "flights of fancy," or even "paranoia."

Wangyal, Geshe. (1901–1983). Tibetan monk-scholar of the Dge lugs sect who played an important role in the transmission of Tibetan Buddhism to the United States. He was born in the region of Kalmykia of Czarist Russia, whose Mongol population practiced Tibetan Buddhism, and became a novice monk at the age of six. He was selected by Agvan Dorzhiev to continue his studies in Lha sa, enrolling at the Sgo mang college of 'Bras spungs monastery in 1922. After nine years of study, he traveled to Beijing and then to Calcutta, where he was hired to serve as translator for Sir Charles Bell (1870–1945), British political officer for Sikkim, Bhutan, and Tibet, during his travels in China and Manchuria. In India, he met the British mountaineer Marco Pallis, with whom he spent four months in England in 1937. With the Chinese invasion of Tibet, he left Tibet for India, coming to the United States in 1955 at the invitation of the Kalmyk community of New Jersey. In 1958, he founded the Lamaist Buddhist Monastery of America, known in Tibetan as the Bslab gsum bshad grub gling (Labsum Shedrup Ling), in Freewood Acres, New Jersey, the first Tibetan Buddhist monastery in the United States. At the monastery and subsequently at Retreat House (later named Tibetan Buddhist Learning Center) in Howell, New Jersey, he brought a number of monks to the United States and gave teachings to a large number of students, several of whom went on to become scholars of Buddhism. His full name was Dge bshes Ngag dbang dbang rgyal.

Wanshan tonggui ji. (J. Manzen dōkishū; K. Mansŏn tonggwi chip 萬善同歸集). In Chinese, "The Common End of Myriad Good Practices," in three rolls; a primer of Buddhist thought and practice composed by the Song-dynasty Chan master Yongming Yanshou (904–975). Written largely in catechistic style, the *Wanshan tonggui ji* relies heavily upon scriptural quotations to answer questions raised concerning everything from meditation and making offerings of flowers to reciting the name of the buddha Amitābha (see nianfo). The overall message of the text is that all practices done properly return to the "true mark" of reality (shixiang), and this message is often interpreted as supporting the notion of "the unity of Chan and the teachings" (Chan jiao yizhi) and that of "sudden awakening (followed by) gradual cultivation" (dunwu jianxiu).

Wanshousi. (萬壽寺). In Chinese, "Long Life Monastery"; located on Mt. Jing, Hangzhou prefecture, in present-day Zhejiang province of China; the first of the so-called "five mountain" (wushan, cf. gozan) monasteries of the Chan tradition in China. Wanshousi, also known as Jingshansi, was established by the Chan master Faqin during the Tianbao reign (742–756) of the Tang dynasty. During the Song dynasty, the monastery was designated as a public monastery, or "monastery of the ten directions" (shifang cha), and was renamed on several occasions as Chengtian Chanyuan (Upholding Heaven Chan Cloister), Nengren Chansi (Śākyamuni Chan Monastery), and Xingsheng Wanshou Chansi (Flourishing of Holiness, Long Life Chan Monastery). Wanshousi attracted many eminent abbots, such as Dahui Zonggao and Wuzhun Shifan, and flourished under their supervision. The famous Japanese pilgrims Dōgen Kigen and Enni Ben'en also studied at Wanshousi. The monastery was destroyed in a conflagration at the end of the Yuan dynasty but was reconstructed during the Hongwu era (1368–1398) of the Ming dynasty. Largely through the efforts of the abbot Nanshi Wenxiu and others, Wanshousi regained some of its past glory.

Wanthadipani. (P. Vaṃsadīpanī). In Burmese, "Lamp on the History [of the Religion]"; the first of four Burmese thathanawin, or Buddhist chronicles, that were composed in Burma (Myanmar) during the Konbaung dynasty (1752–1885). Written c. 1799 in the Burmese language by the monk Mehti Sayadaw, the text records the history of the Theravāda saṅgha (S. saṃgha) from its inception during the lifetime of the Buddha, through cycles of decline and restoration in ancient India, Sri Lanka, and Burma, up through a reformation of the Burmese saṅgha begun at the capital Amarapura in 1784, of which Mehti Sayadaw himself was a leader. The text relies heavily on the Pāli chronicles Samantapāsādikā and Mahāvaṃsa for its account of the ancient tradition in India and Sri Lanka. It takes its material for the history of Buddhism in Burma among the Pyu, Myamma (ethnic Burmans), and Mon peoples from a variety of indigenous sources, including the Kalyāṇī inscriptions (1479), the Yazawin-kyaw (1502), and U Kala's Mahayazawin-gyi (c. 1730). The text concludes with an account of Mehti Sayadaw's missionary activities in the city of Taungoo, where he was dispatched to propagate the new monastic reforms among the local saṅgha.

Warren, Henry Clarke. (1854–1899). One of the first American scholars of Buddhism, known for his translations from the Pāli; born in Boston, Massachusetts, in 1854. Warren suffered a crippling injury as a result of a childhood fall that left him with permanent spinal damage and excruciating physical pain throughout his life. After graduating from Harvard University in 1879, Warren studied with the eminent Sanskrit scholar Charles Lanman at Johns Hopkins University and, together with Lanman, founded the Harvard Oriental Series. Warren visited Oxford in 1884, where he met T. W. Rhys-Davids and joined the Pāli Text Society around the time of its foundation; he also made a substantial financial donation to the organization. Warren's best known work is an extensive anthology of Pāli materials, *Buddhism in Translations*, published in 1896 as the third volume in the Harvard Oriental Series. He also published an edition of Buddhaghosa's Visuddhimagga as volume 41 in that series. Warren died in Cambridge, Massachusetts, at the age of forty-five as a result of his debilitating spinal injury.

wat. In Thai, Khmer, and Lao, the most common term for a vihāra or monastic complex. Wat is derived from the Pāli term vatta, meaning "practice, function, observance," which by extension comes to be interpreted as a "place where practice is performed," and thus a "monastery" (wat). Although Pāli regulations technically require a complex to have at least three monks in residence to be classified as a vihāra, the term wat is used in Thailand to refer to the deserted ruins of monasteries as well as to Hindu temples and Christian churches.

Wat Arun. In Thai, "Monastery of the Dawn," deriving from the Sanskrit and Pāli Aruṇa, the personification of dawn; located in Bangkok on the west bank of the Chao Phraya River. After defeating the Burmese in 1767, King Taksin (Boromrāja IV) is said to have arrived at the Wat Makok ("Olive Monastery") at dawn and renamed it Wat Jaeng ("Bright Monastery"). King Rāma IV bestowed on the monastery its present name. The monastery is best known today for its tall prang, or Khmer-style tower, which was constructed during the reigns of kings Rāma II and Rāma III. The central tower is 250 feet tall and symbolizes Mount Sumeru. The temple was briefly the seat of the Emerald Buddha (see Phra Kaew Morakot) before the image was moved to Wat Phra Kaew in 1784.

Wat Benchamabophit. In Thai, "Monastery of the Fifth King," deriving from the Sanskrit Pañcamapavitra, with pañcama (Thai, benchama) meaning fifth, and pavitra (Thai, bophit/bophitra) meaning holy or benificent one, a synonym for "king"; the monastery is commonly known in English as the "Marble Temple." Located in Bangkok, it is one of the most renowned modern monasteries in Thailand. Construction began in 1900 at the request of the eponymous Rāma V (Chulalongkorn), and the complex is built from Italian marble. It houses a large bronze statue of the Buddha called Phra Phuttha Chinnarat (Buddhajinarāja), which is a replica of the original. The ashes of Rāma V are enshrined under the image.

Wat Bowonniwet. [alt. Wat Bovoranives]. In Thai, "Monastery of Excellent Abode" (P. Pavaranivesa); the royal monastery that is the Bangkok headquarters of the Thammayut sect of Thai Buddhism. Built in 1829, it is most famous as the monastery where Prince Mongkut, the future king Rāma IV and leader of the Thammayut reform movement, served as abbot, beginning in 1836, before he ascended the throne in 1851. The future king lived as a monk (his ordination name was Vajirañāṇa) for twenty-seven years, fourteen of which he spent as abbot of this monastery, before he returned to lay life in order to assume the throne of the Chakri dynasty. Subsequent members of the royal family have served the traditional period of temporary ordination as monks of this monastery; his son, the eminent scholar-monk Vajirañāṇavarorasa (1860–1921), was the long-time abbot of the monastery. The main temple enshrines the buddha image called Phra Phuttha Chinnasi (Buddhajinaśrī), said to date from 1357. Wat Bowonniwet is also the home of Mahamakut Buddhist University, one of Thailand's two public Buddhist universities.

Water and Land Ceremony. See shuilu hui.

Wat Mahathat. In Thai, "Monastery of the Great Relic" (P. Mahādhātu); the abbreviated name of several important Thai monasteries. ¶ Wat Mahathat in the ancient Thai capital of Ayuthaya was constructed in 1374 and served as the seat of the saṅgharāja of the Kamavasi (P. Gāmavāsi, lit. "city-dweller") sect. The temple complex was expanded and restored several times before the city was sacked by the Burmese in 1767; it remains in ruins. Excavations in 1956 unearthed relics. ¶ Wat Phra Mahathat Woromaha Vihan (P. Mahādhātuvaramahāvihāra), located in Nakhon Si Thammarat and thus also known as Wat Phra That Nakhon Si Thammarat, was founded c. 757 CE and was originally a Śrivijaya Mahāyāna Buddhist monastery. Its famous stūpa, modeled on the Mahāthūpa in Sri Lanka, was built in the early thirteenth century to house a tooth relic of the Buddha brought back from the island. ¶ The best-known of the contemporary wats with this name, Wat Mahathat Yuwaraja Rangsarit Raja Woramaha Wihan (P. Mahādhātuyuvarāja [Thai, Rangsarit] Rājavaramāhavihāra), dates from the Ayuthaya period (when it was called Wat Salak), and was named the relic temple for Bangkok in 1803. Because of its location near the palaces, it has often been used for royal ceremonies. Mahachulalongkornrajavidyalaya, Thailand's largest Buddhist university, was located on its grounds until 2008, when the main campus was moved to Wangnoi, Ayuthaya.

Wat Pho. In Thai, "Monastery of Awakening" (P. bodhi); also known as Wat Phra Chetuphon (P. Jetavana); the oldest and largest monastery in Bangkok, constructed in the sixteenth century and occupying twenty acres of land. It was extensively rebuilt in 1781 by King Rāma I and renovated in the first half of the nineteenth century by King Rāma III. The site also houses Thailand's largest reclining buddha image and the largest number of buddha images in the country. The reclining buddha image, constructed in the reign of King Rāma III, is 153 feet (forty-six meters) long and fifty feet (fifteen meters) high. Modeled out of plaster around a brick core, the image is finished in gold leaf, with mother-of-pearl inlay in the eyes. The feet display the 108 different auspicious characteristics of a buddha. In all, the monastery contains over a thousand buddha images, many from the ruins of the former capitals of Ayuthaya and Sukhothai, and a total of ninety-five stūpas of various sizes. Other features are a series of 152 marble slabs depicting the second half of the epic Rāmakian story (the Thai version of the Hindu epic the *Rāmāyaṇa*), as well as numerous chapels, rock gardens, statues, and bell towers. Sometimes referred to as Thailand's first university, Wat Pho also contains an encyclopedic collection of engravings and paintings dealing with astrology, botany, herbal medicine, massage, and yoga. The wat is still a center for teaching traditional Thai massage.

Wat Phra Kaew. [alt. Wat Phra Kaeo]. In Thai, "Temple of the Emerald Buddha," perhaps the most famous Buddhist temple in Thailand, located on the grounds of the royal palace in Bangkok. Much of the construction had been completed when Rāma I moved the Thai capital to Bangkok in 1785. It is a large-walled complex, containing dozens of golden pagodas, many shrines, and two libraries. Unlike most other Buddhist temples in Thailand, the complex does not include monastic quarters because of its location inside the palace grounds. The temple is best known as the site of the Emerald Buddha, or Phra Kaew Morakot, the most sacred buddha image in Thailand; Kaew is an indigenous Thai word for "glass" or "translucent"; morakot derives from the Sanskrit word for emerald (S. marakata).

Wat Phra Pathom Chedi. (P. Paṭhamacetī). In Thai, "Temple of the First Reliquary"; the monastery built at the site of what is said to be the tallest Buddhist caitya (P. cetī) in the world at over 394 feet (120 meters); located in the Thai town of Nakhon Pathom. See Phra Pathom Chedi.

Wat Phra Phutthabat. In Thai, "Monastery of the Buddha's Footprint" (P. Buddhapāda); a Thai monastery located in Saraburi province. In the seventeenth century, a hunter encountered a large puddle of water that appeared to be a footprint of the Buddha (buddhapāda). Once this identification was verified, a monastery was built to enshrine the footprint. Visiting this monastery is considered a source of great merit, and it is traditional for the Thai king to make an annual pilgrimage to the site to pay homage to the relic.

Wat Phra Thammakai. (Thai). See Dhammakāya.

Wat Phra That Doi Suthep. In Thai, "Monastery of the Relic at Mt. Sudeva" ('That' is the Thai word for relic [P. dhātu], Suthep is the Thai pronunciation of the Pāli proper name Sudeva, and Doi is a non-Thai northern word for mountain). A famous mountain monastery in northern Thailand, built on a site that has long been considered sacred and the home of guardian spirits. According to legend, the site was chosen in 1371 ce by a white elephant that was sent out by local monks to find an auspicious location for enshrining a relic (dhātu; śarīra). The site has been expanded several times with the addition of buildings, murals, bells, and parasols. See also Khruba Si Wichai.

Wat Phra That Nakhon Si Thammarat. In Thai, "Monastery of the Relic (P. Dhātu) in Nakhon Si Thammarat" (P. *Nagara-Sīri-Dhammarāja), also known as Wat Phra Mahathat Woramaha Wihan (Mahādhātuvaramahāvihāra); the oldest and most revered Buddhist site in southern Thailand. The monastery dates to 757 ce and was originally a Śrivijaya Mahāyāna Buddhist monastery. Its famous stūpa, modeled on the Mahāthūpa in Sri Lanka, was built in the early thirteenth century to house a tooth relic brought back from the island. See also Wat Mahathat.

Wat Phra That Phanom. In Thai, "Monastery of the Relic (P. Dhātu) in the city of Phanom" (Phanom is the Lao and Khmer term for mountain); the most revered Buddhist shrine in northeast Thailand, located in the town of Nakhon Phanom. The stūpa on the site has a history dating back some fifteen hundred years, according to some local traditions, while other legends claim that it was originally built in 535 bce, eight years after the death of the Buddha, as a reliquary for his breastbone. The structure is Lao in style, with a square base surmounted by slender tapering vertical columns in the shape of an elongated lotus bud. Its present appearance dates from 1977, after its predecessor collapsed under heavy rains in 1975, and is modeled after Wat That Luang in Vientiane, Laos.

Wat Phu. [alt. Wat Phou; Vat Phu]. In Lao, "Mountain Monastery"; an important Khmer monastery complex located in Champassak province on the Mekong River in southern Laos. The first monastery was probably constructed in the fifth century ce, although the surviving structures (now largely in ruins) date from the eleventh through the thirteenth centuries. Originally a Śaiva temple, the ruins contain a shrine to Śiva's bull Nandin, as well as pediments depicting Indra, Kṛṣṇā, and Viṣṇu. The temple complex was converted to Buddhist use in the thirteenth century, with Buddhist images added to many of the shrines. In 2001, the site was designated a UNESCO World Heritage Site.

Wat Suthat Thepwararam. [alt. Wat Suthat]. In Thai, "Beautiful Noble Garden of the Devas" (P. Sudassanadevavarārāma); an important Thai monastery in Bangkok, founded by King Rāma I in 1807. It houses an image of the Buddha seated in the "earth-touching" (bhūmisparśamudrā) pose. The image, known as Phra Sisakayamuni (derived from Śrī-Śākyamuni), is considered the largest (over twenty-five feet tall) and oldest bronze buddha image in Thailand; it was brought from Sukhothai by boat. The monastery is also known for its intricately carved wooden doors, created during the reign of Rāma II (r. 1809–1824) and now housed in the National Museum, and its murals of the Buddha's previous lives, from the reign of Rāma III (r. 1824–1851). The large ordination hall of the monastery is considered one of the most beautiful in Thailand. The temple grounds also contain twenty-eight pagodas, representing the twenty-eight buddhas of the auspicious eon. The temple is the traditional seat of the brāhmaṇa priest who oversees important Thai royal ceremonies, such as the annual plowing ceremony. In front of the monastery is a giant swing, once used in an annual festival in which young men tried to swing high enough to retrieve a sack of gold suspended at a height of seventy-five feet. The festival was banned in the 1930s because of the number of deaths that resulted from the competition.

Wat That Luang. In Lao, "Monastery of the Royal STŪPA"; located in the Laotian capital of Vientiane, it is one of the most important Buddhist sites in Laos. According to legend, the original monastery was founded by monks sent by AŚOKA in the third century BCE. Relics from the early twelfth century have been uncovered, although these may derive instead from a site in modern-day northern Thailand. The prestige of That Luang may have been enhanced due to its proximity to earlier Buddhist sites. The present monastery was constructed on a small hill south of the city in 1818 during the reign of King Manthaturat (r. 1817–1836). It is said to have been built partially from branches of a BODHI TREE located near Wat Keo Fa. The large bronze and gilded buddha in the nave was transferred from the now defunct Wat Aham Mungkhun, located a short distance from That Luang. That Luang has long been one of the important ritual sites in Laos for Buddhist, folk, and royal ceremonials. There are two large STŪPAS on the grounds. The golden funerary stūpa in front of the main hall contains the ashes of the popular and last crowned Laotian king, Sisavang Vong (r. 1904–1959). The grand stūpa, which towers over the rear of the main hall, dates from 1818 and is said to contain relics (DHĀTU; ŚARĪRA) of the Buddha. The wat also contains a number of smaller stūpas that contain ashes of kings, other members of the royal family, and a variety of other dignitaries. The wat has one of Vientiane's larger communities of monks and novices.

Wat Traimit. In Thai, "Monastery of the Three Friends" (S. Traimitra), so named because it was founded by three friends who emigrated from southern China; its full name is Wat Traimit Wittayaram Wora Wihan (S. Traimitravidyārāmavaravihāra). This monastery is located in the Thai capital of Bangkok and is commonly known in English as "The Temple of the Golden Buddha." It contains what is said to be the world's largest gold buddha image, named Phra Phuttha Maha Suwan Patimakon (P. Buddhamahāsuvaṇṇapaṭimā), seated in the "earth-touching" (BHŪMISPARŚAMUDRĀ) pose. The image itself is almost ten feet tall and is claimed to be composed of over five tons of solid gold. The statue, in the SUKHOTHAI style, is believed to have been originally installed in the ancient Thai capital of Sukhothai, perhaps in the thirteenth century. In order to protect it from being plundered by Burmese invaders, it was covered with a layer of plaster. The plastered statue was eventually installed in Wat Phraya Krai during the reign of King Rāma III (r. 1824–1851). When that monastery fell into disrepair around 1931, the image was placed in storage. When it was being moved to its present location in the mid-1950s, the plaster cracked, revealing the golden buddha image inside.

Watts, Alan. (1915–1973). A widely read British Buddhist writer. Born in Kent, Watts was inspired to study Buddhism after reading such works as W. E. Holmes' *The Creed of the Buddha*. At the age of fifteen, he declared himself a Buddhist and wrote to the Buddhist Lodge of the Theosophical Society in London, becoming a student and protégé of the head of the Lodge (later the Buddhist Society), CHRISTMAS HUMPHREYS. At the age of nineteen, Watts wrote his first book, *The Spirit of Zen*, largely a summary of the writings of DAISETZ TEITARO SUZUKI. Shortly thereafter, he assumed the editorship of the journal *Buddhism in England* (later to become *The Middle Way*). In 1938, he married the American Eleanor Everett, the daughter of Ruth Fuller Everett (later, RUTH FULLER SASAKI). They immigrated to the United States during World War II (Watts, a pacifist, did not serve) and lived in New York, where Watts studied briefly with Shigetsu Sasaki, a Japanese artist and Zen practitioner known as Sokei-an. Watts gave seminars in New York and published a book entitled *The Meaning of Happiness*. Shortly after his wife had a vision of Christ, Watts decided to become a priest and entered Seabury-Western Theological Seminary near Chicago. He became an Episcopal priest and served for five years as chaplain at Northwestern University, ultimately resigning from the priesthood shortly after his wife had their marriage annulled. He later worked for six years at the newly founded American Academy of Asian Studies in San Francisco. He published *The Way of Zen* in 1957, followed by *Nature, Man, and Woman* in 1958, and *Psychotherapy East and West* in 1961. He supported himself as a popular author and speaker and played a leading role in popularizing Buddhism and Zen until his death in 1973.

weikza. [alt. weikza-do]. In Burmese, a "wizard," deriving from the Pāli vijjādhara (S. VIDYĀDHARA). In Burmese popular religion, the weikza is portrayed as a powerful thaumaturge possessed of extraordinarily long life, whose abilities derive from a mastery of tranquillity meditation (P. samatha; S. ŚAMATHA) and a variety of occult sciences such as alchemy (B. ekiya), incantations (P. manta; S. MANTRA), and runes (B. ing, aing). Collectively, these disciplines are called weikza-lam or "the path of the wizard." Training in this path is esoteric, requiring initiation by a master (B. saya), and votaries typically are organized into semisecret societies called weikza-gaing (P. vijjāgaṇa). Although concerned with the acquisition of supernatural powers and an invulnerable body, these attributes are ultimately dedicated to the altruistic purpose of assisting good people in times of need and protecting the Buddha's religion from evil forces. In this regard, weikza practitioners often act as healers and exorcists, and in the modern era weikza-sayas with large followings are among the country's notables, who have built monumental pagodas and restored national shrines. The perfected weikza has the ability to live until the advent of the future buddha Metteya (S. MAITREYA), at which time he can choose to pass into nibbāna (S. NIRVĀṆA) as an enlightened disciple (P. sāvaka arahant; S. ŚRĀVAKA ARHAT), vow to become himself a solitary buddha (P. paccekabuddha; S. PRATYEKABUDDHA) or a perfect buddha (P. sammāsambuddha; S. SAMYAKSAṂBUDDHA), or simply continue living as a weikza. Weikza practitioners typically eschew the practice of insight meditation (P. VIPASSANĀ; S. VIPAŚYANĀ) on the grounds that this might cause them to attain nibbāna too quickly. Although largely domesticated to the prevailing worldview of Burmese THERAVĀDA orthodoxy, weikza practice and orientation ultimately derive from outside the Pāli textual tradition and show striking similarities to the Buddhist MAHĀSIDDHA tradition of medieval Bengal.

Weimojie suoshuo jing zhu. (J. Yuimakitsu shosetsukyōchū; K. Yumahil sosŏl kyŏng chu 維摩詰所説經註). An influential commentary on the VIMALAKĪRTINIRDEŚA. The commentary is attributed to KUMĀRAJĪVA, but it was actually written by his disciple SENG ZHAO, who recorded the interpretations of his teacher and combined them with those offered by other of Kumārajīva's disciples, such as DAOSHENG and Daorong. The commentary offers a paragraph-by-paragraph analysis of the sūtra and follows the order of Kumārajīva's Chinese translation of the sūtra. It is the first of the many commentaries on this famed rendering of the *Vimalakīrtinirdeśa* and is still the most frequently cited.

weinuo. [alt. weina] (S. *karmadāna/*karmādāna; T. las su bsko ba; J. ina/ino; K. yuna 維那/唯那). In Chinese, "rector"; a term designating either the process of overseeing, or the specific supervisor of, such crucial monastic activities as apportioning dwellings, managing the refectory, arranging sleeping quarters, cleaning the monastery grounds, etc. According to various VINAYA codes and Chinese pilgrimage accounts such as YIJING'S NANHAI JIGUI NEIFA ZHUAN, it was the rector's duty to strike instruments, such as gongs or chimes (GHAṆṬĀ), to remind others of the monastic schedule. Assemblies, meals, and services were conducted with the help of the rector's announcements. Because of his formal role in maintaining the monastic schedule, the rector may have thus come to serve as the principal supervisor or manager of daily activities in the monastery. The Sanskrit term *karmadāna does not appear in the extant corpus of Indian Buddhist literature, although it is attested in the MAHĀVYUTPATTI Sanskrit-Tibetan lexicon, and the reconstruction is confirmed in Chinese transcriptions. In India, however, karmadāna may not necessarily have referred to a specific monastic office, but rather to the general act of "assigning" (lit. giving, DĀNA) "duties" (lit. action, viz., KARMAN) within the monastery. The Chinese term weinuo, however, clearly refers to a monastic office. The term is typically parsed as a combination of a lexical translation and phonetic transcription, and means something like "regulating (wei) the [dā]na," an interpretation related to the literal sense of the Sanskrit term as "assigning duties," and becomes used in East Asian Buddhism as the specific title of a monastic administrator who delegates responsibilities within the monastery—and thus a "rector." According to the Chinese monastic codes (QINGGUI), the rector was responsible for all matters regarding the SAṂGHA and especially the saṃgha hall (SENGTANG). The rector not only was in charge of the physical maintenance of the hall itself, but he also was called upon to settle issues, such as the determination of relative seniority or the appropriate punishment for transgressions committed by residents of the saṃgha hall. The rector had the responsibility for appointing various low-ranking positions within the monastery, such as attendants, and conducted the tea ceremony. The weinuo also was in charge of leading the formal chanting at daily services, which involved much use of gongs and percussion instruments; weinuo is thus sometimes translated as functionally equivalent to the Western monastic office of "precentor," the leader of the monastic choir. In Korean monasteries, the yuna serves as a "rector" in that he has formal responsibility for enforcing discipline, making work assignments, and arranging the time for group work; in addition, however, he also serves as nominal head of the meditation compound in the monastery and spiritual advisor to the meditation monks.

Weishan jingce. (J. Isan Kyōsaku [alt. Keisaku]; K. Wisan Kyŏngch'aek 潙山警策). See GUISHAN JINGCE.

Weishan Lingyou. (J. Isan Reiyū; K. Wisan Yŏngu 潙山靈祐) (771–853). Alternate Chinese pronunciation of GUISHAN LINGYOU, cofounder of the GUIYANG ZONG [alt. Weiyang zong] of the mature CHAN tradition. See GUISHAN LINGYOU.

Weituo tian. (J. Idaten; K. Wit'a ch'ŏn 韋馱天). A Buddhist guardian deity, who is especially popular in East Asia, where he is often designated as a BODHISATTVA (pusa) or divinity (DEVA; C. tian). Weituo is connected to the god Kārtikeya, also known as Skanda, whom the Buddhist tradition appropriated from the Hindu pantheon. Kārtikeya, the six-headed son of Śiva, is a Hindu god of war who helps defend the gods; in Buddhism, he became one of the many guardian deities who protect the dispensation, its sacred objects, and its sacred spaces. Weituo is the spirit commander of the thirty-two divine generals subordinate to the four heavenly kings (CATURMAHĀRĀJA; see LOKAPĀLA), as well as one of the eight generals under VIRŪḌHAKA, the heavenly king of the southern quarter of the world. He is also identified with KUMĀRABHŪTA (C. Dongzhen). His East Asian name "Weituo" is apparently a mistaken Sinographic transcription from "Sijiantuo" or "Jiantuo tian," both Chinese transcriptions of Skanda. Weituo's role as a dharma protector (DHARMAPĀLA) is reflected in a story from the *Daoxuan lüshi gantong lu* ("Preceptor Daoxuan's Record of Miraculous Stories," c. seventh century), written by the Chinese VINAYA master DAOXUAN (596–667), which relates that Weituo was instructed by the dying Buddha to protect the dharma whenever it was disturbed by demonic forces (MĀRA). From the Tang dynasty onward in China, Weituo was considered the guardian of monasteries and Buddhist practitioners, as well as a symbol of fierce determination in spiritual training. One of Weituo's specific roles was to protect the stūpas that enshrine the Buddha's relics (śarīra). In a popular story involving Weituo, a group of malevolent demons steals one of the Buddha's tooth relics immediately following his death and cremation. Weituo battles the demons, saves the relic, and thereby earns a reputation as a fierce protector of the dharma. Weituo is typically depicted as a young man in full armor, with the headgear of a Chinese general. He is also often shown leaning on his weapon, sometimes a sword, but usually a vajra. In many East Asian monasteries, Weituo's image is found to one side of, and facing, the Buddha image in the main shrine hall (taeŭng chŏn). Weituo is also seen in the company of, and sometimes back to back with, Avalokiteśvara and Maitreya. His visage also frequently appears at the end of Chinese editions of the sūtras, as a reminder of his role in protecting the dharma.

Weixin jue. (J. Yuishinketsu; K. Yusim kyŏl 唯心訣). In Chinese, "Essentials of Mind Only"; an exposition on cittamātra by the Chan master Yongming Yanshou. In this short treatise, Yongming launched a critique of more than 120 differing Buddhist positions, and argued instead that these variant views are but manifestations of a single, true mind. By cutting through to this mind, Yongming argued that all conceptual dichotomies (e.g., gain and loss, right and wrong, sudden and gradual) would be brought to an end and an inconceivable awakening would be attained.

weixin jingtu. (J. yuishin no jōdo; K. yusim chŏngt'o 唯心淨土). In Chinese, "the mind-only pure land"; an interpretation of the pure land influential in the pure land, Chan, Huayan, Tiantai, and esoteric schools; synonymous with the phrase "Amitābha Buddha of one's own nature/mind" (zixing Mituo/weixin Mituo/jixin Mituo). Rather than seeing Amitābha's pure land of sukhāvatī as a physical land located to the west of our world system, this interpretation suggests that the pure land is actually identical to, or coextensive with, the mind itself. One understanding of this interpretation is that the concept of "pure land" is simply a metaphor for the innate brilliance and eternality of one's own mind. In this case, "the mind-only pure land" stands in distinction to the idea of the pure land as an objective reality, and many pure land exegetes rejected this interpretation for implying that the pure land existed only metaphorically. In other interpretations, a pure land is understood to manifest itself differently to beings of different spiritual "grades." In this case, "mind-only pure land" is the highest level, which is accessible or visible only to those enlightened to the true nature of the mind; by contrast, the objectively real pure land is an emanation of the true pure land that manifests itself to unenlightened practitioners, but nonetheless is still a literal realm into which one could be reborn. In this case, "the mind-only pure land" is one level of the pure land, which does not, however, negate the reality of an external pure land. Such an interpretation was more amenable to pure land devotees and was sometimes incorporated into their exegetical writings.

Weiyang zong. (J. Igyōshū; K. Wiang chong 潙仰宗). Alternate Chinese pronunciation of the Guiyang zong, one of the so-called "five houses" (wu jia; see wu jia qi zong), or distinct lineages, that developed within the mature Chan tradition during the late-Tang dynasty. See Guiyang zong.

Wencheng. (T. Rgya mo bza' kong jo, C. Wencheng gongzhu 文成公主) (d. 680). The Tang-dynasty Chinese princess who married the Tibetan king Srong btsan sgam po. Although she was in fact a person of little historical significance, she figures prominently in competing Tibetan and Chinese versions of the introduction of Buddhism into Tibet and of Sino-Tibetan relations. According to Tibetan sources, she was given in marriage to the Tibetan king under threat of invasion and became one of the king's five wives: three Tibetans, one Nepalese, and one Chinese. The Nepalese and Chinese brides were Buddhists and converted their husband to the faith. Each also brought a buddha image as part of their dowry. Princess Wencheng brought the Jo bo Shākyamuni, eventually housed in the Jo khang in Lha sa, and considered the most sacred buddha image in Tibet. The Nepalese princess Bhṛkutī brought the Jo bo mi bskyod rdo rje, housed at Ra mo che. The journey of the Chinese princess and her statue was fraught with difficulties, as the giant demoness (srin mo), whose supine body is the landscape of Tibet, tried to impede their progress. As a result, the king built a series of temples to pin down her body (mtha' 'dul gtsug lag khang). Later sources would identify the Chinese princess as an incarnation of the bodhisattva Tārā. Chinese sources depict the princess as a kind of cultural ambassador, helping to introduce Han culture into the wilds of Tibet and convincing her husband to abandon a variety of barbaric customs. This view of Princess Wencheng has been promoted in various Chinese media (including martial arts films) since the Chinese invasion of Tibet in 1950. Contrary to both versions, it appears that Princess Wencheng arrived at the Tibetan court as a twelve-year-old girl, intended as the bride of Srong btsan sgam po's son, who had died by the time that she arrived. Srong btsan sgam po, by then an old man, made her one of his wives, dying himself a few years later. She did not produce a royal heir and does not seem to have played a significant role at court.

wenda. (J. mondō; K. mundap 問答). In Chinese, lit. "question and answer"; pedagogical technique used in the Chan (J. Zen; K. Sŏn) school that involves an "exchange" or "dialogue" between a Chan master and a disciple regarding the Buddhist teachings. The exchange often consists of questions from the disciple and the master's response, but sometimes the master would also question the disciple to check his or her level of understanding and attainment. The master's answers are typically not a theoretical or discursive response to the question, but instead will employ logical contradiction, contextual inappropriateness, and illocutionary uses of language in order to challenge the understanding of the student. The master's answer might not even be a verbal response at all but might instead employ "the stick and the shout" (BANGHE) as a way of goading the student out of his conventional ways of comprehension. The ultimate goal is to prompt not mere intellectual understanding but an experience of awakening (C. WU; J. SATORI). The recorded sayings (YULU) of eminent Chan masters often include a section on their wenda. These wenda constitute a major part of the GONG'AN literature of the Chan tradition, and the practice of wenda is itself performed using phrases drawn from the gong'an texts. During the Song dynasty in China, Chan monks were appointed to monastic positions, such as "interrogating monk" (wenseng) or "Chan receptionist" (chanke), whose responsibility was to ask questions of the master on behalf of the congregation, transforming wenda into a formal, ritualized occasion.

Wenyan. (C) (文偃). See YUNMEN WENYAN.

Wenyi. (C) (文益). See FAYAN WENYI.

wenzi Chan. (J. monjizen; K. muncha Sŏn 文字禪). In Chinese, "lettered Chan"; a designation coined by JUEFAN HUIHONG (1071–1128) during the Northern Song dynasty (960–1127) to refer to a literati style of Chan exegesis that valorized belle lettres, and especially poetry, in the practice of CHAN. Huihong himself traces the origins of "lettered Chan" to the "five ranks" (WUWEI) of CAOSHAN BENJI (840–901), although Caoshan himself attributes the five ranks to his teacher DONGSHAN LIANGJIE (807–869); in these ranks, Huihong finds the first evidence within the Chan tradition that the manipulation of language in the analysis of the sayings attributed to the ancient Chan masters can bring about awakening. This style of Chan is especially emblematic of monks in the HUANGLONG PAI collateral lineage of the LINJI ZONG.

Wesak. (S. Vaiśākha; P. Vesākha; T. Sa ga zla ba). A modern rendering of Vesākha, the Pāli name for the fourth lunar month of the traditional Indian calendar (thus corresponding to April–May in the solar calendar); by extension, the term refers to the important event(s) in the life of the Buddha that occurred during that month and to their annual commemoration. According to the THERAVĀDA and Tibetan traditions, it was on the full moon of the fourth lunar month that the Buddha was born, was enlightened, and passed into PARINIRVĀṆA. This date is therefore the most important in the Buddhist calendar of many traditions. Wesak is widely celebrated across much of the Buddhist world, but especially in Southeast Asia, where it is considered an especially important time to perform meritorious deeds. According to many East Asian traditions, the full moon of the fourth lunar month marks only the date of the Buddha's birth, with his enlightenment and passage into PARINIRVĀṆA occurring in the twelfth and eleventh lunar months, respectively; Wesak is therefore not nearly as important in the East Asian calendar as it is in Southeast Asia and Tibet.

Wŏlchŏngsa. (月精寺). In Korean, "Lunar Essence Monastery"; the fourth district monastery (PONSA) of the contemporary CHOGYE CHONG of Korean Buddhism, located on Odaesan (see WUTAISHAN) in Kangwŏn province. The monastery's history is closely linked to the VINAYA master CHAJANG (fl. c. 590–658). While Chajang was on pilgrimage at Wutaishan in China, he came across a mysterious old monk who interpreted a prophetic dream he had had and gave him relics (K. sari; S. ŚARĪRA) of the buddha to take back to Korea with him. Seven days later, a dragon told him to return to Odaesan in Korea to build a monastery; in 643, Chajang arrived at Odaesan, where he eventually constructed Wŏlchŏngsa. Wŏlchŏngsa's main shrine hall, Chŏkkwang chŏn (Calm Radiance Hall), enshrines an image of ŚĀKYAMUNI as well as a mysterious statue that was found in the diamond pond south of the monastery. This statue, delicately carved in a style common to the eleventh century, is believed to be of BHAIṢAJYAGURU. In front of the main hall is a nine-story octagonal pagoda, fifty feet (15.2 meters) high, that was constructed in the tenth century. Skillfully carved and multiangled, it is representative of Koryŏ-era STŪPAS. In front of the stūpa is a seated BODHISATTVA, perhaps MAÑJUŚRI, making an offering. The statue has been carved with detailed attention to ornamental accessories and clothing. The Chŏngmyŏl pogung (Precious Basilica of Calm Extinction) houses the relics of the Buddha that Chajang brought back to Korea and is one of four major shrine halls in Korea that does not enshrine a buddha image (the relics take the place of an image). One of Wŏlchŏngsa's most famous residents during the twentieth century was the monk HANAM CHUNGWŎN (1876–1951), who helped save some of its buildings from soldiers who had been ordered to burn them down during the Korean War (seventeen buildings were unfortunately burned and had to be reconstructed). Sangwŏnsa, one of Wŏlchŏngsa's branch monasteries (MALSA), is famous among Korean monasteries for its spectacular scenery and is a popular tourist stop.

Wŏnbulgyo. (圓佛教). In Korean, "Wŏn Buddhism" or "Consummate Buddhism"; a modern Korean new religion, founded in 1916 by PAK CHUNGBIN (1891–1943), later known by his sobriquet SOT'AESAN. Based on his enlightenment to the universal order of the "one-circle image" (IRWŎNSANG), Sot'aesan sought to establish an ideal world where this universal order could be accomplished in and through ordinary human life, rather than the specialized institution of the monastery. After perusing the scriptures of various religions, Sot'aesan came to regard the teachings of Buddhism as the ultimate source of his enlightenment and in 1924 named his new religion the Pulpŏp Yŏn'gu hoe (Society for the Study of the Buddhadharma); this organization was later renamed Wŏnbulgyo in 1947 by Sot'aesan's successor and the second prime Dharma master of the religion, Chŏngsan, a.k.a. Song Kyu (1900–1962). Since the tenets and institutions of Wŏnbulgyo are distinct from those of mainstream Buddhism in Korea, the religion is usually considered an indigenous Korean religion that is nevertheless closely aligned with the broader Buddhist tradition. Sot'aesan used the "one-circle image" as a way of representing his vision of the Buddhist notion of the "DHARMAKĀYA buddha" (pŏpsinbul), which was reality itself; since this reality transcended all possible forms of conceptualization, he represented it with a simple circle, an image that is now displayed on the altar at all Wŏnbulgyo temples. Sot'aesan's religious activities were also directed at improving the daily lot of his adherents, and to this end he and his followers established thrift and savings institutions and led land reclamation projects. Wŏnbulgyo has focused its activities on the three pillars of religious propagation (kyohwa), education (kyoyuk), and public service (chasŏn): for example, the second prime master Chŏngsan established temples for propagation, schools such as Wŏn'gwang University for education, and social-welfare facilities such as hospitals and orphanages. These activities, along with international proselytization, were continued by his successors Taesan, Kim Taegŏ (1914–1998), who became the third prime master in 1962, Chwasan, Yi Kwangjŏng (b. 1936), who became the fourth prime master in 1994, and Kyŏngsan, Chang Ŭngch'ŏl (b. 1940), who became the fifth prime master in 2006. The two representative scriptures of Wŏnbulgyo are the *Wŏnbulgyo chŏngjŏn* ("Principal Book of Wŏn Buddhism"), a primer of the basic tenets of Wŏnbulgyo, which was published by Sot'aesan in 1943, and the *Taejonggyŏng* ("Scripture of the Founding Master"), the dialogues and teachings of Sot'aesan, published in 1962 by his successor Chŏngsan. Wŏnbulgyo remains an influential religious tradition in Korea, especially in the Chŏlla region in the southwest of the peninsula; in addition, there currently are over fifty Wŏnbulgyo temples active in over fourteen countries.

Wŏnch'ŭk. (T. Wen tsheg; C. Yuance; J. Enjiki 圓測) (613–695). In Korean, "Consummate Keenness"; Silla-dynasty monk renowned for his expertise in Sanskrit and YOGĀCĀRA doctrine, who was influential in Chinese and in later Tibetan Buddhism. Wŏnch'ŭk is said to have left for Tang-dynasty China at the age of fifteen, where he studied the writings of PARAMĀRTHA and the *She lun*, or MAHĀYĀNASAṂGRAHA, under Fachang (567–645). Wŏnch'ŭk later became the disciple of the Chinese pilgrim-translator XUANZANG who, in accordance with the new Yogācāra teachings of DHARMAPĀLA that he had brought back from India (see FAXIANG ZONG), denounced the existence of the ninth "immaculate consciousness" (AMALAVIJÑĀNA), which Paramārtha had advocated, and taught instead the innate impurity of the eighth "storehouse consciousness" (ĀLAYAVIJÑĀNA). These crucial doctrinal issues are said to have caused a split between the major disciples of Xuanzang: Wŏnch'ŭk and his followers came to be known as the Ximing tradition in honor of Wŏnch'ŭk's residence, XIMINGSI, and was said to have been more open to positions associated with the earlier SHE LUN ZONG; and the lineage of his fellow student and major rival KUIJI (632–682), which came to be known as the Ci'en tradition after Kuiji's monastery, Da CI'ENSI, and honed more rigidly to Xuanzang and Dharmapāla's positions. Wŏnch'ŭk's famed *Haesimmilgyŏng so* (C. *Jieshenmi jing shu*), his commentary on Xuanzang's translation of the SAṂDHINIRMOCANASŪTRA, includes traces of Wŏnchŭk's earlier training in She lun zong thought and Paramārtha's expositions on the controversial notion of amalavijñāna. Wŏnchŭk regarded the amalavijñāna as simply another name for the inherent purity of the ālayavijñāna, but, unlike Xuanzang, he considered the ālayavijñāna to be essentially pure in nature. He also disagreed with Xuanzang's contention that the ICCHANTIKA could not attain buddhahood. Hence, his work seems to be an attempt to reconcile the divergences between the old Yogācāra of Paramārtha and the new Yogācāra of Xuanzang. Wŏnch'ŭk's commentary to the *Saṃdhinirmocanasūtra* was extremely popular in the Chinese outpost of DUNHUANG, where CHOS GRUB (Ch. Facheng; c. 755–849) translated it into Tibetan during the reign of King RAL PA CAN (r. 815–838). Only nine of the ten rolls of the commentary are still extant in Chinese; the full text is available only in its Tibetan translation, which the Tibetans know as the "Great Chinese Commentary" (Rgya nag gi 'grel chen) even though it was written by a Korean. Five centuries later, the renowned Tibetan scholar TSONG KHA PA drew liberally on Wŏnch'ŭk's text in his major work on scriptural interpretation, LEGS BSHAD SNYING PO. Wŏnch'ŭk's views were decisive in Tibetan formulations of such issues as the hermeneutical stratagem of the three turnings of the wheel of the dharma (DHARMACAKRAPRAVARTANA), the nine types of consciousness (VIJÑĀNA), and the quality and nature of the ninth "immaculate" consciousness (amalavijñāna). Exegetical styles subsequently used in all the major sects of Tibetan Buddhism, with their use of elaborate sections and subsections, may also derive from Wŏnch'ŭk's commentary. Consequently, Wŏnch'ŭk remains better known and more influential in Tibet than in either China or Korea. Wŏnch'ŭk also wrote a eulogy to the Prajñāpāramitāhṛdayasūtra, and commentaries to the Renwang jing and Dharmapāla's *Vijñaptimātratāsiddhi, the latter of which is no longer extant.

Wŏndon sŏngbul non. (圓頓成佛論). In Korean, "The Perfect and Sudden Attainment of Buddhahood"; posthumous publication on the convergence of Hwaŏm (C. Huayan) and Sŏn (C. Chan) thought and practice by the mid-Koryŏ reformer Pojo Chinul (1158–1210). The *Wŏndon sŏngbul non* is said to have been found in a wooden box belonging to Chinul after his death and published posthumously by his disciple Chin'gak Hyesim. The text provides Chinul's most sustained presentation of his views on Hwaŏm thought and practice, which were profoundly influenced by Li Tongxuan's (635–730) idiosyncratic commentary on the Avataṃsakasūtra, the Huayan jing helun. Chinul seeks to demonstrate that the sudden understanding-awakening (K. haeo; C. jiewu; viz., knowing that one is a buddha) is attained at the first level of the ten stages of faith (sipsin), which were usually thought to be a preliminary stage of training, rather than at the first arousing of the thought of enlightenment (bodhicittotpāda), which occurred at the first of the ten stages of abiding (sipchu). Chinul supports this argument by drawing on the Hwaŏm concept of "nature origination" (xingqi), which he finds superior to the alternative Hwaŏm theory of the conditioned origination of the dharmadhātu (fajie yuanqi). This Hwaŏm understanding at the very inception of practice that one is endowed with the fundamental nature of buddhahood is compared to the Chan and Sŏn notion of "seeing one's nature and attaining buddhahood" (jianxing chengfo). But because Chan/Sŏn does not sanction the prolix conceptual descriptions of this experience that are found in the Hwaŏm school, it is the true "perfect and sudden" school. See also yuandun jiao.

Wŏn'gam Kuksa. (K) (圓鑑國師). See Miram Ch'ungji.

Wŏn'gwang. (C. Yuanguang 圓光) (542–640). In Korean, "Consummate Brilliance"; Silla-dynasty monk known as an early exponent of the vinaya tradition in Korea. Wŏn'gwang went to the Chinese kingdom of Chen and studied various texts such as the *Tattvasiddhi and the Mahāparinirvāṇasūtra. After the fall of the Chen dynasty, Wŏn'gwang traveled to Chang'an, where he attended lectures on Asaṅga's Mahāyānasaṃgraha delivered by the monk Tanqian (542–607). Wŏn'gwang returned to Korea in 600 and devised a set of lay precepts known as the "five secular injunctions" (Sesok ogye) at the request of two "flower youths" (hwarang) named Kwisan (d. u.) and Ch'uhang (d.u.). These injunctions adapted Confucian and Buddhist moral codes to the needs of a militant society involved in the ongoing peninsular reunification wars. The five are (1) loyalty, (2) filial piety, (3) trust, (4) not killing wantonly, and (5) not retreating in battle. According to his biography in the Haedong kosŭng chŏn, Wŏn'gwang was also a renowned thaumaturge and tamer of autochthonous spirits. He passed away at the royal monastery of Hwangnyongsa. Two commentaries on the Tathāgatagarbhasūtra, the *Taebangdŭng yŏraejanggyŏng so* and *Yŏraejanggyŏng sagi*, are attributed to Wŏn'gwang, but neither is extant.

Wŏnhyo. (C. Yuanxiao; J. Gangyō 元曉) (617–686). In Korean, "Break of Dawn"; famous monk of the Silla dynasty and probably one of the two most important monks in all of Korean Buddhist history, who was renowned for both his scholastic achievements and his efforts to propagate Buddhism among the common people. He is reputed to have written over one hundred commentaries, of which some twenty are extant. According to the hagiographical accounts of Wŏnhyo in the Song gaoseng zhuan and the Samguk yusa, Wŏnhyo tried, but failed, to travel to China with his friend Ŭisang in order to study with the Chinese translator and Yogācāra exegete Xuanzang. While on the road, Wŏnhyo is said to have attained enlightenment after a traumatic experience in which he discovered that the earthen sanctuary in which the two travelers had taken refuge one stormy night was in fact a tomb. This experience prompted his awakening that all things are created by mind, which led Wŏnhyo to realize that he did not need to continue on to China in order to understand Buddhism. (Ŭisang did travel to the mainland, where he studied with the early Huayan exegete Zhiyan.) As the legends about Wŏnhyo's enlightenment experience evolve, this story becomes even more horrific: Wŏnhyo is said to have discovered that the sweet water he drank in the tomb to slake his thirst was actually offal rotting in a skull, a traumatic experience that immediately prompted his realization that the mind creates all things. Wŏnhyo spent much of his life writing commentaries to the many new translations of Buddhist scriptures then being introduced into the Korean peninsula. A brief affair with the widowed princess of Yosŏk palace led to the birth of a son, who would grow up to become the famous literatus, Sŏl Ch'ong (c. 660–730), the creator of Idu ("clerical writing"), the earliest Korean vernacular writing system. After the affair, Wŏnhyo changed into lay clothes and traveled among the peasantry, singing and dancing with a gourd he named Unhindered (Muae) and practicing "unconstrained conduct" (K. muae haeng; C. wu'ai xing). ¶ In Wŏnhyo's many treatises, he pioneered a hermeneutical technique he called "reconciling doctrinal controversies" (hwajaeng), which seeks to demonstrate that various Buddhist doctrines, despite their apparent differences and inconsistencies, could be integrated into a single coherent whole. This "ecumenical" approach is pervasive throughout Wŏnhyo's works, although its basic principle is explained chiefly in his *Simmun hwajaeng non* ("Ten Approaches to the Reconciliation of

Doctrinal Controversy," only fragments are extant), Taesŭng kisillon so ("Commentary to the 'Awakening of Faith According to the Mahāyāna'"), and Kŭmgang sammaegyŏng non ("Exposition of the Vajrasamādhisūtra"). Wŏnhyo was versed in the full range of Buddhist philosophical doctrines then accessible to him in Korea, including Madhyamaka, Yogācāra, Hwaŏm, and tathāgatagarbha thought, and hwajaeng was his attempt to demonstrate how all of these various teachings of the Buddha were part of a coherent heuristic plan within the religion. Since at least the twelfth century, Wŏnhyo's hwajaeng exegesis has come to be portrayed as characteristic of a distinctively Korean approach to Buddhist thought.

wŏnju. (C. yuanzhu; J. inju 院主). In Korean, lit. "chief of the campus"; the preferred term in Korean monasteries for the "prior." See jianyuan.

Wŏnmyo Yose. (圓妙了世) (1163–1240). In Korean, "Consummate Sublimity, Knower of the World"; monk during the mid-Koryŏ dynasty, who is considered an influential figure in the revitalization of the Korean Ch'ŏnt'ae (C. Tiantai) tradition. Yose also played a major role in the popularization of a movement known as the Paengnyŏn kyŏlsa, or White Lotus retreat society (see also jieshe; bailian she). Yose was ordained by the monk Kyunjŏng (d.u.) at the monastery of Ch'ŏllaksa in present-day Hapch'ŏn. In 1185, he passed the clerical examinations (sŭngkwa) and led a retreat at a monastery known as Changyŏnsa on Mt. Yŏngdong. The eminent Sŏn monk Pojo Chinul is known to have sent Yose a letter with a poem at that time, inviting Yose to his "Samādhi and Prajñā retreat society" (Chŏnghye kyŏlsa) at Kŏjosa. Yose subsequently joined the society and practiced Sŏn meditation with Chinul, but left the society when Chinul moved the society to the monastery of Kilsangsa (present-day Songgwangsa). With the support of some prominent lay followers, Yose restored a group of dilapidated buildings on Mt. Mandŏk and established a White Lotus Society there in 1211. Yose continued to reside at the site after the restoration was completed five years later in 1216. He was posthumously awarded the title of state preceptor (K. kuksa; C. guoshi) and given the funerary name Wŏnmyo. He is the reputed author of the *Samdaebu chŏryo*, which is no longer extant.

Wŏnyung chong. (圓融宗). In Korean, "Consummate Interfusion school"; an alternate name for the Hwaŏm (C. Huayan) school in Korea. See Kyo.

World Fellowship of Buddhists. The first international Buddhist organization, founded in Colombo, Sri Lanka, in 1950, by representatives from twenty-seven countries, and headed by Gunapala Piyasena Malalasekera (1899–1973). Although most Buddhist traditions around the world are actively involved in the organization, Theravāda Buddhists of Southeast Asia have traditionally played a central role: all its previous and current headquarters have been located in countries where the Theravāda tradition predominates (e.g., Sri Lanka, Myanmar, and Thailand) and all its presidents have also come from those countries. The WFB has more than 130 regional centers in over thirty countries, including India, Australia, the United States, Korea, Japan, and some African and European countries. The organization aims to promote the teachings of the Buddha, strengthen collegiality among Buddhists of different national traditions, and contribute to world peace by participating in social, educational, and humanitarian activities. The current headquarters is located in Bangkok, Thailand.

wu. (J. satori; K. o 悟) In Chinese, "awakening," "enlightenment"; one of the common Chinese translations for the Sanskrit term bodhi (awakening); often seen in English through its indigenous Japanese pronunciation of satori. The precise content of this awakening differs according to the various schools of Buddhism. In the East Asian tradition, wu could typically involve a gradual awakening (jianwu), but it is more commonly associated with "sudden awakening" (dunwu), especially in the Chan zong (J. Zen; K. Sŏn). Sudden awakening refers to the view that the mind is inherently enlightened (cf. "buddha-nature," or foxing) and thus does not need to be purified of its afflictions (kleśa) in order for that buddha-nature to be realized. Gradual awakening, by contrast, refers to the view that enlightenment is the result of a process of purifying the mind of its afflictions over a series of stages, which may take several lifetimes to complete. The Chan scholiasts Guifeng Zongmi and Pojo Chinul, following earlier taxonomies of awakening in the Huayan zong, distinguish between two kinds of awakening: an initial sudden understanding-awakening (jiewu), i.e., the instant when one first comes to know that one is innately a buddha; and, following a lengthy period of gradual cultivation (jianxiu), a final realization-awakening (zhengwu), when one is able fully to act on the potential inherent in one's initial awakening and not only *be* a buddha but also *act* like one. This description of the soteriological process is called sudden awakening followed by gradual cultivation (see dunwu jianxiu). Chan authors discuss many other possible permutations in this awakening and cultivation binary, including gradual cultivation/gradual enlightenment, sudden awakening/sudden cultivation, etc. Although the sudden-gradual issue is most commonly associated with the Chan school, there are precedents in Indian Buddhism. The so-called Bsam yas debate, or Council of Lha sa, that took place in Tibet at the end of the eighth century is said to have pitted the Indian monk Kamalaśīla against the Chan monk Heshang Moheyan in a debate over the issue of whether enlightenment occurs gradually or suddenly.

wu. (J. mu; K. mu 無). In Chinese, a Sinograph meaning "not have," "without," "no," and, as a philosophical term, "nonbeing," "nothingness." Exegetes in the Dark Learning (Xuanxue) school of Chinese philosophy, which was influential in early Chinese Buddhist thought, first explored the philosophical implications of the term wu. Based on their reading of the *Daode jing* ("The Way and Its Power"), a seminal Daoist classic traditionally attributed to the legendary Laozi, they interpreted wu as meaning either (1) "nonexistence" or "nonbeing," in distinction to the Sinograph you, viz., "existence," or "being"; or (2) the metaphysical substratum of the universe, viz., "nothingness," which transcended the dichotomy of you and wu. Wu in this second denotation did not indicate simply voidness or negation; it rather referred to the source of the dao itself or the principle underlying all existence. In this sense, wu was inseparable from you, the phenomenal expressions of the dao. This wu was termed "original nothingness" (benwu), because it served as the ultimate foundation of the myriad of existing things in the universe, and thus represented a preconceptual reality that transcended dichotomous existence (you). Wang Bi (226–249), traditionally regarded as the founder of Xuanxue, defined a person who attained wu as a sage (shengren). ¶ Early Chinese Buddhist thinkers, such as Dao'an (312–385) and Zhu Fatai (320–387), drew on this Xuanxue concept of benwu to render the Buddhist concept of emptiness (śūnyatā); Sengzhao (374–414) in his Zhao lun also equates the original nothingness (benwu) with the dharma-nature (dharmatā). As Chinese Buddhists gradually refined their understanding of the Buddhist notion of emptiness, prompted especially by the influence of Kumārajīva's translations of the prajñāpāramitā texts, this rendering of śūnyatā as wu was ultimately replaced by the new term kong (emptiness). ¶ In the context of the Chan zong, wu was often used to emphasize the mental state of nonattachment. However, ever since the character wu (pronounced mu in Japanese and Korean) was singled out by Chan master Dahui Zonggao as a meditative topic (huatou) in Chan practice, Chan adepts began to use "wu" as an aid in their "questioning meditation" (kanhua Chan). This meditative topic was derived from a popular gong'an (kōan) attributed to Zhaozhou Congshen: "Does a dog have buddha nature, or not?" Zhaozhou answered, "wu" ("no," lit. "it does not have it"). The Sinograph wu was also a frequent subject of monochrome brushstroke calligraphy, which was and is still often hung on the walls of the abbot's quarters (fangzhang) in Chan monasteries. See wu gong'an; gouzi wu foxing.

wu'ai xing. (J. mugegyō; K. muae haeng 無礙行). In Chinese, "unhindered action" or "unconstrained conduct"; one of the types of practice of a bodhisattva-mahāsattva, as expounded especially in the Avataṃsakasūtra, referring to a conduct that is not constrained by the restrictions of customary morality or mundane societal expectations. Other related terms that are described as unhindered include "unhindered physicality" (wu'ai shen), "unhindered samādhi" (wu'ai sanmei), "unhindered wisdom" (wu'ai zhi), "unhindered dharma" (wu'ai fa), "unhindered path" (wu'ai dao), etc. The actions of a bodhisattva-mahāsattva conform to those of the buddhas themselves and any merit forthcoming from them are freely transferred (huixiang) to other sentient beings to help them with their salvation; for this reason, their actions are free from any kinds of hindrances. The Mahāyānasaṃgraha (*She Dasheng lun*) also explains "unhindered action" as the merit of a buddha, which is obtained through the purest of wisdom. Unhindered action sometimes refers to a particular stage or practice of a bodhisattva-mahāsattva: the Bodhisattvabhūmi (*Pusa shanjie jing*) presents it as the tenth of the twelve conducts of a bodhisattva-mahāsattva, along with such advanced practices as the signless practice, untainted practice, practice-less practice, and contented practice. In this context, unhindered action refers to the stage where a bodhisattva cultivates the realm of reality (dharmadhātu) that transcends all discrimination and teaches the true dharma (saddharma) for the sake of innumerable sentient beings. This status is said to correspond specifically to the ninth of the ten bodhisattva stages (daśabhūmi), and the bodhisattva on this stage is described as being endowed with four types of analytical knowledges (pratisaṃvid), which in Chinese were known as the four "unhindered knowledges" (C. si wu'ai jie): i.e., unhindered knowledge of (1) phenomena (dharma), viz., one makes no mistakes in one's teachings; (2) meaning (artha), viz., to be unhindered with regard to the content and meaning of one's teachings; (3) etymology or language (nirukti), viz., the ability to comprehend all languages; and (4) eloquence (pratibhāna), viz., ease in offering explanations. Chengguan (738–839) states in his massive Huayan jing shu ("Commentary to the Avataṃsakasūtra") that the bodhisattva is able to abide in unhindered action (lit. "unhindered abiding") because he no longer has any cognitive obstructions (jñeyāvaraṇa). The practice of unconstrained conduct has been a prominent, if controversial, feature of Korean Buddhism throughout its history. Several eminent Korean monks were known as practitioners of unconstrained conduct, including Wŏnhyo (617–686), Chinmuk (1562–1633), and Kyŏnghŏ Sŏngu (1849–1912), and they followed ways of life that disregarded the standards of conduct typically incumbent upon ordained monks.

Wubai wenlun shiyi. (C) (五百問論釋疑). See Fahua wubai wenlun.

wuchong xuanyi. (J. gojūgengi; K. ojung hyŏnŭi 五重玄義). In Chinese, "five layers of profound meaning" according to the Tiantai school. See Fahua wuchong xuanyi.

wudao song. (J. godōju; K. odo song 悟道頌). In Chinese, lit. "hymn on awakening to the way (dao)"; an "enlightenment hymn." See yiji.

wufa. (J. gohō; K. obŏp 五法). In Chinese, "the five [aspects of] dharmas." According to various Chinese scholastic traditions, deriving from translations of the Laṅkāvatārasūtra and Yogācāra materials, these five delineate the full ontological and epistemological range of all dharmas: phenomena (shi), characteristics (xiang), conceptual discrimination (fenbie), correct knowledge of the way things are (zhengzhi), and suchness (ZHENRU). The first three aspects are called "factors associated with delusion/unenlightenment" (mifa) because the multiplicity, duality, and reality of "phenomena" and "characteristics" are merely "imagined" and "superimposed" by the discriminatory property of the unenlightened mind (which is covered by the third aspect, fenbie, viz., PARIKALPITA). In contrast, the last two aspects are called "factors associated with enlightenment" (wufa), with "knowledge" being the ability to discern the true "suchness" of things without conceptual superimpositions.

wu gong'an. (J. mukōan; K. mu kongan 無公案). In Chinese, "the case 'no'"; an influential CHAN case or precedent (GONG'AN) associated with the Tang-dynasty Chan master ZHAOZHOU CONGSHEN (778–897). In this exchange, once a student came to Zhaozhou and asked, "Does a dog have the buddha-nature (FOXING), or not?" Zhaozhou answered, "No" (lit., "It does not have it"). The complete exchange from which this gong'an is drawn continues: "Everything has buddha-nature, from the buddhas above, to the ants below. Why wouldn't a dog have it?" Zhaozhou replied: "Because he has the nature of karmically conditioned consciousness." This response seems to be associated with Chan debates concerning the Sinitic Buddhist doctrine of the "buddha-nature of the insentient" (wuqing foxing), which presumed that all insentient things, including rocks and tiles, trees, and grass, were also endowed with the buddha-nature; thus, if even rocks have the buddha-nature, why not dogs? Since the answer to the student's question should unequivocally be "Yes, a dog does have the buddha-nature," Zhaozhou's enigmatic response, which Wumen calls a "checkpoint of the patriarchs," seems to challenge one of the foundational beliefs of East Asian Buddhism; in so doing, it engenders a question in the student's mind, which will help to foster inquiry and ultimately a sense of doubt (YIQING). This answer "wu" ("no") became a popular meditative topic (HUATOU) in the Chan meditation practice of "questioning meditation" (KANHUA CHAN) and is one of the most important gong'ans used in kanhua Chan training, especially in the Chinese LINJI ZONG and Japanese RINZAISHŪ lineages, as well as in the Korean CHOGYE CHONG. The wu gong'an is the first case collected in the gong'an anthology WUMEN GUAN ("Gateless Checkpoint"), and its use in kanhua practice was popularized by the Chinese Linji teacher DAHUI ZONGGAO (1089–1163). See also GOUZI WU FOXING.

wuhui nianfo. (J. goe nenbutsu; K. ohoe yŏmbul 五會念佛). In Chinese, "five-tempo intonation of [the name of] the buddha" (see NIANFO). A method of intoning the name of the buddha AMITĀBHA devised by the Tang-dynasty monk FAZHAO (d.u.). While in SAMĀDHI, Fazhao is said to have received instructions for the wuhui nianfo technique directly from Amitābha himself. The practice seems to be based on the larger SUKHĀVATĪVYŪHASŪTRA, which speaks of the bejeweled trees that produce music in five tempos when swayed by the wind. The first tempo is a leisurely chant performed in a high tone (ping). The second tempo is a high and rising tone (pingshang). The third tempo is neither leisurely nor rapid, and the fourth gradually becomes rapid. The fifth tempo is a rapid and repetitious recitation of the four characters "A-mi-tuo-fo," the Chinese pronunciation of Amitābha. According to Fazhao, the practical aim of this practice is to focus on the three jewels (RATNATRAYA) until one attains "no-thought" (WUNIAN) and nonduality (ADVAYA). Fazhao recommends wuhui nianfo for both clergy and lay who wish to rid themselves of the five types of suffering and the five hindrances, or to purify the five sense organs (INDRIYA) and attain the five powers (BALA). The ultimate purpose of the practice is to attain rebirth in the PURE LAND of SUKHĀVATĪ. Two manuals by Fazhao detailing the practice of wuhui nianfo, the *Jingtu wuhui nianfo lüefa shiyi canben* ("Praise for the Abbreviated Ritual Manual of the Pure Land Five-Tempo Intonation of [the Name of] the Buddha") and the *Jingtu wuhui nianfo songjing guanxing yi* ("Rite for Intoning the Buddha's Name, Reciting Scripture, and Performing Meditation According to the Five Tempos of the Pure Land"), were recovered in the DUNHUANG manuscript cache.

wujiao. (C) (五教). In Chinese, the "fivefold taxonomy of the teachings" according to the Huayan school. See HUAYAN WUJIAO.

Wujiao zhang. (C) (五教章). See HUAYAN WUJIAO ZHANG.

wu jia qi zong. (J. goke shichishū; K. oga ch'ilchong 五家七宗). In Chinese, "five houses and seven schools." According to the traditional historical narratives of the CHAN tradition, the lineages of the sixth patriarch (LIUZU) HUINENG's two major disciples NANYUE HUAIRANG and QINGYUAN XINGSI grew into five houses and eventually seven schools. The five houses refer to the lineages of the GUIYANG [alt. Weiyang] ZONG, LINJI ZONG, CAODONG ZONG, YUNMEN ZONG, and FAYAN ZONG of the Tang dynasty. Each of these "houses" (jia) is said to have had its own unique teaching style (jiafeng) and was respectively named after its purported founder or "patriarch": the Guiyang was named after GUISHAN LINGYOU and his disciple YANGSHAN HUIJI, the Linji after LINJI YIXUAN, the Caodong after DONGSHAN LIANGJIE and his disciple CAOSHAN BENJI, the Yunmen after YUNMEN WENYAN, and the Fayan after FAYAN WENYI. Among these houses, the Linji became predominant during the Song dynasty, when it further split into two separate lineages known as the HUANGLONG PAI (named after HUANGLONG HUINAN) and the YANGQI PAI (named after YANGQI FANGHUI). These two Song-dynasty lineages, together with the original listing of five houses, constitute the so-called seven schools. According to the Chan historian GUIFENG ZONGMI, the early Chan lineages known as the NIUTOU ZONG, Heze zong (see HEZE SHENHUI), JINGZHONG ZONG, BAOTANG ZONG, BEI ZONG, and NAN ZONG were eventually supplanted by the flourishing lineages of Nanyue's disciple

Mazu Daoyi (i.e., the Guiyang and Linji) and Qingyuan's disciples Shitou Xiqian (i.e., the Caodong and Yunmen) and Xuefeng Yicun (i.e., the Fayan).

wujinzang yuan. (J. mujinzōin; K. mujinjang wŏn 無盡藏院). In Chinese, "inexhaustible storehouse cloister"; the emblematic institution of the Third Stage Sect (Sanjie jiao), a major school of Buddhism during the Tang dynasty. The wujinzang yuan was established at Huadusi (Propagation and Salvation Monastery) in the capital Chang'an early in the Tang dynasty, probably between 618 and 627. The institution was based on the concept of "merit-sharing," i.e., that one could enter into the universal inexhaustible storehouse of the dharma realm, as articulated by the sect's founder Xinxing (540–594), by offering alms to the wujinzang yuan on behalf of all sentient beings. By 713, when the Tang emperor Xuanzong (r. 712–756) issued an edict closing it due to charges of embezzlement, the wujinzang yuan had served as a major agency for promoting the sect for almost a century. Drawing on the Avataṃsakasūtra and the Vimalakīrtinirdeśa, the sect interpreted the Sinographs wujin (inexhaustible) to mean that both the field of reverence—viz., the three jewels (ratnatraya)—and the field of compassion—viz., sentient beings—were inexhaustible. The wujinzang yuan, therefore, was the place where the sect's sixteen kinds of almsgiving (dāna) were to be practiced, through offerings made to (1) the buddha, (2) the dharma, (3) the saṃgha, and (4) all sentient beings; (5) works that serve to ward off evil; (6) works that serve to do good; and offerings of (7) incense, (8) lamps, (9) the monks' baths, (10) bells and chants, (11) clothing, (12) dwellings, (13) beds and seats, (14) receptacles for food, (15) coal and fire, and (16) food and drink. There were two kinds of offerings made to the wujinzang yuan: (1) regular offerings collected in the form of a daily levy and (2) offerings received at particular times of the year. A Sanjie jiao text discovered at Dunhuang says that a person is expected to offer one fen (a hundredth of a tael) of cash or one ge (a tenth of a pint) of grain per day, or thirty-six qian (a tenth of a Chinese ounce) or 3.6 dou (pecks) of grain per annum. However, the offerings were mostly made at specific times of the year, such as on the fourth day of the first lunar month, the day commemorating Xinxing's death, and the Ullambana festival on the fifteenth day of the seventh lunar month. For those adherents who could not make offerings directly at Huadu monastery, the sect would temporarily open local branches, called "merit offices" (gongde chu), especially at the time of the Ullambana festival. The assets of the wujinzang yuan consisted for the most part of such tangible assets as money, cloth, gold and silver, and jade. The offerings were used, for example, to fund the restoration of monasteries and the performance of religious services (i.e., the reverence field of merit, jingtian), and to provide alms to the poor (i.e., the compassion field of merit, beitian; see puṇyakṣetra). People could also receive loans from the wujinzang, a function comparable to today's microloans made to help raise people out of poverty. During the reign of Empress Wu, Fuxiansi in Luoyang was for a brief time also the site of a wujinzang yuan. See also Xiangfa jueyi jing.

Wuliangshou jing. (J. Muryōjukyō; K. Muryangsu kyŏng 無量壽經). In Chinese, "Sūtra of Infinite Life." See Sukhāvatīvyūhasūtra.

Wuliangshou jing lun. (C) (無量壽經論). See Wuliangshou jing youpotishe yuansheng ji.

Wuliangshou jing youpotishe yuansheng ji. (J. Muryōjukyō upadaisha ganshōge; K. Muryangsugyŏng ubajesa wŏnsaeng ke 無量壽經優婆提舍願生偈). In Chinese, "Verses on the Wish for Rebirth and the Exposition of the Limitless Life Scripture"; also known as the *Wuliangshou jing lun* ("Commentary on the Limitless Life Scripture"), *Jingtu lun* ("Treatise on the Pure Land"), *Wangsheng lun* ("Treatise on Rebirth"), and *Yuansheng ji* ("Verses on the Wish for Rebirth"). The *Wuliangshou jing youpotishe yuansheng ji* is attributed to Vasubandhu and was translated into Chinese by Bodhiruci at the monastery of Yongningsi in 529. The text is largely a commentary on the larger Sukhāvatīvyūhasūtra and is comprised of a twenty-four-line verse and prose commentary. The verse section begins with an exhortation to be reborn in the country of peace and happiness (anleguo) or pure land (jingtu) of the buddha Amitābha, which it subsequently describes in detail, and ends with the dedication of merit (pariṇāmanā). The prose commentary explains the ritual means of rebirth in terms of "five gates of recollection" (wu nianmen). These five gates are veneration (libai), praise (cantan), vow (zuoyuan), discernment (guancha), and dedication (huixiang). The text came to be held in high regard in China and Japan after the eminent Chinese monk Tanluan composed an influential commentary on the text. Along with the shorter and longer *Sukhāvatīvyūhasūtras* and the Guan Wuliangshou jing, the Japanese monk Hōnen recognized the *Wuliangshou jing youpotishe yuansheng ji* as a central scripture of the school now known as the Jōdoshū. See also Jingtu lun.

Wuliang yi jing. (J. Muryōgikyō; K. Muryang ŭi kyŏng 無量義經). In Chinese, "Sūtra of Immeasurable Meanings," one of the "Three [Sister] Sūtras of the 'Lotus'" (Fahua sanbu [jing]), along with the Saddharmapuṇḍarīkasūtra ("Lotus Sūtra") itself and the Guan Puxian pusa xingfa jing ("Sūtra on the Procedures for Contemplating the Practices of the Bodhisattva Samantabhadra"). The *Wuliang yi jing*, is presumed to be the prequel to the influential *Saddharmapuṇḍarīkasūtra*, while the *Guan Puxian pusa xingfa jing* is usually considered its sequel. The extant version of the scripture, in one roll, is attributed to the Indian translator *Dharmāgatayaśas of the Southern Qi dynasty (479–502), and is claimed to have been translated in 481; the Lidai sanbao ji scriptural catalogue also refers to a second, nonextant translation. There is, however, no evidence that a scripture with this title ever circulated in India, and no such text is ever cited in Indian sources. In addition, there are issues with the biography of the alleged translator (*Dharmāgatayaśas is otherwise unknown and this is his only attributed translation), and peculiar events in the transmission of the scripture, which suggest that attempts were made to obscure its questionable provenance. The scripture also includes unusual transcriptions and translations of Buddhist technical terminology, and peculiar taxonomies of Indian doctrinal concepts. Because of these problematic issues of provenance and content, the sūtra is now suspected of being an indigenous Chinese composition (see apocrypha). Such Chinese exegetes as Huiji (412–496) and Tiantai Zhiyi (538–597) presumed that this scripture was the otherwise-unknown Mahāyāna sūtra titled "Immeasurable Meanings" that is mentioned in the prologue to the *Saddharmapuṇḍarīkasūtra*, which the Buddha is said to have preached just prior to beginning the "Lotus Sūtra" proper. The *Wuliang yi jing* is in three chapters (pin). The first chapter is the prologue, where the bodhisattva "Great Adornment" (Dazhuangyan pusa) offers a long verse paean describing the Buddha's many virtues. The second chapter is the sermon itself, where the Buddha explains the doctrine of immeasurable meanings as being the one teaching that will enable bodhisattvas to quickly attain complete, perfect enlightenment (anuttarasamyaksaṃbodhi). This doctrine reveals that all phenomena (dharma) are void and calm in both their natures and their characteristics and thus are empty and nondual (advaya). Hence, the immeasurable meanings of all descriptions of dharmas derive from the one dharma that is free from characteristics. The final chapter is the epilogue, which describes the ten kinds of merit that accrue from hearing the sūtra.

Wumen guan. (J. Mumonkan; K. Mumun kwan 無門關). In Chinese, lit., "Gateless Checkpoint," or "Wumen's Checkpoint"; compiled by the Chan master Wumen Huikai, after whom the collection is named, also known as the *Chanzong Wumen guan* ("Gateless Checkpoint of the Chan Tradition"). Along with the Biyan lu ("Blue Cliff Record"), the *Wumen guan* is considered one of the two most important gong'an (J. kōan; K. kongan) collections of the Chan tradition. In the summer of 1228, at the request of the resident monks at the monastery of Longxiangsi, Wumen lectured on a series of forty-eight cases (gong'an) that he culled from various "transmission of the lamplight" (chuandeng lu) histories and the recorded sayings (yulu) of previous Chan masters. His lectures were recorded and compiled that same year and published with a preface by Wumen in the following year (1229). Another case (case 49), composed by the layman Zheng Qingzhi, was added to the *Wumen guan* in 1246. The *Wumen guan* begins with a popular case attributed to Zhaozhou Congshen, in which Zhaozhou replies "wu" (no) to the question, "Does a dog have buddha nature, or not?" (see wu gong'an). Wumen himself is known to have struggled with this case, which was given to him by his teacher Yuelin Shiguan (1143–1217). The Japanese monk Shinichi Kakushin, who briefly studied under Wumen in China, brought the *Wumen guan* to Japan. Although the collection was once declared to be heretical by the Sōtōshū in the mid-seventeenth century, many Japanese commentaries on the *Wumen guan* were composed at the time, testifying to its growing influence during the Edo period.

Wumen Huikai. (J. Mumon Ekai; K. Mumun Hyegae 無門慧開) (1183–1260). In Chinese, "Gateless, Opening of Wisdom"; Chan master in the Linji zong; author of the eponymous Wumen guan ("Gateless Checkpoint"), one of the two most important collections of Chan gong'an (J. kōan; K. kongan). A native of Hangzhou prefecture in present-day Zhejiang province, Huikai was ordained by the monk "One Finger" Tianlong (d.u.), who also hailed from Hangzhou (see also yizhi Chan). Wumen later went to the monastery of Wanshousi in Jiangsu province to study with Yuelin Shiguan (1143–1217), from whom Huikai received the wu gong'an of Zhaozhou Congshen; Huikai is said to have struggled with this gong'an for six years. In 1218, Huikai traveled to Baoyinsi on Mt. Anji, where he succeeded Yuelin as abbot. He subsequently served as abbot at such monasteries as Tianningsi, Pujisi, Kaiyuansi, and Baoningsi. In 1246, Huikai was appointed as abbot of Huguo Renwangsi in Hangzhou prefecture, and it is here that the Japanese Zen monk Shinichi Kakushin studied under him. Emperor Lizong (r. 1224–1264) invited Huikai to provide a sermon at the Pavilion of Mysterious Virtue in the imperial palace and also to pray for rain. In honor of his achievements, the emperor bestowed upon him a golden robe and the title Chan master Foyan (Dharma Eye).

wunian. (T. bsam pa med pa; J. munen; K. munyŏm 無念). In Chinese, "no-thought"; a Chinese meditative term that appears in the sixth-century Dasheng qixin lun but finds its locus classicus in the eighth-century Chan classic, the Liuzu tan jing. The putative author of the *Liuzu tan jing*, the sixth patriarch (Liuzu) Huineng, defines "no-thought" as "not to think even when involved in thought." Thought, therefore, is not the issue, but rather the attachment to thought, which would encourage the proliferation of conceptualization throughout all of one's sensory experience and thus render one a hapless victim of the conceptualizing tendency (cf. prapañca). The *Liuzu tan jing* also explains no-thought in terms of "non-form" (wuxian) and "non-abiding" (wuzhu) and parses the term as follows: wu ("no") refers to the absence of duality and nian ("thought") to thinking about thusness (tathatā). Heze Shenhui used the term "no-thought" to criticize the teaching of the "transcendence of thoughts" (linian) espoused by Shenxiu and his followers in the so-called Northern school (Bei zong). According to Shenhui, whereas the "transcendence of thoughts" (linian) emphasized the progressive wiping away of afflictions (kleśa) and conceptual thinking, "no-thought" (wunian) by contrast implied that there was no need for such effort since one had only to "see one's nature" (JIANXING) in order to attain enlightenment. Thus, wunian became a central feature of those who espoused a "sudden" theory of enlightenment (see DUNWU). In some radical cases, the notion of wunian was used as theoretical justification for the abandonment of all ritual and practice, including meditation and the conferral of monastic precepts. This extreme form of "no-thought" doctrine played an important role in the LIDAI FABAO JI and the antinomian teachings of the Sichuan early-Chan lineages of the JINGZHONG ZONG and BAOTANG ZONG, the latter of which may have had some influence in the development of RDZOGS CHEN thought in Tibet.

Wunian dahui. (C) (五年大會). See WUZHE HUI.

wushi. (J. goji; K. osi 五時). In Chinese, "the five periods [of the Buddha's teaching]"; the TIANTAI school's temporal taxonomy of Buddhist doctrines (JIAOXIANG PANSHI), according to which the Buddha's teachings differ because he preached them at different points during his pedagogical career. The initial account of his awakening that the Buddha taught immediately after his enlightenment was described in the AVATAṂSAKASŪTRA; this stage is thus termed the HUAYAN period (huayan shiqi). This account of the experience of buddhahood was, however, so unadulterated and sublime that many ŚRĀVAKA disciples were utterly unable to comprehend its message. The Buddha therefore began his teaching anew in a second period that was termed Luyuan shiqi (after the Deer Park, MṚGADĀVA, where many of the ĀGAMA scriptures were taught) or ahan shiqi (after the āgamas, which were the compilation of the Buddha's words from this period). This period was said to be an explicit attempt on the part of the Buddha to accommodate those disciples who were confounded during the first period, by teaching his insights in their most elementary form. The third period is called fangdeng (VAIPULYA) shiqi, where the "HĪNAYĀNA" teachings of the second period were superseded by teaching the aspiration for the MAHĀYĀNA. Various sūtras that explicitly compare Mahāyāna favorably to "hīnayāna"—such as the ŚRĪMĀLĀDEVĪSIṂHANĀDASŪTRA and the VIMALAKĪRTINIRDEŚA—were supposedly products of this period. The fourth period is termed the bore shiqi, after its eponymous sūtras, the PRAJÑĀPĀRAMITĀ. This was the stage of the Buddha's teaching career where he began to remove the boundaries separating Mahāyāna and "hīnayāna" by leading his audience from the presumption that there were two separate vehicles to instead a common realization of emptiness (ŚŪNYATĀ). The final period is called Fahua Niepan shiqi, after its two representative sūtras, the SADDHARMAPUṆḌARĪKASŪTRA and the MAHĀPARINIRVĀṆASŪTRA. The teachings associated with this period are described as the "consummate" or "perfect" teachings (YUANJIAO) because they espouse the idea of one vehicle (or the one buddha vehicle; C. YISHENG; S. EKAYĀNA), which Tiantai claimed was the truest form of the Buddha's original intention (benyuan; see PŪRVAPRAṆIDHĀNA). The Tiantai school also compares these five stages of the teachings to the five stages in the clarification of milk (see WUWEI, "five tastes"). See also TIANTAI BAJIAO.

wushi bajiao. (J. goji hakkyō; K. osi p'algyo 五時八教). In Chinese, "five periods and eight teachings"; a classification of teachings (PANJIAO) attributed to the TIANTAI systematizer TIANTAI ZHIYI. A detailed explanation of the wushi bajiao is found in the text by the Korean exegete CH'EGWAN, the CH'ŎNT'AE SAGYO ŬI (C. *Tiantai sijiao yi*). The five periods correspond to what is believed to be the five major chronological periods (WUSHI) of the Buddha's teaching career (represented by the name of a SŪTRA or group of sūtras preached during each period), namely, (1) Huayan (AVATAṂSAKASŪTRA), (2) ĀGAMA, (3) VAIPULYA, (4) PRAJÑĀPĀRAMITĀ, and (5) Lotus (SADDHARMAPUṆḌARĪKASŪTRA) and Nirvāṇa (MAHĀPARINIRVĀṆASŪTRA). According to Zhiyi, the Buddha also employed different techniques of conversion or pedagogical modes (huayi) for audiences of varying capacities, which are broadly divided into four: the sudden, gradual, indeterminate, and secret. The sudden and gradual teachings are distinguished by their variant uses of skillful means (UPĀYA), and indeterminate refers to the differing levels of the understanding of individuals. Zhiyi's contribution to these well-established categories was his further division of the indeterminate teachings into "secret" and "manifest" based on the awareness of the presence of others in the assembly. The content of the Buddha's teachings (huafa) is further described in terms of the four categories of TRIPIṬAKA, common, distinct, and consummate. This division is based on whether the teachings are that of TRIPIṬAKA (viz. HĪNAYĀNA), MAHĀYĀNA (distinct), both (joint), or neither (consummate). Zhiyi referred to the central sūtra of his own Tiantai school, the *Saddharmapuṇḍarīkasūtra*, as consummate. Zhiyi's own classification system is based on those of earlier exegetical traditions of the north (wujiao shizong) and south (sanjiao), which he sought to unite and ultimately transcend. See TIANTAI BAJIAO.

wushi jiao. (C) (五時教). See WUSHI.

Wutaishan. (五臺山). In Chinese, "Five-Terraces Mountain"; a sacred mountain located in northern Shanxi province, which, together with EMEISHAN, PUTUOSHAN, and JIUHUASHAN, is one of the "four great mountains" (sidamingshan) of Buddhism in China. The name Wutai is derived from its five treeless, barren peaks (one in each cardinal direction and the center) that resemble terraces or platforms. During the Northern Wei dynasty (424–532), Wutaishan came to be identified with the mythic Mt. Qingliang (Clear and Cool) of the AVATAṂSAKASŪTRA, which speaks of a mountain to the northeast where the bodhisattva MAÑJUŚRĪ is said to be constantly preaching the DHARMA. From the time of the identification of Mount Wutai as Mt. Qingliang, numerous testimonies to the manifestation of Mañjuśrī on the mountain have been reported. Mt. Wutai thus came to be known as the primary abode and place of worship for Mañjuśrī and for this reason drew pilgrims from across the continent, including South Asia and, later, Tibet. Numerous monasteries and hermitages of both Buddhists and Daoists occupy its peaks. The first Buddhist monastery on Wutaishan, Da Futu Lingjiusi (Great Buddha Vulture Monastery), is claimed to have been built by Kāśyapa Mātaṅga (d.u.) and Dharmaratna (d.u.) sometime during the first century (see also Baimasi and Sishi'er zhang jing). The name of the monastery was changed to Xuantongsi and then to (Da) Huayansi during the Tang dynasty to reflect its role as the center of Huayan studies. The Huayan patriarch Chengguan (738–839) composed his great Huayanjing shu at this monastery. The esoteric monk Amoghavajra also assisted in the establishment of another monastery on Mt. Wutai, which was given the name Jingesi (Gold Pavilion Monastery) in 770 after its gilded tiles. Emperor Daizong (r. 762–779) declared Jingesi as an important center for the new esoteric teachings (mijiao) brought to China by Amoghavajra. The monk Fazhao also established the monastery of Zhulinsi (Bamboo Grove Monastery) on the model of a majestic monastery that Mañjuśrī had revealed to him in a vision. The monasteries Qingliangsi, Beishansi, Manghaisi, and Da Wenshusi are also located on the mountain. During a pilgrimage to Wutaishan by the Korean monk Chajang (d.u., c. mid-seventh century), he had a vision in which Mañjuśrī guided him to a Korean analogue of the mountain; that mountain is now known as Odaesan (the Korean pronunciation of Wutaishan) and is itself a major pilgrimage center of Korean Buddhism. During the Qing dynasty, Wutaishan was also the major center for the study of Tibetan Buddhism in China.

wuwei. (J. mui; K. muwi 無爲). In Chinese, lit., "nonaction," "effortless action," in later contexts "uncompounded"; a key term that appears in early Chinese classics such as the *Lunyu* ("Analects of Confucius"), the *Daode jing* ("The Way and Its Power"), and the *Zhuangzi*. "Nonaction" suggests action that takes place naturally or without artifice; thus variously interpreted as "effortless action," "unattached action," etc. Nonaction thus refers to the ideal mode of behavior for a sage, in which the sage "does nothing and yet there is nothing not done" (wuwei er wu buwei). Rather than acting by fiat, the sage acts by establishing a "sympathetic resonance" (ganying) with the natural movements of heaven, which brings everything naturally to perfection, just as a tree grows naturally without making any effort to grow. The term is frequently used in indigenous Chinese texts in the context of good governance, where wuwei thus refers to the ultimate type of "soft power": by "practicing nonaction," a ruler creates an appropriate environment in which "the people are able to look after themselves" (*Daode jing*, chapter 49); he does not impose his point of view but instead allows common cause with his constituency to develop naturally. In certain Chinese contexts, wuwei could also connote something that was "unproduced," and the early Chinese Buddhists drew on this connotation to translate the seminal Sanskrit term nirvāṇa and nirvāṇa's putative "inactivity"; this misleading translation was eventually abandoned in favor of the phonetic transcription niepan. The Buddhists did however retain the term wuwei in this denotation to translate the concept of "uncompounded" or "unconditioned" factors (asaṃskṛtadharma), such as nirvāṇa and in some schools space (ākāśa), which are not conditioned (saṃskṛta) and are thus not subject to the inevitable impermanence (anitya) to which all conditioned dharmas are subject.

wuwei. (J. goi; K. owi 五位). In Chinese, lit., "five ranks"; a doctrinal formula generally attributed to the Chan master Dongshan Liangjie (807–869), the putative cofounder of the Caodong zong of the mature Chan tradition. The antecedents of these five ranks are traced to Shitou Xiqian's Cantong qi, which discusses the mutual "turning back on one other" (huihu) of the terms brightness and darkness. This dichotomy is eventually generalized as "relative" (pian), lit., "askew" or "partial," referring to that which is bright, conceivable, effable, and phenomena (shi); and absolute (zheng), lit., "upright," correlating with what is dark, inconceivable, ineffable, and principle (li). Although these two valences of relative and absolute may be discrete, they are interconnected, interdependent, and mutually defining, thus constantly "turning back on one other." The five ranks are systematized by Dongshan in his "Verses on the Five Ranks" (*Wuwei song*) as follows. (1) The relative within the absolute (zhengzhong pian): this valence suggests that the ordinary person constantly abides in original enlightenment (benjue), but is unaware of it. (2) The absolute within the relative (pianzhong zheng): the practitioner may have become aware of the reality of original enlightenment, but still treats it as an object to be understood conceptually, rather than directly experienced. (3) [The relative] emerging from the absolute (zhengzhong lai): as the Chan practitioner experiences the pervasiveness of emptiness, that emptiness turns back on itself and transforms into a more dynamic and luxuriant way of experience of reality. (4) [The relative and the absolute] jointly accessible (jianzhong zhi): as the reality of each and every independent phenomenon (shi) is experienced, the reality of principle (li) is simultaneously accessed. (5) Integration of the absolute and the relative, or lit. "arriving within together" (jianzhong dao): the bifurcations between relative and absolute, the experiencing subject and the object experienced, the realizer and the realized, etc., all drop away, so that the practitioner continues to practice but now without practicing anything, and seeks buddhahood while understanding that there is no buddhahood to be sought. In some interpretations, the first two ranks evoke the famous passage in the Prajñāpāramitāhṛdayasūtra: "form is emptiness, emptiness is form" (see rūpaṃ śūnyatā śunyataiva rūpam). The third rank implies the bodhisattva practice of returning to the world after his or her attainment of enlightenment (bodhi). Similarly, the fourth and fifth ranks imply the bodhisattva vow to save all living beings so that they may all access nirvāṇa together.

Despite the use of the term "rank," a systematic progression is not necessarily implied, and some commentators suggest that all five ranks may be experienced simultaneously in a moment of sudden awakening (DUNWU); thus, the five ranks may be an attempt to demonstrate how gradual and sequential outlines of Buddhist soteriology can be integrated with the more subitist soteriologies that become emblematic of the mature Chan tradition. The five ranks are also sometimes correlated with the five wisdoms (PAÑCAJÑĀNA) of a buddha in the MAHĀYĀNA, and specifically in the YOGĀCĀRA school. Dongshan's "five ranks" were frequently used in East Asian GONG'AN collections as a means of checking a student's level of understanding. In one of the modern Japanese RINZAISHŪ systematizations of kōan training, the final stage in the practice that follows initial sudden awakening (J. SATORI, C. dunwu) also involves mastery of the five ranks (J. goi).

wuwei. (J. gomi; K. omi 五味). In Chinese, lit. "five tastes"; an originally Indian list of the five stages in the clarification of milk that is derived from the MAHĀPARINIRVĀṆASŪTRA: milk, cream, curds, butter, and ghee. This list was used in the TIANTAI ZONG as a simile for the five chronological periods (WUSHI) in the Buddha's preaching of the dharma. According to this school's taxonomy of the teachings (JIAOXIANG PANSHI), the various teachings of Buddhism may be categorized according to these five "tastes": milk symbolizes the AVATAṂSAKASŪTRA period; cream, the ĀGAMA period; curds, the VAIPULYA period; and butter, the PRAJÑĀPĀRAMITĀ period; the subtlest and more clarified form of milk, the flavor of ghee (tihuwei; see MAṆḌA), is finally compared to the "consummate" period of the SADDHARMAPUṆḌARĪKASŪTRA and the MAHĀPARINIRVĀṆASŪTRA.

Wuwei sanzang chanyao. (J. Mui sanzō zen'yō; K. Muoe samjang sŏnyo 無畏三藏禪要). In Chinese, "Essentials of Meditation by the TREPIṬAKA ŚUBHAKARASIṂHA"; a relatively short treatise that purportedly records a sermon that the esoteric master Śubhākarasiṃha prepared for a debate he had with CHAN master SHENXIU's disciple Jingxuan (660–723) sometime after 716. The sermon is largely concerned with the conferral of the BODHISATTVA precepts, repentance, the threefold pure precepts (SANJU JINGJIE; see ŚĪLATRAYA), and what Śubhākarasiṃha calls the secret essentials of meditation. Śubhākarasiṃha critiques Jingxuan and other fellow practitioners of meditation for their adherence to the doctrine of "no-thought" (WUNIAN) and offers instead a meditation technique that involves uttering a series of DHĀRAṆĪs, gesturing in a series of MUDRĀs, mindful breathing, and visualizing a lunar disk.

wuwei zhenren. (J. mui no shinnin; K. muwi chinin 無位眞人). In Chinese, "true man of no rank"; a CHAN expression attributed to LINJI YIXUAN (d. 867), which is used to refer to the sentience, or "numinous awareness" (LINGZHI), of the mind, that constantly moves through the sense faculties, thus enabling sensory experience; equivalent to the buddha-nature (FOXING). Linji contrasts this true man of no rank with the "lump of red flesh" (CHIROUTUAN), the physical body that is constantly buffeted by sensory experience. The term zhenren is also used within the Daoist tradition to refer to a Daoist "perfected," who has realized perfect freedom both mentally and physically by achieving immortality and transcending all dichotomies. See also GANSHIJUE.

Wuxiang. (C) (無相). See CHŎNGJUNG MUSANG.

wuxiang jie. (J. musōkai; K. musang kye 無相戒). In Chinese, "formless precepts"; a type of precept mentioned in the LIUZU TAN JING, where they are said to help constrain practitioners so that they are able to gain enlightenment. The formless precepts reflect the early CHAN community's effort to offer its own understanding of the MAHĀYĀNA precepts. Although no clear explanation of exactly what these precepts are is provided in the text, the wuxiang jie are said to be the premier type of precepts, which are superior to the usual types of constraints taught in earlier types of Buddhism, which sought to develop wholesome ways of action and deter unwholesome actions. The conferral of these precepts appears to have occurred at the start of a kind of initiation ceremony, which subsequently followed with acceptance of the four great vows (SI HONGSHIYUAN), repentance (chan), the three refuges (TRIŚARAṆA), and PRAJÑĀPĀRAMITĀ.

wuxin. (J. mushin; K. musim 無心). In Chinese, lit. "no-mind." The term wuxin appears in the Chinese classic the *Zhuangzi* and was adapted by the early Chinese Buddhists exegetes of PRAJÑĀPĀRAMITĀ literature as a gloss on the Madhyamaka notion of ŚŪNYATĀ or "emptiness." These exegetes were collectively known as the "school of the nonexistence of mind" (xinwu zong) and belonged to the larger tradition known as "Dark Learning" (XUANXUE). In later Buddhist treatises, most notably those belonging to the CHAN tradition, "no-mind" came to refer ambiguously either to a state in which all mental activity had ceased or one in which the mind was free of all discrimination, making it effectively equivalent to nonconceptualization (see NIṢPRAPAÑCA). In this latter sense, the term is closely synonymous with "no-thought" (WUNIAN). See also WUXIN LUN.

Wuxin lun. (J. Mushinron; K. Musim non 無心論). In Chinese, "Treatise on No-Mind"; an early CHAN treatise attributed by tradition to the legendary monk BODHIDHARMA, which, in both content and style, resembles NIUTOU FARONG's JUEGUAN LUN. As the title indicates, the treatise is concerned with the notion of WUXIN, or "no-mind," which the text attempts to elucidate by enumerating a long list of dichotomies, such as visible and invisible, bright and dark, and differentiated and undifferentiated. The treatise argues largely in catechistic format that the attainment of no-mind engenders a state that is unmarred by the myriad afflictions (KLEŚA), birth and death, and even NIRVĀṆA. The treatise was largely unknown until its rediscovery in the manuscript cache at the Dunhuang caves at the end of the nineteenth century.

Wuxue Zuyuan. (J. Mugaku Sogen; K. Muhak Chowŏn 無學祖元) (1226–1286). Chinese Chan master in the Linji zong, who was the founder of the influential monastery of Engakuji in Kamakura, Japan; also known as Ziyuan. On the advice of his brother, Wuxue entered the Chinese monastery of Jingcisi, where he was ordained by Beijian Jujian (1164–1246). Wuxue later became the student of the Linji Chan master Wuzhun Shifan (1178–1249) and received his seal of transmission (yinke). Wuxue also studied under Xutang Zhiyu (1185–1269) and Wuchu Daguan (1201–1268) and spent the next few decades residing at various monasteries in Zhejiang prefecture. In 1275, Wuxue left for Nengrensi to avoid the invading Mongol troops of the Yuan dynasty. In 1279, at the invitation of Hōjō Tokimune (1251–1284), the eighth regent of the Kamakura shogunate, Wuxue reluctantly left China for Japan. Upon his arrival in Kamakura, Wuxue was appointed abbot of Kenchōji, succeeding the third abbot Lanxi Daolong. In 1282, Tokimune established Engakuji to commemorate the defeat of the invading Mongol troops and installed Wuxue as its founding abbot (J. kaisan; C. kaishan). Serving as administrator of the two most powerful Buddhist institutions in Japan at the time, Wuxue established a firm foundation for the success of the Rinzaishū in Japan. Wuxue was given the posthumous title state preceptor (J. kokushi, C. guoshi) Bukkō (Buddha Radiance). His students included Japan's first female Zen master, Mugai Nyodai (1223–1298), and Kōhō Kennichi (1241–1316), the son of Emperor Gosaga (r. 1242–1246) and the teacher of Musō Soseki. Wuxue's teachings appear in his *Bukkō kokushi goroku*.

wuyun shijian. (J. goun seken; K. oon segan 五蘊世間). In Chinese, "the world of the five aggregates." See sattvaloka.

Wu Zetian. (J. Bu Sokuten; K. Mu Ch'ŭkch'ŏn 武則天) (624–705). Chinese concubine and empress who was an important patron of Buddhism during the Tang dynasty and the short-lived Zhou-dynasty interregnum (684–704). Wu Zetian entered the palace as a concubine of Emperor Taizong (r. 626–649) while she was still in her teens. After the emperor's death, she became a Buddhist nun, but was summoned again to the palace as a concubine of Taizong's successor and son, the Gaozong emperor (r. 649–683). She bore Gaozong a son in 652 and began to exert much influence in court. Despite fierce opposition from court officials, Gaozong enthroned Wu Zetian as the new empress in 655. Wu Zetian quickly exiled all her foes in court and had the former empress Wang killed. In 657, she reinstated Luoyang as the cocapital of the empire and permanently moved the entire court there after Gaozong's death in 683. She subsequently exiled the Zhongzong emperor (r. 683–684, 705–710) and established her own dynasty named Zhou (684–704). Wu Zetian was an ardent supporter of Buddhism. She associated with such eminent monks as Xuanzang, Shenxiu, Fazang, and Yijing. In an attempt to legitimize her reign, Wu Zetian also ordered the circulation of the Mahāmeghasūtra ("Great Cloud Sūtra"), which described a female reincarnation of Maitreya and her rule over the whole world. She also arranged for the construction in every prefecture of the empire of monasteries all known as Dayunsi (Great Cloud Monastery). In 705, she abdicated the throne to the restored Emperor Zhongzong.

wuzhe hui. (J. mushae; K. much'a hoe 無遮會). In Chinese, "unrestricted assembly"; an assembly hosted by the reigning monarch to make offerings to clergy and laity regardless of their status or station in life. The assembly was typically held every five years and is therefore also known as the "five-year great assembly" (C. wunian dahui; S. pañcavārṣikapariṣad). The first such assembly is attributed to King Aśoka. Emperor Wu of the Liang dynasty (Liang Wudi) is known to have held a wuzhe dahui in 529 for an assembly said to have numbered fifty thousand. The famous pilgrim Xuanzang also witnessed an unrestricted assembly during his travels along the Silk Road. In 596, Empress Suiko (554–628) held the first reported unrestricted assembly in Japan. In 732, Heze Shenhui organized an unrestricted great assembly (wuzhe dahui) at the monastery of Dayunsi in Henan prefecture, where he attacked Shenxiu and his followers.

Wuzhensi. (悟眞寺). In Chinese, "Awakening to Truth Monastery"; located in the Wuzhen Valley of Zhongnanshan near the capital of Chang'an (present-day Xi'an). The monastery is comprised of two compounds, known as the upper and lower monasteries. The upper monastery is also named Zhulinsi, or Bamboo Grove Monastery, because of the bamboo forest surrounding it. Wuzhen Monastery was founded by the Sui-dynasty Buddhist monk Jingye (564–616), who stayed there from 595 to 608. He was accompanied by other eminent monks including Huichao (546–622), a disciple of the Tiantai master Huisi (515–568), and Facheng (563–640). The latter was instrumental in expanding the monastery by building the Huayan Hall and another hall to enshrine images of a hundred buddhas. He also inscribed Buddhist verses on cliffs surrounding the monastery and along its roads. Due to his efforts, Wuzhen monastery became renowned during the Tang dynasty for its majesty and became a favorite haunt of literati. Eminent San lun zong monks such as Huiyuan (523–592), Baogong (542–621), and Huiyin (539–629) also either resided here or were affiliated with the monastery. It was either at Wuzhensi or Longchisi that the Huayan master Fazang (643–712), at the behest of the Ruizong emperor of Tang (r. 684–690, 710–712), is said to have famously performed a ritual to pray for snow in order to stave off a severe drought the region was experiencing. During the Song dynasty, the monastery was renamed Chongfasi, or Monastery of the Esteemed Dharma.

wuzhong xuanyi. (J. goshu no gengi; K. ojong hyŏnŭi 五種玄義). In Chinese, "five categories of profound meaning"; a list of five general hermeneutical issues that should be addressed prior to undertaking an in-depth exegesis of any SŪTRA, attributed to TIANTAI ZHIYI (538–597) and emblematic of scriptural exegesis in the TIANTAI SCHOOL. These five are (1) explicating the meaning of the text's title (shiming), (2) analyzing the fundamental intent of the sūtra (bianben), (3) clarifying its principal themes or doctrines (mingzong), (4) expounding the sūtra's "function" or impact on its audience (lunyong), and (5) classifying the sūtra (PANJIAO), viz., delineating its place within the entire corpus of sūtras expounded by the Buddha. These five issues typically would be addressed by the commentator prior to beginning the exegesis of the sūtra proper. See also SANFEN KEJING; JIAOXIANG PANSHI.

Wuzhu. (C) (無住) (714–774). See BAOTANG WUZHU.

Wuzhun Shifan. (J. Bujun Shihan/Bushun Shiban/Mujun Shihan; K. Mujun Sabŏm 無準師範) (1178–1249). Chinese CHAN master in the LINJI ZONG. After his ordination in the winter of 1194, Wuzhun studied under a series of famed Chan masters, including FOZHAO DEGUANG and Po'an Zuxian. Wuzhun eventually attained awakening under Po'an and succeeded his lineage. During his illustrious career at such important monasteries as WANSHOUSI on Mt. Jing, Wuzhun also taught the Japanese pilgrims Hōshin (d.u.), Dōyū (1201–1258), and the famed ENNI BEN'EN, who is now regarded as the first exponent of ZEN in Japan. Wuzhun was later summoned by Emperor Lizong (r. 1224–1264) to provide a public lecture at the Pavilion of Benevolent Illumination in the imperial palace. The emperor later bestowed upon him the title Chan master Fojian (Buddha Mirror). Wuzhun left many famous disciples such as WUXUE ZUYUAN and Mu'an Puning, both of whom went to Kamakura in Japan and served as abbots of the powerful monastery of KENCHŌJI.

Wuzu Fayan. (J. Goso Hōen; K. Ojo Pŏbyŏn 五祖法演) (d. 1104). Chinese CHAN master in the LINJI ZONG. Wuzu was a native of Mianzhou prefecture in present-day Sichuan province. After being ordained at the age of thirty-four, Fayan studied YOGĀCĀRA doctrine in his home province, but later went south where he studied under Huilin Zongben (1020–1099), Fushan Fayuan (991–1067), and BAIYUN SHOUDUAN. Fayan eventually became Baiyun's disciple and inherited his Linji lineage. After staying at various monasteries in Anhui province, Fayan moved to Mt. Wuzu (also known as East Mountain) in Hubei province, where he acquired his toponym. The mountain itself received its name, Wuzu (fifth patriarch), from its most famous past resident, the fifth patriarch of Chan, HONGREN. Mt. Wuzu thus became an important center for the Linji lineage, and it was there that Fayan taught his famous disciples YUANWU KEQIN, Taiping Huiqin (1059–1117), and Foyan Qingyuan (1067–1120), known collectively as the "three Buddhas of East Mountain." Wuzu's teachings are recorded in the *Wuzu Fayan chanshi yulu*.

X

xiala. (C) (夏臘). See JIELA.

xiangdai miao. (C) (相待妙). See DAIJUE ERMIAO.

xiangfa. (J. zōhō; K. sangpŏp 像法). In Chinese, "semblance dharma" or "counterfeit dharma"; a term related to the Sanskrit SADDHARMAPRATIRŪPAKA. The Sanskrit term has a range of uses, including as a designation for the BUDDHADHARMA after the buddha has passed into PARINIRVĀṆA. In the East Asian context, xiangfa came to designate the second and middle period of a buddha's teaching. The first period, that of the SADDHARMA (C. zhengfa), is the period of the true dharma after a buddha's passage into parinirvāṇa, during which time it is still possible to achieve enlightenment by following his teachings. The second period, of xiangfa, is a time during which the achievement of enlightenment is still possible, but the practice of the dharma has generally been reduced to rote repetition of the teachings and practices; there are also signs of laxity in both monastic and lay practice developing during this period. The third period, that of MOFA (cf. SADDHARMAVIPRALOPA), or the final dharma, is a time of degeneration and decline, during which the practice of the dharma is no longer efficacious, due largely to the diminished capacities of humans. This division into three periods of the dharma seems to have originated in China and was widely influential in East Asian Buddhism.

Xiangfa jueyi jing. (J. Zōbō ketsugikyō; K. Sangpŏp kyŏrŭi kyŏng 像法決疑經). In Chinese, the "Scripture on Resolving Doubts Concerning the Semblance Dharma"; an indigenous Chinese Buddhist scripture (see APOCRYPHA), dating from the mid-sixth century. The *Xiangfa jueyi jing* is set against the background of the Buddha's PARINIRVĀṆA. At the request of a BODHISATTVA named Changshi (Constant Giving), the Buddha offers instructions on the practice of giving (DĀNA), in which he declares charity to be the most appropriate practice during the age of the semblance dharma (XIANGFA; SADDHARMAPRATIRŪPAKA). The semblance-dharma period is characterized as an age of degeneration, during which both clergy and laity begin to transgress the precepts and slander the Buddha's teaching. The *Xiangfa jueyi jing* emphasizes the importance of collective rather than individual giving during this age, and especially giving to the impoverished and underprivileged, rather than just to the three jewels (RATNATRAYA) of Buddhism. These and other ideas from the *Xiangfa jueyi jing* were especially influential in the teachings of the Third-Stage school (SANJIE JIAO) and that school's emblematic institution, the WUJINZANG YUAN (inexhaustible storehouse cloister). Such eminent monks as TIANTAI ZHIYI, JIZANG, and HŌNEN also held the *Xiangfa jueyi jing* in high regard.

Xiangguosi. (相國寺). In Chinese, "Minister of the State Monastery"; located in eastern Henan in the city of Kaifeng. Originally built in 555 CE and named Jianguosi, it was subsequently destroyed during a battle. It then became a private residence and garden; but later, when a monk named Huiyun saw a reflection of a monastery in its garden pool, he collected enough subscriptions to buy the residence and turn it back into a monastery in 711. It was renamed Xiangguosi by the Ruizong emperor of the Tang (r. 684–690, 710–712). The monastery was well supported by Tang and Song emperors, as evidenced by the campus's extensive grounds and the lavish materials used in its accoutrements, such as using gold dust to decorate images, icons, and paintings. It is well known for its layout, including its use of twin pagodas (STŪPA). Xiangguosi also became famous for its frescoes, painted by famous contemporary artists from the neighboring region. Artists at the Song Painting Academy painted much of the Buddhist imagery at this monastery. Xiangguosi reached the zenith of its influence during the Song dynasty, when it became an outpost for foreign monks visiting China.

xiangjiao. (J. zōkyō; K. sanggyo 像教). In Chinese, "teaching [viz., religion] of images"; a pejorative term coined by Confucians to refer to Buddhism, derived from the emphasis in Buddhism on bowing before images during rituals and ceremonies. Confucianism, in turn, was called the "teaching [viz., religion] of names" (mingjiao), to demonstrate by contrast that it was based on intellectual inquiry and the "rectification of names" (zhengming) rather than on worship of images of Confucius and the teachers within the tradition.

Xiangmo Zang. (T. Bdud 'dul snying po; J. Gōma Zō; K. Hangma Chang 降魔藏) (d.u.). In Chinese, "Demon-Subduer Zang." Chinese monk and leading disciple of the CHAN master SHENXIU, in the Northern school (BEI ZONG). At an early age, Xiangmo Zang acquired the nickname "demon-subduer" (xiangmo) by dwelling in deserted houses and open fields. Later, he learned to recite the Saddharmapuṇḍarīkasūtra and studied the vinaya after he became a monk. He is said to have had an awakening experience after listening to a lecture on the "theories of the Southern school" (Nan zong lun) and, abandoning his scriptural studies, became a student of Shenxiu. As Shenxiu's disciple, Xiangmo Zang became the target of Heze Shenhui's polemical attack on the Northern school of Chan. Xiangmo Zang also appears in the Bsam gtan mig sgron by Gnubs chen Sangs rgyas ye shes along with a certain Wolun (d.u.) and Moheyan and others of the Northern school, whose teachings may have exerted some influence on mahāyoga in Tibet.

Xiangshansi. (香山寺). In Chinese, "Fragrant Mountain Monastery"; located on Songshan in Ruzhou, Henan province. It is not known when the monastery was first established, but it is thought to have been built c. 516 CE during the Northern Wei dynasty (386–584). One source credits the founding of a Xiangshan monastery in Xiangzhou to a certain general named Liu Qingzhi, but no further mention is made of either the general or the monastery. The current Xiangshansi underwent a major renovation around 1068 during the Northern Song dynasty, and special attention was paid to restoring its Dabei ta (Great Compassion pagoda), which still stands today; housed in the pagoda is a thousand-armed and thousand-eyed form of Guanyin (Sāhasrabhujasāhasranetrāvalokiteśvara). Xiangshansi, like Shang Tianzhusi, is known for being a major pilgrimage site for Guanyin (Avalokiteśvara) worship. It became associated with the Princess Miaoshan incarnation of Guanyin, whose legend is inscribed on a stele at the monastery. The stele was commissioned in 1100 by a minor civil servant, Jiang Zhiqi (1031–1104), who was the prefect of Ruzhou. Jiang had the legend reinscribed on another stele at the Shang Tianzhusi when he moved to Hangzhou four years later.

xiangxu wuchang. (C) (相續無常). See er wuchang.

Xiangyan Zhixian. (J. Kyōgen Chikan; K. Hyangŏm Chihan 香嚴智閑) (d. 898). Chinese Chan master in the Guiyang zong of the Chan tradition. Zhixian entered the monastery under Baizhang Huaihai and later became a student of Yangshan Huiji. Zhixian dwelled for a long time at Mt. Xiangyan, whence his toponym. One day while he was sweeping the garden, Zhixian is said to have attained awakening when he heard the bamboo brush against the roof tiles. He is best known for the gong'an case "Xiangyan Hanging from a Tree": A man is dangling by his mouth from the branch of a tall tree, his hands tied behind his back and nothing beneath his feet. Someone comes under the tree branch and asks, "Why did Bodhidharma come from the West?" If he keeps his mouth clenched and refuses to answer, he is rude to the questioner; but if he opens his mouth to answer, he will fall to his death. How does he answer? Upon Zhixian's death, he was given the posthumous title Chan master Xideng (Inheritor of the Lamplight).

xiang zong. (J. sōshū; K. sang chong 相宗). In Chinese, "characteristics school"; also known as the Faxiang zong or "Dharma Characteristics" school. Both these names were used polemically by rival scholiasts to polarize certain trends in Buddhist thought. In distinction to the xing zong, or "nature" school, Fazang in the Huayan zong uses the term xiang zong to refer to those monk-scholars whose scholarship focused on the changing form of phenomena and reality. Monks of the Faxiang or Yogācāra tradition tended to be categorized as this characteristics school. Maintaining a strict distinction between the xing and the xiang trends was called xingxiang juepan (differentiation of nature and characteristics), while a scholastic approach that attempted to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xianzong ji. (J. Kenshūki; K. Hyŏnjong ki 顯宗記). In Chinese, "Notes on Revealing the Cardinal Principle," attributed to Heze Shenhui; also known as the *Heze dashi xianzong ji* ("Notes on Revealing the Cardinal Principle of Great Master Heze") and *Xianzong lun* ("Treatise on Revealing the Cardinal Principle"). A simpler version of the *Xianzong ji*, entitled *Dunwu wusheng bore song* ("Verses on Sudden Enlightenment, the Unborn, and Prajñā"), was also discovered at Dunhuang. As the title of the Dunhuang version makes clear, in this treatise Shenhui expounds on the notions of no-thought (wunian), the unborn, or nonarising (anutpāda), and wisdom (prajñā), which all seem to function as synonyms for emptiness (śūnyatā). Shenhui also mentions the Indian patriarch Bodhidharma's transmission of this "secret teaching" to China and his conferral of the patriarchal robe as a mark of transmission. The *Xianzong ji* was later included in the genealogical history of the Chan tradition, the Jingde chuandeng lu.

Xiaodao lun. (J. Shōdōron; K. Sodo non 笑道論). In Chinese, "Laughing at the Dao Treatise"; an anti-Daoist polemical treatise composed by Zhen Luan (d.u.) and presented to Emperor Wu (r. 560–578) of the Northern Zhou dynasty in 570. In response to the Daoist contentions in the Laozi huahu jing that the Chinese sage Laozi went to India and became Śākyamuni Buddha in order to convert the Western barbarians, the *Xiaodao lun* attempts to expose the inconsistencies in Daoist thought, cosmological perspectives, practice, and ritual, and to demonstrate that the Daoists actually borrowed heavily from Buddhism. The treatise so displeased the emperor that he is said to have immediately ordered the text burned.

xiaoguo. (C) (小過). In Chinese, "minor misdeed." See duṣkṛta.

xiaomiao. (小廟). In Chinese, lit. "small temple"; a Song-dynasty term for private monasteries whose control was passed within a single monastic lineage. The term is used in distinction to the large public monasteries, or "monasteries of the ten directions" (shifang cha).

xiaosheng jiao. (C) (小乘教). See Huayan wujiao.

xiayu. (C) 下語. See agyo.

Xiao zhiguan. (C) (小止觀). See Xiuxi zhiguan zuochan fayao.

xilai yi. (J. seiraii; K. sŏrae ŭi 西來意). In Chinese, lit. "the meaning of coming from the west"; in Chan literature, a common allusion to the question "What was the meaning of [Bodhidharma's] coming from the west?" (xilai yi ruohe), i.e., "Why did Bodhidharma, the founding patriarch of Chan, come from India to propagate Chan?" This question was commonly asked in Chan gong'an exchanges to test the spiritual depth of a teacher or disciple and as a meditative topic in "questioning meditation" (kanhua Chan). The phrase is found in Huangbo Xiyun's (d. c. 850) Chuanxin fayao, and the use of the question is well displayed in a famous exchange involving Mazu Daoyi (709–788) and his disciple Hongzhou Shuiliao (d.u.): when Shuiliao asks Mazu this question, Mazu encourages him to come closer, whereupon he kicks him to the ground, and Shuiliao immediately jumps up, enlightened. Zhaozhou Congshen's (778–897) answer to this question is the famous gong'an: "Cypress tree in front of the courtyard" (tingqian boshuzi). Some of the other answers that appear in Chan literature include "sitting for a long time is a bother" (Biyan lu, case no. 17), "there is no meaning in Bodhidharma's coming from the west" (*Biyan lu*, case no. 20), and "Zang's head is white, Hai's head is black" (*Biyan lu*, case no. 73).

xilai yi ruohe. (C) (西來意若何). See xilai yi.

Ximingsi. (西明寺). In Chinese, "Luminosity of the West Monastery," located in the Tang capital of Chang'an (present-day Xi'an). There are two founding narratives. The first credits the Gaozong emperor (r. 649–683) with establishing the monastery at his old residence in 658 and installing Daoxuan (596–667), founder of the Nanshan vinaya school (Nanshan lü zong), as its abbot. It is there that Daoxuan is said to have compiled the Da Tang Neidian ("Great Tang Catalogue of Inner [viz., Buddhist] Classics") as an inventory of scriptures for the newly established library at the monastery. Daoxuan also assisted Xuanzang (600/602–664) in translating preceptive texts, collaborated with his brother Daoshi (d. c. 683) in publishing vinaya texts, and wrote his collection of essays in defense of Buddhism entitled the Guang hongming ji. A second narrative instead credits Xuanzang with founding the monastery. According to this story, the grounds were originally the residence of an imperial prince, and at first it was proposed to build both a Buddhist and a Daoist monastery there. After Xuanzang surveyed the site, he pronounced the site too small for two establishments, and thus only a Buddhist monastery was built. When Xuanzang settled there, the Gaozong emperor (r. 649–683) is said to have donated land, silk, and cotton to sustain it. ¶ Regardless of which account is correct, Ximingsi quickly became a major center of Buddhist scholarship and housed the most comprehensive library of Buddhist texts in the country. The monastery is said to have been built to match the dimensions of Jetavana in India and, at one point, housed sixty-four cloisters. Because of its location in the Tang capital, several eminent monks resided and worked there. For example, the Tang emperor Xuanzong (r. 713–756) is said to have invited Śubhakarasiṃha to stay at Ximingsi, where Yixing (683–727) assisted him in his translation work. Yijing (635–713) also translated there the Sanskrit manuscripts he brought back with him from his pilgrimage to India. The Korean monk Wŏnch'ŭk (613–695) worked with Xuanzang at Ximingsi (to the point that his lineage of scholastic interpretation is sometimes called the Ximing lineage, see Ximing xuepai), and the Japanese monk Kūkai (774–835) is also known to have studied at the monastery.

Ximing xuepai. (C) (西明學派). In Chinese, "the Ximing scholastic lineage" of the Faxiang zong, associated with Wŏnch'ŭk. See Faxiang zong.

xindi. (S. cintābhūmikā; J. shinji; K. simji 心地). In Chinese, lit. "mind-ground" or "mind as ground"; a common metaphor used in Mahāyāna literature to suggest that mind or thought is the source, or "ground," of all phenomena. The *Dasheng bensheng xindi guan jing* ("Sūtra on the Great-Vehicle Contemplation of the Innate Mind Ground"), for example, metaphorically refers to the minds of the sentient beings of the three realms of existence as a "mind-ground," since all phenomena—whether mundane (laukika) or supramundane (lokottara), and including all virtuous and nonvirtuous dharmas, as well as the five rebirth destinies (gati) and the states of a pratyekabuddha, bodhisattva, or even a buddha—are generated from the mind of sentient beings, just as all grains and fruits are generated from soil. A commentary to the Mahāvairocanābhisaṃbodhisūtra (*Dari jing shu*) says that the mind is also metaphorically referred to as a "ground," since the practice of bodhisattvas relies on the mind, just as activities of ordinary people rely on the ground. In the Fanwang jing ("Brahmā's Net Sūtra"), the mind-ground refers to the bodhisattva precepts (pusa jie), which help to restrain the activities of body, speech, and mind; the precepts are the mind-ground because the activities of mind, or thought, are the basis for actions performed via body and speech. The buddha Vairocana says in the sūtra that he achieved complete, perfect enlightenment (samyaksaṃbodhi) only after cultivating the mind-ground over a hundred incalculable eons (asaṃkhyeyakalpa). The Korean monk Wŏnhyo (617–686), in his *Pŏmmanggyŏng Posal kyebon sagi* ("Personal Exposition on the Bodhisattva Precepts Text of the 'Brahmā's Net Sūtra'"), described three different denotations of mind-ground in terms of the abider and the ground on which that abider resides. These are (1) the fifty stages of the bodhisattva path (the ten bodhisattvabhūmi, plus the forty stages preliminary to the bhūmis), which is the ground on which the thought of enlightenment (bodhicitta) of the bodhisattva abides; (2) the three categories of precepts (śīlatraya), which is the ground on which the enlightened mind abides; and (3) the realm of reality (dharmadhātu), which is the ground on which the practitioner abides. In the Chan zong, the mind that was transmitted by Bodhidharma, the putative founder of Chan, is termed the mind-ground, and his teaching of the one (enlightened) mind is called the dharma teaching of the mind-ground (xindi famen). Huangbo Xiyun (d. 850) says in his Chuanxin fayao that the "dharma teaching of the mind-ground means that all dharmas are constructed depending upon this mind." Finally, Guifeng Zongmi in his Chanyuan chuchuanji tuxu ("Prolegomenon to the Comprehensive References to the Fountainhead of Chan Collection") equates mind-ground with the buddha-nature (foxing): "the originally enlightened true nature of sentient beings is called both buddha-nature and mind-ground."

xingjiao. (J. angya; K. haenggak 行脚). In Chinese, lit., "wandering on foot," i.e., "pilgrimage"; a term used especially in the Chan tradition to refer to a pilgrimage, often performed by a young monk who is in search of a teacher. Traditionally, this pilgrimage is made to numerous monasteries, most often located deep in the mountains, in hopes of having an interview with the resident master. In Japan, angya nowadays refers to the trip that young monks (known as unsui; see yunshui) who have just completed their initial training at a provincial temple make to a major Zen training monastery, where they can continue their studies with a senior teacher (rōshi).

xingju shuo. (J. shōgusetsu; K. sŏnggu sŏl 性具說). In Chinese, the "nature-replete theory"; also known as liju sanqian, or "principle is replete with the trichiliocosm (trisāhasramahāsāhasralokadhātu)." According to Tiantai doctrine, everything within the three realms of existence (traidhātuka) is all contained within the original nature of all sentient beings. This theory is said to be based on Tiantai Zhiyi's notion of yinian sanqian, or "the trichiliocosm in a single thought." During the Shanjia Shanwai debate of the eleventh-century Tiantai community, the xingju theory came to connote the trichiliocosm that was replete within myriad phenomena and was distinguished from the Huayan doctrine of xingqi.

xingli. (J. anri; K. haengni 行履). In Chinese, lit., "practice hidden"; a contraction of qiongxing lijian, which literally means "assiduous practice and hidden conduct." In the Chan traditions, xingli generally refers to the daily conduct of a monk, which includes a whole gamut of activities from walking, sitting, and keeping silence to drinking tea and eating food. As such, the term can also refer to the progress of a monk's training or to the history of his activities.

xingqi. (J. shōki; K. sŏnggi 性起). In Chinese, "nature origination"; an important Huayan soteriological and ontological theory, which emphasizes the common ground of all phenomenal appearances in the true nature of the mind. The term xingqi probably derives from the "Baowang rulai xingqi pin" ("Chapter on the 'Nature Origination' of the Tathāgata Jeweled King"), the thirty-second chapter of Buddhabhadra's (359–429) sixty-roll translation of the Avataṃsakasūtra, which seems to translate the Sanskrit term tathāgatagotrasaṃbhava (the arising of the lineage of the tathāgata). Its philosophical origins lie in the tathāgatagarbha corpus of literature, which maintains that all sentient beings are fundamentally identical to the buddhas, since they share the same buddha-nature (foxing), and the term finds its antecedents in such earlier theories as the "conditioned origination of the true nature" (zhenxing yuanqi) proposed by the Southern Di lun zong master Jingying Huiyuan (523–592). ¶ The term "nature origination" was coined by the second Huayan patriarch Zhiyan (602–668), and its implications were elaborated by the "third patriarch" Fazang (643–712) in his Huayanjing tanxuan ji and especially the "fifth patriarch" Guifeng Zongmi (780–841). In Zhiyan's soteriological interpretation of the xingqi, as elucidated in his influential treatise, Huayan jing naizhangmen deng za kongmu zhang, "nature" (xing) refers to the "essence" (ti) and "origination" (qi) to the appearance of that essence in the "mind-ground" (xindi). Zhiyan explicitly contrasts nature origination with the soteriological formulations of dependent origination (C. yuanqi; S. pratītyasamutpāda): unlike dependent origination, which explains the specific conditions through which the experience of enlightenment occurs—and thus inevitably distinguishes the ordinary realm of saṃsāra from the enlightened realm of nirvāṇa—nature origination operates entirely on the level of fruition to explain how enlightenment can "originate" only from within the very "nature" of this world itself. Enlightenment is therefore not something that needs to be produced, for it is the inherent nature of the mind itself. Zongmi subsequently provides a more ontological explanation of the xingqi, by explaining that "nature" refers to the one mind (yixin) as discussed in the Dasheng qixin lun ("Awakening of Faith According to the Mahāyāna") and "origination" refers to the process by which that nature is made manifest in the world at large. Thus, in distinction to the "conditioned origination of the dharmadhātu" (fajie yuanqi), which explains how all phenomena in the universe are mutual conditioning, and conditioned by, all other phenomena, "nature origination" instead clarifies that all those phenomena simultaneously derive from the common ground that is the nature. Nature origination thus provides a description of causality from the standpoint of the "dharmadhātu of the unimpeded interpenetration of principle and phenomena" (lishi wu'ai fajie).

Xingsi. (C) (行思). See Qingyuan Xingsi.

Xingtao. (C) (性瑫). See Mu'an Xingtao.

xingzhe. (J. anja; K. haengja 行者). In Chinese, "postulant." According to the *Shishi yaolan*, a postulant refers to an unordained lay practitioner, a minimum of sixteen years of age, who works in a monastery until he or she is formally ordained. Within the Chan traditions of East Asia, the sixth patriarch (liuzu) Huineng (638–713) is usually presumed to have been a postulant at the time he achieved enlightenment and received transmission from the fifth patriarch Hongren. In premodern China, a postulant referred to a layperson who lived and worked in the monastic compounds before ordination; the postulant was still permitted to grow his or her hair and might in some cases even have a spouse. Postulants were expected to observe the five lay precepts (C. wujie; S. pañcaśīla), but with the third precept against improper sexual conduct strengthened to require celibacy. In Korea, postulants (haengja) work in the monastery for at least six months before being allowed to ordain as novices. In Japan, a postulant (anja) may or may not be expected to ordain and works under the guidance of the administrative monks (yakusō) at the monastery or temple. ¶ The term xingzhe may also be used generically to refer to anyone who studies or practices Buddhism.

xing zong. (J. shōshū; K. sŏng chong 性宗). In Chinese, the "school of the nature"; also known as the Faxing zong, or "Dharma Nature" school. In distinction to the xiang zong, or "characteristics school," which mainly involved the analysis of phenomena, the xing school refers to those Buddhist intellectual traditions that studied the underlying essence or "nature" of reality. While the xiang school, i.e., the Faxiang or "Dharma Characteristics" school, was a pejorative term referring to the Chinese Yogācāra school established on the basis of the new Yogācāra texts introduced from India by Xuanzang (600/602–664) and elaborated by his lineage, the name "xing zong" was used polemically to refer to the Madhyamaka teachings of the San lun zong, the tathāgatagarbha teachings, or the last three of the five teachings in the Huayan school's hermeneutical taxonomy (see jiaoxiang panshi): the advanced teachings of Mahāyāna (Dasheng zhongjiao), i.e., the sudden teachings (dunjiao) and the perfect teachings (yuanjiao). Maintaining a strict differentiation between the xing and xiang tendencies was called xingxiang juepan (differentiation between nature and characteristics); a scholastic approach that sought to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xin Huayan jing lun. (C) (新華嚴經論). See Huayan jing helun.

xinman chengfo. (C) (信滿成佛). See yuanrong.

xinxin. (J. shinjin; K. sinsim 信心). In Chinese, "mind of faith" or "faith in mind"; the compound is typically interpreted to mean either faith in the purity of one's own mind or else a mind that has faith in the three jewels (ratnatraya) and the principle of causality. The "mind of faith" is generally considered to constitute the inception of the Buddhist path (mārga). In the elaborate fifty-two stage path schema outlined in such scriptures as the Avataṃsakasūtra, the Renwang jing, and the Pusa yingluo benye jing, "mind of faith" (xinxin) constitutes the first of the ten stages of faith (shixin), a preliminary level of the bodhisattva path generally placed prior to the generation of the thought of enlightenment (bodhicittotpāda) that occurs on the first of the ten abiding stages (shizhu). The Mahāparinirvāṇasūtra also says that the buddha-nature (foxing) can be called the "great mind of faith" (da xinxin) because a bodhisattva-mahāsattva, through this mind of faith, comes to be endowed with the six perfections (pāramitā). ¶ In the pure land traditions, the mind of faith typically refers to faith in the vows of the buddha Amitābha, which ensures that those who have sincere devotion and faith in that buddha will be reborn in his pure land of sukhāvatī. Shandao (613–681) divided the mind of faith into two types: (1) faith in one's lesser spiritual capacity (xinji), which involves acceptance of the fact that one has fallen in a state of delusion during myriads of rebirths, and (2) faith in dharma (xinfa), which is faith in the fact that one can be saved from this delusion through the vows of Amitābha. Shinran (1173–1262) glosses the mind of faith as the buddha-mind realized by entrusting oneself to Amitābha's name and vow. ¶ The term xinxin is also used as a translation of the Sanskrit śraddhā (faith), which is one of the five spiritual faculties (indriya), and of adhyāśaya (lit. "determination," "resolution"), which is used to describe the intention of the bodhisattva to liberate all beings from suffering. See also Xinxin ming.

Xinxing. (J Shingyō; K. Sinhaeng 信行) (540–594). In Chinese, "Practice of Faith"; founder of the "Third-Stage Sect" (Sanjie jiao), a school of popular Buddhism that flourished during the Tang dynasty. Born in Ye in present-day Henan province, Xinxing ordained as a novice monk by the age of seventeen, after which he wandered the country, studying Buddhism and reading such Buddhist scriptures as the Saddharmapuṇḍarīkasūtra ("Lotus Sūtra"), Vimalakīrtinirdeśa, and Mahāparinirvāṇasūtra. Feeling guilty for accepting from the laity offerings that he did not believe he deserved, Xinxing eventually abandoned monastic life, participating in various state labor projects and cultivating ascetic practices. He is also known to have bowed to all he met on the street, following the teachings of the Sadāparibhūta chapter of the *Saddharmapuṇḍarīkasūtra*. It is uncertain exactly when Xinxing established the Third-Stage Sect, but it was probably sometime around 587. In 589, at the behest of Emperor Wendi, he entered Chang'an, the capital city of the Sui dynasty, and stayed at Zhenjisi (Authentic Quiescence Monastery, later renamed Huadu monastery), where he promoted actively the teachings of the school until his death in 594. Xinxing had about three hundred followers, including Sengyong (543–631) and Huiru (d. c. 618). Due to the proscription of the sect during the Tang dynasty, only a few fragments of Xinxing's writings are extant. These include the *Sanjie fofa* ("Buddhadharma during the Third Stage"), in four rolls, and sections of the *Duigen qixing fa* ("Principles on Practicing in Response to the Sense-Bases") and the *Ming Dasheng wujinzang fa* ("Clarifying the Teaching of the Mahāyāna's Inexhaustible Storehouse"). ¶ Xinxing's teachings derive from the doctrines of the degenerate dharma (MOFA) and the buddha-nature (FOXING); they emphasize almsgiving (S. DĀNA) as an efficient salvific method, which contributed to the development of the school's distinctive institution, the WUJINZANG YUAN (inexhaustible storehouse cloister). Because people during the degenerate age (mofa) were inevitably mistaken in their perceptions of reality, it was impossible for them to make any meaningful distinctions, whether between right and wrong, good and evil, or ordained and lay. Instead, adherents were taught to treat all things as manifestations of the buddha-nature, leading to a "universalist" perspective on Buddhism that was presumed to have supplanted all the previous teachings of the religion. Xinxing asserted that almsgiving was the epitome of Buddhist practice during the degenerate age of the dharma and that the true perfection of giving (DĀNAPĀRAMITĀ) meant that all people, monks and laypeople alike, should be making offerings to relieve the suffering of those most in need, including the poor, the orphaned, and the sick. In its radical reinterpretation of the practice of giving in Buddhism, even animals were considered to be a more appropriate object of charity than were buddhas, bodhisattvas, monks, or the three jewels (RATNATRAYA). Particularly significant were offerings made to the inexhaustible storehouse cloister (Wujinzang yuan), which served the needs of the impoverished and suffering in society—especially offerings made on the anniversary of Xinxing's death. See also XIANGFA JUEYI JING.

Xinxin ming. (J. Shinjinmei; K. Sinsim myŏng 信心銘). In Chinese, "Inscription on the Mind of Faith" (or "Faith in Mind"); attributed to the dubious third patriarch of the CHAN tradition, the otherwise-unknown SENGCAN. The *Xinxin ming* is a relatively short poem that praises nonduality and the method for attaining that experience. The last stanza, for instance, states that "faith and mind" (xinxin) are not two, and nonduality (lit. "not two") is the "perfected mind" (xinxin). According to the *Xinxin ming*, the method of attaining nonduality largely involves the cultivation of detachment, especially from words and thoughts. Along with the ZHENGDAO GE, CANTONG QI, and BAOJING SANMEI, the *Xinxin ming* has been regarded as one of the seminal statements of the Chan understanding of the dharma. Numerous commentaries on the poem were composed in East Asia. The *Xinxin ming* is still recited aloud in some Chan and ZEN monasteries.

xinxun zhongzi. (C) (新薰種子). In Chinese, "newly acquired seeds." See BIJA.

Xiqian. (C) (希遷). See SHITOU XIQIAN.

Xitan ziji. (J. Shittan jiki; K. Siltam chagi 悉曇字記). In Chinese, "Notes on the SIDDHAM Syllabary," by the Chinese monk Zhikuang (d.u.); an influential primer of the Indian Siddham writing system. The *Xitan ziji* is said to be based on the teachings of a certain South Indian monk named Prajñābodhi. The main purpose of the *Xitan ziji* is to explain briefly the morphological operation of combining vowels and consonants. Zhikuang begins by discussing short and long syllables (e.g., a and ā). He then provides a detailed explanation of each vowel, their pronunciations, their various inflections, and their names. His coverage then extends to the syllables formed from the combination of consonants and vowels.

Xiuxin yao lun. (J. Shushin yōron; K. Susim yo non 修心要論). In Chinese, "Treatise on the Essentials of Cultivating the Mind," attributed to the fifth patriarch of the CHAN school, HONGREN; an important text on meditative practice in the early Chan tradition. The edition of the *Xiuxin yao lun* used within the Chan school was published at the Korean monastery of Ansimsa in 1570 during the Chosŏn dynasty under the title CH'OESANGSŬNG NON ("Treatise on the Supreme Vehicle") and again in 1907 as part of an edited volume of SŎN materials known as the SŎNMUN CH'WARYO. With the recent discovery of some earlier versions of the text at DUNHUANG, a more nuanced history of the *Xiuxin yao lun* has emerged. Overall, the different recensions all seem to share the common goal of establishing "guarding the mind" (shouxin) as an authentic and effective practice in Chan. Largely written in dialogic format, the *Xiuxin yao lun* emphasizes the inherent purity of the mind, which the author likens to suchness (TATHATĀ). The practice of "guarding the mind" seems to be related to or even derived from the fourth patriarch DAOXIN's "guarding the one" (shouyi), a practice that Daoxin probably borrowed from indigenous Chinese materials. The *Xiuxin yao lun* also emphatically notes the superiority of shouxin over the popular practice of reciting the buddha's name (NIANFO) and a (misguided) experience of SAMĀDHI, suggesting a polemical context for its composition.

Xiuxi zhiguan zuochan fayao. (J. Shujū shikan zazenhōyō; K. Susŭp chigwan chwasŏn pŏbyo 修習止觀坐禪法要). In Chinese, "Essentials for Sitting in Meditation and Cultivating Calmness and Contemplation"; also known as the *Tongmeng zhiguan* ("Calming and Contemplation for Neophytes") and the (*Tiantai*) *Xiao zhiguan* ("Shorter Calming and Contemplation of [Tiantai]"). The monk TIANTAI ZHIYI, the systematizer of the TIANTAI ZONG, is known to have composed this treatise as a guide for training his brother Zhen Zhen. The treatise was composed sometime after his *Shi chan boluomi cidi chanmen* (571) and MOHE ZHIGUAN (594). Despite its popular designation as the *Xiao zhiguan*, the relatively short *Xiuxi zhiguan zuochan fayao* borrows heavily from the *Shi chan boluomi cidi chanmen* and seems to have no direct relation to Zhiyi's massive *Mohe zhiguan*. A preface to the *Xiuxi zhiguan zuochan fayao* was prepared by the monk Yuanzhao (1048–1116) and was published together with the treatise in 1095. The treatise is divided into ten chapters: (1) necessary conditions, (2) rebuking desires, (3) discarding obstructions, (4) regulation, (5) expedient methods (upāya), (6) proper cultivation, (7) manifestation of the (roots of) virtue (kuśalamūla), (8) recognizing Māra, (9) healing ailments, and (10) attainment of fruits. The practice of meditation outlined in the treatise is based on the twenty-five preparatory expedient methods of the Dazhidu lun and the *Shi chan boluomi cidi chanmen*. As the title makes clear, the general purpose of the treatise is to provide the essentials for the concurrent practice of calming (śamatha) and insight (vipaśyanā). The treatise is still widely used in various Buddhist traditions as a practical manual for beginning meditators.

xuanmen. (C) (玄門). See shi xuanmen.

Xuansha sanbing. (J. Gensha sanbyō; K. Hyŏnsa sambyŏng 玄沙三病). In Chinese, "Xuansha's Three Infirmities"; a famous sermon attributed to the Chan master Xuansha Shibei. Different versions of the sermon are found in the Biyan lu (case 88), Jingde chuandeng lu (roll 18), Kaian kokugo (roll 6), etc. One day, Xuansha asked the assembly what they would do should a blind, mute, and deaf person come to them for teaching, since the blind cannot see them raise their whisk, the mute cannot reply, and the deaf cannot hear. On a different occasion, the Chan master Yunmen Wenyan demonstrated how this could be done. When a monk stepped back as Yunmen was about to hit him, the master whimsically noted that the monk was not blind. When the monk approached at his bidding, Yunmen then noted that the monk was not deaf. Finally, Yunmen asked the monk if he understood, and when the monk gave him a negative reply, Yunmen declared that he was not mute.

Xuansha Shibei. (J. Gensha Shibi; K. Hyŏnsa Sabi 玄沙師備) (835–908). Chinese Chan master in the lineage of Qingyuan Xingsi (d. 740) and a predecessor in the Fayan zong of the classical Chan school; he was a native of Min (present-day Fujian province). Xuansha left home to study with the Chan master Lingxun (d.u.) on Mt. Furong and later received the monastic precepts in 864 from the vinaya master Daoxuan (d.u.) at the monastery Kaiyuansi in Jiangxi province. Two years later, he visited the Chan master Xuefeng Yicun and became his disciple. Xuansha's adherence to the precepts is said to have been so strict that he was given the nickname Bei Doutuo, or "Dhutaṅga Bei." He subsequently left Xuefeng's side and established a cloister on Mt. Sheng (also known as Mt. Xuansha) in Fujian province, named Xuansha (Sublime Sand). In 898, he was summoned to live in the cloister of Anguoyin in Fujian by the king of Min. Emperor Zhaozong (r. 888–904) gave Xuansha the title of Great Master Zongyi (Tradition's Best). Luohan Kuichen (867–928) was one of his disciples. His sayings were published in the *Xuansha guanglu* and *Xuansha Shibei chanshi yulu*, and sporadic references to some of his more popular sayings (e.g., Xuansha sanbing) can also be found in the Biyan lu.

Xuansu. (C) (玄素). See Helin Xuansu.

Xuanxue. (J. Gengaku; K. Hyŏnhak 玄學). In Chinese, "Dark Learning," or "Profound Learning"; a Chinese philosophical movement of the third through sixth centuries ce, which provided a fertile intellectual ground for the emergence of early Chinese forms of Buddhism. It is sometimes known as "Neo-Daoism," although the target audience of Xuanxue literati was fellow elite rather than adherents of the new schools of religious Daoism that were then developing in China. The social and political upheaval that accompanied the fall of the Han dynasty (206 bce–220 ce) prompted many Chinese intellectuals to question the traditional foundations of Chinese thought and society and opened them to alternative worldviews. Buddhism, which was just then beginning to filter into Chinese territories, found a receptive audience among these groups of thinkers. Xuanxue scholars critiqued and reinterpreted the normative Chinese teachings of Confucianism by drawing on the so-called "three dark [treatises]" (sanxuan), i.e., the *Yijing* ("Book of Changes"), *Daode jing* ("The Way and Its Power"), and the *Zhuangzi*. Xuanxue designates a broad intellectual trend that sought a new way of understanding the "way" (dao). Xuanxue philosophers explored the ontological grounding of the changing and diverse world of "being" (C. you) on a permanent and indivisible substratum called "nothingness" or "nonbeing" (C. wu). Xuanxue thinkers such as Wang Bi (226–249), who is regarded as the founder of the movement, and Guo Xiang (d. 312), who is often considered to represent its apex, explored how this ontological stratum of nothingness still was able to produce the world of being in all its diversity. This process was clarified by adopting the mainstream Chinese philosophical bifurcations between (1) the ineffable "substance" or "essence" (ti) of things and the ways in which that substance "functions" (yong) in the phenomenal world; and (2) the "patterns" or "principles" (li) that underlie all things and their phenomenal manifestations (shi). These distinctions between ti/yong and li/shi proved to be extremely influential in subsequent Chinese Buddhist exegesis. Also according to Xuanxue interpretation, the sage (shengren) is one who understands this association between being and nothingness but realizes that their relationship is fundamentally inexpressible; nevertheless, in order to make it intelligible to others, he feels "compelled" to describe it verbally. This emphasis on the inadequacy of language resonated with Buddhist treatments of the ineffability of spiritual experience and the necessity to deploy verbal stratagems (UPĀYA) in order to make that experience intelligible to others. The sage was able to manifest his understanding in the phenomenal world not by conscious intent but as an automatic "response" (ying) to "stimuli" (gan); early Chinese Buddhist thinkers deploy the compound "stimulus and response" (GANYING) to explain the Buddhist concepts of action (KARMAN) and of grace (i.e., the "response" of a buddha or BODHISATTVA to a supplicant's invocation, or "stimulus"). Xuanxue thinkers also began to explore parallels between their ideas of "nonbeing" (wu) and the notion of emptiness (ŚŪNYATĀ) in the PRAJÑĀPĀRAMITĀ corpus, which was just then being translated into Chinese. Xuanxue exegesis has often been described in the scholarly literature as a "matching concepts" (GEYI) style of interpretation, where Buddhist concepts were elucidated by drawing on indigenous Chinese philosophical terminology, though this interpretation of geyi has recently been called into question. Although Xuanxue vanished as a philosophical movement by the early sixth century, its influence was profound on several pioneering Chinese Buddhist thinkers, including ZHI DUN (314–366) and SENGZHAO (374–414), and on such early philosophical schools of Chinese Buddhism as the SAN LUN ZONG and DI LUN ZONG, and eventually on the TIANTAI ZONG and HUAYAN ZONG of the mature Chinese tradition.

Xuanzang. (J. Genjō; K. Hyŏnjang 玄奘) (600/602–664). Chinese monk, pilgrim, and patriarch of the Chinese YOGĀCĀRA tradition (FAXIANG ZONG) and one of the two most influential and prolific translators of Indian Buddhist texts into Chinese, along with KUMĀRAJĪVA (344–413); in English sources, his name is seen transcribed in a variety of ways (now all outmoded), including Hsüan-tsang, Hiuen Tsiang, Yuan Chwang, etc. Xuanzang was born into a literati family in Henan province in either 600 or 602 (although a consensus is building around the latter date). In 612, during a state-supported ordination ceremony, Xuanzang entered the monastery of Jingtusi in Luoyang where his older brother was residing as a monk. There, Xuanzang and his brother studied the MAHĀPARINIRVĀṆASŪTRA and various MAHĀYĀNA texts. When the Sui dynasty collapsed in 618, they both fled the capital for the safety of the countryside. In 622, Xuanzang was given the complete monastic precepts and was fully ordained as a monk (BHIKṢU). By this time Xuanzang had also studied earlier translations of the MAHĀYĀNASAṂGRAHA, JÑĀNAPRASTHĀNA, and *TATTVASIDDHI under various teachers but came to doubt the accuracy of those translations and the veracity of their teachings. In order to resolve his doubts, Xuanzang embarked on an epic journey to India in 627, in flagrant disregard of the Taizong emperor's (r. 626–629) edict against traveling abroad. His trek across the SILK ROAD and India is well known, thanks to his travel record, the DA TANG XIYU JI, his official biography, and the famous Ming-dynasty comic novel based on Xuangzang's travels, XIYU JI ("Journey to the West"). (See "Routes of Chinese Pilgrims" map.) According to these sources, Xuanzang visited the various Buddhist pilgrimage sites of the subcontinent (see MAHĀSTHĀNA) and spent years at NĀLANDĀ monastery mastering Sanskrit, including fifteen months studying the texts of the Indian Yogācāra tradition under the tutelage of the 106-year-old ŚĪLABHADRA. In 645, Xuanzang returned to the Tang capital of Chang'an with over six hundred Sanskrit manuscripts that he had acquired in India, along with images, relics, and other artifacts. (These materials were stored in a five-story stone pagoda, named the DAYAN TA, or Great Wild Goose Pagoda, that Xuanzang later built on the grounds of the monastery of DA CI'ENSI; the pagoda is still a major tourist attraction in Xi'an.) The Taizong and Gaozong emperors (r. 649–683) honored Xuanzang with the title TREPIṬAKA (C. sanzang fashi; "master of the Buddhist canon") and established a translation bureau (yijing yuan) in the capital for the master, where Xuanzang supervised a legion of monks in charge of transcribing the texts, "rectifying" (viz., clarifying) their meaning, compiling the translations, polishing the renderings, and certifying both their meaning and syntax. Xuanzang and his team developed an etymologically precise set of Chinese equivalencies for Buddhist technical terminology, and his translations are known for their rigorous philological accuracy (although sometimes at the expense of their readability). While residing at such sites as HONGFUSI, Da ci'ensi, and the palace over an eighteen-year period, Xuanzang oversaw the translation of seventy-six sūtras and śāstras in a total of 1,347 rolls, nearly four times the number of texts translated by Kumārajīva, probably the most influential of translators into Chinese. (Scholars have estimated that Xuanzang and his team completed one roll of translation every five days over those eighteen years of work.) Xuanzang's influence was so immense that he is often recognized as initiating the "new translation" period in the history of the Chinese translation of Buddhist texts, in distinction to the "old translation" period where Kumārajīva's renderings hold pride of place. Among the more important translations made by Xuanzang and his translation team are the foundational texts of the Yogācāra school, such as the CHENG WEISHI LUN (**Vijñaptimātratāsiddhi*), ASAṄGA's MAHĀYĀNASAṂGRAHA, and the YOGĀCĀRABHŪMIŚĀSTRA, and many of the major works associated with the SARVĀSTIVĀDA school of ABHIDHARMA, including definitive translations of the *Jñānaprasthāna* and the encyclopedic ABHIDHARMAMAHĀVIBHĀṢĀ, as well as complete translations of VASUBANDHU's ABHIDHARMAKOŚABHĀṢYA and SAṂGHABHADRA's *NYĀYĀNUSĀRA. He translated (and retranslated) many major Mahāyāna sūtras and śāstras, including the massive MAHĀPRAJÑĀPĀRAMITĀSŪTRA, in six hundred rolls; this translation is given a place of honor as the first scripture in the East Asian Buddhist canons (see DAZANGJING; KORYŎ TAEJANGGYŎNG). Also attributed to Xuanzang is the Chinese translation of the famed PRAJÑĀPĀRAMITĀHṚDAYASŪTRA, or "Heart Sūtra," probably the most widely read and recited text in East Asian Buddhism. Because Xuanzang himself experienced a palpable sense of the Buddha's absence while he was sojourning in India, he also translated the *Nandimitrāvadāna* (*Da aluohan Nantimiduo luo suoshuo fazhu ji*, abbr. *Fazhu ji*, "Record of the Duration of the Dharma Spoken by the Great Arhat NANDIMITRA"), the definitive text on the sixteen ARHAT protectors (see ṢOḌAŚASTHAVIRA) of Buddhism, which became the basis for the LOUHAN cult in East Asia.

Xuanzhong ming. (J. Genchūmei; K. Hyŏnjung myŏng 玄中銘). In Chinese, "Inscription on the Center of Mystery," by the Chinese CHAN master DONGSHAN LIANGJIE. In this poem, Dongshan sings of the "mystery" of subtle reciprocation (huihu wanzhuan), simultaneous illumination of phenomena and principle (SHI LI shuangming), and the unimpededness of essence and function (TI YONG wuzhi), which he likens to the activities of a sage. The *Xuanzhong ming* is found in Dongshan's recorded sayings, the *Dongshan yulu*.

Xuedou Chongxian. (J. Setchō Jūken; K. Sŏltu Chunghyŏn 雪竇重顯) (980–1052). Chinese CHAN master in the YUNMEN ZONG of the mature Chan tradition; also known as Yinzhi. Xuedou was a native of Sichuan province. After his ordination under Renxian (d.u.) of the cloister of Pu'anyuan, Xuedou received doctrinal training from Yuanying (d.u.) of Dacisi and Guyin Yuncong (965–1032) of Shimen. During his travels in the south, Xuedou visited the Yunmen master Zhimen Guangzuo (d.u.) in Hubei province and became his leading disciple. Xuedou later resided on Cuiwei peak near Tongting Lake and the monastery of Zishengsi on Mt. Xuedou in Zhejiang province, whence he acquired his toponym. During his residence in Zishengsi, Xuedou acquired more than seventy students and composed his famed collection of one hundred old cases (guce, viz., GONG'AN) known as the *Xuedou songgu*, which in turn formed the basis of Chan master YUANWU KEQIN's influential BIYAN LU. Xuedou also composed the *Tongting yulu*, *Xuedou kaitang lu*, *Puquan ji*, *Zuying ji*, and various other texts. Xuedou's successful career as a teacher is often considered a period of revitalization of the Yunmen tradition.

Xuefeng Yicun. (J. Seppō Gison; K. Sŏlbong Ŭijon 雪峰義存) (822–908). Chinese CHAN master in the lineage of QINGYUAN XINGSI (d. 740); a native of Min (present-day Fujian province). He was ordained at the age of seventeen and given the dharma name Yicun, but temporarily returned to lay clothing during the severe persecution of the HUICHANG FANAN and studied under Furong Lingxun (d.u.). After a brief stay with DONGSHAN LIANGJIE, Xuefeng left at Dongshan's direction to study with DESHAN XUANJIAN (780/2–865). Xuefeng then embarked on a journey with his colleagues Yantou Quanhuo (828–887) and Qinshan Wensui (d.u.). With the help of Yantou, Xuefeng is said to have had his first awakening experience during a snowfall on Mt. Ao in Hunan. Xuefeng and Yantou became Deshan's leading disciples. Xuefeng later established a monastery with the support of the king of Min on what came to be known as Mt. Xuefeng in Fujian province. The mountain was originally known as Mt. Xianggu (Elephant Bone) but acquired its new name after a famous exchange at the mountain between the king of Min and the monk Xuefeng. Xuefeng's monastery was given the name Chongshengsi and Yingtian Xuefeng Chanyuan. In 882, Emperor Xizong (r. 873–888) bestowed upon him the title Great Master Zhenjue (Authentic Enlightenment) and the purple robe. His disciples include YUNMEN WENYAN (the founder of the YUNMEN ZONG of the classical Chan school), XUANSHA SHIBEI (whose students eventually would go on to establish the FAYAN ZONG), Changjing Huileng (854–932), Baofu Congzhan (d. 928), and Gushan Shenyan (d. 943). His teachings are recorded in his *Xuefeng Zhenjue chanshi yulu*.

Xuemo lun. [alt. Xuemai lun] (J. Kechimyakuron; K. Hyŏlmaek non 血脈論). In Chinese, "Treatise on the Blood-Vessel." This short treatise has been traditionally attributed to the legendary Indian monk BODHIDHARMA and is also referred to as the *Damo dashi xuemo lun* ("Great Master [Bodhi]dharma's Treatise on the Blood-Vessel"). Judging from its style of argumentation and doctrinal content, the treatise was most probably composed by a CHAN adept of the HONGZHOU ZONG or NIUTOU ZONG sometime during the ninth century, long after Bodhidharma's death. The treatise begins with the claim that the three realms of existence (TRAIDHĀTUKA) return to the "one mind" (YIXIN), which was transmitted from one buddha to another without recourse to words or letters (BULI WENZI). From beginning to end, the treatise consistently underscores the importance of the inherent purity of the mind (xin) and claims that the mind is none other than the buddha, DHARMAKĀYA, BODHI, and NIRVĀṆA. The treatise also polemically contends that the practice of chanting and being mindful of the buddha AMITĀBHA's name (NIANFO), reading scriptures, and upholding the precepts may guarantee a better rebirth and intelligence but do not ensure the achievement of buddhahood. According to the treatise, only the practice of seeing one's own nature (JIANXING) can lead to buddhahood (see JIANXING CHENGFO). The first known edition of the *Xuemo lun* was first published in Korea in 1473 and was republished on several subsequent occasions. It is often anthologized in larger compilations such as the SŎNMUN CH'WARYO and SHŌSHITSU ROKUMON.

Xu gaoseng zhuan. (J. Zoku kōsōden; K. Sok kosŭng chŏn 續高僧傳). In Chinese, "Supplement to the Biographies of Eminent Monks," compiled by the VINAYA master DAOXUAN; also known as the *Tang gaoseng zhuan*. As the title suggests, the *Xu gaoseng zhuan* "supplements" or "continues" the work of HUIJIAO's earlier GAOSENG ZHUAN and records the lives of monks who were active in the period between Huijiao's composition during the Liang dynasty and Daoxuan's own time. The *Xu gaoseng zhuan* contains 485 major and 219 appended biographies, neatly categorized under translators (yijing), exegetes (yijie), practitioners of meditation (xichan), specialists of VINAYA (minglü), protectors of the DHARMA (hufa), sympathetic resonance (GANTONG), sacrifice of the body (YISHEN), chanters (dusong), benefactors (xingfu), and miscellaneous (zake). Although Daoxuan generally followed Huijiao's earlier categorizations, he made several changes. In lieu of Huijiao's divine wonders (shenyi), viz., thaumaturgists, Daoxuan opted to use the term sympathetic resonance, instead; he also subsumed Huijiao's hymnodists (jingshi) and propagators (changdao) under the "miscellaneous" category. Daoxuan also introduced the new category of protectors of the dharma order to leave a record of disputes that occurred at court with Daoists. These adjustments seem to reflect ongoing developments within Chinese Buddhism in how to conceive of, and write, history. Other related biographical collections include ZANNING's SONG GAOSENG ZHUAN, Shi Baochang's BIQIUNI ZHUAN, the Korean HAEDONG KOSŬNG CHŎN, and the Japanese HONCHŌ KŌSŌDEN.

Xutang Zhiyu. (J. Kidō Chigu; K. Hŏdang Chiu 虛堂智愚) (1185–1269). Chinese CHAN master in the LINJI ZONG; also known as Xijingsou. Xutang was ordained at age sixteen by Shiyun (d.u.) of Pumingsi and later became the disciple of YUN'AN PUYAN (1156–1226). He continued to visit various teachers throughout the country until he became the abbot of the monastery of Xingshengsi in 1229. Xutang also served as abbot of many other important Chan monasteries throughout his illustrious career, including BAOLINSI and WANSHOUSI. The emperors Lizong (r. 1224–1264) and Duzong (r. 1264–1274) honored Xutang as their teacher. Among his disciples is the Japanese monk NANPO JŌMYŌ (1235–1308), to whom the abbots of DAITOKUJI and MYŌSHINJI trace their lineage. The eminent Japanese monk and abbot of Daitokuji, IKKYŪ SŌJUN, even went so far as to consider himself to be a reincarnation of Xutang and had numerous portraits of himself drawn in the likeness of Xutang.

Xuyun. (虛雲) (1840–1959). In Chinese, "Empty Cloud"; CHAN monk of the modern period, renowned as one of the major reformers of modern Chinese Buddhism, especially of the Chan school; also known as Deqing. Xuyun was a native of Xiangxiang in Hunan province. He entered the monastery at the age of nineteen and received the precepts a year later from the monk Miaolian (d.u.). He then embarked on a long pilgrimage to famous mountains in China and to such distant sites as Tibet, India, and Sri Lanka, where he studied with teachers in a variety of Buddhist traditions. At the age of forty-three, Xuyun climbed WUTAISHAN, where he is said to have had a vision of the resident bodhisattva MAÑJUŚRĪ. His awakening experience came at the drop of a teacup at the age of fifty-six. Xuyun was particularly renowned for his austerities and longevity. He became an important exponent of the convergence of "questioning meditation" (KANHUA CHAN) and recitation of the Buddha's name (NIANFO), who was noted for using the meditative topic (HUATOU) "Who is reciting the Buddha's name?" Xuyun spent the rest of his career propagating Buddhism throughout China until his death on Mt. Yunju in Jiangxi province at the advanced age of 120. See also TAIXU; YINGUANG.

Y

yab yum. A Tibetan term, literally meaning "father-mother," referring to the theme common in VAJRAYĀNA iconography, especially that of ANUTTARAYOGATANTRA, viz., male and female deities in sexual union. The deities are depicted either standing face-to-face or sitting, with the male deity in the VAJRĀSANA and the female deity seated on the male deity's lap, with her legs wrapped around his back, their arms embracing each other. Although interpreted in numerous ways, the male figure is generally understood to represent compassion (KARUṆĀ) and method (UPĀYA) and the female figure wisdom (PRAJÑĀ). Their union represents the indivisibility of these two qualities in the state of buddhahood. Although often described in such symbolic terms, numerous SĀDHANAs associated with the anuttarayogatantras include the practice of sexual union.

yakṣa. (P. yakkha; T. gnod sbyin; C. yecha; J. yasha; K. yach'a 夜叉). In Indian mythology, a class of nature spirit, commonly serving as local guardians of the earth and of trees and the treasures hidden there. They possess supernatural powers—including the ability to fly, to change their appearance, and to disappear—which they can employ for good or for evil. They appear often in Buddhist texts, sometimes serving as benevolent protectors of and messengers for the Buddha and his disciples. The most famous of them is VAJRAPĀṆI, who accompanies the Buddha as his bodyguard. They are commonly listed among the audience of the Buddha's sermons, with some attaining the rank of stream-enterer. There are also demonic yakṣas, especially the female yakṣas or yakṣiṇī, who devour infants and corpses and must be subdued by the Buddha, an ARHAT, or a BODHISATTVA. The continent of UTTARAKURU and the island of Sri Lanka were considered to be abodes of the yakṣas.

Yakushiji. (薬師寺). In Japanese, "Medicine Buddha Monastery." One of the seven great monasteries of Nara, Japan. Yakushiji is currently the headquarters (daihonzan) of the Hossō (C. FAXIANG ZONG) tradition. In 680, Emperor Tenmu (r. 673–686) ordered the construction of a statue of the Medicine Buddha (BHAIṢAJYAGURU) and a new monastery to pray for the recovery of his ill consort, who later succeeded him as Empress Jitō (r. 687–697). Due to the emperor's death and the lack of sufficient funds, construction began under Empress Jitō's reign in the old capital of Fujiwarakyō in present-day Kashihara city. Construction was completed in 697, but the monastery was physically relocated to the new capital Heijōkyō in 718 after the transfer of the capital in 710. The monastery originally consisted of two pagodas to the east and the west flanking a central golden hall (kondō) and a lecture hall (kōdō) behind it. After a great fire in 973, only the pagodas and the golden hall remained. The hall collapsed during a typhoon in 1445 and the west pagoda was lost to fire during a war in 1528. Reconstruction of the monastery took place during most of the late twentieth and early twenty-first centuries. The golden hall houses the famed Medicine Buddha triad from the Hakuhō period (645–710), now designated a national treasure.

Yama. (T. Gshin rje; C. Yanmo wang; J. Enma ō; K. Yŏmma wang 閻魔王). In the Buddhist pantheon, the lord of death and the king of hell. Among the six rebirth destinies (ṢAḌGATI), Yama is considered a divinity (DEVA), even though his abode is variously placed in heaven (SVARGA), in the realm of the ghosts (PRETA), and in the hells (see NĀRAKA). Birth, old age, sickness, and punishment are said to be his messengers, sent among humans to remind them to avoid evil deeds and to live virtuously. Since KARMAN functions as a natural law, with suffering resulting from unvirtuous actions and happiness from virtuous actions, the process of moral cause and effect should proceed without the need for a judge to mete out rewards and punishments. However, in Indian sources, Yama is sometimes described as the judge of the dead, who interrogates them about their deeds and assigns the wicked to the appropriate hell. This role of Yama was expanded in China, where he oversaw a quintessentially Chinese infernal bureaucracy: Yama is said to have organized the complex array of indigenous "subterranean prisons" (C. diyu) into a streamlined system of ten infernal courts, each presided over by a different king who would judge the incoming denizens. These judges were known collectively as the ten kings of hell (C. SHIWANG) and are the subject of the eponymous *Shiwang jing*, a Chinese indigenous scripture (see APOCRYPHA). See also KṢITIGARBHA.

yāma. (T. 'thab bral; C. yemo tian; J. yamaten; K. yama ch'ŏn 夜摩天). In Sanskrit and Pāli, proper name of a heaven in the sensuous realm (KĀMADHĀTU); also known as suyāma ("where the seasons are always good"). The yāma heaven is the third from the bottom of the six heavens located in the sensuous realm above Mount SUMERU, between TRĀYASTRIṂŚA below and

TUṢITA above. Like all Buddhist heavens, it is a place of rebirth and not a permanent post-mortem abode. Because this heaven is located in the sky, the divinities who inhabit it do not need to engage in combat with the ASURAS who dwell on the slopes of Mount Sumeru, hence the Tibetan interpretation of the name as "free from conflict." (The Chinese is a Sinographic transcription of the Sanskrit.) The life span in this heaven is said to be two thousand years, with each day lasting two hundred human years.

yamabushi. (山伏). In Japanese, lit. "those who lie down [or sleep] in the mountains"; itinerant mountain ascetics associated with the SHUGENDŌ (way of cultivating supernatural power) tradition; also known as shugenja, or "those who cultivate supernatural powers." Records reveal that as early as the Nara period (although possibly before), yamabushi practiced a variety of severe austerities in the mountains, which were thought to be numinous places that housed the spirits of the dead. Thanks to the special powers accumulated through this training, such adepts were able to mediate with the realm of the dead, convert baleful spirits, and provide healing services. During this early period, the yamabushi were not formally ordained but instead operated independently, drawing freely from Buddhism, Daoism, and indigenous religious beliefs. In the mid to late Heian period (794–1185), such Shugendō sites as the mountains of Yoshino and KUMANO became affiliated with Japanese Tendaishū (TIANTAI) and SHINGONSHŪ institutions, and yamabushi increasingly incorporated esoteric Buddhism into their training, whereby they strove to attain buddhahood (SOKUSHIN JŌBUTSU) through severe asceticism, such as immersion under waterfalls, solitary confinement in caves, fasting, meditating, and the recitation of spells (MANTRA). In addition, yamabushi guided people on pilgrimages through their mountain redoubts and performed powerful rites for the aristocratic nobility and royal court. During the Tokugawa period (1600–1868), they were forced because of temple regulations (J. jin hatto) to adopt permanent residences. While higher-ranking practitioners stayed at the mountain centers, many others settled down in villages, where they performed shamanic rituals and offered healing and prayers. Later in the Tokugawa period, many of these practices would provide the foundation for Japan's so-called new religions. When Shugendō was proscribed in 1872, yamabushi were forced to join either Buddhist or Shintō institutions and to forgo many of their former practices. When this ban was lifted in the late 1940s following World War II, yamabushi at some centers, including Mt. Haguro and Kumano, resumed their former practice, which continues to the present.

Yamaka. In Pāli, "Pairs"; one of the principal books of the Pāli abhidhammapiṭaka (see ABHIDHARMAPIṬAKA), which has no precise analogue in the abhidharmas of other MAINSTREAM BUDDHIST SCHOOLS. The text belongs to the second stratum of Pāli abhidhamma works and is traditionally dated to the time of the third Buddhist council (see COUNCIL, THIRD) (c. third–second century BCE). The *Yamaka* is divided into ten chapters: (1) nine kinds of faculties or roots (mūla), for example, the three wholesome faculties (see KUŚALAMŪLA), the three unwholesome faculties (see AKUŚALAMŪLA), and the three neutral faculties; (2) five aggregates (see SKANDHA); (3) six sensory bases (ĀYATANA); (4) eighteen elements (DHĀTU); (5) the FOUR NOBLE TRUTHS; (6) conditioning factors (see SAṂSKĀRA) created via body, speech, and mind; (7) the proclivities (see ANUŚAYA); (8) mind (CITTA); (9) factors (see DHARMA); and (10) faculties (INDRIYA). Each of these chapters is organized into three sections: (1) delimitation of terminology, viz., the precise denotation of the terms covered in a chapter; (2) process, viz., discussions of how the terms are deployed in the course of abhidhamma analysis; and (3) penetration, viz., what understandings are generated through this analysis. The coverage proceeds through series of paired exchanges. An example is the opening discussion of the truth of suffering (P. dukkhasacca; S. DUḤKHASATYA). Exchange A asks: "Are painful sensations (P. dukkha; S. DUḤKHA) always included in the truth of suffering? Yes." Exchange B asks: "Does the truth of suffering always refer to painful sensations? No, the truth of suffering involves other types of suffering apart from physical and psychological suffering." Through this exchange, the text clarifies that the term dukkha cannot be limited solely to physical or psychological pain (see DUḤKHADUḤKHATĀ), but suggests that it may also involve the suffering caused by change (see VIPARIṆĀMADUḤKHATĀ) and in fact lies at the very root of conditioning itself (see SAṂSKĀRADUḤKHATĀ). Perhaps because its format of paired exchanges does not readily lend itself to systematic analysis, the *Yamaka* has the dubious distinction of being probably the least read of all the works in the Pāli abhidhammapiṭaka.

yamakaprātihārya. (P. yamakapāṭihāriya; T. cho 'phrul ya ma zung; C. shuangshenbian; J. sōjinpen; K. ssangsinbyŏn 雙神變). In Sanskrit, "paired miracle" or "twin miracle"; this and the MAHĀPRĀTIHĀRYA are the two most famous of the miracles performed by the Buddha during his career, which are frequently narrated in both canonical and commentarial literature and widely depicted in Buddhist art. Both types are generally understood to have taken place in the city of ŚRĀVASTĪ and thus are often referred to collectively in the literature as the ŚRĀVASTĪ MIRACLES. The yamakaprātihārya involved the manifestation of the contrasting physical elements (MAHĀBHŪTA) of fire and water. After the Buddha established a rule preventing monks from displaying miraculous powers, he was challenged by a group of non-Buddhist yogins to a display of his own supranormal powers. As a buddha, he was exempt from this prohibition, so he accepted their challenge and stated that he would perform a miracle at the foot of a mango tree. To keep him from proceeding, his opponents uprooted all the mango trees in the vicinity, leading the Buddha to cause a great tree to grow spontaneously from a mango seed. At the appointed time, the Buddha created a bejeweled walkway in the sky and then proceeded back and forth on it, causing flames to emerge from the upper part of his body and streams of water from the lower part, then water from the upper part and flames from the lower part, then flames from the right side and water from the left side, then from his front and back, right eye and left eye, right ear and left ear, etc. He then created a double of himself (see MANOMAYAKĀYA), with whom he conversed. It is because of the simultaneous presence of fire and water (and perhaps because of his creation of his doppelgänger) that the event is called the "paired miracle." After performing the miracle and preaching for sixteen days, the Buddha departed for the heaven of the thirty-three (TRĀYASTRIṂŚA), where he spent the rains retreat (VARṢĀ) teaching the ABHIDHARMA to his mother MĀYĀ (who had been reborn as a divinity in the TUṢITA heaven). This miracle is said to be performed by all buddhas (and only by a buddha) and always in Śrāvastī.

Yamāntaka. (T. Gshin rje gshed; C. Yanmandejia/Daweide mingwang; J. Enmantokuka/Daiitoku myōō; K. Yŏmmandŏkka/Taewidŏk myŏngwang 焰曼德迦/大威德明王). In Sanskrit, "Destroyer of Death" (lit. "he who brings an end (antaka) to death (yama)"), closely associated with BHAIRAVA ("The Frightening One") and VAJRABHAIRAVA; one of the most important tantric deities. In Tibetan Buddhism, he was one of the three primary YI DAM of the DGE LUGS sect (together with GUHYASAMĀJA and CAKRASAṂVARA). Yamāntaka is considered to be a fully enlightened buddha, who appears always in a wrathful form. He is depicted both with and without a consort; the solitary depiction, called "sole hero" (ekavīra), is particularly popular. Bhairava also appears in the Hindu tantric pantheon as a wrathful manifestation of the god Śiva. According to Buddhist mythology, MAÑJUŚRĪ, the bodhisattva of wisdom, took the form of the terrifying bull-headed deity in order to destroy the Lord of Death (YAMA) who was ravaging the country; hence the epithet Yamāntaka (Destroyer of Death). Yamāntaka has nine heads, thirty-four arms, and sixteen legs, each arm holding a different weapon or frightening object, and each foot trampling a different being. Each of these receives detailed symbolic interpretation in ritual and meditation texts associated with Yamāntaka. Thus, his two horns are said to represent the two truths (SATYADVAYA) of MADHYAMAKA philosophy: ultimate truth (PARAMĀRTHASATYA) and conventional truth (SAṂVṚTISATYA). His nine heads represent the nine categories (NAVAṄGA[PĀVACANA]) of Buddhist scriptures. His thirty-four arms, together with his body, speech, and mind, symbolize the thirty-seven "factors pertaining to awakening" (BODHIPĀKṢIKADHARMA). His sixteen legs symbolize the sixteen emptinesses (ŚŪNYATĀ). The humans and animals that he tramples with his right foot represent the attainment of the eight accomplishments, viz., supernatural abilities acquired through tantric practice, including the ability to fly, to become invisible, and travel underground. The birds that he tramples with his left foot represent the attainment of the eight powers, another set of magical abilities, including the ability to travel anywhere in an instant and the power to create emanations. His erect phallus represents great bliss, his nakedness means that he is not covered up with obstacles, and his hair standing on end symbolizes his passage beyond all sorrow (DUḤKHA). The Yamāntaka root tantras are the *Sarvatathāgatakāyavāgcittakṛṣṇayamāritantra* ("Body, Speech, and Mind of All Tathāgatas: Black Enemy of Death Tantra") in eighteen chapters; *Sarvatathāgatakāyavāgcittaraktayamāritantra* ("Red Enemy of Death Tantra," in large part, a different version of the same tantra in nineteen chapters); and the important *Kṛṣṇayamārimukhatantra*, also called the "Three Summaries Tantra" (T. *Rgyud sdom gsum*) because it has no chapters. Also included in the cycle is the *Yamāntakakrodhavijayatantra* ("Victorious Wrathful Yamāntaka Tantra"), a CARYĀTANTRA. Based on these three works, in Tibet, the three varieties of Yamāntaka are called the "red, black, and the frightening" (T. dmar nag 'jigs gsum) derived from Raktayamāri (Red Enemy of Death), Kṛṣṇayamāri (Black Enemy of Death), and Vajrabhairava.

yāna. (T. theg pa; C. sheng; J. jō; K. sŭng 乘). In Sanskrit, "vehicle," "conveyance"; a common Sanskrit term for any means of transportation (in Pāli materials and in many of the MAINSTREAM BUDDHIST SCHOOLS, the term is generally used in this literal sense). In MAHĀYĀNA literature, the term takes on great significance in the metaphorical sense of a mode of transportation along the path to enlightenment, becoming a constituent of the term Mahāyāna ("Great Vehicle") itself. In Mahāyāna SŪTRAS and ŚĀSTRAS, this rhetorical sense of the term is often put to polemical use, with the followers of the Buddha being placed into three or two vehicles. The three vehicles are the BODHISATTVAYĀNA or Mahāyāna, the PRATYEKABUDDHAYĀNA, and the ŚRĀVAKAYĀNA. The two vehicles are the Mahāyāna and the HĪNAYĀNA (the "lesser vehicle," or even more disparagingly, "base vehicle" or "vile vehicle"), which subsumes the pratyekabuddhayāna and the śrāvakayāna. Other uses of the term yāna include the BUDDHAYĀNA and the EKAYĀNA ("one vehicle"), whose precise relationship to the bodhisattvayāna and the Mahāyāna is discussed in the scholastic literature. Among the Mahāyāna sūtras, the most celebrated expression of the rhetoric of the yānas occurs in the SADDHARMAPUṆḌARĪKASŪTRA ("Lotus Sūtra") where, in the parable of the burning house, a father promises to reward his children with three different carriages (yāna) when in fact there is only a single magnificent carriage. With the rise of tantric Buddhism, the Mahāyāna itself is divided into two, the PĀRAMITĀYĀNA or "perfection vehicle," referring to the path to buddhahood involving successive mastery of the perfections (PĀRAMITĀ) as set forth in the sūtras, and the MANTRAYĀNA or "mantra vehicle," referring to the path to buddhahood as set forth in the TANTRAS (although some scholars have argued that the proper term here is not yāna, but naya, meaning "mode" or "principle"). The tantric teachings are also variously referred to as the GUHYAMANTRAYĀNA ("secret mantra vehicle"), the PHALAYĀNA ("fruition vehicle"), and, most famously, as the VAJRAYĀNA ("diamond vehicle" or "thunderbolt vehicle").

yang 'dul gtsug lag khang. (yangdul tsuklakang). In Tibetan, the four "extra-taming temples" or "extra-pinning temples" of

Bu chu, Mkho mthing, Dge gyes, and Pra dum rtse said to have been constructed during the time of the Tibetan king Srong btsan sgam po to pin down the limbs of the demoness (T. srin mo) who was impeding the introduction of Buddhism into Tibet. The Lha sa temple (gtsug lag khang) pins down her heart and the four extra taming temples pin down her right and left elbows and right and left knees.

Yang le shod. (Yangleshö). An important pilgrimage site south of the Kathmandu Valley in Nepal, sacred to Tibetan and Newar Buddhists as well as to Hindus, although the source and meaning of the name are unclear. According to traditional Buddhist accounts, Padmasambhava practiced meditation in a cave here, subdued nāga demons through the practice of Vajrakīlaya, and attained realization of mahāmudrā. Hindus relate the site to the avatāra of Viṣṇu called Śeṣa Nārāyaṇa.

Yangqi Fanghui. (J. Yōgi Hōe; K. Yanggi Panghoe 楊岐方會) (992–1049). Chinese Chan master and patriarch of the Yangqi pai collateral line of the Linji zong; one of the two major Linji sublineages, along with the Huanglong pai. Yangqi was a native of Yuanzhou prefecture in present-day Jiangxi province. After studying under various teachers, he visited the Chan master Shishuang Chuyuan (986–1039), himself a successor of Fenyang Shanzhao (947–1024), and became one of Shishuang's leading disciples. Yangqi was later invited to serve as abbot of the monastery Putong Chanyuan on Mt. Yangqi in his hometown of Yuanzhou, whence he acquired his toponym. In 1046, he moved his residence to the monastery of Haihuisi on Mt. Yung'ai. Among his many talented disciples, the most famous is Baiyun Shouduan (1025–1072). His teachings are recorded in the *Yangqi Fanghui chanshi yulu*, *Yangqi Fanghui chanshi houlu*, and *Yangqi Hui chanshi yuyao*. See also wu jia qi zong.

Yangqi pai. (J. Yōgiha; K. Yanggi p'a 楊岐派). One of the two major branches of the Linji zong of the Chan school, which is listed among the five houses and seven schools (wu jia qi zong) of the mature Chinese Chan tradition. The school is named after its founder, Yangqi Fanghui (995–1049), who taught at Mt. Yangqi in what is now Yuanzhou province. Yangqi was a disciple of Shishuang Chuyuan (986–1039), a sixth-generation successor in the Linji school, who also taught Huanglong Huinan (1002–1069), the founder of the Huanglong pai sublineage of the Linji school. The Yangqi lineage flourished under its third-generation successors, Fojian Huiqin (1059–1117), Foyan Qingyuan (1067–1120), and Yuanwu Keqin (1063–1135), who promoted it among the literati, and it became one of the dominant schools of Song-dynasty Buddhism thanks to the decisive role played by Yuanwu's disciple Dahui Zonggao (1089–1163). It was especially within this lineage that the meditative technique of the Chan of investigating the meditative topic or questioning meditation (kanhua Chan) flourished. The Yangqi masters took a different approach to gong'an (public case) training, criticizing "lettered Chan" (wenzi Chan), a style of Chan developed by Yunmen and Huanglong masters, which gained popularity among the literati officials in the Northern Song period with its polished language and elegant verse explanations of the meaning of the gong'an. Dahui in particular presented the gong'an as a meditative tool for realizing one's innate enlightenment, not to demonstrate one's talent in clever repartee or one's literary prowess; at the same time, he critiqued the approaches of rival Chan schools, criticizing such Huanglong masters as Juefan Huihong (1071–1128) for clinging to intellectual and literary endeavors and such Caodong zong masters as Hongzhi Zhengjue (1091–1157) for clinging to tranquillity and simply waiting for one's innate enlightenment to manifest itself. The school also produced many gong'an collections, including the Biyanlu ("Blue Cliff Record"), complied by Yuanwu Keqin, and the Wumen guan ("Gateless Checkpoint"), compiled by the seventh-generation successor Wumen Huikai (1183–1260). The Yangqi lineage was formally introduced to Korea by T'aego Pou (1301–1382), who studied with the eleventh-generation Yangqi teacher Shiwu Qinggong (1272–1352); some modern Korean monks and scholars argue that the contemporary Korean Sŏn tradition should be traced back to T'aego and his Yangqi lineage, rather than to Pojo Chinul (1158–1210). The Yangqi school reached Japan in the thirteenth century through pilgrim monks, including Shunjō (1166–1227), who studied with the Yangqi teacher Meng'an Yuancong (1126–1209), and Nanpo Jōmyō (1235–1309), better known by his imperially bestowed title Entsū Daiō Kokushi ("state preceptor," see guoshi), who studied with the ninth-generation teacher Xutang Zhiyu (1185–1269). All Linji lineages in contemporary Japan are affiliated with the Yangqi pai.

Yangshan Huiji. (J. Gyōzan/Kyōzan Ejaku; K. Angsan Hyejŏk 仰山慧寂) (807–883). Chinese Chan master and patriarch of the Guiyang zong [alt. Weiyang zong]. Yangshan was a native of Shaozhou prefecture in present-day Guangdong province. According to his biography, Yangshan's first attempt to enter the monastery at age fifteen failed because his parents refused to give their required permission. Two years later he cut off two of his fingers as a sign of his resolve to become a monk and became a śrāmaṇera under the guidance of Chan master Tong (d.u.) of Nanhuasi. After he received his monastic precepts, Yangshan studied the vinayapiṭaka. Yangshan is said to have received the teachings of the circle diagrams from Danyuan Yingzhen (d.u.), and he later became a disciple of Chan master Guishan Lingyou after serving him for fifteen years. He later moved to Mt. Yang in Yuanzhou prefecture (present-day Jiangxi province), whence he acquired his toponym, and established a name for himself as a Chan master. Yangshan later moved to Mt. Dongping in his hometown of Shaozhou, where he passed away in the year 883 (alternative dates for his death are 916 and

891). He was posthumously honored with the title Dengxu dashi (Great Master Clear Vacuity) and a purple robe. He was also named Great Master Zhitong (Penetration of Wisdom). His teachings are recorded in the *Yuanzhou Yangshan Huiji chanshi yulu*. The names of the mountains on which Yangshan and his teacher Guishan resided were used in compound to designate their lineage, the Guiyang.

Yangs pa can. (Yangpachen). The monastic residence of the Zhwa dmar incarnations in Tibet, founded under the direction of the fourth Zhwa dmar Chos kyi grags pa (Chökyi Drakpa, 1453–1524) and located near Mtshur phu monastery west of Lha sa; it was also known as Thub bstan Yangs pa can (Tupten Yangpachen). After the tenth Zhwa dmar was found guilty of treason, the monastery was converted to Dge lugs and renamed Kun bde gling.

Yang Wenhui. (J. Yō Bunkai; K. Yang Munhoe 楊文會) (1837–1911). Chinese Buddhist layman at the end of the Qing dynasty, renowned for his efforts to revitalize modern Chinese Buddhism. A native of Anhui province, Yang fled from the Taiping Rebellion to Hangzhou prefecture. In 1862, he serendipitously acquired a copy of the Dasheng qixin lun ("Awakening of Faith According to the Mahāyāna") and became interested in Buddhism. In 1878, he traveled to England, where he served at the Chinese Embassy in London, befriending the Japanese Buddhist scholar Nanjō Bun'yū (1849–1927), who helped him to acquire Chinese Buddhist texts that had been preserved in Japan. After his return to China, Yang established a publishing press called the Jingling Kejing Chu and published more than three thousand Buddhist scriptures. In 1893, Anagārika Dharmapāla visited Yang in Shanghai. In 1894, Yang and the British missionary Timothy Richard translated the Dasheng qixin lun into English. In 1907, the Jingling Kejing Chu began to publish primers of Buddhism in various languages. In 1910, Yang also founded the Fojiao Yanjiu Hui (Buddhist Research Society), where he regularly lectured until his death in 1911.

Yanshou. (C) (延壽). See Yongming Yanshou.

yantra. (T. 'khrul 'khor; C. tuxiang; J. zuzō; K. tosang 圖像). In Sanskrit, "diagram" or "instrument." Although the term can have many meanings in Sanskrit, within the Buddhist tradition it is most commonly used to refer to a picture made of images and/or geometric shapes, usually triangles, which are repeated in such a way that they form a pattern. Such magical diagrams are used in tantric rituals and meditations to depict in visual form the power of the invoked deities, representing the universe, or certain spiritual or cosmological powers in the universe. A yantra is commonly understood as rendering through lines and colors the sacred sound of a mantra. Yantras are used for such purposes as gaining magical protection, worshipping tantric deities, or facilitating meditation. The term is in some cases interchangeable with a maṇḍala, although there are some differences: a yantra is typically small in size while a maṇḍala is variously sized and may even be large enough for a practitioner to enter during the rituals; a yantra, except for those under temple statues, is often portable, while a maṇḍala is not; and deity figures rarely appear on a yantra, while they are common on a maṇḍala. A yantra can be two- or three-dimensional and may range from such simple geometric designs as dots or triangles to more elaborate temple structures. Some texts suggest that merely seeing a maṇḍala or drawing or imagining a yantra also brings benefits. Yantra tattooing (Thai, yak sant) is a common practice in Southeast Asia among both monks and laity. It is generally performed by specialist monks using traditional needles.

yaoshi. (J. yakuseki; K. yaksŏk 藥石). In Chinese, lit. "herbal medicine (yao) and stone probes" (shi); "medicine stone," the Chinese Buddhist euphemism for "supper." The vinaya restricts monks and nuns from eating after noon; anytime afterwards is an "improper time." There are waivers allowed for certain types of "medicine," however, which may legally be consumed. To circumvent this prohibition against eating after noon, the Chinese referred to food consumed after noon as "medicine," and an evening meal therefore euphemistically came to be referred to as a "medicine stone."

Yaśas. (P. Yasa; T. Grags pa; C. Yeshe; J. Yasha; K. Yasa 耶舍). An early arhat disciple of the Buddha. The son of a wealthy merchant of Vārāṇasī, Yaśas was brought up in luxury. He had three mansions, one for the winter, one for the rainy season, and one for the summer, and was attended by a troupe of female musicians. Once, he happened to awake in the middle of the night and witnessed his attendants sleeping in an indecorous manner. Greatly disturbed, he put on a pair of golden sandals and wandered in the direction of the Deer Park (Mṛgadāva) where the Buddha was dwelling, exclaiming, "Alas, what distress, what danger." The Buddha saw him approach and, knowing what he was experiencing, called out to him, "Yaśas, come. Here there is neither distress nor danger." Yaśas approached the Buddha, took off his golden sandals, and sat down beside him. The Buddha preached a graduated discourse (anupubbikathā) to him, at the conclusion of which Yaśas became a stream-enterer (srotaāpanna). He thus became the Buddha's sixth disciple and the first who had not known him prior to his achievement of enlightenment (as had his first five disciples, the bhadravargīya or pañcavargika). Yaśas was also the first person to become an enlightened lay disciple (upāsaka), although he ordained a few minutes later. Later, Yaśas's father, who had come searching for his son, arrived at the Buddha's residence. The Buddha used his magical powers to make Yaśas invisible and, inviting his father to sit, preached a discourse to him. Yaśas's father also became a stream-enterer, while Yaśas, who overheard the sermon from his invisible state, became an arhat. When the Buddha made Yaśas visible to his father, he informed him that, since his son was now an arhat, it would be impossible for him to return home to a householder's life and he would have to become a monk. Yaśas thus became the sixth member of the Buddha's monastic order. Yaśas accompanied the Buddha to his father's house the next day to receive the morning meal. After the meal, the Buddha preached a sermon. Yaśas's mother, Sujātā, and other members of the household became stream-enterers, his mother thus becoming the first female disciple (upāsikā) of the Buddha and the first woman to become a stream-enterer. At that time, fifty-four of Yaśas's friends also were converted and entered the order of monks, swelling its ranks to sixty members. It was at this time that the Buddha directed his disciples to go forth separately and preach the dharma they had realized for the welfare and benefit of the world. ¶ There was a later monk, also named Yaśas, whose protest led to the second Buddhist council (Council, Second), held at Vaiśālī. Some one hundred years after the Buddha's death, Yaśas was traveling in Vaiśālī when he observed the monks there receiving gold and silver as alms directly from the laity, in violation of the vinaya prohibition against monks touching gold and silver. He also found that the monks had identified ten points in the vinaya that were identified as violations but that they felt were sufficiently minor to be ignored. The ten violations in question were: (1) carrying salt in an animal horn; (2) eating when the shadow of the sundial was two fingerbreadths past noon; (3) after eating, traveling to another village to eat another meal on the same day; (4) holding several assemblies within the same boundary (sīmā) during the same fortnight; (5) making a monastic decision with an incomplete assembly and subsequently receiving the approval of the absent monks; (6) citing precedent as a justification to violate monastic procedures; (7) drinking milk whey after mealtime; (8) drinking unfermented wine; (9) using mats with a fringe; and (10) accepting gold and silver. Yaśas told the monks that these were indeed violations, at which point the monks are said to have offered him a share of the gold and silver they had collected. When he refused the bribe, they expelled him from the order. Yaśas sought the support of several respected monks in the west, including Sambhūta, Śāṇakavāsin, and Revata. Together with other monks, they went to Vaiśālī, where they convened a council (saṃgīti) at which Revata submitted questions about each of the disputed points to Sarvagāmin, the eldest monk of the day, who is said to have been a disciple of Ānanda. In each case, he said that the practice in question was a violation of the vinaya. Seven hundred monks then gathered to recite the vinaya. Those who did not accept the decision of the council held their own convocation, which they called the Mahāsāṃghika or "Great Assembly," the rival group coming to be called the Sthaviranikāya, or "School of the Elders." This event is sometimes referred to as "the great schism," since it marks the first permanent schism in the order (saṃghabheda).

Yasenkanna. [alt. Yasenkanwa] (夜船閑話). In Japanese, "Idle Talk on a Night Boat"; a short meditative text composed by the Zen master Hakuin Ekaku in the Rinzaishū, and his most popular piece. The *Yasenkanna* was first published in 1757 and has remained in print ever since. The title seems to be an allusion to the popular saying, "night boat on the Shirakawa River" (Shirakawa yasen), which refers to the story of a man from the countryside and the lies he tells about his trip to Kyōto. Hakuin wrote the *Yasenkanna* to offer beginners of meditation an expedient technique for overcoming "Zen illness" (zenbyō) and fatigue. The *Yasenkanna* details Hakuin's own bout with this illness and his miraculous recovery with the help of a secret technique known as inner discernment or visualization (naikan), which he purports to have learned from the obscure hermit Hakuyū. Different versions of this story also appear in Hakuin's other writings, such as the *Kanzanshi sendai kimon*, *Orategama*, and *Itsumadegusa*.

Yaśodharā. (P. Yasodharā; T. Grags 'dzin ma; C. Yeshutuoluo; J. Yashudara; K. Yasudara 耶輸陀羅). The Sanskrit proper name of wife of the prince and bodhisattva, Siddhārtha Gautama, and mother of his son, Rāhula (she is often known in Pāli sources as Rāhulamātā, Rāhula's Mother); she eventually became an arhat, who was declared by the Buddha to be foremost among nuns possessing the six superknowledges (abhijñā; P. abhiññā). According to Pāli accounts, she was born on the same day as Prince Gautama and had skin the color of gold, hence another of her epithets, Bhaddā Kaccānā. She is also referred to in Pāli commentaries as Bimbā. Yaśodharā married the prince when she was sixteen, after he had proved his superior skill in archery and other manly arts. She was chief consort in a harem of forty thousand women. On the day her son, Rāhula, was born, the prince renounced the world and abandoned his wife, child, and palace to become a mendicant. According to another version of the story, Rāhula was conceived on the night of the prince's departure and was not born until the night of the prince's enlightenment, six years later. Yaśodharā was so heartbroken at her husband's departure that she took up his ascetic lifestyle, eating only one meal per day and wearing the yellow robes of a mendicant. When the Buddha returned to his former palace in Kapilavastu after his enlightenment, Yaśodharā was allowed the honor of worshipping him in the manner she saw fit. After seven days, as the Buddha was about to depart, Yaśodharā instructed her son Rāhula to ask for his inheritance. In response, the Buddha instructed Śāriputra to ordain his son. As Rāhula was the first child to be admitted to the order, he became the first Buddhist novice (śrāmaṇera). Yaśodharā and Rāhula's grandfather Śuddhodana were greatly saddened at losing the child and heir to the order; hence, at Śuddhodana's request, the Buddha passed a rule that, thenceforth, no child should be ordained without the consent of its parents. When later the Buddha allowed women to enter the order, Yaśodharā became a nun (bhikṣuṇī) under Mahāprajāpatī, who was chief of the nuns' order and the Buddha's stepmother. Yaśodharā cultivated insight and became an arhat with extraordinary supranormal powers. She could recall her past lives stretching back an immeasurable age and one hundred thousand eons without effort. The JĀTAKA records numerous occasions when Yaśodharā had been the wife of the bodhisattva in earlier existences. Also mentioned as the wife of the Buddha is Gopā, although it is unclear whether this refers to another wife or is another name for Yaśodharā.

Yaśomitra. (T. Grags pa bshes gnyen) (fl. c. late sixth century). Indian ĀBHIDHARMIKA scholastic, probably affiliated with the SAUTRĀNTIKA school, and author of the SPHUṬĀRTHĀ-ABHIDHARMAKOŚAVYĀKHYĀ, an important commentary on VASUBANDHU'S ABHIDHARMAKOŚABHĀṢYA. His commentary is noted for its detail and clarity, and for its attempt to identify the adherents of the various doctrinal positions mentioned by Vasubandhu. The text is preserved in both Sanskrit and Tibetan. Yaśomitra's text was among the first ABHIDHARMA works to be studied in Europe; it was one of the Sanskrit manuscripts send by BRIAN HOUGHTON HODGSON from Kathmandu to Paris, where it was read by EUGÈNE BURNOUF, who discusses it in his *Introduction à l'histoire du Buddhisme indien* (1844).

Yasutani Hakuun. (安谷白雲) (1885–1973). Japanese ZEN teacher in the SŌTŌSHŪ, who was influential in the West. Born in Japan, Yasutani attended public school until he entered a Sōtō Zen seminary at the age of thirteen. Yasutani was trained as a teacher and taught elementary school. He was married at the age of thirty and raised five children before turning to a life dedicated to the work of a Sōtō priest. He met Sogaku Harada in 1924 while lecturing in Tōkyō. Yasutani began intensive study with Harada roshi and dedicated his life to teaching the dharma to laypeople. Yasutani organized a group called the Sanbō Kyodan (Fellowship of the Three Jewels), which became independent of the Sōtō school in 1954. Yasutani was the teacher of PHILIP KAPLEAU, who studied with him for eight years, and maintained a close relationship with him until 1967. Kapleau's *The Three Pillars of Zen* was based heavily on Yasutani's teachings. Yasutani traveled to the United States for the first time at the age of seventy-seven, three years after SHUNRYŪ SUZUKI arrived. For seven years, Yasutani taught Zen to many laypeople in the USA and, although he had prepared to live somewhat permanently in the country, a tuberculosis test prevented him from receiving a permanent visa. In his later years, Yasutani continued to travel in the United States as well as in India. He preferred to teach Zen in a nonmonastic environment. He died in Kamakura in 1973.

Yatana Htut-hkaung zedi. The Yatana Htut-hkaung Pagoda (Burmese, JEDI; P. cetī; S. CAITYA) is located on Minwun Hill in the northern part of the Sagaing Hills in Upper Burma (Myanmar). It was built in 1315 CE by Princess Soe Min-gyi, the daughter of Sagaing's founder, King Athinkaya Saw-yun. Over the course of time, the neighboring village, along with its monastery and line of SAYADAWS (abbots), came to be known as Htut-hkaung. One such abbot was Htut-hkaung Sayadaw, who flourished in the nineteenth century, was greatly respected by King MINDON (r. 1853–1878) for his learning and piety. The king built for the sayadaw a famous monastery named Mahādhammika Kyaung where he taught scripture and meditation to many hundreds of monks and nuns. This sayadaw was a prolific writer, and his catechisms are famous in Burmese literature. He received many titles from the King Mindon and was believed by some to have been an arahant (S. ARHAT).

yathābhūtajñānadarśana. (P. yathābhūtañāṇadassana; C. rushi zhijian; J. nyojitsu chiken; K. yŏsil chigyŏn 如實知見). In Sanskrit, "knowledge and vision that accord with reality"; a crucial insight leading to deliverance (VIMUKTI), which results in dispassion toward the things of this world because of seeing things as they actually are: i.e., as impermanence (ANITYA), suffering (DUḤKHA), and nonself (ANĀTMAN). "Knowledge and vision (jñānadarśana)" is usually interpreted to suggest the direct insight into things "as they are" (yathābhūta), meaning these three marks of existence (TRILAKṢAṆA), or sometimes the FOUR NOBLE TRUTHS. Yathābhūtajñānadarśana is presumed to be closely related to wisdom (PRAJÑĀ), but with one significant difference: yathābhūtajñānadarśana is the first true insight, but it is intermittent and weak, while prajñā is continuous and strong. Seeing things as they are, however, is intense enough that the insight so gleaned is sufficient to transform an ordinary person (PṚTHAGJANA) into an ĀRYA. ¶ In the *Upanisāsutta* of the SAṂYUTTANIKĀYA, the standard twelvefold chain of dependent origination (PRATĪTYASAMUTPĀDA) is connected to an alternate chain that is designated the "supramundane dependent origination" (P. lokuttara-paṭiccasamuppāda; S. lokottara-pratītyasamutpāda), which outlines the process leading to liberation and prominently includes the knowledge and vision that accord with reality. Here, the last factor in the standard chain, that of old age and death (JARĀMARAṆA), is substituted with suffering (P. dukkha; S. DUḤKHA), which in turn becomes the first factor in this alternate series. According to the *Nettipakaraṇa*, a Pāli exegetical treatise, this chain of supramundane dependent origination consists of: (1) suffering (P. dukkha; S. duḥkha), (2) faith (P. saddhā; S. ŚRADDHĀ), (3) delight or satisfaction (P. pāmojja; S. prāmodya), (4) rapture or joy (P. pīti; S. PRĪTI), (5) tranquility or repose (P. passaddhi; S. PRAŚRABDHI), (6) mental ease or bliss (SUKHA), (7) concentration (SAMĀDHI), (8) knowledge and vision that accord with reality (P. yathābhūtañāṇadassana; S. yathābhūtajñānadarśana), (9) disgust (P. nibbidā; S. NIRVEDA), (10) dispassion (P. virāga; S. VAIRĀGYA), (11) liberation (P. vimutti; S. VIMUKTI), and (12) knowledge of the destruction of the contaminants (P. āsavakkhayañāṇa; S. āsravakṣayajñāna; see ĀSRAVAKṢAYA). The *Kimatthiyasutta* of the AṄGUTTARANIKĀYA gives a slightly different version of the first links, replacing suffering and faith with (1) observance of precepts (P. kusalasīla; S. kuśalaśīla) and (2) freedom from remorse (P. avippaṭisāra; S. avipratisāra). In both formulations, yathābhūtajñānadarśana arises as a result of the preceding factor of meditative concentration (samādhi); it is regarded as the specific awareness (JÑĀNA) of the nature of reality, which is seen (DARŚANA) vividly and directly. In this context, yathābhūtajñānadarśana is essentially synonymous with insight (VIPAŚYANĀ). As this chain of transcendental dependent origination is sometimes interpreted, the stage of faith (P. saddhā; S. śraddhā) is made manifest through generosity (DĀNA) and observing precepts (ŚĪLA), which frees the mind from feelings of remorse and guilt (avipratisāra). The stage of delight or satisfaction (prāmodya) refers to a satisfied or relaxed state of mind, which is freed from any mental disturbances that might prevent concentration. The stages of rapture (prīti), bliss (sukha), and concentration (samādhi) are factors associated with the four levels of meditative absorption (DHYĀNA). The knowledge and vision that accord with reality arise in dependence on the preceding samādhi; it is able to destroy the afflictions (KLEŚA), rather than simply suppress them, as occurs in the state of concentration, and thus leads to liberation from SAṂSĀRA. The fact that samādhi provides a basis for seeing things "as they are," which generates an insight that can bring about liberation, demonstrates the explicitly soteriological dimensions of concentration in a Buddhist meditative context. ¶ In Pāli sources, such as the VISUDDHIMAGGA, yathābhūtajñānadarśana is the fifteenth of eighteen principal types of superior insight (P. mahāvipassanā), which liberate the mind from delusions regarding the world and the self. The eighteen insights are contemplations of: (1) impermanence (aniccānupassanā); (2) suffering (dukkhānupassanā); (3) nonself (anattānupassanā); (4) aversion (nibbidānupassanā); (5) dispassion (virāgānupassanā); (6) extinction (nirodhānupassanā); (7) abandoning (paṭinissaggānupassanā); (8) waning (khayānupassanā); (9) disappearing (vayānupassanā); (10) change (vipariṇāmānupassanā); (11) signlessness (animittānupassanā); (12) wishlessness (appaṇihitānupassanā); (13) emptiness (suññatānupassanā); (14) advanced understanding into phenomena (adhipaññādhammavipassanā); (15) knowledge and vision that accord with reality (yathābhūtañāṇadassana); (16) contemplation of danger (ādīnavānupassanā); (17) contemplation involving reflection (paṭisaṅkhānupassanā); and (18) contemplation of turning away (vivaṭṭanānupassanā). The counterparts which are overcome through these eighteen insights are: (1) the idea of permanence, (2) the idea of pleasure, (3) the idea of self, (4) delighting, (5) greed, (6) origination, (7) grasping, (8) the idea of compactness, (9) the accumulation of action (kamma), (10) the idea of lastingness, (11) signs, (12) desire, (13) misinterpretation, (14) misinterpretation due to grasping, (15) misinterpretation due to confusion, (16) misinterpretation due to reliance, (17) nonreflection or thoughtlessness, (18) misinterpretation due to entanglement.

yathābhūtaparijñāna. (T. ji lta ba mkhyen pa'i ye shes). An alternate term for YATHĀVADBHĀVIKAJÑĀNA (knowledge of the mode).

yathāvadbhāvikajñāna. (T. ji lta ba mkhyen pa'i ye shes; C. ruli zhi; J. nyorichi; K. yŏri chi 如理智). In Sanskrit, lit. "knowledge of the mode"; a buddha's knowledge of the single mode of being of the universe. This type of knowledge is typically mentioned in conjunction with the "knowledge of the multiplicities" (YĀVADBHĀVIKAJÑĀNA), a buddha's knowledge of each of the phenomena of the universe in its specificity. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (SATYADVAYA).

yāvadbhāvikajñāna. (T. ji snyed pa mkhyen pa'i ye shes; C. ruliang zhi; J. nyoryōchi; K. yŏryang chi 如量智). In Sanskrit, lit., "knowledge of the multiplicities" or "knowledge of the varieties"; a buddha's knowledge of each of the phenomena of the universe in its specificity. This type of knowledge is typically mentioned in conjunction with a buddha's "knowledge of the mode" (YATHĀVADBHĀVIKAJÑĀNA), which understands the single mode of being of the universe. Only a buddha possesses these two knowledges and possesses them simultaneously; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (SATYADVAYA).

yavana. (T. yol ba; C. biandi; J. henji; K. pyŏnji 邊地). In Sanskrit (from Greek Ionian), "peripheral" or "outlying regions"; referring to the regions beyond the civilizing influences of Buddhism and higher spiritual culture. The term was used to designate Greeks (Ionians) and later even Arab Muslims. In Buddhist cosmology, the term was used to designate regions north and west of India proper, which are inhabited by illiterate, barbaric peoples hostile to Buddhism. The birth into a "peripheral region" is considered to be one of the "insuperable difficulties" (see AKṢAṆA) to the attainment of enlightenment in the present lifetime. See also BIANDI.

Yazawin-kyaw. In Burmese, "Celebrated Chronicle"; the traditional title given to the MAHĀSAMMATAVAṂSA, the oldest extant yazawin, or Burmese (Myanmar) royal chronicle. It was completed in two installments by the monk MAHĀSĪLAVAṂSA of AVA, the first completed in 1502, the second in 1520. The chronicle is written in mixed Burmese and Pāli and contains the earliest surviving examples of the Burmese nissaya (Pāli to Burmese word-by-word translation) style of writing. The text follows roughly the outline of the MAHĀVAṂSA and devotes most of its coverage to the history of Buddhist dynasties in India and Sri Lanka. Only the last seventh of the work concerns the history of Burma from the time of the Buddha through the PAGAN (Bagan) and Ava periods. The text contains the assertion that the Buddhism of Burma was established by the elder Mahāpuṇṇa during the lifetime of the Buddha and hence is older and longer-lived than that of Sri Lanka. The Yazawin-kyaw concludes with an account of the meritorious deeds of Shwenan-kyaw-shin (r. 1502–1527), the king of Ava at the time the work was composed.

ye dharmā. In Sanskrit, lit. “those phenomena…”; the opening words of perhaps the most famous synopsis of the teachings of Buddhism; the full declaration in Sanskrit is “ye dharmā hetuprabhavā hetuṃ teṣāṃ tathāgato hy avadat teṣāṃ ca yo nirodha, evaṃ vādī mahāśramaṇaḥ”: “Of those phenomena produced through causes, the TATHĀGATA has proclaimed their causes (HETU) and also their cessation (NIRODHA). Thus has spoken the great renunciant (ŚRAMAṆA).” This statement plays a central role in the story of ŚĀRIPUTRA’S conversion. Śāriputra, who was a disciple of the agnostic teacher SAÑJAYA VAIRĀṬĪPUTRA, encountered one of the Buddha’s five original disciples (PAÑCAVARGIKA), AŚVAJIT. Noticing Aśvajit’s serene countenance, Śāriputra asked him who his teacher might be, to which Aśvajit replied that his teacher was the Buddha. When Śāriputra asked what it was that the Buddha taught, Aśvajit demurred, explaining that he had only recently renounced the life of a householder and was unable to present the teaching in full. Śāriputra asked Aśvajit to give him the gist of the Buddha’s teaching. Aśvajit replied with this famous ye dharmā line. Immediately upon hearing these words, Śāriputra is said to have gained the rank of stream-enterer (SROTAĀPANNA), the first stage of sanctity (ĀRYAMĀRGA). He then asked the whereabouts of the Buddha and was ordained, going on to become the disciple most renowned for his wisdom. Aśvajit’s précis points to the central importance of causality in the Buddha’s teachings and provides a kind of summary of the FOUR NOBLE TRUTHS. The Buddha has identified the causes (such as KARMAN and KLEŚA) of those things that have causes (such as suffering, S. DUḤKHA), and he has also identified their cessation in the experience of NIRVĀṆA. What may therefore have begun as a simple statement to mollify an eager questioner eventually became a slogan and ultimately a MANTRA, the very recitation of which was said to produce apotropaic powers. Like a mantra, the words of the ye dharmā slogan were often transcribed phonetically, rather than translated, into various languages across Asia. These words were also often written on strips of paper and enshrined in STŪPAS; they thus became a dharma-verse relic (ŚARĪRA), serving as a substitute for a bodily relic of the Buddha.

Yellow Hats. (C. huangmao 黄帽). A popular designation in both European languages and Chinese for the DGE LUGS sect of Tibetan Buddhism, whose monks do indeed wear yellow hats. Although the term zhwa gser, or “yellow hat,” does occur occasionally in Tibetan as a term of self-appellation for the Dge lugs, the Western and Chinese division of major Tibetan sects into Yellow Hats, RED HATS, and BLACK HATS has no corollary in Tibetan Buddhism and should be avoided.

Yel pa bka’ brgyud. (Yelpa Kagyü). One of the four major and eight minor subsects of the BKA’ BRGYUD sect of Tibetan Buddhism (BKA’ BRGYUD CHE BZHI CHUNG BRGYAD), originating with Ye shes brtsegs pa (b. 1134), a student of Bka’ brgyud hierarch PHAG MO GRU PA RDO RJE RGYAL PO. After a period of decline, it was revived by CHOS KYI ’BYUNG GNAS but was latter absorbed into KARMA BKA’ BRGYUD.

ye shes. (yeshe). In Tibetan, lit. “primordial knowledge,” with ye meaning “original” or “primordial.” The term renders the Sanskrit JÑĀNA; in the RNYING MA sect of Tibetan Buddhism, it refers to the originally pure mind. See RIG PA; JÑĀNA.

Ye shes mtsho rgyal. (Yeshe Tsogyal) (c. 757–817). A renowned female Tibetan Buddhist master, generally regarded as a wisdom ḌĀKINI and venerated especially as consort and disciple of the Indian adept PADMASAMBHAVA. Ye shes mtsho rgyal was born into an aristocratic family in central Tibet, south of LHA SA. According to traditional biographical accounts, a nearby lake miraculously swelled at the time of her birth and she was thus given the name “victor of the lake” (mtsho rgyal). This lake, near the cave complex of SGRAG YANG RDZONG, is believed to still hold Ye shes mtsho rgyal’s life essence (bla). Her remarkable beauty even at a young age drew numerous suitors, but rather than submit to a marriage arranged by her father, she fled in order to undertake religious practice. She spent a brief period of time in the court of the Tibetan ruler KHRI SRONG LDE BTSAN (perhaps as one of his wives), after which she met Padmasambhava and was accepted as one of his chief disciples. In addition to receiving and practicing numerous tantric instructions, Ye shes mtsho rgyal helped to conceal many of Padmasambhava’s treasure teachings (GTER MA), many of which are said to be her transcriptions of Padmasambhava’s teachings. She is regarded as the first Tibetan to achieve buddhahood in a single lifetime. As a wisdom ḍākinī, she is also known as Bde chen rgyal mo (“Great Bliss Queen”).

Ye shes ’od. (Yeshe Ö) (947–1024). A Tibetan king of the western region of GU GE credited with inspiring a revival of Buddhism that initiated the latter dissemination (PHYI DAR) of Buddhism in Tibet. He decried the state of Tibetan Buddhist practice, especially the practice of TANTRA, in a famous ordinance (bka’ shog), complaining that people were engaging in murder and illicit sex under the guise of the tantric practices of “liberation” (grol) and “union” (sbyor). According to a famous story, Ye shes ’od was captured by a Gar log Turk chieftain while seeking to raise the capital necessary to invite ATIŚA DĪPAṂKARAŚRĪJÑĀNA to Tibet. He then sacrificed his own life by commanding his grandnephew BYANG CHUB ’OD to use whatever gold had been accumulated not as a ransom for his own release, but rather as an offering to the Indian scholar. Atiśa was so moved by the king’s act of selflessness that, despite his previous declinations, he agreed to make the journey north. Traditional accounts also suggest that Ye shes ’od sponsored a group of twenty-two young scholars to study Indian languages and tantric literature in Kashmir (see KASHMIR-GANDHĀRA), of whom only two survived: the translators RIN CHEN BZANG PO and RNGOG LEGS PA’I SHES RAB. Both the story of his noble death for the sake of Atiśa’s invitation and the story of his sponsorship of Rin chen bzang po present difficulties in chronology, suggesting that they are embellishments. He is also credited with inspiring the establishment of numerous religious institutions, including THO LING, NYAR MA, and TA PHO. He is also known as Lha bla ma (Lha Lama).

Ye shes sde. (Yeshe De) (fl. late eighth/early ninth century). A Tibetan translator (LO TSĀ BA) during the early dissemination (SNGA DAR) of Buddhism in Tibet; a native of Ngam shod of the Sna nam clan, also referred to by the clan name Zhang. He is said to have been a disciple of both PADMASAMBHAVA and ŚRISIṂHA, from whom he received tantric instructions, especially in the SEMS SDE (mind class) of RDZOGS CHEN. He collaborated with some fifteen Indian scholars, among them Jinamitra, Śīlendrabodhi, and Dānaśīla, on the translation of as many as 347 different works, if the later canonical records are correct. His translations includes upwards of 163 Mahāyāna sūtras, among them the PRAJÑĀPĀRAMITĀ, AVATAṂSAKASŪTRA, and RATNAKŪṬASŪTRA collections, translations of the YOGĀCĀRABHŪMI and other basic MADHYAMAKA and YOGĀCĀRA treatises, as well as a number of works by his contemporaries ŚĀNTARAKṢITA and KAMALAŚĪLA. He is also credited with the translation of tantric works that would come to be known as the “old translations” used by the RNYING MA sect. He is said to have been a practitioner of the VAJRAKĪLAYA tantras. He is also author of a number of original compositions, among them the *Lta ba’i khyad par* (“Differences in Views”), preserved in both a BSTAN ’GYUR and DUNHUANG version, which divides the Madhyamaka school into Sautrāntika-Madhyamaka and Yogācāra-Madhyamaka. See also DPAL BRTSEGS; KLU’I RGYAL MTSHAN.

yi bao. (C) (依報). See ER BAO.

yi dam. In Tibetan, a term often translated as “meditational deity” or “tutelary deity.” In the practice of Buddhist tantra, it is the enlightened being, whether male or female, peaceful or wrathful, who serves as the focus of one’s SĀDHANA practice. One is also to visualize one’s tantric teacher (VAJRĀCĀRYA) as this deity. The term is of uncertain origin and does not seem to be a direct translation of a Sanskrit term, although iṣṭadevatā is sometimes identified with the term. The etymology that is often given sees the term as an abbreviation of yid kyi dam tshig, meaning “commitment of the mind.” Traditionally, the yi dam is selected by throwing a flower onto a MAṆḌALA, with the deity upon whom the flower lands becoming the “chosen deity.” However, when one receives a tantric initiation, the central deity of that tantra typically becomes the yi dam, with daily practices of offering and meditation often required. Through the propitiation of the deity and recitation of MANTRA, it is said that the deity will bestow accomplishments (SIDDHI). In the practice of DEVATĀYOGA, one meditates upon oneself as that deity in order to achieve buddhahood in the form of that deity. The yi dam is considered one of the three roots (rtsa gsum) of tantric practice, together with the GURU and the ḌĀKINĪ: the guru is considered to be the source of blessings; the yi dam, the source of accomplishments; and the ḍākinī, the source of activities. These three roots are considered the inner refuge, with the Buddha, DHARMA, and SAṂGHA being the outer refuge, and the channels (NĀḌI), winds (PRĀṆA), and drops (BINDU) being the secret refuge.

yidashi. (一大事). In Chinese, the “one great matter.” See DASHI.

Yifu. (J. Gifuku, K. Ŭibok 義福) (661–736). Chinese CHAN master associated with the Northern school (BEI ZONG) of the early Chan tradition. Yifu was a native of Luzhou prefecture in present-day Shanxi province, who became a student of the lay master DU FEI (d.u.), the author of the CHUAN FABAO JI, at Fuxiansi in Luoyang. After Yifu received the full monastic precepts in 690, he went to the monastery of YUQUANSI in Jingzhou prefecture to study with the eminent Chan master SHENXIU. Yifu became Shenxiu’s close disciple and continued to study under him probably until his master’s death. Later, Yifu moved to the monastery of Huagansi on ZHONGNANSHAN, where he lived for about twenty years. During his stay at Huagansi, Yifu attracted a large following. In 722, he moved again to the grand monastery of DACI’ENSI in Chang’an, where he was patronized by the upper echelons of Tang Chinese society. At the request of Emperor Xuanzong (r. 712–756), Yifu returned once again to Luoyang and resided at the monasteries of Fuxiansi and Nanlongxingsi. He received the posthumous title Chan Master Dazhi (Great Wisdom).

yi ge brgya pa. (yi ge gyapa). In Tibetan, “hundred-syllable MANTRA”; term used to describe a number of lengthy MANTRAS, most commonly that of VAJRASATTVA, recited as part of a Tibetan tantric confession and purification practice. This is one of the preliminary practices (SNGON ’GRO) of the RNYING MA sect of Tibetan Buddhism, involving one hundred thousand repetitions of the Vajrasattva mantra.

yiji. (J. yuige; K. yuge 遺偈). In Chinese, “bequeathed verse” or “death verse”; a verse (C. ji; lit. S. GĀTHĀ) left by eminent monks and nuns, especially in the CHAN school, just before the moment of death, as a final expression of their enlightenment experience; also called a “taking leave of the world hymn” (cishi song) or, especially in the Korean tradition, a “moment of death gāthā” (imjongge). The verse may be either recited or written and is left as the master’s last bequeathed teaching immediately before he passes away, often delivered as part of a final sermon. The final instructions of a buddha or a monk for the edification of his disciples are referred to as a “bequeathed teaching” (yijiao; see also YIJIAO JING), and the tradition of specifically bequeathing a verse as part of this final instruction is thought to have originated in the Tang-dynasty Chan tradition. Such bequeathed verses usually consisted of four lines of four, five, or seven Sinographs per line and thus are similar in format to other types of verses found within the Chan tradition, such as an "enlightenment hymn" (C. wudao song), the verse recited by a student upon achieving enlightenment, and "dharma-transmission gāthā" (C. chuanfa ji), the verse bestowed on a dharma successor as an authorization to teach. As an example of such a bequeathed verse, Hongzhi Zhengjue (1091–1157), a well-known teacher in the Caodong zong, is said to have written the following gāthā just before his death: "An illusory fantasy and a flower in the sky (khapuṣpa),/ Are these sixty-seven years,/ A white bird fades into the mist,/ The autumnal waters merge with the sky." Not all renowned Chan masters left yiji and others derided the practice. The yiji of Dahui Zonggao (1089–1163), the influential Linji zong master and a contemporary of Hongzhi, expressed ironically his indifference to yiji: "Birth is thus,/ Death is thus,/ Verse or no verse,/ What's the fuss?" In Japan, handwritten death verses were treasured as precious calligraphic art and a virtual relic of the deceased master. They were thus often hung in the abbot's quarters (J. hōjō, C. fangzhang) or in the retirement cloisters.

Yijiao jing. (J. Yuikyōgyō; K. Yugyo kyŏng 遺教經). In Chinese, "Scripture on the Bequeathed Teachings"; also known as *Foshuo banniepan jiaojie jing* ("Scripture on the Admonishments Taught by the Buddha [before] his Parinirvāṇa") and *Fo yijiao jing* ("Scripture on the Teachings Bequeathed by the Buddha"). Sanskrit and Tibetan versions of this text are not known to have existed. The Chinese translation of this text is attributed to Kumārajīva, but the text is now widely assumed to be an indigenous Chinese Buddhist scripture (see apocrypha). The sūtra is set against the backdrop of the Buddha's parinirvāṇa, when he imparts his final instructions to the gathered disciples. The Buddha instructs his disciples to uphold the precepts and regard them as their teacher after his entry into parinirvāṇa. He then instructs them to control sensuality (kāma) and cultivate serenity and dhyāna. Finally, the Buddha asks the assembly if they have any questions regarding the four noble truths. When no one replies, the Buddha succinctly expounds upon impermanence and the need to seek liberation (vimokṣa). This sūtra bears striking resemblances in style and content to the Mahāparinibbānasutta and Aśvaghoṣa's Buddhacarita. Along with the Sishi'er zhang jing and Guishan jingce, the *Yijiao jing* has been cherished by the Chan tradition for its simple and clear exposition. Sometime during the late Tang and early Song dynasties, the three texts were edited together as the *Fozu sanjing* ("The Three Scriptures of the Buddhas and Patriarchs") and recommended to Chan neophytes.

yijing. (C) (疑經). In Chinese, lit. "suspicious scriptures" or "scriptures of doubtful [provenance]." See apocrypha.

Yijing. (J. Gijō; K. Ŭijŏng 義淨) (635–713). Chinese Buddhist monk and pilgrim. Ordained at the age of twenty, Yijing dreamed of following in the footsteps of the renowned pilgrims Faxian and Xuanzang. He eventually set out for India in 671 via the southern maritime route. After visiting the major Indian pilgrimage sites (see mahāsthāna), Yijing traveled to the monastic university at Nālandā, where he remained for the next ten years. On his return trip to China, Yijing stopped at Śrīvijaya (Palembang in Sumatra) to continue his studies. He praised the monks there for their high level of learning, describing them as primarily hīnayāna in affiliation. It was in Śrīvijaya that he began to compose his record of his travels, the Nanhai jigui neifa zhuan, which remains an important source on the practice of Buddhism in the many regions where he traveled and for understanding the various nikāya affiliations of the period. It was also during his time in Śrīvijaya that Yijing began his translation of the massive Mūlasarvāstivāda vinaya. When he ran out of paper and ink, he made a brief trip back to China in 689 to retrieve more writing supplies and then returned to Śrīvijaya. After a thirty-year sojourn overseas, Yijing finally returned to China in 695 with some four hundred Sanskrit texts and three hundred grains of the Buddha's relics (śarīra). Yijing was warmly welcomed in the capital of Luoyang by Empress Wu Zetian, who appointed him to the monastery of Foshoujisi. Later, from 695 to 699, Yijing participated in Śikṣānanda's new translation of the Avataṃsakasūtra and devoted the next decade or so to the translation of the scriptures that he had brought back with him from India. In addition to the Mūlasarvāstivāda vinaya, his translations also include several important Yogācāra treatises and tantras. His writings also include a collection of the biographies of renowned East Asian Buddhist pilgrims to India, the Da Tang xiyu qiufa gaoseng zhuan.

yijing sanzang. (J. yakukyō sanzō; K. yŏkkyŏng samjang 譯經三藏). In Chinese, lit. "master of the three repositories, translator of scriptures." See trepiṭaka.

Yingluo jing. (C) (瓔珞經). See Pusa yingluo benye jing.

Yinguang. (J. Inkō; K. In'gwang 印光) (1862–1940). Chinese monk renowned for his efforts to revitalize modern Chinese Buddhism, especially of the pure land tradition; also sometimes referred to as the thirteenth patriarch of the Chinese jingtu school and as Chang Cankui Seng (Forever Ashamed Monk). Yinguang was a native of Geyang in Shaanxi province. At a young age, Yinguang suffered from an eye ailment, probably conjunctivitis, which he is said to have cured by studying the Buddhist scriptures. He was formally ordained later at the monastery of Xing'an Shuangqisi in his home province. Yinguang's interest in pure land thought and practice is said to have been catalyzed by his encounter with the writings of the Chan master Jixing Chewu (1741–1810), who came to be known as the twelfth patriarch of the pure land tradition in

China. For more than twenty years, he resided in isolation at the monastery of Fayusi on the sacred mountain of PUTUOSHAN, where he studied the scriptures and practiced the recitation of the name of the buddha AMITĀBHA (NIANFO; cf. NAMU AMIDABUTSU). Yinguang's reputation grew with the publication of his private correspondences and his collected essays known as *Jingtu jueyi lun* ("Treatise on Resolving Doubts about the Pure Land"). His writings were often critical of Chan and emphasized the efficacy of pure land practice instead. Yinguang also worked to restore monasteries and to republish important pure land writings until his death in 1940. See also TAIXU; XUYUN.

yingwu Chan. (J. ōmuzen; K. aengmu Sŏn 鸚鵡禪). In Chinese, lit. "parrot Chan"; a CHAN Buddhist expression referring to the way some practitioners merely parrot with their mouths the pithy sayings and GONG'AN dialogues of the patriarchs and masters (ZUSHI), but fail to realize their true message and attain enlightenment for themselves. This pejorative description is also applied to pundits of the traditional Buddhist scholastic schools (C. jiao, see K. KYO), whose intellectual erudition and doctrinal prowess were caricatured as "parrot Chan," in contrast to the Chan school's supposed subitist spiritual approach that did not rely on mere intellectual understanding (see BULI WENZI). These pundits are likened to parrots in that they also mimic other people's understanding through their doctrinal exegeses, but without comprehending it themselves. Cf. KOUTOU CHAN.

yingyan. (應驗). In Chinese, "responsive attestation." See GANYING.

yinian sanqian. (J. ichinen sanzen; K. illyŏm samch'ŏn 一念三千). In Chinese, lit. "the TRICHILIOCOSM in a single instant of thought"; a TIANTAI teaching that posits that any given thought-moment perfectly encompasses the entirety of reality both spatially and temporally. An instant (KṢAṆA) of thought refers to the shortest period of time and the trichiliocosm (TRISĀHASRAMAHĀSĀHASRALOKADHĀTU) to the largest possible universe; hence, according to this teaching, the microcosm contains the macrocosm and temporality encompasses spatiality. Thus, whenever a single thought arises, there also arise the myriad dharmas; these two events occur simultaneously, not sequentially. Any given thought can be categorized as belonging to one of the ten realms of reality (DHARMADHĀTU). For example, a thought of charity metaphorically promotes a person to the realm of the heavens at that instant, whereas a subsequent thought of consuming hatred metaphorically casts the same person into the realm of the hells. Tiantai exegetes also understood each of the ten dharmadhātus as containing and pervading all the other nine dharmadhātus, making one hundred dharmadhātus in total (ten times ten). In turn, each of the one hundred dharmadhātus contains "ten aspects of reality" (or the "ten suchnesses"; see SHI RUSHI) that pervade all realms of existence, which makes one thousand "suchnesses" (qianru, viz., one hundred dharmadhātus times ten "suchnesses"). Finally the one thousand "suchnesses" are said to be found in the categories of the "five aggregates" (SKANDHA), "sentient beings" (SATTVA), and the physical environment (guotu). These three latter categories times the one thousand "suchnesses" thus gives the "three thousand realms," which are said to be present in either potential or activated form in any single moment of thought. This famous dictum is attributed to the eminent Chinese monk TIANTAI ZHIYI, who spoke of the "trichiliocosm contained in the mind during an instant of thought" (sanqian zai yinian xin) in the first part of the fifth roll of his magnum opus, MOHE ZHIGUAN. Zhiyi's discussion of this dictum appears in a passage on the "inconceivable realm" (ACINTYA) from the chapter on the proper practice of ŚAMATHA and VIPAŚYANĀ. Emphatically noting the "inconceivable" ability of the mind to contain the trichiliocosm, Zhiyi sought through this teaching to emphasize the importance and mystery of the mind during the practice of meditation. Within the context of the practice of contemplation of mind (GUANXIN), this dictum also anticipates a "sudden" theory of awakening (see DUNWU). TIANTAI exegetes during the Song dynasty expanded upon the dictum and applied it to practically every aspect of daily activity, such as eating, reciting scriptures, and ritual prostration. See also SHANJIA SHANWAI.

yinke. (J. inka; K. in'ga 印可). In Chinese, lit. "seal of/in approval," "certification" and often seen in Western sources in its Japanese pronunciation inka; a seal of approval, certification, or transmission, which is given by masters in the various CHAN traditions across East Asia to practitioners who, in their estimation, have attained a satisfactory level of awakening or maturity of understanding to serve as public exponents of their lineage. Because these lineages are presumed to trace back to BODHIDHARMA, the founder of the Chan school, and ultimately to the person of the Buddha himself, the person who receives such certification is considered to be qualified to speak for the current generation of Chan adepts on behalf of the Chan patriarchs, masters, and even the Buddha, to accept and train students, and to give them certification in turn once their training is complete. The manner of certification differs within traditions. Certification often entails admission into the master's lineage; the conferral of such symbols of religious authority and memorial worship as robes, bowls, chowries (BINGFU), or portraits; and the right to serve in high ecclesiastical office in a sectarian monastery. In the modern ZEN traditions of Japan, certification is offered by a RŌSHI, a teacher who has himself been previously certified. Especially in the Japanese traditions, receiving inka need not necessarily be testimony to the profundity of a person's enlightenment experience, but may simply be public recognition that a student has sufficient maturity and ability to serve as abbot or hold other high ecclesiastical office in the monasteries and temples of a specific sectarian lineage. In some cases, yinke is an abbreviation for yinke zhengming, or "certification via seal of approval." Certification is also known as yinding (seal of meditation), renke (acceptance and approval), and yinzheng (seal and certify). See also CHUANFA; FASI.

yinke zhengming. (J. inka shōmyō; K. in'ga chŭngmyŏng 印可證明). In Chinese, "certification via a seal of approval." See YINKE.

yinsheng nianfo. (J. inshō nenbutsu/inzei nenbutsu; K. insŏng yŏmbul 引聲念佛). In Chinese, "intoning [the name of] the Buddha by drawing out the sound" (see NIANFO); one of the "five-tempo intonations of [the name of] the Buddha" (WUHUI NIANFO) devised by FAZHAO. Yinsheng nianfo involves the long, drawn-out intonation of the name of the buddha AMITĀBHA. Even before Fazhao, the practice of yinsheng nianfo is known to have been practiced by the CHAN master CHŎNGJUNG MUSANG (680–756 [alt. 684–762]), who recommended this practice for those who wished to attain "no recollection" (wuyi), "no thought" (WUNIAN), and "no forgetting" (mowang).

Yinyuan Longxi. (J. Ingen Ryūki 隱元隆琦) (1592–1673). Chinese CHAN master and founding patriarch of the Japanese ŌBAKUSHŪ. Yinyuan was a native of Fuzhou, in present-day Fujian province. He began his training as a monk in his early twenties on PUTUOSHAN and was formally ordained several years later at Wanfusi on Mt. Huangbo. Yinyuan continued his training under the Chan master MIYUN YUANWU and, while serving under the Chan master FEIYIN TONGRONG at Wanfusi Yinyuan, was formally recognized as an heir to Feiyin's lineage in 1633. Seven years later, in 1640, Yinyuan found himself at the monastery of Fuyansi in Zhejiang province and at Longquansi in Fujian province in 1645. The next year, in 1646, he returned to Mt. Huangbo and revitalized the community at Wanfusi. In 1654, at the invitation of Yiran Xingrong (1601–1668), the abbot of the Chinese temple of Kōfukuji in Nagasaki, Yinyuan decided to leave China to escape the succession wars and political turmoil that had accompanied the fall of the Chinese Ming dynasty. He was to be accompanied by some thirty monks and artisans. Due to political issues, however, Yinyuan was only allowed to enter Japan a year later in 1655. That same year, largely through the efforts of the Japanese monk Ryōkei Shōsen (1602–1670), the abbot of MYŌSHINJI, Yinyuan was allowed to stay at Ryōkei's home temple of Fumonji under virtual house arrest. The next year when Yinyuan expressed his wishes to return to China, Ryōkei arranged a visit to Edo and an audience with the young shōgun. At the end of 1658, Yinyuan made the trip to Edo and won the patronage of the shōgun and his ministers. With their support, Yinyuan began the construction of MANPUKUJI in Uji in 1661. The site came to be known as Mt. Ōbaku, the Japanese pronunciation of his mountain home of Huangbo, and served as the center for the introduction of Ming-dynasty Chan into Japan. Yinyuan's teachings, especially those concerning monastic rules, catalyzed institutional and doctrinal reform among the entrenched Japanese ZEN communities. In 1664, Yinyuan left his head disciple MU'AN XINGTAO in charge of all administrative matters involving the monastery and retired to his hermitage on the compounds of Manpukuji. Nine years later Emperor Gomizunoo (r. 1611–1629) bestowed upon him the title state preceptor (J. kokushi, C. GUOSHI) Daikō Fushō (Great Radiance, Universal Illumination). He died shortly thereafter. Yinyuan brought many texts and precious art objects with him from China, and composed numerous texts himself such as the *Huangbo yulu*, *Hongjie fayi*, *Fushō kokushi kōroku*, *Ōbaku oshō fusō goroku*, *Ingen hōgo*, and *Ōbaku shingi*.

Yiqiejing yinyi. (J. Issaikyō ongi; K. Ilch'egyŏng ŭmŭi 一切經音義). In Chinese, "Pronunciation and Meaning of All the Scriptures"; a specialized Chinese glossary of Buddhist technical terminology. As more and more Indian and Central Asian texts were being translated into Chinese, the use of Sanskrit and Middle Indic transcriptions and technical vocabulary increased, leading to the need for comprehensive glossaries of these abstruse terms. Because of the polysemous and sacred character of such Buddhist doctrinal concepts as BODHI, NIRVĀṆA, and PRAJÑĀ, many Chinese translators also preferred to transcribe rather than translate such crucial terms, so as not to limit their semantic range to a single Chinese meaning. The Indian pronunciations of proper names were also commonly retained by Chinese translators. Finally, the spiritual efficacy thought to be inherent in the spoken sounds of Buddhist spells (MANTRA) and codes (DHĀRAṆĪ) compelled the translators to preserve as closely as possible in Chinese the pronunciation of the Sanskrit or Middle Indic original. By the sixth century, the plethora of different transcriptions used for the same Sanskrit Buddhist terms led to attempts to standardize the Chinese transcriptions of Sanskrit words, and to clarify the obscure Sinographs and compounds used in Chinese translations of Buddhist texts. This material was compiled in various Buddhist "pronunciation and meaning" (yinyi) lexicons, the earliest of which was the twenty-five-roll *Yiqiejing yinyi* compiled by the monk Xuanying (fl. c. 645–656). Xuanying, a member of the translation bureau organized in the Chinese capital of Chang'an by the renowned Chinese pilgrim, translator, and Sanskritist XUANZANG (600/602–664), compiled his anthology in 649 from 454 of the most important MAHĀYĀNA, ŚRĀVAKAYĀNA, VINAYA, and ŚĀSTRA materials, probably as a primer for members of Xuanzang's translation team. His work is arranged by individual scripture, and includes a roll-by-roll listing and discussion of the problematic terms encountered in each section of the text. For the more obscure Sinographs, the entry provides the fanqie (a Chinese phonetic analysis that uses paired Sinographs to indicate the initial and final sounds of the target character), the Chinese translation, and the corrected transcription of the Sanskrit, according to the phonologically sophisticated transcription system developed by Xuanzang. Xuanying's compendium is similar in approach to its predecessor in the secular field, the *Jingdian shiwen*, compiled during the Tang dynasty in thirty rolls by Lu Deming (c. 550–630). The monk Huilin (783–807) subsequently incorporated all of Xuanying's terms and commentary into an expanded glossary that included difficult terms from more than 1,300 scriptures; Huilin's expansion becomes the definitive glossary used within the tradition. Still another yinyi was compiled later during the Liao dynasty by the monk Xilin (d.u.). In addition to their value in establishing the Chinese interpretation of Buddhist technical terms, these "pronunciation and meaning" glossaries also serve as important sources for studying the Chinese phonology of their times.

yiqing. (J. gijō; K. ŭijŏng 疑情). In Chinese, lit. the "sensation of doubt," or simply "doubt"; a feeling of puzzlement and sense of questioning that is a crucial factor in the meditation technique of "questioning meditation" (KANHUA CHAN) as systematized by DAHUI ZONGGAO (1089–1163). In the kanhua technique, doubt refers to the puzzlement and perplexity that the meditator feels when trying to understand the conundrum that is the GONG'AN (public case) or HUATOU (meditative topic). This doubt arises from the inability to understand the significance of the huatou through rational thought. This loss of confidence in one's conceptual and intellectual faculties releases the mind from the false sense of security engendered through habitual ways of thinking, creating a feeling of frustration that is often compared to "a mosquito trying to bite an iron ox." The meditator's sense of self ultimately becomes so identified with the huatou that the intense pressure created by the doubt "explodes" (C. po), freeing the mind from the personal point of view that is the self. Hence, by cutting off conceptualization and producing a state of intense concentration, the sensation of doubt helps to impel meditation forward toward the experience of awakening (WU). The term "sensation of doubt" was not coined by Dahui. One of its earliest usages is in the enlightenment poem of Luohan Guichen (867–928), the teacher of FAYAN WENYI (885–958), which describes enlightenment as shattering the "ball of doubt" (YITUAN). Dahui's grandteacher, WUZU FAYAN (d. 1104), also taught his students to keep the great ball of doubt. But it was Dahui who put doubt at the core of his interpretation of kanhua Chan meditation; for him, the sensation of doubt becomes an effective antidote to conceptual thinking as well as the force that drives the student forward toward enlightenment. The Chinese term yi is also used as the translation for the Sanskrit term VICIKITSĀ, or skeptical doubt, which was one of the five hindrances (NĪVARAṆA) to meditative absorption (DHYĀNA). But rather than being viewed as it had been in India as a hindrance, in Dahui's interpretation doubt instead plays a crucial role in the meditative process.

Yishan Yining. (J. Issan Ichinei; K. Ilsan Illyŏng 一山一寧) (1247–1317). Chinese CHAN master in the LINJI ZONG; a native of Taizhou prefecture in present-day Zhejiang province. At a young age, Yishan became a student of a certain Wudeng Rong (d.u.) at the monastery of Hongfusi on Mt. Fu near his hometown in Taizhou. He was later ordained at the monastery of Puguangsi in Siming in Zhejiang province and continued to study VINAYA at Yingzhensi and TIANTAI thought and practice at Yanqingsi. Yishan then began his training in Chan under several teachers. He eventually became a disciple of Wanji Xingmi (d.u.), a disciple of the Chan master CAOYUAN DAOSHENG. In 1299, the Yuan emperor Chengzong (r. 1294–1307) bestowed upon him the title Great Master Miaoci Hongji (Subtle Compassion, Universal Salvation) and an official post as the overseer of Buddhist matters in Zhejiang. That same year, he was sent to Japan as an envoy of the court, but was detained temporarily at the temple of Shūzenji in Izu by the Kamakura shogunate. When the Hōjō rulers learned of Yishan's renown in China, Yishan was invited to reside as abbot of the powerful monasteries of KENCHŌJI, ENGAKUJI, and Jōchiji in Kamakura. In 1313, Yishan was invited by the retired Emperor Gouda (r. 1274–1287) to reside as the third abbot of the monastery NANZENJI in Kyōto. Yishan had many students in Japan including the eminent Japanese monk MUSŌ SOSEKI. Yishan became ill and passed away in the abbot's quarters (J. hōjō; C. FANGZHANG) of Nanzenji in 1317. The emperor bestowed upon him the title state preceptor (J. kokushi; C. GUOSHI) Issan (One Mountain). Yishan is also remembered for his calligraphy and for introducing to Japan the new commentaries written by the great Neo-Confucian scholar Zhu Xi (1130–1200) to Japan. He and his disciples, such as Shiliang Rengong (1266–1334), Mujaku Ryōen (d.u.), Monkei Ryōsō (d. 1372), and Tōrin Yūkyū (d. 1369), contributed much to the development of GOZAN culture in Japan.

yishen. (J. yuishin; K. yusin 遺身). In Chinese, lit., "to let go of the body," viz., "self-immolation." See SHESHEN.

Yisheng xianxing jiao. (C) (一乘顯性教). See HUAYAN WUJIAO.

yituan. (J. gidan; K. ŭidan 疑團). In Chinese, "ball of doubt"; also referred to as dayituan, or "great ball of doubt." Although the term appears in a verse recorded in the JINGDE CHUANDENG LU that is attributed to Luohan Guichen (867–928), the teacher of FAYAN WENYI, it was the CHAN master DAHUI ZONGGAO who systematized and popularized its use. Dahui probably inherited the notion of a ball of doubt from his teacher YUANWU KEQIN, whose teacher WUZU FAYAN also mentions a ball of doubt in his teachings. Dahui described the arousal of the sensation of doubt (YIQING) or the ball of doubt as an important tool in his meditative approach called KANHUA CHAN, or investigation of the meditative "topic" (HUATOU).

yixin. (S. ekacitta; J. isshin; K. ilsim 一心). In Chinese, "one mind"; the ground of being and the principle (LI) foundational to all phenomena (SHI). The LAṄKĀVATĀRASŪTRA and the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāyāna"), both central texts in the TATHĀGATAGARBHA corpus of literature, treat the "one mind" as a central doctrine. The *Laṅkāvatārasūtra* states that the "calm extinction [of NIRVĀṆA] is called the one mind, and this one mind is called the tathāgatagarbha." The *Dasheng qixin lun* presents all of Buddhism in terms of the one mind and its two aspects: the mind's true-thusness aspect (xin zhenru men) and production-and-cessation aspect (xin shengmie men). The *Dasheng qixin lun*, arguably the most influential tathāgatagarbha text within the East Asian Buddhist tradition, has long been considered the principal treatise outlining the doctrine of the one mind and its associations with the YOGĀCĀRA theory of consciousness and tathāgatagarbha thought. ¶ The exegeses to the *Dasheng qixin lun* by JINGYING HUIYUAN (523–592), WŎNHYO (617–686), and FAZANG (643–712), which the tradition has regarded as its three major commentaries (san dashu), have each elucidated in considerable detail the foundational role that the notion of the one mind plays in that text. Fazang, for example, glossed the one mind of the *Dasheng qixin lun* as the "one tathāgatagarbha mind" and thus identified the one mind with the tathāgatagarbha; the two aspects of the one mind, true thusness and production-and-cessation, were correlated, respectively, with either MADHYAMAKA and YOGĀCĀRA or principle (li) and phenomena (shi). Fazang thus places tathāgatagarbha thought above both the SAN LUN ZONG (the Chinese analogue of the Madhyamaka school) and the FAXIANG ZONG (Yogācāra) teachings in his doctrinal taxonomy (panjiao; see JIAOXIANG PANSHI). By contrast, Huiyuan's commentary treats the one mind within the context of the nine-consciousnesses theory of the SHE LUN ZONG, an early Yogācāra-oriented strand of Chinese Buddhist thought. In his analysis of the two aspects of the one mind, Huiyuan correlates the true-thusness aspect of the one mind with the ninth "immaculate consciousness" (AMALAVIJÑĀNA); he correlates the production-and-cessation aspect of the one mind with the eighth "storehouse consciousness" (ĀLAYAVIJÑĀNA). Unlike Fazang's interpretation, tathāgatagarbha is here not identified with the one mind but is instead viewed as the production-and-cessation aspect of the mind. In Wŏnhyo's case, rather than seeking as Fazang did to distinguish the Faxiang teachings of Yogācāra from tathāgatagarbha thought, he sought instead to reconcile the Faxiang perspective on consciousness with the *Dasheng qixin lun*'s analysis of mind. Like Huiyuan, Wŏnhyo identified the tathāgatagarbha with the production-and-cessation aspect of the one mind. ¶ The one mind is also a central theme of the ZONGJING LU, an encyclopedic CHAN anthology compiled by YONGMING YANSHOU (904–976) in the FAYAN ZONG, which seeks to unify the various Chinese schools of Buddhism, including HUAYAN, Yogācāra, and TIANTAI, and to demonstrate the compatibility of doctrinal teachings and meditative practice. Yanshou draws on the doctrinal classification schema of GUIFENG ZONGMI (780–841), the Chan scholiast who was also the fifth patriarch of the Huayan school, in positing three broad strands of Buddhist teaching: dharma characteristics (Faxiang zong), destruction of characteristics (Poxiang), dharma nature (FAXING ZONG). Yanshou states that the Faxing (dharma nature) teachings, which include both the Huayan and Chan schools and which are based on tathāgatagarbha thought, treat both aspects of true thusness or the one mind, that is, the aspect of "immutability" (bubian) and "adaptability" (lit., "according to conditions," suiyuan); the Faxiang (dharma characteristics) teachings, by contrast, only treat the aspect of "adaptability." ¶ In the TIANTAI school, one mind or sometimes one thought (yinian) is said to be the ground of all things in existence in both their tainted and pure manifestations, a notion expressed in the aphorism "one thought [contains] the TRICHILIOCOSM" (YINIAN SANQIAN), one of the main doctrines of the school. The Tiantai teaching that "one mind," viz., a single instance of thought, contains all three "viewpoints" (yixin sanguan) also expresses how the three inseparable aspects of phenomena (SANDI)—viz., the truth of emptiness (kongdi), the truth of being only provisionally real (jiadi), and the truth of the mean (zhongdi)—are each contained in one thought moment. In the PURE LAND tradition, one mind generally refers to single-minded recollection (NIANFO) of, especially, the buddha AMITĀBHA, and is a synonym of one-pointedness of mind.

yixin chuanxin. (J. ishin denshin; K. isim chŏnsim 以心傳心). In Chinese, "mind-to-mind transmission." An oft-repeated phrase used mainly by the East Asian CHAN traditions to refer to a special transmission of the "mind" of the Buddha from master to disciple in a "telepathic" way that does not rely on words or letters (see JIAOWAI BIECHUAN and BULI WENZI). In an attempt to distinguish itself from the other Buddhist traditions that sought the teachings of the Buddha in sūtras and commentaries, the burgeoning Chan tradition of the eighth and ninth centuries emphasized the nonverbal transmission of the Buddha's teachings. The notion of mind-to-mind transmission has thus served as an important trope in the self-fashioning of the Chan tradition. Mind-to-mind transmission is often explained by reference to a famous Chan legend that first appears in the *Tiansheng guangdeng lu*. While at Vulture Peak (GṚDHRAKŪṬAPARVATA), the Buddha is said to have raised a flower in front of a large assembly, whereupon the elder MAHĀKĀŚYAPA smiled in response. The Buddha then announced that he had thereby entrusted his "treasury of the true dharma eye" (ZHENGFAYANZANG) to Mahākāśyapa, thus recognizing him as the Buddha's successor and first patriarch (ZUSHI). For this legend, see NIANHUA WEIXIAO.

Yixing. (J. Ichigyō; K. Irhaeng 一行) (683–727). In Chinese, "Single Practice"; a famous student of CHAN and master of esoteric Buddhism (MIJIAO), translator, and distinguished astronomer. Yixing was a native of Julu prefecture in present-day Hebei province. He became a monk under the eminent Chan master PUJI (651–739) in the Northern school (BEI ZONG) of the early Chan tradition and also studied the VINAYA under a monk by the name of Huizhen (d.u.). Having made a name for himself at the monastery of Guoqingsi on Mt. Tiantai, in 717, Yixing was invited by Emperor Xuanzong (r. 712–756) to the palace in Luoyang. While residing at the palace, Yixing became a disciple of the TREPIṬAKA ŚUBHAKARASIṂHA and, together, they translated the MAHĀVAIROCANĀBHISAṂBODHISŪTRA. Based on Śubhakarasiṃha's oral interpretations provided in the course of preparing their translation, Yixing also composed an important commentary on the sūtra, the *Darijing shu*. In 727, Yixing's reputation in astronomy and calendrics prompted the emperor to have him devise a new calendar, which is known as the Dayan li. Yixing also devised an elaborate celestial globe, which used hydraulic power to portray the precise movements of the sun, moon, and constellations across the firmament. After his death, he was bestowed the posthumous title Chan master Dahui (Great Wisdom).

yixing sanmei. (S. ekavyūhasamādhi; J. ichigyō zanmai; K. irhaeng sammae 一行三昧). In Chinese, "single-practice SAMĀDHI." The term yixing sanmei seems to first appear in a passage in the Chinese translation of the SAPTAŚATIKĀPRAJÑĀPĀRAMITĀSŪTRA: "The DHARMADHĀTU has only a single mark; to take the dharmadhātu as an object is called one-practice samādhi." Two practices are then recommended by the text for cultivating yixing sanmei, viz, the perfection of wisdom (PRAJÑĀPĀRAMITĀ) and recollection of the Buddha's name (S. BUDDHĀNUSMṚTI; C. NIANFO). The concept of yixing sanmei was later incorporated into the apocryphal Chinese treatise DASHENG QIXIN LUN and the influential meditation manual MOHE ZHIGUAN. TIANTAI ZHIYI, the author of the *Mohe Zhiguan*, identified the practice of constant sitting, the first of the so-called four kinds of samādhi (sizhong sanmei), with yixing sanmei. Famous teachers of the early CHAN community, such as DAOXIN, HUINENG, and HEZE SHENHUI, also emphasized the importance of yixing sanmei, which they identified with seated meditation (ZUOCHAN) and the cultivation of prajñāpāramitā. According to the LIUZU TANJING ("Platform Sūtra of the Sixth Patriarch"), Huineng interpreted yixing sanmei as the maintenance of a straightforward mind (yizhi xin) while walking, standing, sitting, and lying. Shenhui identified yixing sanmei with "no mind" (WUXIN; see also WUNIAN).

Yixuan. (C) (義玄). See LINJI YIXUAN.

yizhi Chan. (J. isshi no zen; K. ilchi sŏn 一指禪). In Chinese, "one-finger Chan"; the famous pedagogical technique used by the CHAN master Juzhi Yizhi (c. ninth century) and his teacher Hangzhou Tianlong (d.u.) in the lineage of MAZU DAOYI. "One-finger Chan" refers to Juzhi's propensity to answer any question he was asked by simply raising one finger, so as not to allow any conceptual understanding of Buddhism to arise in the student's mind. The phrase appears in Case 19 of the BIYAN LU and Case 3 of the WUMEN GUAN, and is frequently cited in Chan sources. In one well-known Chan case (GONG'AN), Juzhi is said to have cut off the finger of a boy who mimicked him without understanding the meaning of the gesture.

yizi guan. (J. ichijikan; K. ilcha kwan 一字關). In Chinese, "one-word checkpoint" or "one-word barrier"; a pedagogical device developed by YUNMEN WENYAN (864–949), the founder of the YUNMEN ZONG of the classical CHAN tradition, which used only a single utterance to respond to a student's question. For example, once a monk asked him, "When you kill your parents, you repent before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?" Yunmen answered, "Lu" ("exposed"). Another time a monk asked him, "What is the treasury of the true dharma eye (ZHENGFAYANZANG)?" Yunmen answered, "Pu" ("universal"). Such terse answers offered no basis for conceptual understanding, instead demanding that students have a direct realization of truth. These one-word checkpoints were highly praised by DAHUI ZONGGAO for fostering especially close concentration during KANHUA CHAN meditation: "Once you enter into the gate of the one-word GONG'AN, even nine oxen wouldn't be able to pull you out."

yoga. (T. sbyor ba/rnal ’byor; C. xiu/xiuxing/xiuxi/yuqie; J. shu/shugyō/shujū/yuga; K. su/suhaeng/susŭp/yuga 修/修行/修習/瑜伽). In Sanskrit, "bond," "restraint," and by extension "spiritual discipline"; in Buddhism, a generic term for soteriological training or contemplative practice, including tantric practice.

Yogabhāvanāmārga. [alt. Bhāvanāyogamārga; Yogabhāvanāpatha] (T. Rnal ’byor bsgom pa’i lam). In Sanskrit, "Path of Yogic Cultivation"; a work on the BODHISATTVA path usually attributed to the eighth-century Indian master Jñānagarbha, who is known as the teacher of ŚĀNTARAKṢITA (c. 725–788) and a disciple of Śrīgupta. It is presumed that the *Yogabhāvanāmārga* is an example of the later MADHYAMAKA school's attention to the theme of the stages of meditative cultivation (BHĀVANĀ), as best exemplified by KAMALAŚĪLA's three BHĀVANĀKRAMAS. There are two Jñānagarbhas known to the tradition, one from the early ninth century and the other from the eleventh century. Some scholars suggest that the commentary to the Maitreya chapter of the SAṂDHINIRMOCANASŪTRA should be attributed to the first Jñānagarbha, while authorship of the *Yogabhāvanāmārga* should be ascribed to the second. The *Yogabhāvanāmārga*, along with Jñānagarbha's two other works, the *Satyadvayavibhaṅga* ("Analysis of the Two Truths") and its autocommentary *Satyadvayavibhaṅgavṛtti* ("Commentary on Analysis of the Two Truths"), are only extant in Tibetan translation.

Yogācāra. (T. Rnal ’byor spyod pa; C. Yuqiexing pai; J. Yugagyōha; K. Yugahaeng p'a 瑜伽行派). In Sanskrit, "Practice of YOGA"; one of the two major MAHĀYĀNA philosophical schools (along with MADHYAMAKA) in India, known especially for its doctrines of "mind-only" (CITTAMĀTRA) or "representation-only" (VIJÑAPTIMĀTRATĀ), the TRISVABHĀVA, and the ĀLAYAVIJÑĀNA. In addition, much of the exposition of the structure of the Mahāyāna path (MĀRGA) and of the Mahāyāna ABHIDHARMA derives from this school. The texts of the school were widely influential in Tibet and East Asia. Although several of the terms associated with the school occur in such important Mahāyāna sūtras as the DAŚABHŪMIKASŪTRA, the LAṄKĀVATĀRASŪTRA, and especially the SAMDHINIRMOCANASŪTRA, the exposition of the key doctrines was largely the work of two

Indian scholastics of the fourth to fifth centuries CE, the half brothers ASAṄGA and VASUBANDHU and their commentators, especially STHIRAMATI and DHARMAPĀLA. Asaṅga's major works include the central parts of the YOGĀCĀRABHŪMI, the MAHĀYĀNASAṂGRAHA, and the ABHIDHARMASAMUCCAYA. Vasubandhu's most famous Yogācāra works are the VIṂŚATIKĀ and the TRIṂŚIKĀ (his most famous work of all, the ABHIDHARMAKOŚABHĀṢYA, is said to have been composed prior to his conversion to the Mahāyāna). Among the "five books of MAITREYA" (see BYAMS CHOS SDE LNGA), three are particularly significant in Yogācāra: the MADHYĀNTAVIBHĀGA, the DHARMADHARMATĀVIBHĀGA, and the MAHĀYĀNASŪTRĀLAṂKĀRA. Important contributions to Yogācāra thought were also made by the logicians DIGNĀGA and DHARMAKĪRTI. Although Yogācāra and Madhyamaka engaged in polemics, in the latter phases of Buddhism in India, a synthesis of Yogācāra and Madhyamaka took place in the works of such authors as ŚĀNTARAKṢITA and KAMALAŚĪLA; Tibetan doxographers dubbed this synthesis YOGĀCĀRA-SVĀTANTRIKA-MADHYAMAKA. ¶ Yogācāra authors offered detailed presentations and analyses of virtually all of the important topics in Buddhist thought and practice, built upon an edifice deriving from meditative experience. The school is perhaps most famous for the doctrines of "mind-only" (cittamātra) and "representation-only" (vijñaptimātra), according to which the conception of the objects of experience as existing external to and independent of the consciousness perceiving them was regarded as the fundamental ignorance and the cause of suffering. Instead of the standard six consciousnesses (VIJÑĀNA) posited by other Buddhist schools (the five sensory consciousnesses and the mental consciousness), some Yogācāra texts described eight forms of consciousness: these six, plus the seventh "afflicted mind" (KLIṢṬAMANAS), which mistakenly generates the false notion of a perduing self (ĀTMAN), and the eighth foundational, or "storehouse," consciousness (ālayavijñāna). This foundational consciousness is the repository of seeds (BIJA) or imprints (VĀSANĀ) produced by past actions (KARMAN) that fructify as experience, producing simultaneously consciousness and the objects of consciousness. The afflicted mind mistakenly regards the foundational consciousness as a permanent and independent self. The doctrine of the three natures (trisvabhāva), although variously interpreted, is also often explained in light of the doctrine of representation-only. The imaginary nature (PARIKALPITA) refers to misconceptions, such as the belief in self and in the existence of objects that exist apart from consciousness. The dependent nature (PARATANTRA) encompasses impermanent phenomena, which are products of causes and conditions. The consummate nature (PARINIṢPANNA) is reality, classically defined as the absence of the imaginary nature in the dependent nature. By removing these latent predispositions from the ālayavijñāna and overcoming the mistaken bifurcation of experience between a perceiving subject and perceived objects (GRĀHYAGRĀHAKAVIKALPA), a transformation of consciousness (ĀŚRAYAPARĀVṚTTI) occurs which turns the deluded mind of the sentient being into the enlightenment cognition of the buddhas (BUDDHAJÑĀNA), with the ālayavijñāna being transformed into the mirrorlike wisdom (ĀDARŚAJÑĀNA). In the realm of soteriology, much of what would become the standard Mahāyāna elaboration of the five paths (PAÑCAMĀRGA) and the bodies (KĀYA, e.g., TRIKĀYA) of a buddha is found in works by Yogācāra authors, although there are important differences between Yogācāra and Madhyamaka on a number of key soteriological questions, including whether there is one vehicle (EKAYĀNA) or three final vehicles (TRIYĀNA), that is, whether all beings are destined for buddhahood, or whether some, such as the ARHATs of the mainstream Buddhist schools, are stuck in a soteriological dead end. ¶ Not all the scholastics regarded as Yogācāra exegetes adhered to all of the most famous doctrines of the school. The most common division of the school is into those who do and do not assert the existence of eight consciousnesses (and hence the ālayavijñāna). The former, who include Asaṅga and Vasubandhu, are called "followers of scripture" (āgamānusārin), and the latter, who include the famous logicians DIGNĀGA and DHARMAKĪRTI, are called "followers of reasoning" (nyāyānusārin). Yogācāra strands of Buddhism were extremely influential in the development of indigenous East Asian schools of Buddhism, including the mature schools of HUAYAN and even CHAN. For specifically East Asian analogues of Yogācāra, see FAXIANG ZONG, XIANG ZONG, DI LUN ZONG, and SHE LUN ZONG.

Yogācārabhūmiśāstra. [alt. Yogācārabhūmi] (T. Rnal 'byor spyod pa'i sa'i bstan bcos; C. Yuqieshidi lun; J. Yugashijiron; K. Yugasaji non 瑜伽師地論). In Sanskrit, "Treatise on the Stages of Yogic Practice"; an encyclopedic work that is the major treatise (ŚĀSTRA) of the YOGĀCĀRA school of Indian Buddhism. It was widely influential in East Asia and Tibet, being translated into Chinese by XUANZANG between 646 and 648 and into Tibetan circa 800. Authorship is traditionally ascribed to ASAṄGA (or, in China, to MAITREYA), but the size and scope of the text suggest that it is the compilation of the work of a number of scholars (possibly including Asaṅga) during the fourth century CE. The work is divided into five major sections. The first and longest, comprising approximately half the text, is called the "Multiple Stages" (Bahubhūmika or Bhūmivastu) and sets forth the stages of the path to buddhahood in seventeen sections. The two most famous of these sections (both of which are preserved in Sanskrit and which circulated as independent works) are the ŚRĀVAKABHŪMI and the BODHISATTVABHŪMI, the latter providing one of the most detailed discussions of the bodhisattva path (MĀRGA) in Indian literature. In this section, many of the central doctrines of the Yogācāra school are discussed, including the eight consciousnesses, the ĀLAYAVIJÑĀNA, and the three natures (TRISVABHĀVA). The structures and practices of the paths of the ŚRĀVAKA, PRATYEKABUDDHA, and BODHISATTVA are presented here in the form that would eventually become normative among MAHĀYĀNA scholasts in general (not just adherents of Yogācāra). The second section, "Compendium of Resolving [Questions]" (Viniścayasaṃgrahaṇī), considers controversial points that arise in the previous section. The third section, "Compendium of Interpretation" (Vyākhyānasaṃgrahaṇī), examines these points in light of relevant passages from the sūtras; it is interesting to note that the majority of the texts cited in this section are Sanskrit ĀGAMAS rather than Mahāyāna sūtras. The fourth, called "Compendium of Synonyms" (Paryāyasaṃgraha) considers the terms mentioned in the sūtras. The fifth and final section, "Compendium of Topics" (Vastusaṃgraha), considers central points of Buddhist doctrine, including PRATĪTYASAMUTPĀDA and BODHI. This section also contains a discussion of VINAYA and (in the Chinese version) ABHIDHARMA.

Yogācāra-Svātantrika-Madhyamaka. (T. Rnal 'byor spyod pa'i dbu ma rang rgyud pa). According to Tibetan exegetes, who coined the term, one of the two branches of the SVĀTANTRIKA school of MADHYAMAKA, together with the SAUTRĀNTIKA-SVĀTANTRIKA-MADHYAMAKA. Its main proponents include ŚĀNTARAKṢITA and KAMALAŚĪLA. Like YOGĀCĀRA, the school holds that external objects do not exist and that objects are of the nature of consciousness. Like MADHYAMAKA, the school holds that consciousness is empty of true existence. In its presentation of the three vehicles (TRIYĀNA), it correlates each vehicle with a different wisdom, thus bringing together the views of the HĪNAYĀNA, Yogācāra, and Madhyamaka. In order to achieve liberation from rebirth as an ARHAT, the ŚRĀVAKA must understand that a perduring self (ATMAN) does not exist. A PRATYEKABUDDHA must understand that objects, and hence the external world, do not exist separately from the consciousnesses that perceive them, thereby abandoning the GRĀHYAGRĀHAKAVIKALPA, the misconception of there being a bifurcation between subject and object. In order to achieve buddhahood, the BODHISATTVA must understand the emptiness (ŚŪNYATĀ) of all phenomena.

yogatantra. (T. rnal 'byor rgyud). One of the four traditional Indian categories of tantric texts. In a late Indian categorization of Buddhist TANTRA, a hierarchy was established that placed texts into one of four categories, in descending order: ANUTTARAYOGATANTRA, yogatantra, CARYĀTANTRA, and KRIYĀTANTRA. The precise meaning of these categories, their parameters, and their contents were widely discussed, especially in Tibet. In one influential description, yogatantra was said to emphasize internal yoga over external ritual practice and therefore did not employ the practice of sexual union. An examination of texts included in this category shows, however, that this description is somewhat arbitrary. Important texts classed as yogatantras include the SARVATATHĀGATATATTVASAṂGRAHA, the MAÑJUŚRĪMŪLAKALPA, the SARVADURGATIPARIŚODHANATANTRA, and the VAJRAŚEKHARA. MAṆḌALAS with the buddha VAIROCANA as the central deity occur often in the yogatantras.

yogin. (T. rnal 'byor pa; C. xiuxing ren; J. shugyōnin; K. suhaeng in 修行人). A male practitioner of YOGA (generally in the generic sense of meditative practice) who has gained some level of attainment in his practice. The term can be used to refer to any advanced Buddhist practitioner, although it refers especially to advanced practitioners of Buddhist TANTRA.

yoginī. (T. rnal 'byor ma). A female practitioner of YOGA, or contemplative practice, but used especially to refer to female adepts of Buddhist TANTRA, particularly those who engage in tantric rituals (including sexual rituals) with tantric YOGINS. The term is sometimes synonymous with ḌĀKINĪ.

yoginītantra. (T. rnal 'byor ma'i rgyud). Also known as "mother tantras" (MĀTṚTANTRA) and "wisdom tantras" (T. shes rab kyi rgyud), one of the two categories into which the ANUTTARAYOGATANTRAS are divided, the other being "father tantras" (PITṚTANTRA). Developing in India from the SIDDHA tradition, the yoginītantras apparently receive this name because the majority (and in some cases all) of the deities in the tantra's MAṆḌALA are female. According to a traditional explanation, these tantras emphasize wisdom (PRAJÑĀ), especially the mind of clear light (PRABHĀSVARACITTA), while father tantras emphasize method (UPĀYA), especially the illusory body (MĀYĀDEHA). See CAKRASAṂVARATANTRA.

yogipratyakṣa. (T. rnal 'byor mngon sum; C. dingguan zhi; J. jōkanchi; K. chŏnggwan chi 定觀知). In Sanskrit, "yogic direct perception"; a specific variety of direct perception (PRATYAKṢA) that is typically presumed to derive from meditative practice (BHĀVANĀ; YOGA). A direct intuition of the real obtained through meditative practice, this type of understanding was accepted as a valid means of knowledge by most of the traditional Indian religious schools. In Buddhism, the psychological analysis of the notion of yogipratyakṣa and the related yogijñāna (yogic knowledge or cognition) was undertaken by DHARMAKĪRTI (c. 600–670) in his PRAMĀṆAVĀRTTIKA and NYĀYABINDU, as well as by his commentators. Dharmakīrti's predecessor DIGNĀGA (c. 480–540) had posited that there were only two reliable sources of knowledge (PRAMĀṆA): direct perception (PRATYAKṢA) and logical inference (ANUMĀNA). Dharmakīrti, however, subdivided direct perception (pratyakṣa) into four subtypes, viz., sensory cognition (indriyajñāna), mental discrimination (MANOVIJÑĀNA), self-awareness (SVASAṂVEDANA), and yogic cognition (yogijñāna). In Dharmakīrti's analysis, yogic cognition (yogijñāna) is a form of yogic perception (yogipratyakṣa), because it fulfills the two conditions of perception (pratyakṣa): (1) it is devoid of conceptual construction (KALPANĀ); and (2) it is a cognition that is "nonerroneous" (abhrānta), viz., real. The treatment of yogipratyakṣa in the literature thus focuses on how yogipratyakṣa fulfills these two conditions of perception. Yogic knowledge is devoid of conceptual construction (kalpanā), Dharmakīrti maintains, because it is nonconceptual (akalpa; NIRVIKALPA) and thus "vivid" or "distinct" (spaṣṭa). This type of perception is therefore able to perceive reality directly, without the intercession of mental images or concepts. Since yogic cognition is said to be devoid of conceptual construction, this raises the issue of its second condition, its lack of error. Why is meditatively induced perception true and reliable? How does a meditator's yogic perception differ from the hallucinations of the deranged, since both of them presume they have a vivid cognition of an object? The reason, Dharmakīrti maintains, is that the objects of yogic knowledge are "true" or "real" (bhūta; sadbhūta), whereas hallucinations are "false" or "unreal" objects (abhūta; asadbhūta). The only true objects of yogic knowledge offered by Dharmakīrti are the FOUR NOBLE TRUTHS: that is, the perception of these truths is true and reliable because they enable one to reach the goal of enlightenment, not because they involve a perception of an ultimate substance. In this sense, Dharmakīrti's understanding of yogijñāna is more focused on the direct realization of the soteriological import of the four noble truths than on extraordinary sensory ability. Therefore, yogic direct perception is qualitatively different from the various forms of clairvoyance that are the byproducts of deep states of concentration that may be achieved by both Buddhist and non-Buddhist practitioners. Yogipratyakṣa is a form of insight (VIPAŚYANĀ) posssessed only by noble persons (ĀRYAPUDGALA); and among the five paths it occurs only on the path of vision (DARŚANAMĀRGA) and above. See also DARŚANA.

yojana. (T. dpag tshad; C. youxun; J. yujun; K. yusun 由旬). In Sanskrit, a "league"; a standard measure of distance in ancient India, and often used in Buddhist texts; it is said to be the distance a yoked team of oxen could travel in one day. Modern estimates of this distance vary widely, with the figure of eight miles often provided as an approximation, although estimates of from four to ten miles (six to sixteen kilometers) are also found.

Yōkan. (永觀) (1032–1111). Japanese VINAYA master of the Sanronshū (C. SAN LUN ZONG); also known as Eikan. Yōkan wrote two important works on PURE LAND doctrine known as the *Ōjōjūin* and the *Ōjōkōshiki*. In contrast to the TENDAISHŪ and SHINGONSHŪ interpretation of the practice of NENBUTSU (C. NIANFO) as the contemplation of the buddha AMITĀBHA, Yōkan emphasized instead the efficacy of the vocal recitation of name of Amitābha (NAMU AMIDABUTSU). Doctrinally, Yōkan supported the view that enlightenment and afflictions, like buddhas and human beings, are not two but of a single essence. Yōkan or Eikan is also well known for the monastery in Kyōto that took his name, Eikandō, which is also called Zenrinji.

Yokawa. (横川). The northern of the three main subcomplexes of the TENDAISHŪ (C. TIANTAI ZONG) monastery ENRYAKUJI on HIEIZAN in Japan. In 848, the Japanese pilgrim-monk ENNIN established the Shūryōgon'in complex in Yokawa; subsequent expansion projects were undertaken by the monks RYŌGEN and GENSHIN. The Yokawa complex is famous for its central hall, now known as the Yokawa chūdō, also founded in 848, and the Eshin'in (or Eshindō) established by Genshin, which came to function as a special hall for practicing nenbutsu (C. NIANFO).

Yona. One of nine adjacent lands (P. paccantadesa) converted to Buddhism by missionaries dispatched by the elder MOGGALIPUTTATISSA at the end of the third Buddhist council (see COUNCIL, THIRD), which was held in PĀṬALIPUTRA during the reign of AŚOKA in the third century BCE. The region is generally identified as located in northwest India, homeland of the Bactrian Greeks, and is also known as Yonakā or YAVANA. Yona was converted by the elder Mahārakkhita, who preached the *Aggikkhandhopamasutta*. The third Buddhist council at Pāṭaliputra, and the nine Buddhist missions are known only in STHAVIRANIKĀYA sources and are first recorded in the fifth-century DĪPAVAṂSA.

Yŏndam Yuil. (蓮潭有一) (1720–1799). Korean SŎN master and exegete during the Chosŏn dynasty; also known as Mui. Shortly after his parents' death in 1737, Yŏndam became a student of the monk Sŏngch'ŏl (d.u.) at the monastery of Pŏpch'ŏnsa on Mt. Sŭngdal and received the monastic precepts the next year from the VINAYA master Anbin (d.u.). In 1739, he began scriptural studies under the Sŏn master Pyŏkha Taeu (1676–1763), which he continued under Yongam Ch'ejo (1714–1779) and Sŏlp'a Sangŏn (1707–1791). In 1741, Yŏndam began training in Sŏn meditation under Hoam Ch'ejŏng (1687–1748) and eventually became his disciple. Yŏndam established himself as a talented exegete of Sŏn materials and was installed as the abbot of the monastery of Sŏbongsa in 1779. He left many writings, including the *Imha nok*, *Chabo haengŏp*, *Tosŏ kwamok pyŏngip sagi*, *Sŏnyo sagi*, *Sŏjang sagi*, *Wŏn'gak sagi*, *Simsŏng non*, and others. In his influential *Imha nok*, Yŏndam addressed the anti-Buddhist polemics of the Confucian scholars. His "personal notes" (sagi) on the CHANYUAN ZHUQUANJI DUXU, DAHUI SHUZHUANG, CHANYAO, and YUANJUE JING are still widely used in Korean monastic seminaries, or kangwŏn.

yŏndŭng hoe. (燃燈會). In Korean, "lantern-lighting ceremony"; a Korean Buddhist celebration that originated sometime during the Koryŏ dynasty. To celebrate the lunar New Year, lanterns were lit on the fifteenth day of the first lunar month and kept lit for two nights. Although King Sŏngjong (r. 982–997) banned the ceremony, the ban was lifted in the first year of King Hyŏnjong's (r. 1010–1031) reign and the ceremony was held again on the fifteenth day of the second lunar month and continued to be held on the second month from that point onward. In 1352, the celebration of the yŏndŭng hoe took place in the palace on the traditional East Asian date of the Buddha's birthday (the eighth day of the fourth lunar month) with one hundred monks in attendance, and the event was subsequently held on the Buddha's birthday throughout the remainder of the Chosŏn dynasty. This custom of lighting lanterns to celebrate the Buddha's birthday continues today in Korea.

yong. (J. yū; K. yong 用). In Chinese, "function," or "application"; a term often deployed in the East Asian religious traditions, including Buddhism, as a philosophical pair with "essence" (TI). Chinese Daoist and "Dark Learning" (XUANXUE) texts first imbued the term with philosophical implications: the *Daode jing* refers to yong as the "attributes" of the way, and the *Daodejing zhu*, Wang Bi's (226–249) commentary to the text, employs the term to indicate the functions or attributes of "nonbeing" (WU) or "voidness" (xu). However, yong, along with its companion ti, was not widely used until the Buddhists adopted both terms to provide a basic conceptual frame for reality or truth. For example, the SAN LUN ZONG master JIZANG (549–623) used ti and yong to explicate his theory of the middle way (MADHYAMAPRATIPAD). He connected the middle (zhong) to ti, which he described as "neither ultimate nor conventional" (feizhen feisu), and the provisional (jia) to yong, which he described as "ultimate and conventional" (zhensu). The ti and yong pair was often used in the HUAYAN, TIANTAI, and CHAN traditions. GUIFENG ZONGMI (780–841), a Tang-dynasty master of both the HUAYAN ZONG and Heze Chan traditions, provided a systematic explanation for yong and ti, based on the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāyāna"). In particular, he distinguished between two different types of function in his theory of mind: the "inherent function of the self-nature" (zixing benyong), which he called "numinous awareness" (LINGZHI), and the responsive functions that accord with conditions (suiyuan yingyong), which he described as the various mental functions that derive from the inherent function of the mind. Many Chinese and Korean Neo-Confucian thinkers, such as Cheng Yi (1033–1107), Zhu Xi (1130–1200), and Yi Hwang (1501–1570), applied Zongmi's interpretation of this pair to their own philosophical systems.

Yongjia Xuanjue. (J. Yōka Genkaku; K. Yŏngga Hyŏn'gak 永嘉玄覺) (675–713). Chinese CHAN monk renowned for his writings on meditation, also known as Mingdao, Yishujue, and Great Master Zhenjue (True Awakening); Yongjia is his toponym, the name of his hometown in Zhejiang province. Yongjia made a name for himself at a young age as an expert on meditation and the TIANTAI practices of calmness and insight (see ŚAMATHA and VIPAŚYANĀ). He is said to have later received a seal of approval (YINKE) from the sixth patriarch (LIUZU) of Chan, HUINENG, after studying under the master for only one day and a night; hence, his cognomen Yishujue (Single-Night Enlightened, or Overnight Guest). His teachings are primarily known through the influential works attributed to him, such as the ZHENGDAO GE and *Yongjia ji*. Yongjia was given the posthumous title Great Master Wuxiang (No Marks).

Yongjusa. (龍珠寺). In Korean, "Dragon Pearl Monastery"; the second district monastery (PONSA) of the contemporary CHOGYE CHONG of Korean Buddhism, located on Mt. Hwa in Kyŏnggi province. The temple was constructed in 854 and originally named Karyangsa. It was rebuilt in 1790 to serve as the royal tomb of Prince Sado (1735–1762), the father of King Chŏngjo (r. 1776–1800). During the Japanese colonial period (1910–1945), Yongjusa became one of thirty-one head monasteries (PONSA) and it managed forty-nine branch temples (malsa) in several regions. A monks' training school was established in 1955, followed by a meditation hall in 1969. Yongjusa's main shrine hall (TAEUNG CHŎN) was constructed in 1790 and enshrines images of the buddhas ŚĀKYAMUNI, BHAIṢAJYAGURU, and AMITĀBHA. Other cultural properties at the site include the main temple bell, bronze censers, and a hanging painting of the Buddha (KWAEBUL).

yongmaeng chŏngjin. (S. ārabdhavīrya; T. brtson 'grus rtsom pa, C. yongmeng jingjin; J. yūmyōshōjin 勇猛精進). In Korean, "ferocious effort"; an especially rigorous period of practice performed during a SŎN (C. CHAN) meditative retreat (K. kyŏlche; C. JIEZHI) in Korea. The term most commonly refers to a one-week period during the winter retreat and leading up to the enlightenment day of the Buddha (Puch'ŏnim sŏngdo il) on the eighth day of the twelfth lunar month (usually in early January), during which all the monks (or nuns) in the meditation hall will undertake the ascetic practice (see DHUTAṄGA) of constantly sitting and never lying down to sleep (K. CHANGJWA PURWA) for the entire seven days. This practice is a ritual reenactment of the Buddha's own final fervent effort to awaken. The phrase has also come to refer more generally to an intense session of meditation carried out by a small group of elite monks during a three-year retreat (samnyŏn kyŏlsa). See also SESSHIN; RŌHATSU SESSHIN.

Yongming Yanshou. (J. Yōmei Enju; K. Yŏngmyŏng Yŏnsu 永明延壽) (904–975). Chinese CHAN master in the FAYAN ZONG during the Five Dynasties and Song dynasty periods; also known as Chongxuan and Baoyizi. Yongming was a native of Lin'an prefecture in Zhejiang province. At the age of twenty-seven, Yongming left his post as a minor official to become a monk under Cuiyan Lingcan (d.u.), a disciple of the Chan master XUEFENG YICUN (822–908); he subsequently studied under TIANTAI DESHAO (891–972) and inherited his Fayan lineage. Beginning in 952, Yongming served as abbot of a series of different monasteries, including Zishengsi on Mt. Xuedou, Lingyinsi (at the request of the king of Wuyue), and Yongmingsi, whence he acquired his toponym. Yongming was renowned for his advocacy of the simultaneous cultivation of Chan meditation and NIANFO (recitation of the Buddha's name) and for his magnum opus ZONGJING LU, a massive Chan genealogical history, in one hundred rolls. His writings also include the famous WANSHAN TONGGUI JI and the WEIXIN JUE. Although Yongming's Fayan lineage declined in China during the Song dynasty, thirty-six envoys sent by the Koryŏ king to study under Yongming returned with his teachings to Korea, where the line continued to flourish. Yongming was posthumously given the title Chan master Zhijue (Wise Awakening).

Yongningsi. (J. Eineiji; K. Yŏngnyŏngsa 永寧寺). In Chinese, "Eternal Peace monastery"; one of the most important monasteries in the Northern Wei capital of Luoyang. After the Wei rulers moved the Chinese capital to Luoyang, Empress

Dowager Ling, the birth mother of Emperor Xiao Mingdi (r. 515–528), began construction of Yongningsi in 516. According to the Luoyang qielan ji, Yongningsi was a grand complex that could house more than a thousand monks and was located to the west of the imperial highway and south of the Changhe gate. In the northern precinct of the monastery was a buddha hall, which housed various golden images, and to the south, a triple-gated tower more than two hundred feet in height. A nine-story pagoda that rose a thousand feet supported a tall golden pole with golden disks to collect the dew. Golden bells were also hung from the pagoda. Since it overlooked the palace, only Emperor Xiao Mingdi and the Empress Dowager were allowed to climb the pagoda to gaze at the entire capital. All the scriptures and paintings from foreign countries available at the time are said to have been stored at the monastery. The eminent translator Bodhiruci also translated many scriptures while in residence at Yongningsi. The monastery was devastated by a fire and was left in ruins after the capital was moved again to Ye. Several restorations were made during the Sui and Tang dynasties, but the monastery remains in ruins today.

Yŏngsanjae. (靈山齋). In Korean, "Vulture Peak Ceremony"; a Korean Buddhist rite associated with the Saddharmapuṇḍarīkasūtra ("Lotus Sūtra"), which has been performed in Korea since the mid to late Koryŏ dynasty (918–1392). This elaborate ritual is a loose reenactment of the *Saddharmapuṇḍarīkasūtra* and is intended to depict the process by which all beings, both the living and the dead, are led to enlightenment. Its performance often occurs in conjunction with the forty-ninth day ceremony (K. sasipku [il] chae; C. sishijiu [ri] zhai), which sends a deceased being in the intermediate transitional state (antarābhava) on to the next rebirth. The Yŏngsanjae is renowned for including the most complete repertoire of Buddhist chant and dance preserved in the Korean tradition. The rite may last for between one day and a week, although it is rare nowadays to see it extend beyond a single day; briefer productions lasting a couple of hours are sometimes staged for tourists. The Yŏngsanjae is protected through the Korean Cultural Property Protection Law as an intangible cultural asset (Muhyŏng Munhwajae, no. 50), and the group responsible for protecting and preserving the rite for the future consists of monks at the monastery of Pongwŏnsa in Seoul, the headquarters of the T'aego chong. The monks at the monastery also train monks and nuns from other orders of Buddhism, as well as laypeople, in different components of the rite. In recent years, the dominant Chogye chong of Korean Buddhism has also begun to perform the Yŏngsanjae again, thanks to training from the Pongwŏnsa specialists in the tradition. ¶ The Yŏngsanjae is held in front of a large kwaebul (hanging painting) scroll depicting Śākyamuni teaching at Vulture Peak (Gṛdhrakūṭaparvata), delivering the *Saddharmapuṇḍarīkasūtra* to his followers. A day-long version of the ceremony starts with bell ringing and a procession escorting the attending spirits in a palanquin, which then proceeds to a ceremonial raising of the kwaebul. The rest of the day is made up of the following sequence of events: chanting spells (dhāraṇī) to the bodhisattva Avalokiteśvara (K. Kwanseŭm posal); the cymbal dance, or parach'um, as monks chant the *Ch'ŏnsu kyŏng* (C. Qianshou jing) dedicated to the thousand-handed incarnation of Avalokiteśvara (see Sāhasrabhujasāhasranetrāvalokiteśvara); pŏmp'ae; purification of the ritual site (toryanggye), during which the butterfly dance, or nabich'um, is performed to entice the dead to attend the ceremony while the pŏmp'ae chants entreat the three jewels (ratnatraya) and dragons (nāga) to be present; the dharma drum dance, or pŏpkoch'um, during which a large drum is beaten to awaken all sentient beings; a group prayer to the Buddha and bodhisattvas, where everyone in attendance has the chance to take refuge in the three jewels (ratnatraya); an offering of flowers and incense (hyanghwagye) to the Buddha and bodhisattvas is made by the nabich'um dancers, followed by offering chants; a chant hoping that the food offerings on the altar will be sufficient as the parach'um is performed again together with four dhāraṇī chants; placing the offerings on the altar while chanting continues; culminating in a transfer of merit (kongdŏkkye) to all the people in attendance, including sending off the spiritual guests of the ceremony. The siktang chakpŏp, an elaborate ceremonial meal, is then consumed. A recitation on behalf of the lay donors who funded the ceremony (hoehyang ŭisik) concludes the rite.

Yongsŏng Chinjong. (龍城震鐘) (1864–1940). Korean monk during the Japanese colonial period (1910–1945), also known as Paek Yongsŏng; leader of a conservative group of monastic reformers, and one of the thirty-three signatories to the Korean Declaration of Independence in 1919. Ordained at the monastery of Haeinsa in 1879, he received full monastic precepts five years later and became a disciple of Taeŭn Nango (1780–1841) at the hermitage of Ch'ilburam. Later, he had a great awakening while he was studying the Jingde chuandenglu at the monastery of Songgwangsa, where he became a disciple of the Sŏn master Hwansŏng Chian. One year after Korea was annexed by Japan, he established the monastery of Taegaksa and a Sŏn center (Sŏnhagwŏn) in Seoul in an attempt to propagate Buddhism among a wider public. On March 1, 1919, he signed the Korean Declaration of Independence as a representative of the Buddhist community and was consequently incarcerated by the Japanese colonial government for eighteen months. During his year and a half in prison, he translated many sūtras (such as the voluminous Avataṃsakasūtra, or *Hwaŏmgyŏng*) from literary Chinese into han'gŭl, the Korean vernacular script, in order to make more Buddhist texts accessible to ordinary Koreans. After his release from prison in March 1921, he established a community known as the Taegakkyo (Teaching of Great Awakening) and a translation center called Samjang Yŏkhoe (Society for Translating the Tripiṭaka), and devoted most of his time to the translation of Buddhist scriptures. In 1928 he published the journal *Mua* ("No Self") and with Hanyŏng Chŏngho also published the journal *Puril* ("Buddha Sun"). In May 1929, he and 127 other monks submitted a petition to the Japanese colonial government asking for the restoration of the tradition of celibacy in the Buddhist monasteries. Because of his interest in ensuring the continuance of the BHIKṢU and BHIKṢUṆĪ traditions, Yongsŏng personally established many ordination platforms and transmitted the complete monastic precepts (kujokkye) several times during his career. He also stressed the need for monasteries to be self-sustaining economically. In accordance with his plan for self-sustenance, he participated in the management of a mine in Hamgyŏng province, and in 1922, he bought some land in Manchuria and ran a farm on the compounds of a branch of the Taegakkyo. He also started a Ch'amsŏn Manil Kyŏlsahoe (Ten-Thousand Day Meditation Retreat Society) at the monastery of Ch'ilbulsa and attracted many followers from other monasteries. Yongsŏng was a prolific writer who left behind many works, including his famous *Kwiwŏn chŏngjong* ("The Orthodox Teaching that Returns to the Source"), a tract that compared Buddhism to Confucianism, Daoism, and Christianity, a modern twist on the old "three teachings" syncretism of medieval East Asian philosophy. This work was one of the first attempts by Buddhists to respond to the inroads made by Christianity in modern Korea. In his treatment, he suggests that Confucianism presented a complete moral doctrine but was deficient in transcendental teachings; Daoism was deficient in moral teachings but half-understood transcendental teaching; Christianity was fairly close to the Buddhist ch'ŏn'gyo ("teachings of [humans] and divinities"), which taught the kinds of meritorious actions that would lead to rebirth in heavenly realms but was completely ignorant of the transcendental teaching. Only Buddhism, Yongsŏng concluded, presented all facets of both moral and transcendental teachings. Yongsŏng's other works include his *Kakhae illyun*, *Susim non*, and *Ch'ŏnggong wŏnil*. See also IMWŎTKO.

Yongzhong. (C) (J. Eichū; K. Yŏngchung 永中) (d.u.). Yuan-dynasty CHAN master in the LINJI ZONG, also known as Jueji Yongzhong, and author of the ZIMEN JINGXUN.

yoni. (T. skye gnas; C. sheng; J. shō; K. saeng 生). In Sanskrit and Pāli, "modes of birth"; four modes by which sentient beings are born into the three realms of existence (TRAIDHĀTUKA): (1) oviparous birth (aṇḍajayoni), viz., beings born from eggs, such as birds, reptiles, fish, and insects; (2) viviparous birth (jarāyujayoni), viz., beings born from a womb, such as mammals and human beings; (3) moisture-born (saṃsvedajayoni), viz., beings such as maggots generated by rotten meat or mosquitoes born from swamp water, which are understood to be born as the result of the combination of heat and moisture; (4) metamorphic birth (UPAPĀDUKAYONI), viz., spontaneously generated beings, such an divinities (DEVA), hungry ghosts (PRETA), denizens of hell (NĀRAKA), and those residing in the intermediate state (ANTARĀBHAVA). In some interpretations, even beings generally classified in one category may in certain circumstances be born through other modes. For example, although human beings are viviparously born, the five hundred sons of the king of Pañcāla, one of the sixteen ancient kingdoms of India, are said to have been born from eggs, King Māndhātṛ was born from moisture, and the first humans to appear at the beginning of the KALPA are born by metamorphosis. Among animals, although the first three modes of birth are most common, there are also some animals born by metamorphosis, such as NĀGAS and GARUḌAS. Finally, among beings that are born through metamorphosis, there are certain types of preta who are said to be born viviparously.

yoniśomanaskāra. [alt. yoniśomanasikāra] (P. yonisomanasikāra; T. tshul bzhin yid la byed pa; C. ruli zuoyi/zheng siwei; J. nyorisai/shōshiyui; K. yŏri chagŭi/chŏng sayu 如理作意/正思惟). In Sanskrit, "systematic attention"; attention directed to an object or a phenomenon purposely and thoroughly, without becoming entranced by its external marks (LAKṢAṆA) and secondary characteristics (ANUVYAÑJANA). The term is used in the context of meditation to refer to the thoroughgoing reflection in which one traces an object or a phenomenon back to its cause or origin, so that one perceives how it arises and perishes in accordance with conditions. Thus, yoniśomanaskāra ultimately refers to attention directed to the FOUR NOBLE TRUTHS, which reveals that the things of this compounded world are fundamentally impermanent (ANITYA), suffering (DUḤKHA), and nonself (ANĀTMAN). While unsystematic attention (AYONIŚOMANASKĀRA) to the characteristics of sensory objects creates false views, craving, and eventually subjection to the objective order of SAṂSĀRA, systematic attention instead brings this unsystematic attention to an end so that the practitioner perceives the true nature of things. Thus, because of systematic attention, as yet unarisen erroneous views (MITHYĀDṚṢṬI) do not arise, already arisen ones cease, unarisen right views arise (SAMYAGDṚṢṬI), and already arisen ones increase. Systematic attention is thus foundational to the path that leads to liberation from saṃsāra. See also YUKTI.

yŏnji. (C. ranzhi; J. nenshi 燃指). In Korean, "finger burning." Although not officially sanctioned by the Korean Buddhist SAṂGHA, the ascetic practice of finger burning is sometimes performed by a handful of devoted Korean monks and nuns. Unlike a similar Chinese practice, the practice of finger burning is not performed in the context of ordination, and is held in high regard. The rationale for such a practice is often traced to the self-immolation of the bodhisattva BHAIṢAJYARĀJA in the SADDHARMAPUṆḌARĪKASŪTRA and the bodhisattva SADĀPRARUDITA's self-mutilation in the AṢṬASĀHASRIKĀPRAJÑĀPĀRAMITĀ. See also DEHADĀNA; SHESHEN.

yon mchod. [alt. mchod yon] (yön chö). In Tibetan, "priest-patron," a term used to describe the relationship between various Tibetan Buddhist hierarchs and Mongol, Manchu, and Chinese rulers. The compound is composed of abbreviations of two terms. The first, "yon bdag," connotes a powerful benefactor or patron, often a political or military leader. The second "mchod gnas" connotes a religious official, such as a court chaplain. The relationship between Tibetan hierarchs and Mongol rulers is traced to the meeting of Sa skya Paṇḍita and Godan Khan (1206–1251, the grandson of Genghis Khan). When Mongol troops invaded Tibet, Sa skya Paṇḍita led a delegation to the Mongol court in 1247, during which he cured Godan Khan of an illness and offered him religious instruction. Subsequently, Godan Khan became his disciple, sparing Tibet from further invasion and granting control of central Tibet to Sa skya Paṇḍita. The classic example of the "priest-patron" relationship occurred when Sa skya Paṇḍita's nephew 'Phags pa blo gros rgyal mtshan served as religious preceptor and close advisor to Qubilai Khan. Other Tibetan Buddhist hierarchs would serve in similar roles during the Ming and Qing dynasties. As often invoked in Tibetan sources, in the "priest-patron" relationship, the Tibetan Buddhist lama provides religious instruction and spiritual protection (through the performance of tantric rituals) to the Mongol, Manchu, or Chinese chieftain and in return the Mongol, Manchu, or Chinese ruler provides material support and military protection, while allowing Tibet to remain independent.

Yon tan rgya mtsho. (Yöntan Gyatso) (1589–1616). In Tibetan, "Ocean of Good Qualities"; the fourth Dalai Lama. The Dge lugs monk Bsod nams rgya mtsho, later recognized as the third Dalai Lama, visited the court of the Mongol ruler, the Altan Khan, in 1578. It was the Altan Khan who first used the term "Dalai Lama" to refer to this leader of the Dge lugs sect. The third Dalai Lama soon returned to Tibet but came back to Mongolia after the death of the Altan Khan, spending the next five years giving Buddhist teachings and founding monasteries before dying in 1588. His incarnation was identified by the Mongols among their own people, as the grandson of Altan Khan's successor. He was given the name Yon tan rgya mtsho. He was thus the only Dalai Lama who was not ethnically Tibetan. The Dge lugs hierarchy in Tibet did not immediately recognize the Mongol as the incarnation of Bsod nams rgya mtsho. To assuage their concerns, a Mongolian delegation was sent to Tibet in 1600 to invite a group of Dge lugs dignitaries to come to Mongolia and administer the traditional tests to determine the boy's identity. After the tests convinced the Tibetan delegation that he was indeed the fourth Dalai Lama, they took the boy back to Lha sa in 1602, where he was ordained as a novice at the Jo khang. He received bhikṣu ordination in 1614 from his tutor Blo bzang chos kyi rgyal mtshan, who would later become the first (or according to a different reckoning, the fourth) Paṇ chen Lama. Tibet was on the brink of civil war, with the king of Gtsang, a patron of the Karma bka' rgyud, seeking to control central Tibet, where the Dge lugs were in power with the support of the Mongols. Although the young fourth Dalai Lama appears not to have been involved in politics, the fact that he was a foreigner seems to have been resented in some quarters. He died of uncertain causes in 1616 at the age of twenty-seven. The close relations that developed between the Mongols and the Dge lugs sect as a result of his selection as Dalai Lama would be an important factor in the eventual political ascendancy of his successor, the fifth Dalai Lama, Ngag dbang blo bzang rgya msho, in 1642.

Yōsai. (J) (榮西). See Myōan Eisai.

Yose. (K) (了世). See Wŏnmyo Yose.

Yu. (J. U; K. U 于). Ethnikon used in China for monks who hailed from Khotan (transcribed as Yutian in Chinese), an Indo-European oasis kingdom at the southern edge of the Takla Makhan desert in Inner Asia, along the northern slope of the Kunlun mountains. Khotan was a major center of Buddhism in Central Asia and an important conduit for the transmission of Buddhism from India to China along the Silk Road.

Yuandeng. (C) (圓澄). See Zhanran Yuandeng.

yuandun jiao. (J. endongyō; K. wŏndon kyo 圓頓教). In Chinese, "perfect and sudden teaching"; one of the highest levels of the various doctrinal taxonomies (panjiao; see jiaoxiang panshi) deployed in the Tiantai zong, Huayan zong, and sometimes the Chan zong. The Tiantai school first introduced the term to refer to the highest form of the teachings. In the Tiantai analysis, "perfect" refers to "perfect teaching" or "consummate teaching" (yuanjiao), the last of the four types of teachings according to content (huafa sijiao), while "sudden" refers to the "sudden teaching" (dunjiao), the first of the four modes of exposition (huayi sijiao) (see Tiantai bajiao). The compound "perfect and sudden teaching" thus refers to the consummate vision of the ultimate truth of Buddhism that is expounded all at once without any provisional or gradual expedients. In the Tiantai zong, this "perfect and sudden teaching" may refer either to (1) the teachings of the Tiantai school itself, which provide an approach to Buddhist soteriology in which every stage, condition, and thought, whether defiled or pure, becomes the basis of enlightenment since it represents the perfect median truth (see sandi); or (2) the teachings of the Avataṃsakasūtra, in which the Buddha expounded his consummate and unadulterated vision of reality immediately after his enlightenment without any consideration of the ability of his audience to understand that vision. The Huayan school follows closely the Tiantai concept of yuandun jiao. The Huayan and Chan teacher Guifeng Zongmi (780–841), for example, refers to the perfect and sudden teaching as the "huayi dun" (sudden teaching according to the method of exposition), correlating it with the teaching of the dharma-realm of the mutual and unobstructed interpenetration between phenomenon and phenomena (shishi wu'ai fajie). The Korean Sŏn (Chan) master Pojo Chinul (1158–1210), based on the works of Li Tongxuan (635–730), interpreted the term as referring to the perfect and sudden enlightenment to the truth of nature origination (xingqi), which occurs through understanding Huayan doctrine from a Sŏn perspective. In the Chan tradition, therefore, the "perfect and sudden teaching" may refer to the highest form of the Buddhist teachings rather than to the teachings of any specific scholastic school (Kyo). See also Wŏndon sŏngbul non.

yuanjiao. (圓教). In Chinese, "perfect/consummate teaching." See Huayan wujiao.

Yuanjue jing. (J. Engakukyō; K. Wŏn'gak kyŏng 圓覺經). In Chinese, "Scripture of Perfect Enlightenment"; also known as *Dafangguang yuanjue xiuduoluo liaoyi jing*; an influential indigenous Chinese sūtra (see apocrypha). The *Yuanjue jing* was purportedly translated by a certain Buddhatrāta (d.u.) at the monastery of Baimasi in 693, but no Sanskrit or Tibetan equivalent is known to have existed and the scripture is now recognized as being an apocryphon. While in a special samādhi named "great illuminating repository of spiritual penetration" (shentong daguang mingzang), the Buddha is requested by twelve bodhisattvas including Mañjuśri, Samantabhadra, and Maitreya to explain perfect enlightenment (yuanjue), the originally pure mind as its cause, and the different ways to cultivate it. The scripture focuses on śamatha, samāpatti, and dhyāna as the primary means of cultivation, and divides the spiritual capacity of sentient beings into three levels. The tathāgatagarbha and original-enlightenment (benjue) theories of the apocryphal Dasheng qixin lun seem to have influenced the composition of the *Yuanjue jing*. The scripture was especially influential in the writings of the Chan historian Guifeng Zongmi, who wrote several commentaries and subcommentaries on the text, including his *Yuanjue jing lueshu*, *Yuanjue jing lüeshu chao*, *Yuanjue jing daochang xiuzheng yi*, *Yuanjue jing dashu*, and *Yuanjue jing dashu chao*. Zongmi also wrote manuals, no longer extant, on the use of the *Yuanjue jing* in repentance rituals. The *Yuanjue jing* is one of a number of Chan-related texts that were translated into Uighur Turkish in the Turfan region.

Yuanmiao. (原妙). See Gaofeng Yuanmiao.

Yuanming lun. (J. Enmyōron; K. Wŏnmyŏng non 圓明論). In Chinese, "Treatise on Perfect Illumination"; attributed to Aśvaghoṣa, but almost certainly a transcription of a lecture by a teacher associated with the Northern school (Bei zong) in the nascent Chinese Chan tradition. Several copies of this text have been discovered at Dunhuang, and a private copy is extant in Japan. The treatise consists of nine chapters written largely in catechistic format. The treatise elucidates the causes and results of the path, the nature of the dharmadhātu as the manifestation of one's own mind, false and correct views, the importance of upāya, and the practice of meditation. The *Yuanming lun* serves as an important source on the teachings of the early Chan tradition before its coalescence around the mythology of the "sixth patriarch" (liuzu) Huineng and the so-called Southern school (Nan zong).

Yuanren lun. (J. Genninron; K. Wŏnin non 原人論). In Chinese, "Treatise on the Origin of Humanity"; by the eminent Huayan and Chan scholiast Guifeng Zongmi. A preface to this relatively short treatise was prepared by Zongmi, as was another by his lay disciple Pei Xiu (787?–860). The treatise largely consists of four chapters: exposing deluded attachments, exposing the partial and superficial, directly revealing the true source, and reconciling root and branches. In his critique of deluded attachments, Zongmi offers a response to the different Confucian and Daoist theories of the way (dao), spontaneity (ziran), primal pneuma (yuanqi), and the mandate of heaven (tianming). Zongmi then briefly summarizes the teachings of the different vehicles of Buddhism, such as hīnayāna and Mahāyāna, and expounds their different approaches to reality. Relying on the teachings of the Avataṃsakasūtra, Zongmi finally offers a Buddhist alternative to the theories of the Confucian and Daoist critics: the tathāgatagarbha as the origin of humanity.

yuanrong. (J. ennyū; K. wŏnyung 圓融). In Chinese, "consummate interfusion," "perfectly interfused"; a term used in the Huayan and Tiantai traditions to refer to the ultimate state of reality wherein each individual phenomenon is perceived to be perfectly interfused and completely harmonized with every other phenomena. Yuanrong is contrasted with "separation" (geli), the understanding of reality in terms of the discriminative phenomena of the conventional realm. ¶ The concept of yuanrong is deployed soteriologically as one of the two modes of describing the bodhisattva path in the Huayan tradition, viz., the "approach of consummate interfusion" (yuanrong men), also known as the "approach of consummate interfusion and mutual conflation" (yuanrong xiangshe men); this mode is contrasted with the "approach of sequential practices" (cidi xingbu men). The approach of sequential practices refers to the different stages in the process of religious training, which progress through the fifty-two stages of the bodhisattva path (mārga). By contrast, the yuanrong men focuses instead on the principle of equivalency (pingdeng) and indicates the way in which any one stage of training subsumes all stages of the path, or how the inception of the path is in fact identical to its consummation. According to this mode of description, then, the completion of the ten stages of faith (shixin), a preliminary stage of the mārga in the Huayan tradition, is often stated to be identical to the achievement of buddhahood (xinman chengfo). In the Huayan school's fivefold taxonomy of the teachings (Huayan wujiao) as systematized by Fazang (643–712), the three vehicles are considered to represent the xingbu men, while the "consummate teaching" (yuanjiao), the final and highest level of teaching in this schema, corresponds to the yuanrong men. ¶ Yuanrong is also used in accounts of contemplation practice in the Huayan school, as, for example, in the "contemplation on the consummate interfusion of the three sages" (sansheng yuanrong guan), which was treated by both Chengguan (738–839) and Li Tongxuan (635–730). In this Huayan meditation, the bodhisattvas Mañjuśri and

SAMANTABHADRA represent the causal aspects of practice (yinfen), and the buddha VAIROCANA, the fruition aspect (guofen); the consummate interfusion of the causal and effect aspects of practice thus indicates enlightenment. Samantabhadra and Mañjuśrī are juxtaposed as, respectively, the DHARMADHĀTU as the object of faith (suoxin) and the mind as the subject of faith (nengxin), as practice (xing) and understanding (jie), and as principle (LI) and wisdom (zhi). When these juxtaposed aspects are perfectly interfused with each other, the causal aspect is consummated and becomes perfectly interfused with the effect aspect. Thus Samantabhadra as the "empty TATHĀGATAGARBHA" (kong rulaizang) and Mañjuśrī as the "nonempty tathāgatagarbha" (bukong rulaizang) are interfused with Vairocana Buddha's "comprehensive tathāgatagarbha" (zong rulaizang). ¶ In the Tiantai tradition, the "consummate interfusion of the three truths" (yuanrong sandi) is one of the two ways of interpreting the three truths (SANDI), viz., of emptiness (kongdi), provisionally real (jiadi), and the mean (zhongdi). The yuanrong sandi, also termed the "nonsequential three truths" (BU CIDI SANDI), refers to the notion that each truth (di) is endowed with all three of these truths together, and thus the particular and the universal are not separate from one another. This mode is distinguished from the "differentiated three truths" (GELI SANDI), also known as the "sequential three truths" (cidi sandi), where each truth is treated independently; in this mode, the first two truths represent the aspect of phenomena, while the last truth, of the mean, refers to the aspect of principle. In the Tiantai doctrinal taxonomy (see TIANTAI BAJIAO; WUSHI BAJIAO), geli sandi and yuanrong sandi are said to correspond, respectively, to the "distinct teaching" (biejiao) and the "consummate teaching" (yuanjiao), the third and fourth of the "four types of teaching according to their content" (huafa sijiao) in the Tiantai doctrinal classification. ¶ In both the Huayan and Tiantai traditions, yuanrong is also employed as a defining characteristic of the "dharma realm" (fajie; S. dharmadhātu). The term "consummate interfusion of the dharma realm" (fajie yuanrong) describes both the infinitely interdependent state of the Huayan "dharmadhātu of the unimpeded interpenetration of phenomenon with phenomena" (SHISHI WU'AI FAJIE), as well as the Tiantai doctrine of "intrinsic inclusiveness" (xingju), in which each individual phenomenon is said to be endowed with the TRICHILIOCOSM (SANQIAN DAQIAN SHIJIE; see TRISĀHASRAMAHĀSĀHASRALOKADHĀTU), which represents the entirety of existence in the Tiantai cosmology. The Huayan "dharmadhātu of the unimpeded interpenetration of phenomenon with phenomena" is systematized in the doctrine of the Huayan version of causality, the "conditioned origination of the dharmadhātu" (FAJIE YUANQI), and this Huayan causality of the dharmadhātu is also explained as the "consummate interfusion of the six aspects" (LIUXIANG yuanrong).

yuanrong sanguan. (圓融三觀). In Chinese, "three contemplations of consummate interfusion." See SANGUAN.

yuanrong xiangshe men. (圓融相攝門). In Chinese, "approach of consummate interfusion and mutual conflation." See YUANRONG.

Yuanwu Keqin. (J. Engo Kokugon; K. Wŏno Kŭkkŭn 圜悟克勤) (1062–1135). Chinese CHAN master in the LINJI ZONG; also known as Wuzhuo and Foguo. Yuanwu was a native of Chongning, Pengzhou prefecture, in present-day Sichuan province (northwest of the city of Chengdu). Little is known about his early career, but Yuanwu eventually became a disciple of the Chan master WUZU FAYAN. According to legend, Yuanwu became ill after leaving Wuzu's side, and returned as Wuzu had predicted. Yuanwu then inherited Wuzu's Linji lineage. While traveling in the south, Yuanwu befriended the statesman ZHANG SHANGYING (1043–1122) and also won the support of other powerful local figures, such as the governor of Chengdu. At their request, Yuanwu served as abbot of several monasteries, including Jiashansi and Daolinsi, where he lectured on the *Xuedou gonggu* by XUEDOU CHONGXUAN. These lectures were later edited together as the BIYAN LU ("Blue Cliff Record"), an influential collection of Chan cases (GONG'AN). Yuanwu was honored with several titles: Emperor Huizong (r. 1100–1125) gave him the title Chan master Foguo (Buddha Fruition) and Gaozong the title Chan master Yuanwu (Consummate Awakening). The title Chan master Zhenjue (True Enlightenment) was also bestowed upon him. Among his hundred or so disciples, DAHUI ZONGGAO, the systematizer of the KANHUA CHAN method of meditation, is most famous. Yuanwu's teachings are recorded in the *Yuanwu Foguo chanshi yulu* and *Yuanwu chanshi xinyao*.

yuganaddha. (T. zung 'jug; C. shuangru/shuangyun; J. sōnyū/sōun; K. ssangip/ssangun 雙入/雙運). In Sanskrit and Pāli, lit., "yoked together," sometimes translated as "union" or "joining." The term is especially important in tantric literature, where it often refers to the union of two things, resulting in a state of nonduality (ADVAYA). However, the term appears in a variety of contexts where two elements are conjoined, including serenity (ŚAMATHA) and insight (VIPAŚYANĀ), wisdom (PRAJÑĀ) and method (UPĀYA), SAṂSĀRA and NIRVĀṆA, male and female, and subject and object. In Pāli literature, the term appears especially in the context of treatments of samatha and vipassanā, both in practices in which the meditator alternates between the two and practices in which the two are unified.

Yuimae. (C. Weimo hui; K. Yuma hoe 維摩會). In Japanese, "VIMALAKĪRTI ceremony." One of the three great ceremonies (Nankyō san[n]e) held in the ancient Japanese capital of Nara. In 656, when the senior courtier Nakatomi no Kamatari (an ancestor of the Fujiwara clan) became seriously ill, the Paekche nun Pŏmmyŏng (J. Hōmyō) advised Empress Saimei to sponsor a reading of the "Inquiry about Illness" chapter of the VIMALAKĪRTINIRDEŚA in order to speed his recovery. The reading was successful and, out of gratitude, Kamatari and his family subsequently sponsored a lecture on the sūtra in 658 to commemorate the construction of the new monastery of Sankaiji. This ceremony was transferred to the Hossōshū (C. FAXIANG ZONG) monastery of KŌFUKUJI in Nara in 712, where it was held periodically every two to five years; it is now observed annually on the tenth day of the tenth lunar month. For seven days, a lecture on the *Vimalakīrtinirdeśa* is offered to the public and offerings are made to the SAṂGHA.

Yujŏmsa. (楡岾寺). In Korean, "Elm Hillock Monastery"; one of the four major monasteries located in the Diamond Mountains (KŬMGANGSAN) in present-day North Korea, and best known traditionally for its fifty-three buddha images. Yujŏmsa claims to be one of the oldest monasteries on the Korean peninsula. According to its historical record, *Kŭmgangsan Yujŏmsa sajŏkki*, written in 1297 by the Koryŏ official and diplomat Min Chi (1248–1326), icons of fifty-three buddhas drifted to the Silla seashore in the year 4 CE through the intercession of an Indo-Scythian [alt. Yuezhi, Rouzhi] king from the northwestern region of India. These images were originally cast by MAÑJUŚRĪ in the Indian city of ŚRĀVASTĪ and enshrined inside a large bell. After landing in Korea, the bell containing these fifty-three icons magically traveled inland and was eventually discovered in a branch of an elm tree by a Korean local official. To house these icons, the Silla king Namhae Ch'ach'aung (r. 4–24 CE) ordered the construction of this monastery, which he named after the elm tree in which the bell was discovered. Despite this legend of the monastery's origins, however, the main construction work at Yujŏmsa could not have begun before 1168. In the thirteenth century, during the late Koryŏ period, the monastery enjoyed the patronage of the Mongol–Korean court, which raised its political status and importance. The fifty-three buddhas of Yujŏmsa remained a popular destination for both literati tourists and Buddhist pilgrims to the Diamond Mountains throughout the Chosŏn dynasty. When the site was surveyed in 1912 by the Japanese scholar Sekino Tadashi (1867–1935), only fifty small gilt bronze icons were displayed in the Nŭngin pojŏn on a unique screen altar that was ornamented with meandering tree branches. In contrast to Min Chi's description of the iconography, various other images, including bodhisattvas and monastic figures, were included along with the buddha icons. Stylistically, forty-three individual figures could be dated to the Unified Silla period, and the remaining seven were determined to be post-Koryŏ products. This incongruent mixture of styles is due to continuous devastations of the images by fire and theft and their subsequent restorations. Yujŏmsa burned to the ground during the Korean War (1950–1953) and the current whereabouts of the fifty-three icons are unknown.

Yujŏng. (K) (惟政). See SAMYŎNG YUJŎNG.

yukti. (P. yutti; T. rigs pa; C. daoli; J. dōri; K. tori 道理). In Sanskrit, "reasoning" or "argumentation"; the process of analytical reflection that results in correct understanding. The term often appears in conjunction with ĀGAMA (scripture), as criteria or tools deployed to verify a particular point of doctrinal correctness. Yukti is usually presumed to have two denotations in the literature, viz., "reasoning" and "rational principles," although sometimes it is difficult to differentiate between these two senses in a particular text. ¶ The MAHĀYĀNASŪTRĀLAṂKĀRA, for instance, refers to yukti as one of the four types of provisional establishment (prajñaptivyavasthāna), that is, provisional establishment of dharma (dharmaprajñaptivyavasthāna), truth (satyaprajñaptivyavasthāna), reasoning (yuktiprajñaptivyavasthāna), and vehicle (yānaprajñaptivyavasthāna). Yukti is itself subdivided into four types, that is, the yukti of reference (apekṣāyukti), defined as systematic attention (YONIŚOMANASKĀRA); efficacy (kāryakāraṇayukti), defined as right view together with its fruits (samyagdṛṣṭiḥ phalānvitā); valid proof (upapattisādhanayukti), defined as analysis by means of correct cognition (pramāṇavicaya); and reality (DHARMATĀ-yukti), defined as the inconceivable (ACINTYA). ¶ In such texts as the YOGĀCĀRABHŪMI, the SAṂDHINIRMOCANASŪTRA, and the ABHIDHARMASAMUCCAYA, the four types of yukti are described as tools or means for investigating Buddhist teachings and yukti thus carries the denotation of "rational principles" (see VYĀKHYĀYUKTI). In these scriptures, the principle of dependence (apekṣāyukti) is defined as the principle of dependent origination (PRATĪTYASAMUTPĀDA); thus, in dependence on the seed, the shoot emerges. The principle of efficacy (kāryakāraṇayukti) is defined as the way in which particular causes are associated with specific effects; thus, visual consciousness affects vision but not hearing. The principle of valid proof (upapattisādhanayukti) is defined as the three types of valid knowledge (PRAMĀṆA), that is, direct perception (PRATYAKṢA), logical inference (ANUMĀNA), and scripture (āgama). The principle of reality (dharmatā-yukti) is defined as the generic properties and natures of dharmas, such as the property of water falling downward, or the sun rising in the east. The *Saṃdhinirmocanasūtra*'s emphasis on the third yukti of valid proof ultimately led to a narrowing of the term to refer to the three types of valid knowledge (pramāṇa). After DIGNĀGA (c. 480–540), who accepted only two pramāṇas—that is, direct perception (pratyakṣa) and logical inference (anumāna), but not scripture (āgama)—yukti is subsequently confined to only these two types of pramāṇas. In the ABHIDHARMAKOŚABHĀṢYA, Vasubandhu advocates that the wisdom obtained through reflection (CINTĀMAYĪPRAJÑĀ), the second of the three modes of wisdom (prajñā) (along with the wisdom obtained through listening/learning [ŚRUTAMAYĪPRAJÑĀ] and the wisdom obtained through meditative practice [BHĀVANĀMAYĪPRAJÑĀ]) is produced from investigation by means of yukti (yuktinidhyānajā). Since Vasubandhu presents all three modes of wisdom as arising from meditative concentration (SAMĀDHI), yukti in this context seems to have been understood in relation to meditative practice, not purely intellectual reasoning. ¶ The Pāli equivalent yutti, which appears in the NETTIPPAKARAṆA, is presented as one of the sixteen categories (hārā) of scriptural exposition, referring to (logical) fitness, right construction, or correctness of meaning.

yuktikāya. (T. rigs tshogs). In Sanskrit, literally "corpus of reasoning," or "collection of reasoning"; a term used in the Indian and Tibetan traditions to refer collectively to six works that traditionally constitute NĀGĀRJUNA's philosophical oeuvre. The six works are the MŪLAMADHYAMAKAKĀRIKĀ, YUKTIṢAṢṬIKĀ, ŚŪNYATĀSAPTATI, VIGRAHAVYĀVARTANĪ, VAIDALYAPRAKARAṆA, and RATNĀVALĪ. (Some versions list only five works in the corpus, eliminating the *Ratnāvalī*; others substitute the AKUTOBHAYĀ in place of the *Ratnāvalī* as the sixth work). This group of texts is often referred to in connection with the STAVAKĀYA, or "corpus of hymns," the devotional works attributed to Nāgārjuna. There are traditionally four works in this group of hymns, known collectively as the CATUḤSTAVA: the LOKĀTĪTASTAVA, NIRAUPAMYASTAVA, ACINTYASTAVA, and PARAMĀRTHASTAVA, although a number of other important hymns are also ascribed to Nāgārjuna. These two collections of Nāgārjuna's works figure prominently in the "self-emptiness, other emptiness" (RANG STONG GZHAN STONG) debate in Tibetan Buddhism, where the parties disagree on the question of which corpus represents Nāgārjuna's final view.

Yuktiṣaṣṭikā. (T. Rigs pa drug cu pa; C. Liushisong ruli lun; J. Rokujūju nyoriron; K. Yuksipsong yŏri non 六十頌如理論). In Sanskrit, "Sixty Stanzas of Reasoning"; one of the most famous and widely cited works attributed to NAGARJUNA, traditionally counted as one of the texts in his "corpus of reasoning" (YUKTIKĀYA). Although lost in the original Sanskrit, the work is preserved in both Tibetan and Chinese; a number of the Sanskrit stanzas have however been recovered as citations in other works. Sixty-one stanzas in length, the work is a collection of aphorisms generally organized around the topic of PRATĪTYASAMUTPĀDA. It begins with the famous homage to the Buddha, "Obeisance to the King of Sages who proclaimed dependent origination, this mode by which production and disintegration are abandoned." The work argues throughout that the world that is subject to production and disintegration is an illusion created by ignorance and that the path taught by the Buddha is the means to destroy this illusion and the suffering it creates. Individual stanzas are quoted by such commentators as BHĀVAVIVEKA, CANDRAKĪRTI, and ŚĀNTARAKṢITA in support of some of the central debates in MADHYAMAKA, such as whether ARHATS must understand the Madhyamaka conception of emptiness (ŚŪNYATĀ) in order to be liberated from rebirth and whether Nāgārjuna held that external objects do not exist (the thirty-fourth stanza can be read to suggest that he held this view).

Yuktiṣaṣṭikāvṛtti. (T. Rigs pa drug cu pa'i 'grel pa). "Commentary on [NĀGĀRJUNA's] Sixty Stanzas of Reasoning," by CANDRAKĪRTI. See YUKTIṢAṢṬIKĀ.

Yulan Guanyin. (C) (魚藍觀音). See MALANG FU.

yulanben. (T. yongs su skyob pa'i snod; J. urabon; K. uranbun 盂蘭盆). In Chinese, lit. "yulan vessel," referring to the "ghost festival." The Sinographs "yulan" have typically been interpreted by scholars to be a transcription of a hypothetical BUDDHIST HYBRID SANSKRIT, Middle Indic, or perhaps even Iranian form *ULLAMBANA, which is presumed to correspond to the Sanskrit avalambana (lit. "hanging downward," "suspended"); the term refers to the "Ghost Festival," a ritual that sought the salvation of beings condemned to the unfortunate fate of being "suspended" in hell. This explanation of yulan is questionable, however, since this connotation of the Sanskrit term avalambana is unknown in Indian Buddhist contexts. The Tibetan translation of yulanben as yongs su skyob pa'i snod, or "vessel of complete protection," also does not fit any connotations of "hanging down"; the Tibetan rendering does, however, seem to fit better an alternate explanation of the derivation of yulan(ben) as the Buddhist Hybrid Sanskrit term ullumpana (sometimes mistakenly transcribed as ullumpana, ullumbana, etc.), lit. "rescuing, extracting [from an unfortunate fate]." The Sinograph "ben" ("bowl") is less problematic: it refers to the bowl in which offerings are placed during the PRAVĀRAṆĀ festival in order to rescue one's ancestors from their unfortunate destinies. A more recent hypothesis is that "yulan" is a transcription of the Sanskrit and Pāli term odana (cooked rice) and "ben" a native word for bowl; the compound "yulanben" is thus not a transcription of the hypothetical Sanskrit word ullambana but actually means a "rice bowl," perhaps even a special kind of rice bowl for making offerings on the pravāraṇā day. The term yulanben is now used to refer to the "ghost festival," a popular ceremony in medieval China, Korea, and Japan, when offerings were made to the SAṂGHA of the ten directions (DAŚADIŚ) on behalf of one's ancestors. A bowl was filled with all kinds of flavorful foods and fruits and offered on behalf of seven generations of one's deceased parents and ancestors. The festival was held on the full moon of the seventh lunar month, when the saṃgha performed the pravāraṇā ceremony, ending the summer rains retreat (VARṢĀ). The origin myth and practices associated with the ghost festival are found in various sources, including popular stories known as BIANWEN and such Buddhist apocryphal scriptures as the YULANBEN JING and BAO'EN FENGBEN JING ("Sūtra for Offering Bowls to Repay Kindness"). The Japanese BON FESTIVAL (alt. Obon) derives from this term; it is celebrated in either mid-July or mid-August in order to honor the spirits of one's deceased ancestors.

Yulanben jing. (T. 'Phags pa yongs su skyobs pa'i snod ces bya ba'i mdo; J. Urabongyō; K. Uranbun kyŏng 盂蘭盆經). In Chinese, "Book of the Yulan Vessel"; an influential indigenous Chinese Buddhist scripture (see APOCRYPHA), often known in English as the *Ullambana Sūtra* or simply the *Yulanben Sūtra*. Along with the BAO'EN FENGBEN JING ("Scripture for Offering Bowls to Repay Kindness"), the *Yulanben jing* details the practice of the ghost festival (YULANBEN) and its origin myth. Little is known about the provenance of either text. Both are now generally presumed to be indigenous Chinese works, although some scholars continue to maintain that they are of Indian or Central Asian origin. They are thought to have been composed sometime between the fourth and fifth centuries and were included in the Chinese Buddhist canon as early as the sixth century. The origin myth recounted in the scripture describes the pious efforts of Mulian (S. Mahāmaudgalyāyana), one of the two main disciples of the Buddha, to save his mother from the tortures of her rebirth as a hungry ghost (preta). The Buddha explains to Mulian that it is impossible for an individual on his own to save his ancestors from their suffering; instead, one should place offerings in a bowl for the entire saṃgha of the ten directions, and these offerings will be sufficient to liberate up to seven generations of one's parents and ancestors from their unfortunate rebirths. At least six commentaries were written on the *Yulanben jing*, although only two survive, including an influential exegesis by Guifeng Zongmi. The Tibetan translation of the scripture, made in the Chinese outpost of Dunhuang sometime in the early ninth century by 'Gos Chos grub (C. Facheng; c. 755–849), is rendered directly from the Chinese recension and is extant in only three manuscript editions of the Tibetan canon (bka' 'gyur). See also yulanben.

yulu. (J. goroku; K. ŏrok 語録). In Chinese, "discourse records" or "recorded sayings," also known as yuben (lit. "edition of discourses") or guanglu ("extensive records"); compilations of the sayings of Chan, Sŏn, and Zen masters. This genre of Chan literature typically involved collections of the formal sermons (shangtang), exchanges (wenda), and utterances of Chan masters, which were edited together by their disciples soon after their deaths. The yulu genre sought to capture the vernacular flavor of the master's speech, thus giving it a personal and intimate quality, as if the master himself were in some sense still accessible. Often the recorded sayings of a master would also include his biography, poetry, death verse (yiji), inscriptions, letters (shuzhuang), and other writings, in addition to the transcription of his lectures and sayings. For this reason, Chan discourse records are the Buddhist equivalent of the literary collections (wenji) of secular literati. The term first appears in the Song gaoseng zhuan, and the genre is often associated particularly with the Chan master Mazu Daoyi (709–788) and his Hongzhou line of Chan. Among the more famous recorded sayings are the *Mazu yulu* (a.k.a. *Mazu Daoyi chanshi guanglu),* Linji Yixuan's Linji lu, and Huangbo Xiyun's Chuanxin fayao. Recorded sayings written in Japanese vernacular are also often called a hōgo (dharma discourse).

Yum bu bla sgang. (Yumbu Lagang). A palace and adjacent tower purported to be Tibet's oldest building, established according to legend by the first Tibetan king Gnya' khri btsan po (Nyatri Tsenpo) in central Tibet's Yar klungs (Yarlung) Valley. It may have served as the residence for the earliest Tibetan rulers and was likely renovated by the twenty-eighth king, Lha Tho tho ri gnyan btsan (Lha Tothori Nyentsen, b. 433) during the mid-fifth century. Legends state that this king received the first Buddhist scriptures while residing at the Yum bu bla sgang as they miraculously descended from the sky, heralding the eventual religious conversion of the country. According to one early Tibetan historian, however, the texts were actually transported by the Indian cleric Buddharakṣita; the king, unable to read the Indic script, declared their miraculous descent in order to keep secret their foreign origins. The texts were therefore called the gnyan po gsang ba, "the sacred secret," and indeed remained a secret until the advent of king Srong btsan sgam po in the seventh century.

Yum chen mo. In Tibetan, lit., "great mother"; a Tibetan epithet for a goddess who is the deified embodiment of the prajñāpāramitā, or perfection of wisdom. The term is also used to refer to the Śatasāhasrikāprajñāpāramitā ("Perfection of Wisdom in One Hundred Thousand Lines"), or to any other prajñāpāramitā sūtra. Finally, Yum chen mo is also an honorific term used to refer to the mother of the Dalai Lama.

Yun'an Puyan. (J. Unnan Fugan; K. Unam Poam 運庵普巖) (1156–1226). Chinese Chan master in the Linji zong; a native of Siming in present-day Sichuan province. After studying under Shigu Xiyi (d.u.) and Wuyong Jingquan (1137–1207) following his ordination, Yun'an traveled to the monastery of Zhengzhao Chanyuan on Mt. Yang in 1184 and continued his training under the Chan master Songyuan Chongyue (1132–1202), who early in his vocation had been a student of Dahui Zonggao. When Songyuan was moved to Guangxiao Chansi in Jiangsu province and again to Shiji Chanyuan in Anhui province, Yun'an followed and continued to serve the master for eighteen years. Yun'an eventually became Songyuan's successor. In 1202, after Songyuan's death, Yun'an was invited to reside in a new hermitage established by the master's brother in Yun'an's hometown in Siming. This hermitage was named Yun'an, whence he acquired his toponym. In 1206, Yun'an moved to Dasheng Puzhao Chansi in Jiangsu province, where he trained many eminent disciples, such as Xutang Zhiyu. His disciples edited his sayings together in the *Yun'an Puyan chanshi yulu.*

Yungang. (J. Unkō; K. Un'gang 雲崗). A complex of some fifty-three carved Buddhist caves located at the southern foot of Mt. Wuzhou some ten miles west of the city of Datong, in the Chinese province of Shaanxi. The Yungang grottoes extend roughly half a mile from east to west and were carved over a fifty-year period between the fifth and sixth centuries CE under the patronage of the Northern Wei dynasty (386–534) court. The caves themselves contain roughly fifty thousand Buddhist sculptures, which are noted for their rich variety. The grottoes at Yungang are divided into eastern, western, and central zones. Most of the best-preserved grottoes are found in the western zone, although Grotto No. 1 in the eastern section still contains numerous sculptures in relief. Grotto No. 5, located inside the entrance to the site, contains a giant buddha statue. Grottoes

16–20 are especially renowned for their five colossal buddha images. The iconographical features of the sculptures preserved at the Yungang caves are similar to those found in the contemporaneous cave complex at DUNHUANG; unlike Dunhuang, however, the Yungang caves contain no paintings. Since their completion, the Yungang grottoes have fallen victim to both war and natural disasters. After the People's Republic of China was founded in 1949, the Chinese government took an interest in the site, officially placing it under state protection in 1961. In December 2001, the Yungang grottoes were listed as a UNESCO World Heritage site.

Yunjusi. (雲居寺). In Chinese, "Cloud Dwelling Monastery"; monastery that is the home of the FANGSHAN SHIJING (stone scriptures). The monk Jingwan (?–639) allegedly founded this monastery in 631, but a stone inscription dated to 669 is the earliest written record of its existence. The monastery was also known as Xiyusi (Western Valley or Western Region Monastery), and in the seventh-century *Mingbaoji* ("Records of Miraculous Retribution") it is called Zhichuansi (Fount of Wisdom Monastery). On the nearby hill of Shijingshan (Stone Scriptures Hill) just to the east of Yunjusi, nine cave libraries stored the Fangshan lithic canon: its total of 14,278 lithic blocks of 1,122 Buddhist scriptures represent textual lineages that derive from recensions that circulated during the Tang and Khitan Liao dynasties. The carving of the lithic scriptures started during the Sui dynasty under the monk Jingwan with the support of Empress Xiao (r. 604–617), and continued through the late Ming dynasty. The monastery itself is famous for its pagodas, which were closely associated with the engraving of the lithographs. Seven stone pagodas date from the Tang, of which the single-story one at the top of Stone Scriptures Hill, with an inscription dated to 898, is noted for both its architecture and carved decorations. Two of the five pagodas from the Liao are especially significant. Built in 1117, the octagonal Southern Pagoda has eleven stories and pointed eaves and includes a depository of Buddhist scriptures beneath it. The Northern Pagoda is uniquely shaped: the bottom half is octagonal with bracketed eaves and carved niches, while the upper half is cone-shaped and decorated with nine circular bands. Its surface is decorated with more than thirty groups of brick reliefs depicting scenes of dancing and singing, the most interesting example of which is a goddess strumming a three-stringed instrument, one of the rare extant examples for the study of Liao musical culture. The Northern Pagoda is surrounded by smaller stone pagodas dating from the Tang dynasty, several of which resemble the Xiaoyanta (Small Wild Goose Pagoda; see DACI'ENSI) in the ancient Chinese capital of Chang'an (modern Xi'an).

Yunmen Wenyan. (J. Unmon Bun'en; K. Unmun Munŏn 雲門文偃) (864–949). Chinese CHAN monk and founder of the YUNMEN ZONG, one of the so-called five houses and seven schools (WU JIA QI ZONG) of the classical Chinese Chan tradition. Yunmen was a native of Jiaxing in present-day Zhejiang province. He was ordained at the age of sixteen by the VINAYA master Zhideng (d.u.) of the monastery Kongwangsi and two years later received the full monastic precepts at the precept platform in Piling (present-day Jiangsu province). After his full ordination, Yunmen returned to Kongwangsi and studied the DHARMAGUPTAKA vinaya (SIFEN LÜ) under Zhideng. Later, Yunmen visited Muzhou Daoming (d.u.), a prominent disciple of the eminent Chan master HUANGBO XIYUN, and continued his studies of Chan under XUEFENG YICUN. Yunmen eventually became Xuefeng's disciple and inherited his lineage. Taking his leave of Xuefeng, Yunmen continued to visit other Chan masters throughout the country, and in 911 he visited the funerary STŪPA of the sixth patriarch (LIUZU) HUINENG on CAOXISHAN. Yunmen then visited Lingshu Rumin (d. 918), a famed disciple of the Chan master Fuzhou Da'an (793–883), at his monastery of Lingshu Chanyuan in Shaozhou (present-day Guangdong province) and continued to study under Lingshu until his death in 918. Yunmen was then asked by the ruler of the newly established Nan Han state (917–971), Liu Yan (r. 917–942), to succeed Lingshu's place at Lingshu Chanyuan. In 923, he established a monastery on Mt. Yunmen in the region, whence he acquired his toponym. He continued to reside on Mt. Yunmen for thirty years and frequently visited the palace of the Nan Han state to preach. In 938, Liu Cheng (943–958), monarch of the Nan Han, bestowed on him the title Great Master Kuangzhen (Genuine Truth). According to his wishes, no funerary stūpa was prepared for Yunmen and his body was left in his abbot's quarters (FANGZHANG). Yunmen was especially famous for his so-called one-word barriers (YIZI GUAN), in which he used a single utterance to respond to a student's question. For example, once a monk asked him, "When you kill your parents, you repent before the Buddha. But when you kill the buddhas and patriarchs, to whom do you repent?" Yunmen answered, "Lu" ("exposed"). Eighteen of Yunmen's most famous Chan cases (GONG'AN) are collected in the BIYAN LU ("Blue Cliff Record"); his extended teachings are recorded in the *Yunmen Kuangzhen chanshi guanglu*.

Yunmen zong. (J. Unmonshū; K. Unmun chong 雲門宗). In Chinese, "Cloud Gate school"; one of the so-called five houses and seven schools (WU JIA QI ZONG) of the mature Chinese CHAN tradition. It is named after the mountain, located in Shaozhou (present-day Guangdong province), where its founder YUNMEN WENYAN (864–949) taught. Yunmen Wenyan was famous for his "one-word barriers" or "one-word checkpoints" (YIZI GUAN), in which he responded to his students' questions by using only a single word. The school became one of the dominant Chan traditions in the Five Dynasties (Wudai) and early Song dynasty, producing such prominent masters as DONGSHAN SHOUCHU (910–990), Dongshan Xiaocong (d. 1030), XUEDOU ZHONGXIAN (980–1052), and Tianyi Yihuai (992–1064). Yunmen masters played a major role in the development of classical Chan literature. Xuedou Zhongxian's earlier collection of one hundred old cases (guce, viz., GONG'AN), known as the

Xuedou songgu, served as the basis for the famous Biyan lu ("Blue Cliff Record"), which added the extensive commentaries and annotations of the Linji master Yuanwu Keqin (1063–1135) to Zhongxian's original compilation. Several Yunmen masters were closely associated with the Song-dynasty intelligentsia. Dajue Huailian (1009–1090), for example, was as personal friend of the Song literocrat (shidafu) and poet Su Shi (1036–1101). Fori Qichong (1007–1072) asserted the fundamental harmony of Confucianism and Buddhism, explaining Confucian philosophical concepts using Buddhist terminology. Changlu Zongze (fl. c. late eleventh to early twelfth century) institutionalized the practice of reciting the name of the Buddha (nianfo) into the routine of Chan monastic life and wrote an influential text on Chan monastic regulations or "rules of purity" (qinggui), the Chanyuan qinggui ("Pure Rules for the Chan Grove"). The Yunmen school survived for about two centuries before it was eventually absorbed into the Linji zong.

Yunqi fahui. (雲棲法彙). In Chinese, "Anthology of the Teachings of Yunqi." See Yunqi Zhuhong.

Yunqi Zhuhong. (J. Unsei Shukō; K. Unsŏ Chugoeng 雲棲株宏) (1535–1615). Chinese Chan master of the Linji zong and one of the so-called four great monks of the Ming dynasty, along with Hanshan Deqing (1546–1623), Daguan Zhenke (1543–1603), and Ouyi Zhixu (1599–1655); also known as Fohui and Lianchi. Yunqi was a native of Renhe, Hangzhou prefecture (present-day Zhejiang province). In 1566, Yunqi abandoned his family and his life as a Confucian literatus and was ordained by Xingtianli (d.u.) of West Mountain. Yunqi wandered throughout the country in search of prominent teachers and attained his first awakening at Dongchang in present-day Shandong province. In 1571, he arrived at Mt. Yunqi in Hangzhou, whence he acquired his toponym. There, he was able to restore Yunqi monastery with the help of local followers. His reputation grew after he successfully brought rain and drove tigers from the area. Yunqi remained on the mountain and composed over thirty major works. With the help of his Confucian background, Yunqi was able to draw a large public to his Chan teachings, and he also promoted the practice known as nianfo Chan in what was at the time the largest lay society in China. His influential works, such as the Changuan cejin, *Zizhi lu* ("Record of Self-Knowledge"), *Sengxun riji*, and *Zimen chongxing lu*, were edited together as the *Yunqi fahui* ("Anthology of the Teachings of Yunqi Zhuhong").

yunshui. (J. unsui; K. unsu 雲水). In Chinese, lit. "clouds and water"; a term abbreviated from the phrase "moving clouds and flowing water" (C. xingyun liushui; J. kōun ryūsui; K. haengun yusu), which is used to refer to an itinerant Buddhist practitioner who, like clouds or water, is always on the move and never settles down. The term is especially associated with the Chan (K. Sŏn; J. Zen) school, where it refers to a Chan monk in training. The term implies that a novice monk is expected to travel to various monasteries and learn from different teachers as part of his training, rather than remaining attached to one specific monastery or teaching. In contemporary Japanese Zen usage, unsui refers to neophyte priests who undergo training as novices and live in a sōdō (saṃgha hall, see sengtang) at a Zen training center. A "cloud robe" (J. unnō), by extension, refers to a monk's robe that is worn and ragged from following an itinerant lifestyle. During the Edo period (1600–1868), the term unsui became popularized to mean liberated, blissful travel, as exemplified in the novel, *Tōkaidōchū hizakurige* ("Traveling the Eastern Highway on a Chestnut Pony") by Jippensha Ikku (1765–1831). Unsui is also contrasted with the term "dragons and elephants" (C. longxiang; J. ryūzō; K. yongsang; see S. hastināga), which is commonly found in Chan texts to refer to an advanced adept of Chan.

yuntang. (雲堂). In Chinese, "cloud hall"; a monastic residential hall. See sengtang.

Yuquansi. (玉泉寺). In Chinese, "Jade Spring Monastery"; important meditative center located on Mt. Yuquan in Jingzhou prefecture (present-day Hubei province). During the Daye reign period (605–617) of the Sui dynasty, a name plaque for the monastery was prepared by the King of Jin, and the eminent monk Tiantai Zhiyi lectured there on his Fahua xuanyi and Mohe zhiguan. Yuquansi soon became a prominent center for meditators in China. The monastery became even more famous when the Chan master Shenxiu of the Northern school (Bei zong) took up residence at the site sometime in the last quarter of the seventh century. The famed Chan master Nanyue Huairang is also said to have ordained at Yuquansi.

Yu sim allak to. (C. Youxin anledao; J. Yūshin anrakudō 遊心安樂道). In Korean, "Wandering the Path to Mental Peace and Bliss"; traditionally attributed to the Korean monk Wŏnhyo, its authorship remains a matter of debate. No early references to this text are found in Korean canonical catalogues, and the earliest extant version was found in the library of the Raigōin in Kyōto, Japan. The prevailing scholarly view is that the text was composed in tenth-century Japan, perhaps by an adherent of the Tendaishū, with the first half of the work taken virtually verbatim from Wŏnhyo's *Muryangsugyŏng chongyo* ("Doctrinal Essentials of the Sukhāvatīvyūhasūtra"). The *Yu sim allak to* was influential in Japan, especially during the Kamakura period, when it was quoted in such texts as the *Kōmyō shingon dosha kanjinki* by Myōe Kōben, *An'yōshū* by Minamoto Takakuni (1004–1077), *Ketsujō ōjōshū* by Chinkai (1087–1165), and the Senchaku hongan nenbutsushū by Hōnen. The *Yu sim allak to* consists of seven sections: (1) the central tenet (i.e., the benefits of rebirth), (2) the whereabouts of the land of peace and happiness (anleguo, viz., sukhāvatī), (3) clarification of doubts and concerns, (4) the various causes and conditions of rebirth in the pure land, (5) the nine grades (jiupin) of rebirth, (6) the ease and difficulty of rebirth in the different buddha-fields (BUDDHAKṢETRA), (7) and the rebirth of women, those with dull faculties, and sinners. The last section also contains a MANTRA from the *Amoghapāśakalparājāsūtra* and an empowerment (ADHIṢṬHĀNA) ritual.

Yu-Sŏk chirŭi non. (儒釋質疑論). In Korean, "Treatise on Queries and Doubts concerning Yu (C. Ru, viz., Confucius) and Sŏk (C. Shi, ŚĀKYAMUNI)"; a Buddhist "defense of the faith" against Neo-Confucian criticisms, written during the early Chosŏn period. Although the authorship of this text remains a mystery, the style and content of the treatise resemble the HYŎNJŎNG NON by KIHWA (1376–1433), and it is clear that its Buddhist author was well versed in both Confucian and Daoist thought. The *Yu-Sŏk chirŭi non* is written in catechetic style and consists of nineteen questions and answers, which largely address misleading views that Confucian scholars hold regarding Buddhism. Following a syncretic approach that seeks to reconcile the teaching of Confucianism, Buddhism, and Daoism, this work generally argues that these three teachings each have their own distinctive roles to play in people's lives and need not be in conflict. Buddhism, Confucianism, and Daoism are explained as corresponding, respectively, to (1) nature (K. sŏng, C. XING), mind (K. sim, C. XIN), and pneuma (K. ki, C. qi); (2) truth (K. chin, C. zhen), its traces (K. chŏk, C. ji), and the connection between them; and so on. The treatise claims that these three teachings are ultimately in accord with one another because of their identical basis in the mind. The text also treats such traditional aspects of Chinese thought as yin-yang cosmology and the five phases (K. ohaeng, C. wuxing) (viz., the five traditional Chinese elements), as well as astrological and cosmological issues.

yūzūnenbutsu. (融通念佛). In Japanese, lit. "consummate-interfusion recitation of the Buddha's name"; a method of chanting Amida (S. AMITĀBHA) Buddha's name (J. nenbutsu; C. NIANFO), devised by the founder of the YŪZŪNENBUTSU school, RYŌNIN (1072–1132). The principle of yūzūnenbutsu is derived from Kegonshū (C. HUAYAN ZONG) and TENDAISHŪ (C. TIANTAI ZONG) philosophy, especially the Kegon teachings of "comsummate interfusion" (J. yūzū, C. YUANRONG) and the unobstructed interpenetration of all phenomena (J. jiji muge; see C. SHISHI WU'AI FAJIE) and the Tendai teaching of the mutual inclusion of the ten dharma-realms (J. jikkai goku; C. shijie huju). The principle of yūzūnenbutsu builds upon this sense that each and every phenomenon is perfectly interfused with all other phenomena to propose that the merit coming from one person's chanting of Amitābha's name is transferred to all other persons and vice versa. When more people chant the Buddha's name, more merit is thus transferred to all people, and the merit derived from these cooperative efforts reaches not only the dharma-realm (DHARMADHĀTU) in which it is created but also all other dharma-realms as well. Therefore, all things in all realms of existence receive benefit from any one individual's practice of chanting the Buddha's name. The practice of yūzūnenbutsu thus has two major characteristics: (1) the individual's burden to practice is relieved because salvation is due not just to one's own merit but to everyone's merit; (2) the notion of "other power" (TARIKI) in this form of pure land means both the power of one's fellow beings and the power deriving from Amitābha Buddha's vow of compassion.

Yūzūnenbutsushū. (融通念佛宗). In Japanese, "School of Consummate-Interfusion Recitation of the Buddha's Name"; one of the first Japanese PURE LAND schools. The school was founded by the TENDAISHŪ monk RYŌNIN (1072–1132), who claimed to have a direct revelation from the buddha Amida (S. AMITĀBHA) regarding the principle of YŪZŪNENBUTSU, in which every individual benefits from both his own and other's chanting of the Buddha's name (J. nenbutsu; C. NIANFO) through a mutual transfer of merit. Ryōnin traveled around Japan to teach the practice and spread the school, keeping a register of new adherents as he traveled. Indeed, carrying this register of adherents became a privilege of the leader of the school. Ryōnin also made Dainenbutsuji (Great Recitation of the Buddha's Name Temple), in the Ōsaka area, the center for his campaign in 1127. ¶ The Yūzūnenbutsu school declined after six generations. When the sixth patriarch of the school Ryōchin (d. 1182) died without a successor, the register of adherents was entrusted to the Iwashimizu Hachiman shrine, in the hopes that the HACHIMAN KAMI cum BODHISATTVA resident there would select the next patriarch of the school. About 140 years later, the Yūzūnenbutsu school was revitalized through the efforts of Hōmyō (1279–1349), who claimed to have received a revelation from Hachiman. After becoming Ryōnin's seventh successor in 1321, Hōmyō restored Dainenbutsuji and several other branch temples that had long been neglected. He also received imperial patronage from the monarch Godaigo (r. 1318–1339), who added his name and the names of many government officials to the school's register of adherents. After Hōmyō's death, the school declined again as other pure land schools gained popularity, until 1689, when Daitsū (1649–1716) became the forty-sixth patriarch of the school. Daitsū rejuvenated the school, ardently propagating the school's teachings and the practice of chanting the Buddha's name. Daitsū systematized the school's teachings: he established an academic institute and wrote two treatises, the *Yūzū enmonshō* ("Essay on the Complete Teachings of Perfect Interpenetration [*Yūzū*]") and the *Yūzūnenbutsu shingeshō* ("Essay on Faith and Understanding in the *Yūzūnenbutsu*"). In the former text, Daitsū lists five classifications of the Buddhist teachings in ascending order (the teaching of humans and divinities, HĪNAYĀNA, gradual, sudden, and consummate teachings) and classified Yūzūnenbutsu teachings in the fifth category of the "consummate teachings" (see YUANJIAO); he also discusses the school's daily practice of chanting Amida Buddha's name ten times while facing west. The Yūzūnenbutsu school remains active today at its head temple of Dainenbutsuji, although it is relatively small in size compared to the major Japanese pure land schools of JŌDOSHŪ and JŌDO SHINSHŪ. The AVATAṂSAKASŪTRA and the SADDHARMAPUṆḌARĪKASŪTRA are the principal scriptures of the school, with the three major pure land sūtras (JINGTU SANBUJING) of secondary importance.

Z

Zanabazar (Mongolian). See Rje btsun Dam pa.

Zangs mdog dpal ri. (Sangdok Palri). In Tibetan, the "Glorious Copper-Colored Mountain"; the abode of Padmasambhava. It is located on the island of Cāmara, one of the two "subcontinents" flanking the island of Jambudvīpa; Cāmara is sometimes identified as Sri Lanka. After leaving Tibet, Padmasambhava is said to have departed for the Copper-Colored Mountain. The island was inhabited by ogres (rakṣasa), whom he first had to subdue. He then constructed an octagonal palace, called "Lotus Light" (Padma 'od), at the summit of the mountain, where he will abide until the end of saṃsāra. In Tibetan Buddhism, Copper-Colored Mountain came to function as a pure land, although it is located on earth, and is not flat as pure lands are supposed to be. There are numerous prayers for rebirth on the Copper-Colored Mountain and numerous accounts of devotees being transported there in dreams and visions. Among the most common depictions of Padmasambhava in Tibetan painting are those of him enthroned on the Copper-Colored Mountain.

zangzhu. (J. zōshu/zōsu; K. changju 藏主). In Chinese, "library prefect." One of the six prefects (C. toushou) at a Chan monastery. The library prefect is in charge of the scriptures at the monastery. According to the Chanyuan qinggui, the library prefect prepares the reading desks and tea for those who wish to study the scriptures at the library or scriptorium.

Zanning. (J. Sannei; K. Ch'annyŏng 贊寧) (919–1001). Chinese vinaya master and historian. Zanning was a native of Bohai in present-day Hebei province. Sometime between 926 and 930, he was ordained at the monastery of Xiangfusi in Hangzhou, Zhejiang province, and received his monastic precepts on Mt. Tiantai. Zanning then studied the "Four-Part Vinaya" (Sifen lü) of the Dharmaguptaka school and became an expert in the South Mountain vinaya lineage (Nanshan Lü zong). He thus came to be known as Lühu or "Vinaya Tiger," and was given the title Great Master Mingyi (Bright Righteousness). In 978, he also received the title Great Master Tonghui (Penetrating Wisdom) and was invited to the monastery of Tianshousi. Upon the Emperor's decree, Zanning compiled the influential Buddhist biographical record, the Song gaoseng zhuan, which was completed and entered into the official canon (dazangjing) in 988. He also composed the Da Song seng shi lüe, one of the earliest attempts to provide a comprehensive account of the history of Buddhism throughout Asia. His other writings include the *Neidian ji, Jiuling shengxian lu*, and *Shichao yinyi zhigui.*

Zaō gongen. (藏王權現). In Japanese, "Provisional Manifestation of the Matrix King," also known as Zaō, Zaō bosatsu, and Kongō Zaō; proper name of a tutelary deity revered largely by followers of the Japanese Shugendō and Shingonshū traditions. Zaō gongen is said to have revealed himself to the legendary Japanese ascetic En no Gyōja, the reputed founder of Shugendō, on Mt. Kinbu in Nara. Zaō gongen is considered to be a bodhisattva who quells demons, as well as a nirmāṇakāya of the Buddha. Offerings and worship for Zaō gongen are conducted at the hall of Zaōdō on Mt. Kinbu. This wrathful deity is often depicted with three fearsome heads, with a three-pronged vajra in his right hand and his right leg suspended in the air.

Zaya Paṇḍita. [alt. Jaya Paṇḍita] (1599–1662). An important Mongolian monk of the Dge lugs sect of Tibetan Buddhism. Born as the fifth son in a noble family of the Qoshot tribe, in 1615 he was selected by its leader to become a monk. He was sent to Tibet where he became a disciple of the first (also counted as the fourth) Paṇ chen Lama, Blo bzang chos kyi rgyal mtshan, studying both the scholastic curriculum and the tantric curriculum. In 1639, after twenty-two years in Tibet, on the instructions of the Paṇ chen Lama and the fifth Dalai Lama, he returned to his homeland, serving as a missionary among the Qoshot. During this period, he invented the todorxoi üzüg (clear script) for the transcription of the Oirad language. In 1650, he returned to Tibet to make offerings to the Dalai Lama and to visit the Paṇ chen Lama, and then continued his missionary work, going as far west as the Kalmyk region of the Volga. Zaya Paṇḍita died while en route back to Tibet in 1662. He was a distinguished translator, translating 177 works from Tibetan into the Oirad language. The title of Zaya Paṇḍita was given to masters of the five traditional sciences; there were at least two other important Mongolian monks who bore the title and had lines of incarnation. The monk described here can be distinguished by his Tibetan name, Nam kha'i rgya mtsho.

zazen. (J) (坐禪). See zuochan.

Zazen wasan. (坐禪和讃). In Japanese, "Praise of Seated Meditation"; a short song by the Japanese ZEN master HAKUIN EKAKU in the RINZAISHŪ, which is probably his most popular work. The *Zazen wasan* is still printed in manuals for scripture recitation and is chanted at many Rinzai temples and monasteries today. In his song, Hakuin extols as the supreme virtues original enlightenment (J. HONGAKU; C. BENJUE), seated meditation (J. zazen; C. ZUOCHAN), and seeing one's own nature (J. kenshō; C. JIANXING).

Zazen yōjinki. (坐禪用心記). In Japanese, "Notes on Employing the Mind during Seated Meditation," by the ZEN master KEIZAN JŌKIN in the SŌTŌSHŪ; published in 1680. Following the model of his teacher DŌGEN KIGEN and his meditation manual FUKAN ZAZENGI, Keizan composed this relatively short treatise of his own on seated Zen (J. zazen; C. ZUOCHAN) for the edification of clergy and laity alike. The *Zazen yōjinki* delineates the purpose, method, and technique of seated meditation, with an emphasis on what kinds of mental states should be maintained during practice. Sitting meditation is explained as being a technique designed to set aside all attachments and concerns so that one will be able to abide serenely in one's true nature, or original face. Keizan also speaks of the specific impediments to meditative practice, such as deluded visions and sloth and torpor, and suggests some practical techniques for mitigating such problems.

zedi. (Burmese). See JEDI.

Zen. (禪). In Japanese, "Meditation"; the Japanese strand of the broader East Asian CHAN school, which includes Chinese Chan, Korean SŎN, and Vietnamese THIỀN. Zen is the Japanese pronunciation of the Chinese term Chan, which in turn is a transcription of the Sanskrit term DHYĀNA, or meditative absorption. More specifically, Zen denotes the Japanese Buddhist traditions that trace their origins back to the Chinese Chan school, or CHAN ZONG. Currently three major traditions in Japan, RINZAISHŪ, SŌTŌSHŪ, and ŌBAKUSHŪ, refer to themselves as Zen schools, and are thus known collectively as the Zen tradition (J. ZENSHŪ; C. CHAN ZONG). The Rinzaishū was first transmitted to Japan in the late twelfth century by MYŌAN EISAI (1141–1215), who visited China twice and received training and certification in the Chinese LINJI ZONG. By the end of the Kamakura period, some twenty-one different Rinzai lineages had been transmitted to Japan. The Rinzai school came to be associated with the meditative practice of contemplating Zen "cases" (J. kōan; C. GONG'AN; see also J. kanna Zen; C. KANHUA CHAN). The foundation of the Sōtōshū is attributed to DŌGEN KIGEN (1200–1253), who is credited with transmitting the CAODONG ZONG of the Chinese CHAN teacher TIANTONG RUJING (1162–1227). Dōgen is said to have taught the technique of "just sitting" (SHIKAN TAZA), through which the mind would become stabilized and concentrated in a state of full clarity and alertness, free from any specific content. During the Tokugawa period, the Sōtō school developed into one of the largest Buddhist sects in Japan through the mandatory parish system (DANKA SEIDO), in which every household was required to register as a member of a local Buddhist temple. By the middle of the eighteenth century, there were more than 17,500 Sōtō temples across the country. The Ōbakushū was founded by the émigré Chinese CHAN master YINYUAN LONGXI (J. Ingen Ryūki; 1592–1673), who traveled to Japan in 1654/1655 to escape the succession wars and political turmoil that had accompanied the fall of the Ming dynasty. The Ōbaku school introduced exotic contemporary Chinese customs and monastic practices to the Japanese Zen Buddhism of the time. Although it remained much smaller than the Rinzai and Sōtō Zen traditions, the presence of the Ōbaku school compelled the monks of its two larger rivals to reevaluate their own practices and to initiate a series of important reform movements within their respective traditions (see IN'IN EKISHI). In the modern era, largely through the efforts of such towering intellectual figures as DAISETZ TEITARO SUZUKI (1870–1966), NISHIDA KITARŌ (1870–1945), and NISHITANI KEIJI (1900–1991), the term Zen has also come to connote a "pure experience" (junsui keiken) that transcends language and thought, which is sometimes argued to be the unique property of the Japanese people and their culture (cf. KYOTO SCHOOL). The cavalier way in which the term Zen is now deployed in generic Western writings (e.g., the myriad "Zen in the Art of" books) often has little to do with the traditional perspectives of the Zen tradition found in either Japan or the rest of East Asia. As in the case of Chan, in more common parlance, Zen can also denote the particular teaching style of a Zen master and is often expressed as "so-and-so's Zen." See also entries on the SŌTŌSHŪ, RINZAISHŪ, and ŌBAKUSHŪ and on specific Japanese Zen masters and monasteries.

zendō. (禪堂). In Japanese, "meditation hall." See SENGTANG.

Zenkōji. (善光寺). In Japanese, "Monastery of the Radiance of Goodness"; located in modern-day Nagano. According to the *Zenkōji engi*, the monastery was built at the beginning of the seventh century by a certain Honda Yoshimitsu to enshrine a famous Amida (AMITĀBHA) triad. In the ancient Indian kingdom of VAIŚĀLI, a merchant by the name of Somachattra is said to have warded off epidemic demons and cured his daughter by invoking the name of the buddha Amitābha ten times. Somachattra was so moved by the appearance of Amitābha and his two attendants AVALOKITEŚVARA and MAHĀSTHĀMAPRĀPTA in the sky that he asked the Buddha for an icon to be made in their likeness. The triad was then forged with special gold from the dragon king's palace and worshipped as a living manifestation of Amitābha and his attendants. Somachattra was later reborn as King Sŏng (r. 523–553) of the Korean kingdom of Paekche. The triad first traveled to Paekche to aid King Sŏng, after which it was taken to Japan. Honda Yoshimitsu is said to have discovered the triad in the Naniwa Canal and enshrined it in his house, which was later transformed into a magnificent buddha hall by Empress Kōgyoku (r. 642–645). With support from the Hōjō bakufu, a Zenkōji cult proliferated especially during the Kamakura period and onwards, and numerous replicas of the "original" (Shinano) Zenkōji triad were made and enshrined in Shin ("New") Zenkōji temples. For centuries, the (Shinano) Zenkōji in Nagano remained under the control of another powerful TENDAISHŪ monastery known as MIIDERA. Zenkōji was devastated by fire in 1179, but legendary accounts testify to the miraculous escape of the "original" triad, which now remains as a secret buddha (HIBUTSU) image largely unavailable for public viewing. After the Japanese monk IPPEN's visit to Zenkōji, several Shin Zenkōji temples also came to be associated with his tradition, the JISHŪ.

Zenrin kushū. (禪林句集). In Japanese, "Phrase Collection of the ZEN Grove"; a lengthy collection of more than four thousand Zen phrases—specifically capping phrases (JAKUGO) or appended phrases (AGYO)—culled from Buddhist SŪTRAS, discourse records (YULU), kōan collections (see C. GONG'AN), and various Chinese belletristic classics. The collection was edited by a certain Ijūshi in 1688. Ijūshi's collection is based on a shorter phrase book entitled the *Kuzōshi*, compiled by the Zen master Tōyō Eichō (1428–1504) of the MYŌSHINJI lineage of the RINZAISHŪ. Beginning with single-character phrases, the Zen phrases in the *Zenrin kushū* are sequentially organized according to their number of Sinographs. The *Zenrin kushū* is one of the most commonly used collections in Japanese kōan training today.

Zenrin shōkisen. (禪林象器箋). In Japanese, "A Composition on the Images and Utensils of the Zen Grove"; compiled by the ZEN historian MUJAKU DŌCHŪ in the RINZAISHŪ; a comprehensive catalogue of regulations, events, utensils, and accoutrements used by the Zen (C. CHAN) tradition. The preface was prepared by Mujaku in 1741. More than just a simple catalogue, Mujaku's *Zenrin shōkisen* also meticulously notes the possible origin and history of each catalogued item and also expounds upon the significance of its implementation during his day, making it an invaluable tool for the study of Zen in practice. His research is based on an exhaustive list of sources (a total of 488 selections) beginning with sūtras and commentaries to Chinese and Japanese classics, lamplight histories (see CHUANDENG LU), and poetry. A handwritten copy of the text is currently housed at MYŌSHINJI in Kyōto.

Zenshū. (J) (禪宗). In Japanese, the school, lineage, or tradition of CHAN. See ZEN.

Zetawun Pagoda. In Burmese, "Prince Jeta's Grove" (P. JETAVANA); regarded as the oldest shrine in Sagaing. Zetawun Pagoda commemorates the Buddha's legendary first visit to Burma (Myanmar) in the company of ĀNANDA. According to tradition, the site was occupied by ninety-nine ogres (Burmese, bilu), the leader of whom was named Zeta. When they encountered the Buddha and Ānanda, the ogres welcomed them and, in return for their piety, the Buddha preached the dharma to them for seven days. All ninety-nine ogres became stream-enterers (P. sotāpanna; S. SROTAĀPANNA) while listening to these sermons. The Zetawun Pagoda purportedly contains the lower robe or waist cloth (P. antaravāsaka; S. ANTARVĀSAS) of the Buddha, which he is said to have presented to the ogres upon their entreaty to leave a token of his visit as an object of worship. The name Zetawun honors the ogre chief Zeta and recalls the fact that at the time of the Buddha's visit this spot was covered by forests (Burmese, wun). To commemorate the spiritual attainment of the ogres, the village that grew up around the site became known as Thotapan Ywa or Sotāpanna Village. An annual pagoda festival is held in the village on the new moon day of the Burmese month of Waso (July–August). Adjacent to the Zetawun can also be found an ordination hall said to have been established by the Mon saint, Shin Arahan.

Zhabs dkar tshogs drug rang grol. (Shapkar Tsokdruk Rangdröl) (1781–1851). One of the most revered Tibetan preachers and saints of the nineteenth century. He was born in the Reb kong region of A mdo in the northeast of the Tibetan cultural domain. During his youth, he received instruction in RDZOGS CHEN and various treasure (GTER MA) cycles of the RNYING MA sect. He undertook a one-year retreat at the age of sixteen and was ordained at the age of twenty at Rdo bis, a DGE LUGS monastery. He maintained his monastic vows throughout his life but wore his hair long and piled on the top of his head in the manner of a tantric YOGIN. His main teacher was Chos rgyal Ngag gi dbang po, but he studied with a variety of teachers, including those of the Dge lugs sect. He also studied traditional painting. An adept, pilgrim, and poet of the Rnying ma sect, he traveled throughout Tibet, undertaking retreats at such famous sites as Rma chen spom ra, TSA RI, and Mount KAILĀSA, including in a number of caves where MI LA RAS PA is said to have meditated. He became known as Zhabs dkar, or "white footprint," because he meditated at Mount Kailāsa, where the Buddha is said to have left his footprints (BUDDHAPĀDA). He also traveled to Kathmandu, where he offered gold for the spire of the BODHNĀTH STŪPA. He gained fame among all social classes through his wide-ranging activities as a Buddhist teacher and his enormous personal generosity and charisma. His autobiography, entitled *Snyigs dus 'gro ba yongs kyi skyabs mgon zhabs dkar rdo rje 'chang chen po'i rnam par thar pa rgyas par bshad pa* (translated as *The Life of Shabkar*) is regarded as one of the masterworks of that genre of Tibetan literature.

Zhabs drung Ngag dbang rnam rgyal. (Shapdrung Ngawang Namgyal) (1594–1651). A Tibetan Buddhist figure noted for unifying Bhutan as a Buddhist state. At a young age, Ngag dbang rnam rgyal was installed as the eighteenth successor to the throne of RWA LUNG monastery, seat of the 'BRUG PA BKA' BRGYUD sect of Tibetan Buddhism in central Tibet and its leaders, the 'BRUG CHEN INCARNATIONS. In 1616, at the age of twenty-three, he was forced to flee to Bhutan in a political dispute over his recognition as the reincarnation of the fourth 'Brug chen master, PADMA DKAR PO. Ngag dbang rnam rgyal initially gained control over the western region, with his forces eventually defeating his rivals and uniting the various regions into a single country under his leadership. He later successfully repelled an invasion of Bhutan by Tibetan forces mustered by the fifth DALAI LAMA. His title Zhabs drung (literally "at the feet") refers to his great stature as a Buddhist master. He is famed for establishing a religious and political system of monastic and administrative centers called rdzong (fortress), which are still in use today in Bhutan. Ngag dbang rnam rgyal is also considered the first master of a prominent Bhutanese incarnation lineage, the Zhabs drung incarnations.

zhai. (J. sai; K. chae 齋). A polysemous Chinese term that means "fast," "purify," "make offerings to monks," "festival," or "vegetarian feast" (and often seen translated as "maigre feast"); it is also used to translate the Sanskrit term UPOṢADHA. The traditional PRĀTIMOKṢA prohibition against monks and nuns eating after noon was referred to in Chinese as zhai, hence its translation as "fast." In China, zhai came to refer generally to meals offered at Buddhist rituals and events and more specifically to vegetarian feasts held at monasteries throughout the country. Monasteries often maintained special funds to be used for such purposes. These vegetarian feasts and festivals served as one of the primary means through which the laity made offerings to the monastic community. One of the most famous of such festivals in East Asia was the "Ghost Festival" (YULANBEN).

Zhancha shan'e yebao jing. (J. Senzatsu zen'aku gōhōkyō; K. Chŏmch'al sŏnak ŏppo kyŏng 占察善惡業報經). In Chinese, "Scripture of Divining the Requital of Good and Evil Actions"; an indigenous Chinese Buddhist scripture (see APOCRYPHA) compiled sometime during the late sixth century. The scripture seems to have been used by a community in Guangdong that was deemed heretical and whose practice of divination and repentance was banned in 593. The first roll of this scripture is largely concerned with the practice of divination, which is made possible through repentance. The scripture emphasizes the need for faith in this dharma-ending age (MOFA); the method of cultivating this faith is offered by the bodhisattva KṢITIGARBHA. This method largely involves the use of various spinning tops (lit. "wheels") on which the possible fate and fortune of the client is written. A total of 189 possible fates are offered. The repentance rite in the *Zhancha shan'e yebao jing* seems to have been influenced by the *Upāsakaśīlasūtra* translated by DHARMAKṢEMA. The second roll of the scripture has been a subject of controversy, for it provides an early version of the monistic "one mind" (YIXIN) and TATHĀGATAGARBHA doctrine that came to dominate in the East Asian schools of Buddhism. Comparisons are often made between this second roll and the influential DASHENG QIXIN LUN.

Zhang Sengyao. (C) (張僧繇) (d.u.; fl c. 502–549). The first Chinese artist to paint a rendering of the sixteen ARHAT protectors of Buddhism. See ṢOḌAŚASTHAVIRA.

Zhang Shangying. (J. Chō Shōei; K. Chang Sangyŏng 張商英) (1043–1122). Influential Chinese Buddhist layman and statesman; also known as Tinajue and Wujin jushi (Layman Infinite). Born to a prominent literati family in Xinjin (present-day Sichuan province), Zhang Shangying began his illustrious career in 1065 after receiving his jinshi degree. He first made a name for himself through military expeditions against neighboring barbarian tribes in Yuzhou, after which he was given a high metropolitan post by the powerful grand councilor Wang Anshi (1021–1086). Zhang thus became a supporter of Wang's administrative and fiscal reform attempts known as the "new policies" (xinfa). Even after Wang's fall from power, Zhang maintained his support for reform, which eventually allowed him to become grand councilor himself in 1111. Due to political battles at court and his complaints regarding Emperor Huizong's (r. 1100–1125) support of the Daoists' anti-Buddhist polemics, Zhang's tenure at court was cut short, and he spent the rest of his life in retirement. During this period of retirement, Zhang Shangying devoted much of his time to Buddhism. Throughout his life, Zhang befriended and studied under the most respected CHAN masters of his day, such as Dantang Wenzhun (1061–1115), Doushuai Congyue (1044–1091), Huitang Zuxin (1025–1100), ZHENJING KEWEN, YUANWU KEQIN, DAHUI ZONGGAO, and JUEFAN HUIHONG, and exchanged correspondence with many of them, some of which are still extant. Zhang was particularly fond of the AVATAṂSAKASŪTRA and commentaries on the text composed by the famous Tang dynasty layman LI TONGXUAN; emulating Li, Zhang made a pilgrimage to WUTAISHAN. He also wrote a treatise entitled *Hufa lun* ("Arguments in Defense of the Dharma)" as a rebuttal to the growing anti-Buddhist polemics among the Daoists at court.

Zhanran. (C) (湛然). See JINGXI ZHANRAN.

Zhanran Yuandeng. (J. Tannen Enchō; K. Tamyŏn Wŏnjing 湛然圓澄) (1561–1626). Chinese CHAN master in the CAODONG ZONG; also known as Sanmu daoren. Zhanran was a native of Huiji prefecture in Zhejiang province. In his early twenties, Zhanran became the student of the monk Miaofeng (d.u.) on Mt. Tianhuang and later received monastic precepts from the Chan master YUNQI ZHUHONG, one of the most eminent Chan teachers of the Ming dynasty. In 1591, Zhanran became the disciple of Cizhou Fangnian (d. 1594) and inherited his Caodong lineage. Zhanran first made a name for himself while residing at the monastery of Shouxingsi and subsequently served as abbot of the monasteries WANSHOUSI on Mt. Jing, and Xianshengsi in his hometown of Huiji, as well as several other monasteries in different regions of Zhejiang province. Zhanran composed the ZONGMEN HUOMEN, an influential treatise on

Chan meditation, and his other teachings are recorded in the *Zhanran Yuandeng chansi yulu*.

zhao’er changji. (C) (照而常寂). See JI ER CHANGZHAO.

Zhao lun. (J. Jōron; K. Cho non 肇論). In Chinese, “(Seng) zhao’s Treatise”; an influential work by the eminent Chinese monk SENGZHAO (374–414), one of the major disciples of the important Kuchean translator KUMĀRAJĪVA (344–413). The *Zhao lun* was compiled sometime between 384 and 414 and brings together Sengzhao’s four major works. The first, *Wubuqian lun* (“On the Immutability of Things”), explores the irrelevancy of time in explaining dharmas that are not subject to production and cessation. The second, *Buzhenkong lun* (“Emptiness of the Unreal”), explains how dharmas can simultaneously appear as both real and unreal. The BORE WUZHI LUN (“The Nescience of Prajñā”) explains that because wisdom (PRAJÑĀ) is quiescent, empty, and lacking a perduring essence, any conscious awareness of it, or emanating from it, is impossible. Finally, “Niepan wuming lun” (“The Anonymity of Nirvāṇa”) demonstrates that NIRVĀṆA is fundamentally ineffable and therefore nameless. A chapter entitled “Zong benyi” (“Fundamental Meaning of the Major Tenets”) appears at the beginning of the *Zhao lun* and offers a succinct explanation of some important doctrinal matters, such as original nothingness (benwu), the true mark of reality (shixiang), dharma nature (faxing), and the emptiness of nature (xingkong). Letters exchanged between Sengzhao and the layman Liu Yimin (d. 410) of LUSHAN are appended at the end of the *Zhao lun*. Numerous commentaries on this text exist across the East Asian traditions.

Zhaozhou Congshen. (J. Jōshū Jūshin; K. Choju Chongsim 趙州從諗) (778–897). One of the most renowned Chinese CHAN teachers of the Tang dynasty; his toponym Zhaozhou derives from the Zhaozhou region in Hebei province, where he spent much of his later teaching career. Zhaozhou was ordained in his youth at Hutongyuan in his hometown of Caozhou (in present-day Shandong province). At the age of eighteen, he met NANQUAN PUYUAN (748–835), a successor of MAZU DAOYI (709–788), and studied under him for several decades until that teacher’s death. Then in his fifties, Zhaozhou began to travel throughout China, visiting prominent Chan masters such as HUANGBO XIYUN (d. 850) and Daowu Yuanzhi (760–835). Having served as abbot of various monasteries on Mt. Huangbo, Baoshou, and Jia, Zhaozhou settled at the age of eighty in Guanyinyuan (AVALOKITEŚVARA Cloister) in Zhaozhou, and taught a small group of monks there for the next forty years. Zhaozhou did not use the iconoclastic pedagogical techniques, such as shouting and beating (BANGHE), made famous by other teachers of his era, but used his words to challenge his students and lead them to self-realization. The Song-dynasty Chan master YUANWU KEQIN (1063–1135) described this characteristic of Zhaozhou’s teachings when he said, “Zhaozhou’s Chan lies on the lips.” Zhaozhou is frequently cited in the collections of Chan GONG’AN (public cases), including five of the forty-eight gong’ans collected in the WUMEN GUAN (“Gateless Checkpoint”) and twelve of the one hundred in the BIYAN LU (“Blue Cliff Record”). The most influential gong’an associated with Zhaozhou is the first case collected in the *Wumen guan*, the so-called WU GONG’AN: “‘Does a dog have the buddha-nature (FOXING) or not?’ ‘No.’” Zhaozhou’s “WU” (no; lit. “it does not have it”), became one of the most oft-cited statements in all of Chan, SŎN, and ZEN literature. Due in large part to the efforts of Chan master DAHUI ZONGGAO and his followers, Zhaozhou’s wu came to be used as one of the meditative topics (HUATOU) in the Chan meditation practice of “questioning meditation” (KANHUA CHAN). Although Zhaozhou had thirteen dharma heirs, his lineage soon died out. He posthumously received the title “Zhenji dashi” (Great Master Apex of Truth). The record of his teachings is contained in the three rolls of the *Zhenji dashi yulu* (“Discourse Record of Zhenji Dashi”) and in his *Zhaozhou lu*.

Zhe chen. (Shechen). One of the four main RNYING MA monasteries in eastern Tibet, the others being KAḤ THOG, RDZOGS CHEN, and DPAL YUL; founded in 1735 by the second ZHE CHEN RAB ’BYAMS incarnation, ’Gyur med kun bzang rnam rgyal (Gyurme Kunsang Namgyel, 1710–1769). Zhe chen then became the seat for his subsequent incarnations, who all served as abbot, and a principal institution of the Rnying ma sect of Tibetan Buddhism. The monastery, comprised of several main temples and surrounding structures, was at times also governed by a line of regent lamas, the Zhe chen rgyal tshab (Shechen Gyaltsap) incarnations. The fourth Zhe chen rgyal tshab, Padma rnam rgyal (Pema Namgyel, 1871–1926), formally recognized the young twentieth-century luminary DIL MGO MKHYEN BRTSE as one of five reembodiments of ’JAM DBYANG MKHYEN BRTSE DBANG PO, a leading figure of the nineteenth-century RIS MED, or nonsectarian movement. The institution’s full name is Zhe chen bden gnyis dar rgyas gling (Shechen Dennyi Dargyeling).

Zhe chen rab ’byams. (Shechen Rapjam). An important line of Tibetan incarnate lamas. The first Zhe chen rab ’byams, Bstan pa’i rgyal mtshan (Tenpe Gyaltsen, 1650–1709), was a disciple of the fifth DALAI LAMA, NGAG DBANG BLO BZANG RGYA MTSHO, and Padma rig ’dzin (Pema Rikdzin, 1625–1697)—the latter being the first RDZOGS CHEN INCARNATION and founder of RDZOGS CHEN monastery. The second Zhe chen rab ’byams, ’Gyur med kun bzang rnam rgyal (Gyurme Kunsang Namgyel, 1710–1769), founded Zhe chen monastery in 1735. Subsequent incarnations served as the abbots of Zhe chen monastery.

zheng bao. (J. shōhō; K. chŏngbo 正報). In Chinese “retribution proper,” the actions, or KARMAN, directly affect the individual, conditioning one’s physical body and psychological makeup. See ER BAO.

Zhengdao ge. (J. Shōdōka; K. Chŭngdo ka 證道歌). In Chinese, "Song of the Attainment of the Way"; attributed to Yongjia Xuanjue (675–713); also known as the *Chanmen biyao jue* ("Secret Essentials of the Chan Tradition"). Along with the Xinxin ming, the *Zhengdao ge* is cherished by the Chan tradition as one of the classic verse expressions on the process of meditation and the experience of enlightenment. Its contents purport to convey Yongjia's awakening after only a single day and night of tutelage under the sixth patriarch (liuzu) Huineng, whence Yongjia's cognomen Ishujue ("Single-Night Enlightened," or "Overnight Guest"). The poem consists of fewer than two thousand Sinographs and follows a traditional regulated-verse style. The verse describes enlightenment as the realization that the true nature of all things is in fact the buddha-nature (foxing), which is emptiness itself, transcending all the dichotomies of existence or nonexistence or truth and falsity. This enlightenment is said to occur suddenly, "in a snap of the fingers" (danzhi), the verse says, and it is this sudden enlightenment (dunwu) that has been transmitted through the twenty-eight Indian and six Chinese patriarchs (zushi) of the Chan tradition. Aspects of the style and vocabulary used in the poem, which seem to antedate the eighth century, have led to questions about the authenticity of its attribution to Yongjia. Several copies of this text were found at Dunhuang, and numerous commentaries of this text are extant, dating from the Song dynasty. The Song-dynasty teacher Dahui Zonggao claimed that the verse was held in such high esteem that it had even been back-translated into Sanskrit.

Zhengfayanzang. (J. Shōbōgenzō; K. Chŏngpŏbanjang 正法眼藏). In Chinese, "Treasury of the Eye of the True Dharma," in three rolls, edited by the Chan master Dahui Zonggao and his lay disciples in 1147. The Zhengfayanzang is largely a collection of 661 cases or gong'an with Dahui's prose commentary (pingchang), annotations (C. zhuoyu/zhuyu; see J. jakugo), and instructions for the assembly. The zhengfayanzang of the title is a term used within Chan to indicate the school's special repository of the "eye" or "mind" of the buddhadharma, which is independent from the scriptural tradition. (See jiaowai biechuan). The exchanges between masters and disciples that Daohui covers in his collection are described as being the transmission of this eye. His *Zhengfayanzang* thus records the exchanges of a number of renowned Tang and Northern Song Chan masters and their disciples, including Zhaozhou Congshen, Deshan Xuanjian, and Xuefeng Yicun, as well as the sermons of masters associated especially with the Linji zong, including Linji Yixuan, Yangqi Fanghui, and Huanglong Huinan. Dahui strings together typically between three and six exchanges or sermons and, at the end of each section, adds his own brief prose commentary, often about twenty Sinographs in length, most starting with "Miaoxi says." (Miaoxi is one of Daihui's cognomens.) The *Zhengfayanzang* seems to have exerted some influence on the compilation of the Zongmen liandeng huiyao, by Dahui's third-generation successor Huiweng Wuming (d.u.). The Shōbōgenzō, the magnum opus of the Japanese Sōtōshū monk Dōgen Kigen, bears the same title but in its Japanese pronunciation.

Zhengjue. (C) (正覺). See Hongzhi Zhengjue.

Zhengnian. (C) (正念). See Daxiu Zhengnian.

zhengwu. (J. shōgo; K. chŭngo 證悟). In Chinese, "realization-awakening"; the most advanced of the two types of enlightenment (wu; bodhi) discussed in some Chan schools, equivalent to the achievement of buddhahood. This type of awakening is achieved at the consummation of the ten stages (bhūmi) of the bodhisattva path, rendering one a buddha in fact as well as in principle. The initial "seeing the nature" (jianxing) of buddhahood catalyzes the "understanding-awakening" (jiewu), in which the Chan adept comes to know that he is not a deluded sentient being but a buddha. This initial sudden awakening is not in itself sufficient, however, to bring an end to the habituations (vāsanā) that have been engrained in the mind for an essentially infinite amount of time. It is only after a period of gradual cultivation (jianxiu) that these habitual tendencies will be removed and one's actions will finally correspond with one's understanding. That point where knowledge and action are fully integrated marks the final "realization-awakening" (zhengwu) and thus constitutes the complete, perfect enlightenment of buddhahood (anuttarasamyaksaṃbodhi). This two-tiered approach to awakening is the hallmark of the sudden awakening/gradual cultivation (dunwu jianxiu) path (mārga) schema of certain Chan masters, such as Guifeng Zongmi (780–841) in the Chinese Hoze school of Chan, and Pojo Chinul (1158–1210) of the Korean Sŏn tradition.

Zhenjing Kewen. (J. Shinjō Kokubun; K. Chinjŏng Kŭngmun 眞浄克文) (1025–1102). Chinese Chan master in the Huanglong pai collateral line branch of the Linji zong; also known as Yun'an, Baofeng, and Letan. Zhenjing was a native of Shanfu in present-day Henan province. He became a student of a certain master Guang of the North Pagoda in Fuzhou (present-day Hubei province) and was given the name Kewen. After receiving the monastic precepts at age twenty-four, Zhenjing began studying the sūtras and commentaries, but left for the South to seek out teachers of Chan. In 1065, Zhenjing spent a summer retreat on Mt. Dawei and had his first awakening experience upon hearing the words of the Chan master Yunmen Wenyan from another monk. Zhenjing eventually became a disciple of the eminent Chan master Huanglong Huinan (1002–1069) in Jicui and inherited his Linji lineage. At the request of the local king, Zhenjing moved to Jinleng, where he became the founding abbot of a monastery named Baoningsi. Zhenjing later retired to Gao'an, where he built a small hermitage named Toulao'an. Six years later, he moved to the monastery of Guizongsi on Lushan and again to Letan at the request of the famed statesman Zhang Shangying. Along with his colleagues Huanglong Zuxin (1025–1100) and Donglin Changcong (1025–1091), Zhenjing helped to build their teacher Huanglong Huinan's lineage into one of the most prosperous in China. He retired to the hermitage of Yun'an, where he passed away in 1102. Zhenjing left numerous disciples and students, many of whom were statesmen and officials from Jiangxi province. His teachings can be found in the *Yun'an Zhenjing chanshi yulu*.

Zhenke. (C) (眞可). See DAGUAN ZHENKE.

zhenru. (J. shinnyo; K. chinyŏ 眞如). In Chinese, "true thusness" or "true suchness"; the Chinese translation of the Sanskrit terms BHŪTATATHATĀ or TATHATĀ, which comes to play its own important role in indigenous Chinese Buddhist thought. According to the Chinese scholastic tradition, deriving from translations of the LAṄKĀVATĀRASŪTRA and YOGĀCĀRA sources, ZHENRU is, along with right knowledge (chengzhi), one of the two "factors associated with enlightenment" (wufa), true thusness being what is seen by correct knowledge when perception is freed from conceptual superimpositions. True thusness (zhenru) is described in the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāyāna") as one of two distinct, but complementary, aspects of the one mind (YIXIN), along with production and cessation (shengmie). True thusness and production and cessation correspond, respectively, to ultimate truth (PARAMĀRTHASATYA) and conventional truth (SAṂVṚTISATYA), or the unconditioned (ASAṂSKṚTA) and conditioned (SAṂKṚTA) realms. Since the mind that is subject to production and cessation (which the *Dasheng qixin lun* identifies with ĀLAYAVIJÑĀNA) remains always grounded on the mind of true thusness (which the treatise identifies with TATHĀGATAGARBHA), the mind may therefore be simultaneously described as both deluded and enlightened. The bifurcation between this enlightened essence of the mind as "true thusness" and its various temporal manifestations as "production and cessation" also aligns with the "essence" (TI) and "function" (YONG) distinction that Buddhism imported from indigenous Chinese philosophy.

zhenyan. (J. shingon; K. chinŏn 眞言). In Chinese, lit. "true word." See MANTRA; SHINGONSHŪ.

Zhi. (J. Shi; K. Chi 支). Ethnikon used in China for monks from Scythia (C. Yuezhi) or its successor state, the KUSHAN kingdom, in the northwest of India.

zhi byed. (shije). In Tibetan, lit. "pacification"; a Tibetan Buddhist tradition of meditation practice traced back to the eleventh-century Indian adept PHA DAM PA SANGS RGYAS, who for many years taught at the small temple of GLANG SKOR, near Ding ri in western Tibet. The name derives from the goal of the practice, which is the "pacification" of all suffering, transforming negative states into positive states through the practice of the six perfections (PĀRAMITĀ), especially the perfection of wisdom (PRAJÑĀPĀRAMITĀ). The practice is also said to extend one's life. Together with the related tradition of GCOD, or "severance," promulgated by Pha dam pa sangs rgyas's female disciple MA GCIG LAB SGRON, pacification is frequently counted as one of eight major streams of Buddhist practice found in Tibet, the so-called eight great conveyances that are lineages of achievement (SGRUB BRGYUD SHING RTA CHEN PO BRGYAD). Unlike the tradition of severance, however, the practice of pacification as a unique system had largely died out by the nineteenth century, when great Tibetan scholars of the nonsectarian (RIS MED) movement attempted to preserve its transmission.

zhidian. (J. chiden; K. chijŏn 知殿). In Chinese, lit., "to know the halls," a "hall prefect"; one of the six prefects (C. TOUSHOU) at a CHAN or ZEN monastery. The hall prefect is in charge of cleaning and preparing the shrine halls and the ritual objects placed therein.

Zhi Dun. [alt. Zhi Daolin] (J. Shi Ton/Shi Dōrin; K. Chi Tun/Chi Torim 支遁/支道林) (314–366). An early exegete of the perfection of wisdom (PRAJÑĀPĀRAMITĀ) literature in the southern part of China and leader of an influential group of early Buddhist philosophers associated with the "Dark Learning" (XUANXUE) school. Zhi is especially important for his crucial reinterpretation of the Chinese philosophical term LI, which previously had meant the "pattern" or natural order of things. Zhi instead reinterprets li in light of perfection of wisdom thought as an absolute "principle," which later came to be contrasted with the manifestations of that principle in the world as various "phenomena" (SHI). This distinction between principle and phenomena later occupied a crucial position in the thought of many of the indigenous schools of Chinese Buddhism, including the TIANTAI ZONG and the HUAYAN ZONG. Zhi Dun is also known for the earliest communication to a certain monk from the Korean Koguryŏ Kingdom, at least one decade before the official introduction of Buddhism to the peninsula, suggesting earlier Buddhist contacts between China and Korea than the extant evidence indicates.

zhike. (J. shika; K. chigaek 知客). In Chinese, "guest prefect"; one of the six prefects (C. TOUSHOU) at a CHAN monastery. The guest prefect is in charge of receiving and accommodating important visitors and guests. In modern Japanese ZEN, the guest prefect plays an important role in the training of young monks on pilgrimage (J. ANGYA; see C. XINGJIAO) as they engage each other in the elaborate ritual of receiving permission to enter the monastery.

zhi khro. (shi dro). In Tibetan, "peaceful and wrathful"; a term used to refer to assemblies (especially in a MAṆḌALA) of peaceful and wrathful (also known as khrag 'thung or "blood drinking") deities. For example, in the so-called *Tibetan Book of the Dead*, known in Tibetan as the BAR DO THOS GROL CHEN MO or the *Karma zhi khro* ("The Peaceful and Wrathful Deities of

Karma gling pa"), a maṇḍala of forty-two peaceful deities and fifty-eight wrathful deities appears during the chos nyid bar do, the second of the three bardos (antarābhava).

Zhikong Chanxian. (J. Shikū Zenken; K. Chigong Sŏnhyŏn; S. *Śūnyadiśya-Dhyānabhadra 指空禪賢) (1289–1363). In Chinese, "Pointing to Emptiness, Meditative Worthy," an Indian monk who taught first in China, but later came to live and teach in Korea at the end of the Koryŏ dynasty, where his influence was especially important; his Chinese name is sometimes reconstructed into Sanskrit as *Dhyānabhadra, and this is how he is often known in the literature. According to his memorial stele written by the Korean literatus Yi Saek (1328–1396), Zhikong was born as the third son of the ruler of a small state in the Magadha region of northeastern India around 1235. He entered the monastic life at the age of eight and is said to have studied at the famous Nālandā monastic university under the guidance of Vinayabhadra (C. Lüxian). He claimed to have traveled to Sri Lanka at the age of nineteen to study under Samantaprabhāsa (C. Puming), the 107th patriarch in a putative "Chan" lineage starting from Mahākāśyapa, which probably means some sort of meditative lineage quite distinct from the East Asian Chan lineages. After receiving transmission from Samantaprabhāsa, Zhikong became the 108th patriarch in that lineage. Around 1324, Zhikong traveled via Tibet to the Yuan dynasty and then went on to Koryŏ in 1326 at the invitation of King Ch'ungsuk (1294–1339; r. 1313–1330, 1332–1339), whom he had met in Beijing at the Mongol court. During his stay in Koryŏ, Zhikong went on pilgrimage to many important Buddhist sites, including the famous Diamond Mountains (Kŭmgangsan). He also founded Hoeamsa (Fir Tree Cliff Monastery) in 1328 in what is now Kyŏnggi province, which is said to have been modeled after Nālandā monastery. He returned to the Yuan in 1328, where he was visited by many Korean students, including the late Koryŏ monks Naong Hyegŭn (1320–1376) and Muhak Chach'o (1327–1405), on whom he had great influence. He died in 1363, and because of the reverence in which he was held by King Kongmin (r. 1351–1374), some of his relics were sent to Koryŏ. The relics were first housed in the royal palace and later enshrined in a reliquary at Hoeamsa. Zhikong was supposed to have been well versed in literature of prajñāpāramitā, vinaya, and tantra. In Korea, there survives a collection of his teachings, the *Chigong hwasang Sŏnyo nok* ("Master Zhigong's Essentials of Sŏn Record"), and his putative sūtra, the *Munsusari posal ch'oesangsŭng musaenggye kyŏng* ("Sūtra on the Ultimate Nonproduction (Anutpāda) Precepts of the Bodhisattva Mañjuśrī"), which is supposed to have been translated from a Sanskrit original by his disciple Naong.

Zhili. (C) (知禮). See Siming Zhili.

Zhi Qian. (J. Shi Ken; K. Chi Kyŏm 支謙) (fl. c. 220–252). Prolific earlier translator of Buddhist texts into Chinese. A descendant of an Indo-Scythian émigré from the Kushan kingdom in the Kashmir-Gandhāra region of northwest India, Zhi Qian is said to have been fluent in six languages. Although never ordained as a monk, Zhi Qian studied under the guidance of Zhi Liang (d.u.), a disciple of the renowned Indo-Scythian translator Lokakṣema (fl. c. 178–198 ce). Zhi Qian fled northern China in the political chaos that accompanied the collapse of the Han dynasty (206 bce–220 ce), eventually migrating to the Wu Kingdom in the south. There, he settled first in Wuchang and later in the Wu capital of Jianye, which was where the majority of his translations appear to have been made. Zhi Qian was known to have been artistically talented, and many of his translations were noted for their fluent style that did not strive to adhere to the exact meaning of each word and phrase, but instead sought to convey the insights of the text in an accessible fashion for a Chinese audience. The fifty-three translations that are attributed to Zhi Qian range widely between āgama and didactic materials and early Mahāyāna scriptural literature, but also include many spurious later attributions (see apocrypha). Among the translations that may with confidence be ascribed to Zhi Qian are early renderings of the Vimalakīrtinirdeśa, the Pusa benye jing, the Sukhāvatīvyūhasūtra, the Aṣṭasāhasrikāprajñāpāramitā, and a primitive recension of the Avataṃsakasūtra. Zhi Qian is also presumed to be one of the first Buddhist commentators in the East Asian tradition: Dao'an (314–385) states in his scriptural catalogue Zongli zhongjing mulu (now embedded in the Chu sanzang jiji) that Zhi Qian wrote a commentary to the Śālistambasūtra (C. Liaoben shengsi jing) while preparing its translation. Late in his life, Zhi Qian retired to Mt. Qionglong, where he is said to have passed away at the age of sixty.

zhishi. (J. chiji; K. chisa 知事). In Chinese, lit., "to know or manage affairs"; a "steward" at a Chan monastery. Ideally, there are six stewards who oversee the administration and finances of the monastic community. Because their offices were often located on the east side of the monastery, they were also often referred to as the east section or rank. The influential Chanyuan qinggui mentions only four stewards, the prior (C. jianyuan), rector (C. weinuo), cook (C. dianzuo), and overseer (C. zhisui). Later, the prior came to be referred to as the dusi, and a comptroller (C. jiansi) and assistant comptroller (C. fusi) were added to the list of four.

zhisui. (J. shissui; K. chikse 直歲). In Chinese, "overseer"; one of the six stewards (C. zhishi) at a Chan monastery. The zhisui supervises the manual labor conducted in the monastery, including everything from large construction projects, repairs, and the cultivation of land to patrolling the monastery grounds.

Zhixu. (J. Chigyoku; K. Chiuk 智旭) (C). See Ouyi Zhixu.

Zhiyan. (J. Chigon; K. Chiŏm 智儼) (602–668). Putative second patriarch of the Chinese Huayan tradition. Zhiyan was a native of Tianshui in present-day Gansu province. While still a boy, Zhiyan is said to have become a student of the monk DUSHUN at the monastery of Zhixiangsi on ZHONGNANSHAN. He was ordained at age fourteen and received the full monastic precepts at age twenty, at which time he began studying the "Four-Part Vinaya" (SIFEN LÜ) of the DHARMAGUPTAKA school, as well as the *TATTVASIDDHI, DAŚABHŪMIKASŪTRA, BODHISATTVABHŪMI, and MAHĀPARINIRVĀṆASŪTRA. Zhiyan also studied the MAHĀYĀNASAṂGRAHA under Fachang (567–645). While studying under Jinglin (565–640), Zhiyan came across a copy of the AVATAṂSAKASŪTRA and, at age twenty-seven, composed his influential commentary on the *Avataṃsakasūtra*, the HUAYAN JING SOUXUAN JI. He also composed the KONGMU ZHANG (viz., *Huayan jingnei zhangmendeng za kongmu zhang*), *Shi xuan men*, *Huayan wushi yao wenda*, *Jingang jing lüeshu*, and others. Zhiyan began to make a name for himself by preaching the *Avataṃsakasūtra* to the rural populace and eventually counted among his many supporters the Emperor Gaozong (r. 649–683) himself. Zhiyan is closely associated with the doctrine of "nature origination" (XINGQI), which explains how enlightenment can be "originated" only from within the very "nature" of this world; enlightenment is therefore not something that needs to be created, for it derives from the inherent nature of the mind itself. ZHIYAN's teachings on the *Avataṃsakasūtra* were extremely influential in East Asian Buddhism and were developed further by his disciples ŬISANG and FAZANG. The Korean monk WŎNHYO was also heavily influenced by Zhiyan's writings. Because Zhiyan resided at his teacher's monastery Zhixiangsi, he later came to be called Great Master Zhixiang.

Zhiyi. (C) (智顗) (538–597). See TIANTAI ZHIYI.

zhiyu. (J. chiyoku; K. chiyok 知浴). In Chinese, the "bath prefect"; one of the six prefects (C. TOUSHOU) at a CHAN monastery. The bath prefect is in charge of cleaning the bathhouse, heating the water for use, and preparing necessities such as towels, incense, and tea. Usually, the bath prefect prepares the bath according to a strict monthly schedule.

zhizhi renxin. (J. jikishi ninshin; K. chikchi insim 直指人心). In Chinese, "directly point to the human mind"; a famous aphorism summarizing the soteriological approach of the CHAN school. The phrase appears for the first time in HUANGBO XIYUN's CHUANXIN FAYAO, where it is followed by the line JIANXING CHENGFO ("see one's own nature and become a buddha"). Subsequently, these two phrases appear together with two other phrases, BULIWENZI ("not establishing words or letters") and JIAOWAI BIECHUAN ("a special transmission outside the teachings"), in the ZUTING SHIYUAN compiled in 1108. These four phrases subsequently became a normative teaching for Chan practice and also the foundation on which the Chan, SŎN, and ZEN traditions created their own self-identity as a separate school of East Asian Buddhism.

Zhongfeng Mingben. (J. Chūhō Myōhon; K. Chungbong Myŏngbon 中峰明本) (1263–1323). Chinese CHAN master in the LINJI ZONG and one of the most influential monks of the Yuan dynasty; also known by the toponym Huanzhu (Illusory Abode). Zhongfeng was a native of Qiantang in Hangzhou prefecture (present-day Zhejiang province). While still a youth, Zhongfeng left home to study under the Chan master GAOFENG YUANMIAO of Mt. Tianmu, from whom he eventually received his monastic precepts at age twenty-four. After he left Gaofeng, Zhongfeng maintained no fixed residence and would on some occasions dwell on a boat. As his reputation grew, he came to be known as the Old Buddha of the South (Jiangnan Gufo). Mingben was an especially eloquent advocate of "questioning meditation" (KANHUA CHAN); his descriptions of the meaning and significance of Chan cases (GONG'AN) and meditative topics (HUATOU) and the processes and experience of kanhua practice are widely cited in the literature. In 1318, he was given a golden robe and the title Chan master Foci Yuanzhao Guanghui (Buddha's Compassion, Perfect Illumination, Broad Wisdom) from Emperor Renzong (r. 1311–1320). Zhongfeng also served as teacher of the next emperor Yingzong (r. 1320–1323). Emperor Wenzong (r. 1329–1332) also bestowed upon him the posthumous title Chan master Zhijue (Wise Enlightenment). Five years later, Emperor Shundi (r. 1333–1367) entered Zhongfeng's discourse records (YULU), the *Zhongfeng guanglu*, into the Chinese Buddhist canon (DAZANGJING), a signal honor for an indigenous author (few of whom are represented in the official canon); Shundi also bestowed on him the title State Preceptor Puying (Universal Resonance). Zhongfeng also composed his own set of monastic rules (QINGGUI) titled the *Huanzhu'an qinggui*.

Zhongguan lun shu. (J. Chūgan ronsho; K. Chunggwan non so 中觀論疏). In Chinese, "Commentary on the MŪLAMADHYAMAKAKĀRIKĀ"; composed by the Chinese SAN LUN ZONG monk JIZANG in 608. Jizang begins with his observations on Sengrui's (378–444?) preface to their teacher KUMĀRAJĪVA's translation of the *Mūlamadhyamakakārikā*. He then analyzes the twenty-seven chapters of the *Mūlamadhyamakakārikā* in a manner consistent with other scholars of the San lun tradition. Jizang contends that the middle way is a path traversed by the buddhas and BODHISATTVAS and explains its contents in terms of conventional truth (SAṂVṚTISATYA), absolute truth (PARAMĀRTHASATYA), and neither conventional nor absolute truth. (See also SANDI.) Jizang supports his arguments by citing numerous sūtras, commentaries, and theories of other teachers. For his analysis of emptiness (ŚŪNYATĀ), Jizang frequently makes recourse to the MAHĀPARINIRVĀṆASŪTRA.

zhongjiao. (C) (終教). See HUAYAN WUJIAO.

Zhongnanshan. (J. Shūnanzan; K. Chongnamsan 終南山). In Chinese, "Southernmost Mountain"; also called Nanshan, Mt. Taibai, Mt. Difei, and Mt. Zhounan. Zhongnanshan is located west of the former Chinese capital of Chang'an (present-day Xi'an) and occupies a section of the Qinling Mountain range that stretches through southern Shaanxi province. Because of its proximity to the capital, Zhongnanshan became an important practice site in both the Buddhist and Daoist traditions. Two Buddhist monasteries were built on the mountain, and they attracted many eminent Buddhist monks throughout the dynasties. Daoxuan, the founder of the Nanshan branch of the Chinese vinaya school (lü zong) studied there; because of his long association with the mountain, his tradition of monastic discipline came also to be known as the Nanshan lü zong. Fazang is also said to have begun his study of the Avataṃsakasūtra on Zhongnanshan and to have performed a Buddho-Daoist prayer ritual on the mountain at the behest of Emperor Ruizong in order to relieve a drought. The syncretic character of the ritual he performed symbolizes the way in which Zhongnanshan straddles the two religious traditions. Sources differ as to whether the monastery where he performed the ritual was Longchisi (Monastery of the Dragon Pool) or Wuzhensi (Awakening to Truth Monastery).

Zhongxiangcheng. (J. Shūkōjō; K. Chunghyangsŏng 衆香城). In Chinese, "City of Multitudinous Fragrances"; according to the Aṣṭasāhasrikāprajñāpāramitā, the city where the bodhisattva Dharmodgata lived and taught the perfection of wisdom (prajñāpāramitā); an alternate name for the Korean "Diamond Mountains." See also Gandhavatī, Kŭmgangsan.

Zhu. (J. Jiku; K. Ch'uk 竺). Ethnikon typically used in China for monks who hailed from India (C. Tianzhu).

Zhuanhong jue. (C) (傳弘決). See Mohe zhiguan fuxing zhuanhong jue.

zhuchi. (J. jūji; K. chuji 住持). In Chinese, "abbot" of a Buddhist monastery. The term literally means "dwelling and holding," from the sense that the abbot occupies his own monastery and maintains the Buddha's dispensation in the current generation, serving as a "holding vessel" so that the Buddha's lineage can never be extinguished. The zhuchi dwells in the "abbot's quarters" (fangzhang), a term that in some contexts comes by metonymy to refer to the abbot himself, as is the case in certain Korean monasteries.

Zhu Daosheng. (C) (竺道生). See Daosheng.

Zhu Fonian. (J. Jiku Butsunen; K. Ch'uk Pullyŏm 竺佛念) (d.u.). A prolific early Chinese translator, who was active between the latter fourth and early fifth centuries. A native of Liangzhou, he collaborated with Buddhayaśas in the translation of the Dīrghāgama, with Dharmanandin in the translation of the Ekottarāgama, and the "Four-Part Vinaya" (Sifen lü), the Dharmaguptaka recension of the vinaya, which eventually becomes the definitive version of the vinaya in the Sinitic tradition. He was also involved in the translation of such texts as the Aṣṭasāhasrikāprajñāpāramitā, the Udānavarga, a Sarvāstivāda anthology of aphorisms, and the Jñānaprasthāna, the central treatise of the Sarvāstivāda abhidharma. Some indigenous Chinese scriptures (see apocrypha), such as the Pusa yingluo benye jing, are also attributed to him.

Zhuhong. (C) (祩宏). See Yunqi Zhuhong.

Zhujing yao ji. (J. Shokyō yōshū; K. Chegyŏng yo chip 諸經要集). In Chinese, "Collection of the Essentials of the Various Scriptures," edited by the Chinese monk Daoshi (d. 683); also known as the *Shan'e yebao lun* ("Treatise on Good and Evil Karmic Retribution"). As the title implies, the *Zhujing yao ji* is a collection of what Daoshi considered to be essential passages from more than two hundred primary sources, including various sūtras, vinayas, and commentaries. Many of the passages that were chosen by Daoshi for inclusion in his collection are concerned with the issue of karman and retribution, hence the text's alternative title. The entire collection is comprised of a total of thirty sections: (1) the three jewels (ratnatraya), (2) worshiping stūpas, (3) controlling thoughts, (4) entering the way, (5) praises and chants, (6) lighting incense, (7) receiving requests, (8) receiving vegetarian feasts (zhai), (9) breaking fast, (10) wealth, (11) poverty, (12) leading others, (13) repaying debt to others, (14) releasing living beings, (15) the flourishing of merit, (16) choosing friends, (17) staying alert, (18) six classifications of beings (gati), (19) cause of karman, (20) desire and defilements, (21) four types of birth, (22) retributions, (23) ten evils, (24) deception, (25) laziness, (26) wine and meat, (27) divination, (28) hell, (29) mortuary customs, and (30) miscellaneous matters.

zhung lnga. (shung nga). [alt. gzhung chen bka' pod lnga/ gzhung chen pod lnga]. In Tibetan, "the five books," five Indian treatises that provided the foundation for the monastic curriculum of the Dge lugs sect. The five works are the Abhisamayālaṃkāra of Maitreya, the Madhyamakāvatāra of Candrakīrti, the Pramāṇavārttika of Dharmakīrti, the Abhidharmakośabhāṣya of Vasubandhu, and the Vinayasūtra of Guṇaprabha.

zhuoyu. (著語). In Chinese, "annotation," or "capping phrase." See jakugo.

zhurengong. (J. shujinkō; K. chuin'gong 主人公). In Chinese, literally "master" or "owner"; a term used within the Chan tradition to refer to "buddha-nature" (C. foxing) or "true mind" (C. zhenxin), sometimes seen also as the variant "old master" (zhurenweng). The Zimen jingxun ("Admonitions for the Dark-[Robed]"), an influential Buddhist primer compiled in 1313 by the Chan monk Yongzhong (d.u.), specifically refers to the variant zhurenweng as a designation for "true mind." The

Wumen guan ("Gateless Checkpoint"), the eponymous gong'an collection of Wumen Huikai (1183–1260), includes a gong'an on zhurengong attributed to Ruiyan Shican (850–910), a second-generation successor of Deshan Xuanjian (782–865): Ruiyan would call to himself every day, "Master (zhurengong)!" And he would respond, "Yes." Then he would say, "Be clear!" "Yes." "Any time and any day, don't be fooled by anything." "I won't be." Yaun Kagu's (fl. c. 1376) Chagyŏng mun ("Self-admonitions"), one of the three texts included in the Korean monastic primer Ch'obalsim chagyŏng mun, opens with an admonition to postulants and novices: "Master (chuin'gong)! Listen to my words! How can you continue to transmigrate through the realms of suffering when so many people have realized the way through the gateway of emptiness?" The Korean Sŏn community uses the concept of chuin'gong as a generic "meditative topic" (hwadu; C. huatou) in kanhwa Sŏn (C. kanhua Chan), or "questioning meditation."

Zhwa dmar incarnations. (Shamar). An influential incarnation (sprul sku) lineage in the Karma bka' brgyud sect of Tibetan Buddhism, regarded as a human incarnation of Amitābha. The first incarnation, Grags pa seng ge (Drakpa Senge, 1283–1349), was a disciple of the third Karma pa, who offered him a red crown (zhwa dmar), from which the name of the line of incarnations derives. Subsequent Zhwa dmar embodiments had close relationships with the Karma pa line, in many cases alternately serving as guru and pupil to the Bka' brgyud hierarch. Grags pa seng ge founded a seat at Gnas nang monastery in central Tibet, later moved to Yangs pa can monastery under the direction of the fourth incarnation, Chos grags ye shes (Chödrak Yeshe, 1453–1524). Several Zhwa dmar incarnations spent considerable time in Nepal, including the sixth, Gar dbang Chos kyi dbang phug (Garwang Chökyi Wangchuk, 1584–1630), who composed a detailed description of his travels. The lineage was interrupted for nearly a century when the tenth incarnation, Chos grub rgya mtsho (Chödrup Gyatso, 1741–1791), was accused of forging a treasonous alliance with the Gorkha army during a Tibetan conflict with Nepal, during which Bkra shis lhun po monastery was sacked. The tenth Zhwa dmar died in prison, by either suicide or murder. The Tibetan government seized Yangs pa can monastery and converted it into a Dge lugs monastery. It also banned recognition of new Zhwa dmar embodiments, a proscription that lasted more than a century. In the interim, several incarnations were found but never officially installed. The incarnation lineage includes:

1. Grags pa seng ge (Drakpa Senge, 1283–1349)
2. Mkha' spyod dbang po (Kachö Wangpo, 1350–1405)
3. Chos dpal ye shes (Chöpal Yeshe, 1406–1452)
4. Chos grags ye shes (Chödrak Yeshe, 1453–1524)
5. Dkon mchog yan lag (Könchok Yanlak, 1525–1583)
6. Gar dbang Chos kyi dbang phyug (Garwang Chökyi Wangchuk, 1584–1630)
7. Ye shes snying po (Yeshe Nyingpo, 1631–1694)
8. Dpal chen chos kyi don grub (Palchen Chökyi Döndrup, 1695–1732)
9. Dkon mchog dge ba'i 'byung gnas (Könchok Gewe Jungne, 1733–1740)
10. Chos grub rgya mtsho (Chödrup Gyatso, 1741–1792) [interruption of lineage]
11. 'Jam dbyangs Rin po che (Jamyang Rinpoche, 1892–1946)
12. 'Phrin las kun khyab (Trinle Kunkyap, 1948–1950)
13. Mi pham smra ba'i go cha (Mipam Mawe Gocha, b. 1952)

Zhwa lu. (Shalu). A modest but important monastery near the Tibetan city of Gzhis ka tse (Shigatse), famous as the seat of fourteenth-century polymath Bu ston Rin chen grub, and renowned for its unusual architectural features. The earliest foundations were laid circa 997 by Lo ston Rdo rje dbang phyug (Lotön Dorje Wangchuk, b. tenth century), an active teacher during the outset of the later dissemination (phyi dar) of Buddhism in Tibet. His disciple, Lce btsun Shes rab 'byung gnas (Chetsün Sherap Jungne, d.u.), established a larger structure in 1027, having promised his master to construct a temple "as large as a small hat," from which its name is derived. The project was completed just prior to a visit of the illustrious Bengali scholar Atiśa Dīpaṃkaraśrījñāna. During the thirteenth century, Zhwa lu formed close ties with the ruling Sa skya hierarchs and their Mongol patrons. In 1306, the Yuan emperor Temür (1265–1307) appointed Grags pa rgyal mtshan (Drakpa Gyaltsen, d.u.) as prelate, under whom the institution flourished. Bu ston's rise to the abbacy in 1320 is traditionally viewed as the beginning of a new lineage, the so-called Zhwa lu pa ("Those of Zhwa lu") or Bu lugs tshul ("Tradition of Bu [ston]"). It was at Zhwa lu that Bu ston famously redacted the several hundred volumes that would comprise his influential edition of the Tibetan Buddhist canon. The monastery is equally famous for its unique blend of Tibetan and Chinese architecture (most notably, its pagoda-style roof of glazed turquoise tiles) and murals executed under the direction of Newar artist-disciples of the master Newari artisan Arniko.

Zibo. (C) (紫柏) (1543–1603). See Daguan Zhenke.

Zimen jingxun. (J. Shimon kyōkun/Shimon keikun; K. Ch'imun kyŏnghun 緇門警訓). In Chinese, "Admonitions for Those in the Dark-(Robed) School"; an important Buddhist primer, in nine rolls, compiled in 1313 by the Chan monk Yongzhong (d.u.) in the Linji zong lineage of Zhongfeng Mingben. Yongzhong's text is an expansion of an earlier one-roll primer entitled *Zilin baoxun* ("Precious Admonitions to the Forest of the Dark-[Robed]"), by the Song-dynasty monk Zexian (d.u.). In 1474, the monk Rujin (d.u.) of the monastery of Zhenrusi added some additional work of his own to Yongzhong's text and published the compilation as *Zimen* *jingxun*, in a total of ten rolls. The text contains 170 anecdotes, instructions, admonitions, and suggestions to neophytes, derived from eminent monks who lived between the Northern Song and the Ming dynasties. The author admonishes Chan students to observe the Buddhist precepts and to exert themselves in the study of Buddhism. Citing such Confucian classics as the *Lunyu* ("Analects of Confucius") and the *Shijing* ("Book of Poetry"), Yongzhong admonishes students to be diligent in their learning, even encouraging them to study Confucianism and Daoism in order better to promote Buddhism, just as ancient eminent masters had done. He provides several masters' detailed instructions on Chan meditation, including proper physical posture, and offers instructions on the proper way of reading Buddhist scriptures. Finally, Yongzhong includes the instructions of many renowned Chan masters, as conveyed in their sermons (shangtang) and letters (shuzhuang). Rujin's edition of Yongzhong's work continues to be widely used today to instruct novices and neophytes. In Korea, Yongzhong's nine-roll version has been republished several times since T'aego Pou (1301–1381) imported it to the peninsula during the Koryŏ period.

Zimmè Paññāsa. In Burmese, lit. "Chiangmai Fifty"; the Burmese recension of the *Paññāsajātaka*, or "Fifty [Apocryphal] Birth Stories." See Paññāsajātaka.

Zlum brtsegs lha khang. (Dumtsek Lhakang). A large, three-floored stūpa constructed in 1421 by the renowned Tibetan adept Thang stong rgyal po (Tangtong Gyalpo), located in Bhutan's Spa gro (Paro) Valley. According to traditional biographies, the master erected this structure at a geomantically powerful location in order to restrain a malignant demoness dwelling in the region. It was restored and enlarged in 1841 by the twenty-fifth head abbot (rje mkhan po) of Bhutan, Shes rab rgyal mtshan (Sherap Gyaltsen, served 1836–1839).

zong. (J. shū; K. chong 宗). A polysemous term in Chinese, which can refer to the "core teaching," "cardinal doctrine," or central "axiom" of a text or scholastic philosophy, or to a "school," "tradition," or even "lineage." Because of the denotation of zong as a cardinal doctrine, the term is used to translate the Sanskrit siddhānta, an "axiom" or principal "tenet" of the various schools of Indian philosophy (both Buddhist and non-Buddhist). Although commonly translated as "school" ("sect" is incorrect in a Chinese Buddhist context), this rendering is only appropriate for those scholastic and practice traditions that trace themselves back through an unbroken lineage of ancestors to a specific founding "patriarch" (zushi), such as the Tiantai zong, Huayan zong, and Chan zong. Commentarial traditions focused upon the exegesis of a specific text, such as the Di lun (Daśabhūmikasūtra), She lun (Mahāyānasaṃgraha), or Chengshi lun (*Tattvasiddhi), do not qualify as true schools of Chinese Buddhism, since they neither claim to derive from a single founder nor posit an exclusive lineage of successors; they might more correctly be termed "scholastic traditions."

Zongjing lu. (J. Sugyōroku; K. Chonggyŏng nok 宗鏡録). In Chinese, "Records of the Mirror of the Source"; composed c. 961 by the Song-dynasty Chan master Yongming Yanshou (904–975), in one hundred rolls; also called "Records of the Mirror of the Mind" (*Xinjing lu*). The "source" (zong), Yanshou says in the preface to the *Zongjing lu*, refers to the "one mind" (yixin), which functions like a mirror that is able to reflect all dharmas. This comprehensive collection offers an exhaustive elaboration of the Chan teaching of "one mind" by systematizing the doctrinal and meditative positions of the various Chan traditions of past and present. The *Zongjing lu* consists of three main sections: exemplifications of the source (biaozong zhang), questions and answers (wenda chang), and citations (yinzheng chang). The first section, which comprises much of the first roll, offers a general overview of the treatise, focusing on Chan's "source" in the one mind. The massive second section, corresponding to the second half of the first roll through the ninety-third roll, offers various explanations on the one mind through a question raised at the beginning of each section, followed by Yanshou's detailed response. His explanations are typically accompanied by extensive citations from various sūtras and commentaries, such as the Yuanjue jing and the Dazhidu lun. Throughout this exhaustive survey and explanation of doctrinal matters, Yanshou underscores the importance of the one mind or one dharma as the underlying source of all external phenomena. The third and final section, which comprises the last seven rolls of the collection, validates the previous explanations through quotations of hundreds of scriptures and sayings of eminent Chan masters; its aim is to help those of inferior spiritual capacity give rise to faith. Many of these quotations are from materials that are no longer extant, thus providing an important overview of Chan during Yanshou's time. Yanshou's goal throughout this work is to present his distinctive vision of Chan as a pansectarian tradition that subsumes not only the different Chan lineages, but also such doctrinal traditions as Tiantai, Huayan, and Faxiang. Much of the source material that Yanshou compiled in the *Zongjing lu* may derive from Guifeng Zongmi's similarly massive *Chanyuan ji* ("Chan Collection"), only the prolegomenon to which survives (see Chanyuan zhuquanji duxu). The collection was influential not only in China, but also in Koryŏ-period Korean Sŏn and the five mountain (gozan) schools of Ashikaga-period Japanese Zen.

Zongli zhongjing mulu. (J. Sōri shūkyō mokuroku; K. Chongni chunggyŏng mongnok 綜理衆經目錄). A scriptural catalogue (jinglu) compiled by the Eastern Jin monk Dao'an (312–385); often referred to by its abbreviated title, *An lu*, or "An's Catalogue." The complete catalogue is no longer extant, but is partially preserved within the Chu sanzang jiji. The catalogue covers texts translated between the Han dynasty to the year 374 and provides the titles, translators's names, and the dates of the translations, wherever possible. As one of the first such scriptural catalogues compiled in East Asia, Dao'an's compilation served as the model for all future such endeavors.

Zongmen huomen. (J. Shūmon wakumon; K. Chongmun hongmun 宗門或問). In Chinese, "Some Inquiries into the [Chan] Tradition," composed by the Chan master Zhanran Yuandeng in the Caodong zong. In 1605, Zhanran replied to inquiries he had received from Chan neophytes about the school's distinctive teachings and practices and edited together fifty-two of these exchanges as the *Zongmen huomen*. (The zongmen of the title is a common designation for the Chan zong, especially in Song-dynasty and later materials.) As Zhanran explains in his preface, he wrote this text because it is difficult for neophytes to understand Chan since there are so many different Chan teachings and practices. For example, to the question of what is most essential in Chan meditation and how one should begin in Chan practice, Zhanran answers that one must aspire to investigate the matter of birth-and-death. As to how to investigate the matter of birth-and-death, he answers that one has to arouse three states of mind: (1) the mind of great faith; (2) the mind of ferocious effort (cf. yongmaeng chŏngjin) and nonretrogression; and (3) the mind of great doubt (see yiqing). (Cf. sanyao). In the course of his exposition, Zhanran also covers other Buddhist practices, including recitation of the Buddha's name (nianfo), but he is adamant that Chan is the best and most direct way to enlightenment. In addition to the series of exchanges, Zhanran also appends the following related texts to the *Zongmen huomen*: the *Canchan shinan* ("Difficulties in Investigating Chan"), *Huomen* ("Some Inquiries"), *Buyi* ("Appended Sayings"), *Daming Dingzi men* ("Clear Replies to Dingzi's Inquiries"), and the *Daguan heshang zhaoyang zhuan* ("Tale of the Monk Daguan's Invitation to Disaster"), a fervent defense of the renowned Chan master Daguan Zhenke (a.k.a. Zibo), who died amid political intrigue at court.

Zongmen liandeng huiyao. (J. Shūmon rentōeyō; K. Chongmun yŏndŭng hoeyo 宗門聯燈會要). In Chinese, "Essential Collection of the Lamplight Connections within the [Chan] Tradition"; composed by Huiweng Wuming (d.u.), a third-generation disciple of the Chan master Dahui Zonggao, in 1183. This work is a collection of anecdotes and teachings culled from the biographies and discourse records (yulu) of over six hundred patriarchs and teachers (zushi) of the Chan tradition. Huiweng begins the collection with the seven buddhas of the past (saptabuddha), the twenty-eight Indian patriarchs, and the six patriarchs of China (see chuandeng lu). His collections also include the various lineages and collateral lines that split off from the sixth patriarch (liuzu) Huineng's disciples Qingyuan Xingsi (up to the seventeenth generation) and Nanyue Huairang (up to the fifteenth generation). In addition to its role as a genealogical history, the *Zongmen liandeng huiyao* was favored by many followers of Chan as a reliable and convenient collection of Chan cases (gong'an).

Zongmen shigui lun. (J. Shūmon jikkiron; K. Chongmun sipkyu non 宗門十規論). In Chinese, "Treatise on the Ten Rules of the [Chan] Tradition," composed by Chan master Fayan Wenyi (885–958); also known as the *Fayan chanshi zongmen shigui lun*, *Jinghui Fayan chanshi zongmen shigui lun*, and simply *Shigui lun*. The *Zongmen shigui lun* warns against ten maladies to which those in the Chan tradition are succeptible, viz., (1) assuming the role of teacher without first purifying one's own mind, (2) sectarian disputes, (3) positing the main points of Chan without knowing the specific contexts, (4) answering without consideration of time and situation, (5) failure to distinguish defiled from pure, (6) baseless interpretations of the sayings of the masters of old, (7) memorizing slogans and not being able to use them at the right moment, (8) miscitations by not mastering the canon, (9) improperly composing songs and verses before one's understanding has matured, and (10) defending one's own shortcomings and indulging in disputes. The *Zongmen shigui lun* is also the first text to mention the names of the five houses (see wu jia qi zong) of the mature Chan tradition.

Zongmi. (C) (宗密). See Guifeng Zongmi.

Zongze. (C) (宗賾). See Changlu Zongze.

Zuihō. (J) (瑞方) (1683–1769). See Menzan Zuihō.

zuishangsheng Chan. (J. saijōjōzen; K. ch'oesangsŭng Sŏn 最上乘禪). In Chinese, lit. "supreme vehicle Chan," referring to one of the styles of practice and pedagogy associated with the Chan school; often considered to be equivalent to "unconventional Chan" (gewai chan). Supreme vehicle Chan is one of the five categories of Chan listed by Guifeng Zongmi (780–841) in his Chanyuan zhujuan ji duxu ("Prolegomena to the Source of Chan Collection"). According to Zongmi's treatment, "supreme vehicle Chan" refers to meditation practices that rely on sudden approaches to awakening (dunwu) and generate an initial insight into the true nature of mind, i.e., the original purity of mind that is shared by both sentient beings and buddhas. The text equates this form of Chan with the "pure Chan of the tathāgatas" (rulai qingjing Chan), also known by its abbreviated name, tathāgata Chan (rulai Chan); it also is said to be equivalent to "single-practice samādhi" (yixing sanmei) and the "samādhi of suchness" (zhenru sanmei), since "supreme vehicle Chan" is the root of all kinds of samādhi. The text also defines supreme vehicle Chan as the "Chan transmitted from Bodhidharma"; this latter form of Chan is subsequently named "patriarchal Chan" (zushi Chan) in the Song-dynasty Chan collections, such as the Jingde zhuandeng lu ("Record of the Transmission of the Lamplight Published during the Jingde Era") and Puji's (1179–1253) *Wudeng huiyuan* ("Collected Essentials of the Five Lamplight Histories"), which in turn redefines "tathāgata Chan" as subordinate to "patriarchal Chan."

zuochan. (J. zazen; K. chwasŏn 坐禪). In Chinese, "seated meditation." Zuochan is a combination of the Chinese term "to sit" (zuo) and the character chan, a transcription of the Sanskrit term dhyāna (meditation); often referred to in English-language sources by the Japanese pronunciation zazen. As its etymology implies, zuochan refers to sitting with legs folded on top of each other and eyes slightly closed in meditation. This meditative practice may be generically considered to be directed at samādhi, one of the three trainings (C. sanxue; S. śikṣātraya), along with morality (śīla) and wisdom (prajñā), or alternatively at dhyāna, one of the six pāramitās emblematic of bodhisattva practice, along with charity (dāna), precepts (śīla), forbearance (kṣānti), effort (vīrya), and wisdom (prajñā). Sitting has long held pride of place within the Buddhist tradition as the archetypal position (iryāpatha) most suited to sustained meditation training. The prototype for zuochan is the Buddha's own seated meditation under the Bodhi tree, as well as the legendary Indian monk Bodhidharma's "wall gazing" (biguan) for nine years in a cave. Because of these associations with both the Buddha and Bodhidharma, the founder of the Chan school, zuochan was widely considered to be the primary practice within the Chan, Sŏn, and Zen traditions. In China, zuochan came to be viewed as such a stereotypical aspect of the Chan school, broadly conceived, that Chan teachers began to critique its necessity and importance; these critiques suggested instead that Chan practice was not to be confined just to zuochan, but should also be conducted throughout the three other standard deportments of walking, standing, and lying down. For example, the Liuzu tanjing ("Platform Sūtra"), attributed to the sixth patriarch Huineng, includes such a rectification of the meaning of zuochan when it says that "'seated' means, externally, to refrain from generating thoughts related to wholesome or unwholesome objects; 'meditation' means, internally, to see that the self-nature is unmoving." In this redefinition, zuochan means not just "seated meditation" but instead encompasses a way of understanding that is to be carried through all aspects of one's experience.

Zur chung pa. (Zur chung Shes rab grags pa) (1014–1074). A Rnying ma master, the disciple of Zur po che (Shākya 'byung gnas, 1002–1062) and father of Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135). Because he was a poor novice, Zur po che encouraged him to marry the daughter of a wealthy patron, which he reluctantly did. He is said to have spent thirteen years meditating in a cave. His most famous work is his final testament, the *Zhal gdams brgyad cu pa* ("Eighty Oral Instructions").

Zur po che. ([alt. Zur chen] Shākya 'byung gnas) (1002–1062). A Rnying ma master of the Zur clan. His disciple Zur chung pa, and Zur Shākya seng ge (also known as Sgro sbug pa, 1074–1135) are known with him as the three Zur (Zur rnam pa gsum), with Zur po che as the founding figure. He was a disciple of Nyang Ye shes 'byung gnas and was renowned especially for his practice and teaching of the "magical net" (Māyājāla) class of tantras, the *Dgongs pa 'dus pa'i mdo*, and the sādhana of Vajrakīlaya. As such, he holds an important place in the transmission of rdzogs chen and sems sde teachings. He was ordained by the famous vinaya master Bla chen Dgongs pa rab gsal and also studied extensively with Gnubs chen Sangs rgyas ye shes. During the time of the later dissemination of Buddhism to Tibet, he is credited with organizing the Rnying ma tantras in such a way that a particular tantra, its commentaries, sādhanas, and ritual manuals were grouped together. He identified the *Dgongs pa 'dus pa'i mdo* as the root tantra of anuyoga, the Guhyagarbha as the root tantra of mahāyoga, and the Kun byed rgyal po as the root tantra of atiyoga. He is also credited with the fundamental division of the Rnying ma teachings in bka' ma (words) and gter ma (treasures). He founded the monastery of 'Ug pa lung (Owl Land) located to the east of Gzhis ka rtse (Shigatse).

zushi. (J. soshi; K. chosa 祖師). In Chinese, "patriarch" (lit. "ancestral teacher"), referring to eminent teachers in lineages that are claimed to trace back to Śākyamuni Buddha or even earlier buddhas. Indian Sanskrit texts dating from the 2nd century CE onward refer to a tradition of five "masters of the dharma" (dharmācārya) who succeeded the Buddha as head of the saṃgha: Mahākāśyapa, Ānanda, Madhyāntika, Śāṇakavāsin, and Upagupta. Later sources expand this list into a roster of nine eminent masters who "handed down the lamplight of wisdom successively through the generations." Often, these genealogies were extended as far back as the seven buddhas of antiquity (saptatathāgata). It is widely presumed that this notion of dharma-transmission lineages developed from the earlier vinaya concept of the "preceptor" (upādhyāya), a senior monk who confers the lower ordination (pravrajyā, see pravrajita) to new novices (śrāmaṇera) and higher ordination (upasaṃpadā) to monks (bhikṣu). This personal connection between preceptor and disciple created incipient ordination families connected to specific preceptors, connections that later could be extended to dharma transmission as well. ¶ In East Asia, these lists of Indian dharma masters continued to be expanded and elaborated upon so that they also included the preeminent indigenous figures within each lineage, thus connecting the Chinese patriarchs of each lineage with their Indian predecessors. Most of the indigenous traditions of East Asian Buddhism, including the Chan zong, Tiantai zong, Jingtu zong, and Huayan zong, draw their legitimacy at least partially from their claims that their teachings and practices derive from an unbroken lineage of authoritative teachers that can be traced back geographically to India and temporally to the person of the Buddha himself. The specific names and numbers of patriarchs recognized within each lineage typically change over time and vary widely between the different traditions. Of these lists, the list of patriarchs recognized in the Chan school has received the lion's share of scholarly attention in the West. This Chan list varies widely, but a well-established roster includes twenty-eight Indian and six Chinese patriarchs. These six Chinese patriarchs (liu zu)—Bodhidharma, Huike, Sengcan, Daoxin, Hongren, and Huineng—are credited by the classical tradition with the development and growth of Chan in China, but early records of the Chan school, such as the Lengqie shizu ji and Lidai fabao ji, reveal the polemical battles fought between disparate contemporary Chan communities to place their own teachers on this roster of patriarchal orthodoxy. It is important to note that all of these various lists of patriarchs, in all the different traditions, are created retrospectively as a way of legitimizing specific contemporary lineages or teachers and verifying the authenticity of their teachings; thus their accounts of the chronology and history of their lineages must be used critically. The compound zushi can mean either "patriarch" (lit., ancestral teacher) or in other contexts "patriarchs and teachers," as in the stock phrase "all the buddhas of the three time-periods and patriarchs and teachers throughout successive generations" (sanshi zhufo lidai zushi), which explicitly traces a school's ancestral lineage from the past to the present and into the future. Some modern Buddhists, especially in the West, deplore the sexism inherent in the term "patriarch," preferring instead to render it with the gender-neutral term "ancestor." See also chuandeng lu; fasi; paraṃparā; yinke.

Zutang ji. (J. Sodōshū; K. Chodang chip 祖堂集). In Chinese, "Anthology of the Patriarchs' Hall." See Chodang chip.

Zuting qianchui lu. (J. Sotei kantsuiroku; K. Chojŏng kyŏmch'u nok 祖庭鉗鎚錄). In Chinese, "Record of Forceps and Hammers of the Patriarchs' Hall," edited by the Chan master Feiyin Tongrong (1593–1661) of the Linji zong during the late Ming dynasty. This collection includes over fifty anecdotes considered to be essential for the training of students. These anecdotes focus on the enlightenment stories of several renowned Tang- and Song-dynasty Linji zong masters, such as Linji Yixuan, Shoushan Shengnian (926–993), Fenyang Shanzhao (947–1024), Shishuang Chuyuan (986–1039), Yuanwu Keqin, and Dahui Zonggao, but also include a few stories concerning renowned masters in the Yunmen zong and Caodong zong. Most of these stories are excerpted from Chan texts published during the Song dynasty, especially Puji's (1179–1253) *Wudeng huiyuan* ("Collected Essentials of the Five Lamplight Histories"). Each story is accompanied by Feiyin's own short prose commentary (pingchang). Four additional exchanges between a certain master Wang Jing and the monk Fohui Faquan (d.u.) concerning the history of the Chan tradition are included as an appendix.

Zuting shiyuan. (J. Sotei jion; K. Chojŏng sawŏn 祖庭事苑). In Chinese, "Garden of Matters from the Patriarchs' Hall," edited in eight rolls by Mu'an Shanxiang (d.u.) in 1108; the oldest encyclopedia of the Chinese Chan tradition. This collection includes over 2,400 items related to Chan pedagogy, culled from Buddhist and secular stories, proverbs, numerological lists, personal names, local dialects, and so forth. Mu'an is said to have embarked on this project in response to the growing number of monks who were unable to understand the rich content and context of the many gong'an exchanges found in Chan literature. Mu'an's material is drawn from over twenty important Chan sources, such as the discourse records (yulu) of Yunmen Wenyan, Xuedou Chongxian, and Fayan Wenyi, and Yongjia Xuanjue's popular Zhengdao ge. The encyclopedia functions as a glossary for these works, offering explanations for their difficult technical terms and obscure names (which are not necessarily Chan or Buddhist in origin), and drawing his explanations from Buddhist, Confucian, and Daoist materials, as well as such secular sources. For example, the first roll of the encyclopedia provides a glossary of the *Yunmen lu*, which discusses the author Yunmen Wenyan, offers definitions of terms and explanations of names appearing in the text, drawing on sources ranging from the *Shiji* ("Book of History") to the agama sūtras, and fills out the myriad numerical lists that appear in the text, such as the three vehicles (C. sansheng; S. triyāna), the three baskets of the canon (C. sanzang; S. tripiṭaka), the eight teachings of Tiantai (see wushi bajiao), etc. Mu'an's exhaustive collection meticulously traces the source of each item and provides a detailed commentary on each. The *Zuting shiyuan* was republished in 1154, and numerous editions were published during the Tokugawa period in Japan.

List of Lists

This roster provides some of the most important numerical lists used in the Buddhist traditions. Generally, we include the equivalencies only in Sanskrit, Tibetan, and Chinese, since in most cases these will be adequate to trace the terms back to the relevant entries in the dictionary. In instances where there are several variations of a list, we seek to provide only one common form. In addition, the various languages often provide different interpretations of a particular term, making it difficult to provide a single English translation. For ease in tracing terms back to their main dictionary entries, the numeric elements in the foreign-language names of each list have not been provided; the exceptions are those lists in which numerals are included in the main dictionary entries (for example, daśabhūmi).

ONES

one vehicle. (S. ekayāna; T. theg pa gcig pa; C. yisheng 一乘)

TWOS

two accesses/entrances. (C. er ru 二入)

1. access of principle (C. liru 理入)
2. access of practice (C. xingru 行入)

two accumulations/equipments. (S. saṃbhāra; T. tshogs; C. ziliang 資糧)

1. accumulation/equipment of merit (S. puṇyasaṃbhāra; T. bsod nams kyi tshogs; C. fuziliang 福資糧)
2. accumulation/equipment of wisdom (S. jñānasaṃbhāra; T. ye shes kyi tshogs; C. zhiziliang 智資糧)

two aspects of esoteric Buddhism. (C. er mi 二密)

1. esoteric as to principle (li mi 理密)
2. esoteric as to practices (shi mi 事密)

two attainments. (S. siddhi; T. dngos grub; C. chengjiu/xidi 成就/悉地)

1. mundane attainments (S. sādhāraṇasiddhi; T. thun mong gi dngos grub; C. gongtong chengjiu/xidi 共同成就/悉地)
2. supreme attainment (S. uttamasiddhi; T. mchog gi dngos grub; C. zuishang chengjiu/xidi 最上成就/悉地)

two benefits. (S. artha; T. don; C. li 利)

1. benefitting oneself (S. svārtha/ātmahita; T. rang don; C. zili 自利)
2. benefitting others (S. parārtha/parahita; T. gzhan don; C. lita 利他)

two bodies (of a buddha). (S. kāya; T. sku; C. shen 身)

1. truth body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. physical body (S. rūpakāya; T. gzugs sku; C. shengshen 生身)

twofold generation of the aspiration to enlightenment. (S. bodhicittotpāda; T. byang chub kyi sems bskyed; C. fa putixin 發菩提心)

1. attitude of aspiration (S. praṇidhicittotpāda; T. smon pa'i sems bskyed; C. yuan putixin 願菩提心)
2. attitude of undertaking (S. prasthānacittotpāda; T. 'jug pa'i sems bskyed; C. xing putixin 行菩提心)

two karmic retributions. (C. er bao 二報)

1. retribution proper [viz. one's own actions] (zheng bao 正報)
2. adjunct retribution [viz. environmental factors] (yi bao 依報)

two means of knowledge. (S. pramāṇa; T. tshad ma; C. liang 量)

1. direct perception (S. pratyakṣa; T. mngon sum; C. xianliang 現量)
2. inference (S. anumāna; T. rjes dpag; C. biliang 比量)

two obstructions. (S. āvaraṇa; T. sgribs pa; C. zhang 障)

1. afflictive obstructions (S. kleśāvaraṇa; T. nyon mongs pa'i sgrib ba; C. fannao zhang 煩惱障)
2. cognitive or noetic obstructions [to omniscience] (S. jñeyāvaraṇa; T. shes bya'i sgrib ba; C. suozhi zhang 所知障)

two stages. (S. krama; T. rim pa; C. cidi 次第)

1. stage of generation (S. utpattikrama; T. bskyed rim; C. shengqi cidi 生起次第)
2. stage of completion (S. niṣpannakrama; T. rdzogs rim; C. yuanman cidi 圓滿次第)

two supreme ones. (T. mchog gnyis)

1. Nāgārjuna
2. Asaṅga

OR

1. Guṇaprabha
2. Śākyaprabha

two truths. (S. satyadvaya; T. bden pa gnyis; C. er di 二諦)

1. conventional truth (S. saṃvṛtisatya; T. kun rdzob bden pa; C. sudi/shisu di 俗諦/世俗諦)
2. absolute truth/ultimate truth (S. paramārthasatya; T. don dam bden pa; C. zhendi/shengyi di/diyiyi di 真諦/勝義諦/第一義諦)

two types of nonself. (S. nairātmya; T. bdag med; C. wuwo 無我)

1. nonself of the person (S. pudgalanairātmya; T. gang zag gi bdag med; C. ren wuwo 人無我)
2. nonself of phenomena (S. dharmanairātmya; T. chos kyi bdag med; C. fa wuwo 法無我)

two vehicles. (S. yānadvaya; T. theg pa gnyis; C. er sheng 二乘)

1. vehicle of disciples (S. śrāvakayāna; T. nyan thos kyi theg pa; C. shengwen sheng 聲聞乘)
2. vehicle of solitary buddhas (S. pratyekabuddhayāna; T. rang rgyal gyi theg pa; C. yuanjue sheng 緣覺乘)

OR

1. great vehicle (S. mahāyāna; T. theg pa chen po; C. dasheng 大乘)
2. lesser vehicle (S. hīnayāna; T. theg pa dman pa; C. xiaosheng 小乘)

THREES

three actions. (S. karman; T. las; C. ye 業)

1. wholesome/virtuous (S. kuśala; T. dge ba; C. shan 善)
2. unwholesome/unvirtuous (S. akuśala; T. mi dge ba; C. bushan 不善)
3. neutral/indeterminate (S. avyākṛta; T. lung ma bstan; C. wuji 無記)

three afflictions. (S. kleśa; T. nyon mongs; C. fannao 煩惱)

1. desire/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen 瞋)
3. delusion (S. moha; T. gti mug; C. chi 癡)

three baleful destinies. (S. apāya/durgati; T. ngan song; C. equ 惡趣)

1. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
2. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
3. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

three baskets of the canon. (S. tripiṭaka; T. sde snod gsum; C. sanzang 三藏)

1. basket of discourses (S. sūtrapiṭaka; T. mdo sde'i sde snod; C. jingzang 經藏)
2. basket of discipline (S. vinayapiṭaka; T. 'dul ba'i sde snod; C. lüzang 律藏)
3. basket of abhidharma/scholastic exegesis (S. abhidharmapiṭaka/*śāstrapiṭaka; T. chos mngon pa'i sde snod; C. lunzang 論藏)

three becomings. (S. bhava; T. srid pa; C. you 有)

1. becoming in the sensual realm (S. kāmabhava; T. 'dod pa'i srid pa; C. yuyou 欲有)
2. becoming in the realm of subtle materiality (S. rūpabhava; T. gzugs kyi srid pa; C. seyou 色有)
3. becoming in the immaterial realm (S. ārūpyabhava; T. gzugs med kyi srid pa; C. wuseyou 無色有)

three bodies [of a buddha]. (S. trikāya; T. sku gsum; C. san shen 三身)

1. truth body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. enjoyment body (S. saṃbhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen 報身)
3. emanation body (S. nirmāṇakāya; T. sprul pa'i sku; C. huashen 化身)

three classes of atiyoga. (T. rdzogs chen sde gsum)

1. mental class (T. sems sde)
2. instruction class (T. man ngag sde)
3. expanse class (T. klong sde)

three contaminants. (āsrava; T. zag pa; C. lou 漏)

1. contaminant of sensuality (S. kāmāsrava; T. 'dod pa'i zag pa; C. yu lou 欲漏)
2. contaminant of becoming (S. bhavāsrava; T. srid pa'i zag pa; C. you lou 有漏)
3. contaminant of ignorance (S. avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou 無明漏)

three enlightenments. (S. bodhi; T. byang chub; C. puti 菩提)

1. enlightenment of the disciples (S. śrāvakabodhi; T. nyan thos kyi byang chub; C. shengwen puti 聲聞菩提)
2. enlightenment of the pratyekabuddhas (S. pratyekabodhi; T. rang rgyal gyi byang chub/rang sangs rgyas kyi byang chub; C. yuanjue puti 緣覺菩提)
3. complete perfect enlightenment [of the buddhas] (S. anuttarasamyaksaṃbodhi; T. bla na med pa yang dag par rdzogs pa'i byang chub; C. anouduoluo sanmiao sanputi 阿耨多羅三藐三菩提)

three families, lords of. (S. trikulanātha; T. rigs gsum mgon po; C. sanbu huzhu 三部護主)

1. Avalokiteśvara (T. Spyan ras gzigs; C. Guanshiyin 觀世音)
2. Mañjuśrī (T. 'Jam dpal; C. Wenshu 文殊)
3. Vajrapāṇi (T. Phyag na rdo rje; C. Jingangshou 金剛手)

threefold contemplation. (C. sanguan 三觀)

1. contemplation of emptiness (C. kongguan 空觀)
2. contemplation of conventional existence (C. jiaguan 假觀)
3. contemplation of their mean (C. zhongguan 中觀)

three gates. [viz. types of karmic activity] (S. dvāra; T. sgo; C. men 門)

1. body (S. kāya; T. lus; C. shen 身)
2. speech (S. vāc; T. ngag; C. kou 口)
3. mind (S. manas; T. yid; C. yi 意)

three gates to deliverance. (S. vimokṣamukha; T. rnam thar sgo; C. jietuo men 解脫門)

1. emptiness (S. śūnyatā; T. stong pa nyid; C. kong 空)
2. signlessness (S. ānimitta; T. mtshan ma med pa; C. wuxiang 無相)
3. wishlessness (S. apraṇihita; T. smon pa med pa; C. wuyuan/wuzuo 無願/無作)

three inner tantras. (T. nang rgyud sde gsum)

1. mahāyoga (T. rnal 'byor chen po)
2. anuyoga (T. rjes su rnal 'byor)
3. atiyoga (T. shin tu rnal 'byor)

three jewels. (S. ratnatraya; T. dkon mchog gsum; C. sanbao 三寶)

1. the buddha (T. sang rgyas; C. fo/fotuo 佛/佛陀)
2. the teachings (S. dharma; T. chos; C. fa/damo 法/達磨)
3. the community (S. saṃgha; T. dge 'dun; C. seng/sengqie 僧/僧伽)

three knowledges. (S. trividyā; T. rig pa gsum; C. sanming 三明)

1. recollection of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rjes su dran pa; C. suzhu suinian/suming ming 宿住隨念/宿命明)
2. "the divine eye"/clairvoyance (S. divyacakṣus; T. lha'i mig; C. tianyan ming 天眼明)
3. the extinction of the contaminants (S. āsravakṣaya; T. zag pa zad pa shes pa; C. loujin ming 漏盡明)

three means of knowledge. (S. pramāṇa; T. tshad ma; C. liang 量)

1. direct perception (S. pratyakṣa; T. mngon sum; C. xianliang 現量)
2. inference (S. anumāna; T. rjes dpag; C. biliang 比量)
3. scripture (S. āgama; T. lung; C. shengyan liang/shengjiao liang 聖言量/聖教量)

three natures. (S. trisvabhāva; T. mtshan nyid gsum/ngo bo nyid gsum/rang bzhin gsum; C. sanxing 三性)

1. imaginary/imputed (S. parikalpita; T. kun btags; C. pianji suozhi xing 遍計所執性)
2. dependent (S. paratantra; T. gzhan dbang; C. yitaqi xing 依他起性)
3. perfected/consummate (S. pariniṣpanna; T. yongs su grub pa; C. yuanchengshi xing 圓成實性)

three poisons. (S. triviṣa; T. dug gsum; C. sandu 三毒)

1. desire/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen 瞋)
3. delusion (S. moha; T. gti mug; C. chi 癡)

three realms. [of existence] (S. traidhātuka; T. khams gsum; C. san jie 三界)

1. sensuous realm/desire realm (S. kāmadhātu; T. 'dod khams; C. yu jie 欲界)
2. realm of subtle materiality/form realm (S. rūpadhātu; T. gzugs khams; C. se jie 色界)
3. immaterial realm/formless realm (S. ārūpyadhātu; T. gzugs med khams; C. wuse jie 無色界)

three refuges. (S. triśaraṇa; T. skyabs gsum; C. san gui/san guiyi 三歸/三歸依)

1. the buddha (T. sang rgyas; C. fo/fotuo 佛/佛陀)
2. the teachings (S. dharma; T. chos; C. fa/damo 法/達磨)
3. the community (S. saṃgha; T. dge 'dun; C. seng/sengqie 僧/僧伽)

three roots. (S. mūla; T. rtsa ba)

1. teacher (S. guru; T. bla ma)
2. tutelary deity (T. yi dam)
3. ḍākinī (S. ḍākinī; T. mkha' 'gro ma)

three sages of Huayan. (C. Huayan sansheng 華嚴三聖)

1. Vairocana Buddha (C. Piluzhena zunfo 毗盧遮那尊佛)
2. Samantabhadra bodhisattva (C. Puxian pusa 普賢菩薩)
3. Mañjuśrī bodhisattva (C. Wenshu pusa 文殊菩薩)

three sufferings. (S. duḥkha; T. sdug bsngal; C. ku 苦)

1. suffering of [physical and mental] pain (S. duḥkhaduḥkhatā; T. sdug bsngal gyi sdug bsngal; C. kuku 苦苦)
2. suffering inherent in change (S. vipariṇāmaduḥkatā; T. 'gyur ba'i sdug bsngal; C. huaiku 壞苦)
3. suffering inherent in conditionality (S. saṃskāraduḥkhatā; T. 'du byed kyi sdug bsngal; C. xingku 行苦)

three times. (S. trikāla; T. dus gsum; C. sanshi 三世)

1. past (S. atīta; T. 'das pa; C. guoqushi 過去世)
2. present (S. vartamāna; T. da lta ba; C. xianzaishi 現在世)
3. future (S. anāgata; T. ma 'ongs pa; C. weilaishi 未來世)

three trainings. (S. triśikṣā; T. bslab pa gsum; C. sanxue 三學)

1. morality/higher morality (S. śīla/adhiśīlaśikṣā; T. tshul khrims/lhag pa'i tshul khrims kyi bslab pa; C. jie/zengshangjie xue 戒/增上戒學)
2. concentration/higher concentration (S. samādhi/adhisamādhiśikṣā; T. ting nge 'dzin/lhag pa'i ting nge 'dzin gyi bslab pa; C. ding/zengshangxin xue 定/增上心學)
3. wisdom/higher wisdom (S. prajñā/adhiprajñāśikṣā; T. shes rab/lhag pa'i shes rab kyi bslab pa; C. hui/zengshanghui xue 慧/增上慧學)

three truths/judgments. [of the Tiantai school] (C. sandi 三諦)

1. truth of emptiness (C. kongdi 空諦)
2. truth of being provisionally real (C. jiadi 假諦)
3. truth of the mean (C. zhongdi 中諦)

three turnings of the wheel of the law. (S. dharmacakrapravartana; T. chos 'khor rim pa; C. zhuan falun 轉法輪)

1. the dharma-wheel of the four noble truths (S. catuḥsatyadharmacakra; T. bden pa bzhi'i chos 'khor; C. sidi falun 四諦法輪)
2. the dharma-wheel of the absence of defining characteristics (S. alakṣaṇadharmacakra; T. mtshan nyid med pa'i chos 'khor; C. wuxiang falun 無相法輪)
3. the dharma-wheel of thorough delineations (S. *suvibhaktadharmacakra/pravicayadharmacakra; T. legs par rnam par phye ba'i chos 'khor; C. [shan] fenbie falun/shan bian falun [善]分別法輪/善辯法輪)

three vehicles. (S. triyāna; T. theg pa gsum; C. san sheng 三乘)

1. śrāvakayāna (T. nyan thos kyi theg pa; C. shengwen sheng 聲聞乘)
2. pratyekabuddhayāna (T. rang sangs rgyas kyi theg pa; C. yuanjue sheng/pizhi fo sheng 緣覺乘/辟支佛乘)
3. bodhisattvayāna (T. byang chub sems dpa'i theg pa; C. pusa sheng 菩薩乘)

three restraints. (S. saṃvara; T. sdom pa; C. lüyi/sanbaluo 律儀/三跋羅)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi 波羅提木叉護/別解脫律儀)
2. the restraint that is engendered by meditative absorption (S. dhyānajasaṃvara; T. bsam gtan skyes pa'i sdom pa; C. chanlüyi 禪律儀)
3. the restraint that derives from being free from the contaminants (S. anāsravasaṃvara; T. zag pa med pa'i sdom pa; C. wuloulüyi 無漏律儀).

OR

three vows. (S. trisaṃvara; T. sdom gsum; C. san lüyi 三律儀)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüyi 波羅提木叉護/別解脫律儀)
2. bodhisattva vows (S. bodhisattvasaṃvara; T. byang sems kyi sdom pa; C. pusa lüyi 菩薩律儀)
3. secret mantra vows (S. guhyamantrasaṃvara; T. gsang sngags kyi sdom pa; C. mizhou lüyi 密咒律儀)

three wisdoms. (S. prajñā; T. shes rab; C. hui 慧)

1. wisdom derived from learning (S. śrutamayīprajñā; T. thos pa las byung ba'i shes rab; C. wenhui 聞慧)
2. wisdom derived from reflection (S. cintāmayīprajñā; T. bsam pa las byung ba'i shes rab; C. sihui 思慧)
3. wisdom derived from cultivation (S. bhāvanāmayīprajñā; T. bsgoms pa las byung ba'i shes rab; C. xiuhui 修慧)

FOURS

four absorptions. (S. dhyāna; T. bsam gtan; C. chan/ding 禪/定)

1. first absorption (S. prathamadhyāna; T. bsam gtan dang po; C. chuchan 初禪)
2. second absorption (S. dvitīyadhyāna; T. bsam gtan gnyis pa; C. erchan 二禪)
3. third absorption (S. tṛtīyadhyāna; T. bsam gtan gsum pa; C. sanchan 三禪)
4. fourth absorption (S. caturthadhyāna; T. bsam gtan bzhi pa; C. sichan 四禪)

four activities. (S. karman; T. las; C. shiye 事業)

1. pacification (S. śāntika; T. zhi ba'i las; C. xizai 息災)
2. enrichment (S. pauṣṭika; T. rgyas pa'i las; C. zengyi 增益)
3. control (S. vaśīkaraṇa; T. bdang gi las; C. huai'ai 懷愛)
4. wrath (S. abhicāra; T. drag po mngon spyod; C. xiangfu 降伏)

four aids to penetration. (S. nirvedhabhāgīya; T. nges par 'byed pa'i cha mthun; C. shunjuezefen 順決擇分)

1. heat (S. ūṣman; T. drod; C. nuan 煖)
2. summit (S. mūrdhan; T. rtse mo; C. ding 頂)
3. receptivity/acquiescence (S. kṣānti; T. bzod pa; C. ren 忍)
4. supreme worldly dharmas (S. laukikāgradharma; T. 'jig rten pa'i chos kyi mchog; C. shi diyi fa 世第一法)

four analytical knowledges. (S. pratisaṃvid; T. so so yang dag par rig pa; C. wu'ai jie/wu'ai bian 無礙解/無礙辯)

1. of factors (S. dharma; T. chos; C. fa 法)
2. of meaning (S. artha; T. don; C. yi 義)

3. of etymology or language (S. nirukti; T. nges pa'i tshig; C. ci/ci 詞/辭)
4. of eloquence (S. pratibhāna; T. spobs pa; C. leshuo 樂說)

four baleful destinies. (S. apāya/durgati; T. ngan song; C. equ 惡趣)

1. demigods (S. asura; T. lha ma yin; C. axiuluo qu 阿修羅趣)
2. animals (S. tiryak; T. dud 'gro; C. chusheng qu 畜生趣)
3. ghosts (S. preta; T. yi dwags; C. egui qu 餓鬼趣)
4. hell denizens (S. nāraka; T. dmyal ba; C. diyu qu 地獄趣)

four bases of psychic power. (S. ṛddhipāda; T. rdzu 'phrul gyi rkang pa; C. shenzu/ruyizu 神足/如意足)

1. aspiration (S. chanda; T. 'dun pa; C. yu 欲)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. qin 勤)
3. thought/concentration (S. citta; T. bsam pa; C. xin 心)
4. analysis (S. mīmāṃsā; T. dpyod pa; C. siwei/guan 思惟/觀)

four bodies [of a buddha]. (S. kāya; T. sku; C. shen 身)

1. dharma body (S. dharmakāya; T. chos sku; C. fashen 法身)
2. enjoyment body (S. saṃbhogakāya; T. longs spyod rdzogs pa'i sku; C. baoshen 報身)
3. emanation body (S. nirmāṇakāya; T. sprul pa'i sku; C. huashen 化身)
4. essence body (S. svābhāvikakāya; T. ngo bo nyid kyi sku; C. zixing shen 自性身)

four bonds/fetters. (S. grantha/saṃyojana; T. 'ching ba; C. jie/fu 結/縛)

1. covetousness (S. abhidhyā; T. brnab sems; C. yu'ai 欲愛)
2. ill-will (S. vyāpāda; T. gnod sems; C. chenhui 瞋恚)
3. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims dang brtul zhugs mchog tu 'dzin pa; C. jiejinqu 戒禁取)
4. attachment to views/dogmatic fanaticism (S. dṛṣṭiparāmarśa/idaṃsatyābhiniveśa; T. lta ba mchog tu 'dzin pa; C. wojianqu 我見取)

four boundless states/immeasurables. (S. apramāṇa; T. tshad med; C. wuliang xin 無量心)

1. loving-kindness (S. maitrī; T. byams pa; C. ci 慈)
2. compassion (S. karuṇā; T. snying rje; C. bei 悲)
3. empathetic joy (S. muditā; T. dga' ba; C. xi 喜)
4. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

four characteristics of all conditioned objects. (S. saṃskṛtalakṣaṇa/caturlakṣaṇa; T. 'dus byas kyi mtshan nyid/mtshan nyid bzhi; C. youwei xiang/sixiang 有爲相/四相)

1. origination/birth (S. jāti; T. skye ba; C. sheng 生)
2. maturation/continuance (S. sthiti; T. gnas pa; C. zhu 住)
3. senescence/decay/aging (S. jarā; T. rga ba; C. yi 異)
4. desinence/extinction (S. anitya [alt. anityatā]; T. mi rtag pa; C. mie 滅)

four conditions. (S. pratyaya; T. rkyen; C. yuan 緣)

1. causal condition (S. hetupratyaya; T. rgyu rkyen; C. yin yuan 因緣)
2. immediate antecedent condition (S. samanantarapratyaya; T. de ma thag pa'i rkyen; C. dengwujian yuan 等無間緣)
3. objective-support condition (S. ālambanapratyaya; T. dmigs rkyen; C. suoyuan yuan 所緣緣)
4. predominant condition (S. adhipatipratyaya; T. bdag rkyen; C. zengshang yuan 增上緣)

four contaminants. (S. āsrava; T. zag pa; C. lou 漏)

1. contaminant of sensuality (kāmāsrava; T. 'dod pa'i zag pa; C. yu lou 欲漏)
2. contaminant of becoming (bhavāsrava; T. srid pa'i zag pa; C. you lou 有漏)
3. contaminant of ignorance (avidyāsrava; T. ma rig pa'i zag pa; C. wuming lou 無明漏)
4. contaminant of views (dṛṣṭyāsrava; T. lta ba'i zag pa; C. jian lou 見漏)

four continents. (S. dvīpa; T. gling; C. [da][bu]zhou [大][部]洲)

1. videha [east] (T. lus 'phags; C. dong shengshen zhou 東勝身洲)
2. Jambudvīpa [south] (T. 'dzam bu gling; C. nan Shanbu zhou 南贍部洲)
3. godānīya [west] (T. ba glang spyod; C. xi niuhuo zhou 西牛貨洲)
4. uttarakuru [north] (T. sgra mi snyan; C. bei julu zhou 北俱盧洲)

four "defeat" offenses. (S. pārājika; T. phas pham pa; C. poluoyi 波羅夷)

1. sexual intercourse (S. abrahmacarya; T. mi tshangs pa spyod pa; C. yin 淫)
2. theft (S. adattādāna; T. ma byin par len pa; C. dao 盗)
3. killing [of a human being] (S. vadha; T. gsod pa; C. sha 殺)
4. lying about one's higher spiritual achievements (S. uttaramanuṣyadharmapralāpa; T. mi'i chos bla mar smra ba; C. wang 妄)

four deportments/postures. (S. īryāpatha; T. spyod lam; C. weiyi 威儀)

1. walking (S. caṅkrama; alt. gamana; T. 'chag pa; C. xing 行)
2. standing (S. sthāna; sthita; T. 'greng ba; C. zhu 住)
3. sitting (S. niṣaṇṇa; T. 'dug pa; C. zuo 坐)
4. lying down (S. śayana; T. nyal ba; C. wo 臥)

four divine abidings. (S. brahmavihāra; T. tshang pa'i gnas; C. fanzhu 梵住)

1. loving-kindness (S. maitrī; T. byams pa; C. ci 慈)
2. compassion (S. karuṇā; T. snying rje; C. bei 悲)
3. empathetic joy (S. muditā; T. dga' ba; C. xi 喜)
4. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

four empowerments. (S. abhiṣeka; T. dbang; C. guanding 灌頂)

1. vase empowerment (S. kalaśābhiṣeka; T. bum dbang; C. baoping guanding 寶瓶灌頂)
2. secret empowerment (S. guhyābhiṣeka; T. gsang dbang; C. mimi guanding 秘密灌頂)
3. wisdom–knowledge empowerment (S. prajñājñānābhiṣeka; T. shes rab ye shes kyi dbang; C. zhihui guanding 智慧灌頂)
4. word empowerment (S. śabdābhiṣeka; T. tshig dbang/dbang bzhi pa; C. mingci guanding 名詞灌頂)

four fearlessnesses/self-confidences. (S. vaiśāradya; T. mi 'jigs pa; C. wusuowei 無所畏)

The Tathāgata's self-confidence derives from:

1. his knowledge of all phenomena (S. sarvadharmābhisaṃbodhivaiśāradya; T. chos thams cad mkhyen pa la mi 'jigs pa; C. zhufa xiandengjue wuwei 諸法現等覺無畏)
2. his knowledge that all the contaminants are destroyed (S. sarvāsravakṣayajñānavaiśāradya; T. zag pa zad pa thams cad mkhyen pa la mi 'jigs pa; C. yiqie loujinzhi wuwei 一切漏盡智無畏)
3. his correct identification of all the obstacles to liberation (S. antarāyikadharmānanyathātvaniścitavyākaraṇavaiśāradya; T. bar du gcod pa'i chos rnams bzhan du mi 'gyur bar nges pa'i lung bstan pa la mi 'jigs pa; C. zhangfa buxu jueding shouji wuwei 障法不虛決定授記無畏)
4. his realization of all the marvelous qualities that are to be achieved through completing the path to liberation (S. sarvasampadadhigamāyanairyāṇikapratipattathātvavaiśāradya; T. phun sum tshogs pa thams cad thob par 'gyur bar nges par 'byung ba'i lam de bzhin du gyur ba la mi 'jigs pa; C. weizheng yiqie juzu chudao ruxing wuwei 為證一切具足出道如性無畏)

four floods. (S. ogha; T. chu bo; C. puliu 瀑流)

1. craving for sensuality (S. kāmarāga; T. 'dod pa la 'dod chags; C. yu'ai 欲愛)
2. craving for continued existence (S. bhavarāga; T. srid pa'i 'dod chags; C. you'ai 有愛)
3. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
4. views (S. dṛṣṭi; T. lta ba; C. jian 見)

four foundations of mindfulness. (S. smṛtyupasthāna; T. dran pa'i nyer bzhag; C. nianchu 念處)

1. mindfulness of the body (S. kāyasmṛtyupasthāna; T. lus dran pa nye bar bzhag pa; C. shen nianchu 身念處)
2. mindfulness of sensations (S. vedanāsmṛtyupasthāna; T. tshor ba dran pa nye bar bzhag pa; C. shou nianchu 受念處)
3. mindfulness of mental states (S. cittasmṛtyupasthāna; T. sems dran pa nye bar bzhag pa ; C. xin nianchu 心念處)
4. mindfulness of phenomena (S. dharmasmṛtyupasthāna; T. chos dran pa nye bar bzhag pa; C. fa nianchu 法念處)

four fruitions. [of sanctity] (S. phala; T. 'bras bu; C. guo [zheng/wei] 果[證/位])

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu guo/xutuohuan guo 預流果/須陀洹果)
2. once-returner (S. sakṛdāgāmin; T. lan cig phyir 'ong ba; C. yilai guo/situohan guo 一來果/斯陀含果)
3. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. buhuan guo/anahan guo 不還果/阿那含果)
4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo 無學果/阿羅漢果)

four graspings. (S. upādāna; T. nyer len; C. qu 取)

1. of sensuality (S. kāmopādāna; T. 'dod pa nye bar len pa; C. yuqu 欲取)
2. of wrong views (S. dṛṣṭyupādāna; T. lta ba nye bar len pa; C. jianqu 見取)
3. of rules and rituals (S. śīlavratopādāna; T. tshul khrims dang brtul zhugs mchog 'dzin nye bar len pa; C. jie[jin] qu 戒[禁]取)
4. of the concept "self" (S. ātmavādopādāna; T. bdag lta nye bar len pa; C. woyu qu 我語取)

four great elements. (S. mahābhūta; T. 'byung ba chen po; C. da 大)

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. air/mobility (S. vāyu; T. rlung; C. feng 風)

four guardian kings. (S. mahārājan/lokapāla; T. rgyal chen; C. [hushi] tianwang/huguo tianwang [護世]天王/護國天王)

1. Dhṛtarāṣṭra; in the east (T. Yul 'khor srung; C. Chiguo 持國)
2. Virūḍhaka; in the south (T. 'Phags skyes po; C. Zengzhang 增長)
3. Virūpākṣa; in the west (T. Spyan mi bzang; C. Guangmu 廣目)
4. Vaiśravaṇa; in the north (T. Rnam thos sras; C. Duowen 多聞)

four immaterial absorptions. (S. ārūpyāvacaradhyāna; T. gzugs med pa'i snyoms 'jug; C. wuse ding 無色定) See FOUR IMMATERIAL REALMS (s.v.).

four immaterial realms. (S. ārūpyadhātu; T. gzugs med khams pa'i gnas; C. wuse jie 無色界)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched; C. kong wubian chu 空無邊處)

2. infinite consciousness (S. vijñānānantyāyatana; T. rnam shes mtha' yas skye mched; C. shi wubian chu 識無邊處)
3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched; C. wu suoyou chu 無所有處)
4. neither perception nor nonperception (S. naivasaṃjñānā-saṃjñāyatana; T. 'du shes med 'du shes med min skye mched; C. feixiang feifeixiang chu 非想非非想處)

four intentions. (S. abhiprāya; T. dgongs pa; C. yiqu/miyi 意趣/密意)

1. intention directed towards sameness (S. samatābhiprāya; T. mnyam pa nyid la dgongs pa; C. pingdeng yiqu 平等意趣)
2. intention directed towards other meanings (S. arthāntarābhiprāya; T. don gzhan la dgongs pa; C. bieyi yiqu 別義意趣)
3. intention directed towards other times (S. kālāntarābhiprāya; T. dus gzhan la dgongs pa; C. bieshi yiqu 別時意趣)
4. intention directed towards other individuals (S. pudgalāntarābhiprāya; T. gang zag gzhan la dgongs pa; C. buteqieluo yiyao yiqu 補特伽羅意樂意趣)

four intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the birth (S. jātyantarābhava; T. skye gnas kyi bar do)
2. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. 'chi kha'i bar do)
3. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
4. intermediate state of rebirth (S. bhavāntarābhava; T. srid pa bar do)

four Māras. (S. māra; T. bdud; C. mo 魔)

1. Māra of the aggregates (S. skandhamāra; T. phung po'i bdud; C. yinmo 陰魔)
2. Māra of the afflictions (S. kleśamāra; T. nyon mongs pa'i bdud; C. fannao mo 煩惱魔)
3. Māra of death (S. mṛtyumāra; T. 'chi bdag gi bdud; C. simo 死魔)
4. Māra the deity (S. Devaputramāra; T. Lha'i bu bdud; C. Tianzimo 天子魔)

four means of conversion. (S. saṃgrahavastu; T. bsdu dngos; C. sheshi; shefa 攝事/攝法)

1. generosity (S. dāna; T. sbyin pa; C. bushi 布施)
2. kind words (S. priyavādita; T. snyan par smra ba; C. aiyu 愛語)
3. helpfulness; viz. teaching others to fulfill their aims (S. arthacaryā; T. don spyod pa; C. lixing 利行)
4. consistency between words and deeds (S. samānārthatā; T. don mthun pa; C. tongshi 同事)

four modes of birth. (S. yoni; T. skye gnas rigs; C. sheng 生)

1. oviparous birth (S. aṇḍaja; T. sgo nga las skye ba; C. luansheng 卵生)
2. viviparous birth (S. jarāyuja; T. mngal nas skye ba; C. taisheng 胎生)
3. moisture-born (S. saṃsvedaja; T. drod sher las skye ba; C. shisheng 濕生)
4. metamorphic or transformative birth; viz. spontaneous generation [as of divinities] (S. upapāduka; T. brdzus te skye ba; C. huasheng 化生)

four noble ones. (S. ārya; T. 'phags pa; C. sheng 聖)

1. śrāvaka (T. nyan thos; C. shengwen 聲聞)
2. pratyekabuddha (T. rang rgyal; C. yuanjue 緣覺)
3. bodhisattva (T. byang chub sems dpa'; C. pusa 菩薩)
4. buddha (T. sang rgyas; C. fo 佛)

four noble persons. (S. āryapudgala; T. 'phags pa'i gang zag; C. xiansheng 賢聖)

1. stream-enterer (S. srotaāpanna; T. rgyun du zhugs pa; C. yuliu guo/xutuohuan guo 預流果/須陀洹果)
2. once-returner (S. sakṛdāgāmin; T. lan cig phyir 'ong ba; C. yilai guo/situohan guo 一來果/斯陀含果)
3. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. buhuan guo/anahan guo 不還果/阿那含果)
4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo 無學果/阿羅漢果)

four noble truths. (S. āryasatya; T. 'phags pa'i bden pa; C. shengdi 聖諦)

1. truth of suffering (S. duḥkhasatya; T. sdug bsngal gyi bden pa; C. kudi 苦諦)
2. truth of origination (S. samudayasatya; T. kun 'byung gi bden pa; C. jidi 集諦)
3. truth of cessation (S. nirodhasatya; T. 'gog pa'i bden pa; C. miedi 滅諦)
4. truth of the path (S. mārgasatya; T. lam gyi bden pa; C. daodi 道諦)

four persons. (S. pudgala; T. gang zag; C. buteqieluo 補特伽羅)

1. ordinary persons (S. pṛthagjana; T. so so skye bo; C. fanfu 凡夫)
2. disciples (S. śrāvaka; T. nyan thos; C. shengwen 聲聞)
3. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣覺)
4. bodhisattvas (T. byang chub sems dpa'; C. pusa 菩薩)

four perverted views. (S. viparyāsa; T. phyin ci log; C. diandao 顛倒)

1. to view as permanent what is actually impermanent (S. nityaviparyāsa; T. mi rtag pa la rtag par 'dzin pa; C. chang diandao 常顛倒)

2. to view as pleasurable what is actually suffering (S. sukhaviparyāsa; T. sdug bsngal ba la bde bar ’dzin pa; C. le diandao 樂顛倒)
3. to view as pure what is actually tainted (S. śuciviparyāsa; T. mi gtsang ba la gtsang bar ’dzin pa; C. jing diandao 淨顛倒)
4. to view as self what is actually non-self (S. ātmaviparyāsa; T. bdag med pa la bdag tu ’dzin pa; C. wo diandao 我顛倒)

four philosophical systems. (S. siddhāntabheda; T. grub mtha’ smra ba)

1. Vaibhāṣika [Sarvāstivāda] (T. Bye brag tu smra ba; C. Piposha bu 毘婆沙部)
2. Sautrāntika (T. Mdo sde pa; C. Jingliang bu 經量部)
3. Vijñānavāda/Cittamātra (T. Rnam shes su smra ba/Sems tsam pa; C. Weishi 唯識)
4. Madhyamaka (Dbu ma pa; C. Zhongguan 中觀)

four realms of reality [dharmadhātu]. (C. si fajie 四法界)

1. dharmadhātu of phenomena (C. shi fajie 事法界)
2. dharmadhātu of principle (C. li fajie 理法界)
3. dharmadhātu of the unimpeded interpenetration between principle and phenomena (C. lishi wu’ai fajie 理事無礙法界)
4. dharmadhātu of unimpeded interpenetration of phenomenon and phenomena (C. shishi wu’ai fajie 事事無礙法界)

four reliances. (S. pratisaraṇa; T. rton pa; C. yi 依)

1. reliance on the meaning rather than the words (S. arthapratisaraṇena bhavitavyaṃ na vyañjanapratisaraṇena; T. don la rton par bya yi tshig ’bru la rton par mi bya; C. yiyi buyi yu 依義不依語)
2. reliance on the teaching rather than on the person [who delivers the teaching] (S. dharmapratisaraṇena bhavitavyaṃ na pudgalapratisaraṇena; T. chos la rton par bya yi gang zag la rton par mi bya; C. yifa buyi ren 依法不依人)
3. reliance on wisdom rather than [ordinary] consciousnesses (S. jñānapratisaraṇena bhavitavyaṃ na vijñānapratisaraṇena; T. ye shes la rton par bya yi rnam shes la rton par mi bya; C. yizhi buyi shi 依智不依識)
4. reliance on the definitive meaning rather than the provisional meaning (S. nītārthasūtrapratisaraṇena bhavitavyaṃ na neyārthasūtrapratisaraṇena; T. nges don la rton par bya yi drang don la rton par mi bya; C. yiliaoyi buyi buliaoyi 依了義不依不了義)

four right efforts. (S. samyakpradhāna/samyakprahāṇa; T. spong pa; C. zhengqin 正勤)

1. to bring about the (future) non-production of evil and unwholesome dharmas that have not yet been produced (S. anutpannānāṃ pāpakānām akuśalānāṃ dharmāṇām anutpādāya cchandaṃ janayati/anutpannānāṃ akuśalānāṃ saṃrakṣaṇaṃ; T. mi dge ba ma skyes pa mi bkyed pa; C. weisheng e ling busheng 未生惡令不生)
2. the abandonment of those evil and unwholesome dharmas that have been produced (S. utpannānāṃ pāpakānām akuśalānāṃ dharmāṇāṃ prahāṇāya cchandaṃ janayati/utpannānāṃ akuśalānāṃ prahāṇaṃ; T. mi dge ba skyes pa spong ba; C. yisheng e ling yongduan 已生惡令永斷)
3. the production of wholesome dharmas that have not yet been produced (S. anutpannānāṃ kuśalānāṃ dharmāṇām utpādāya cchandaṃ janayati; T. dge ba ma skyes pa bskyed pa; C. weisheng shan ling sheng 未生善令生)
4. the increase of those wholesome dharmas that have been produced (S. utpannānāṃ kuśalānāṃ dharmāṇāṃ sthitaye bhūyobhāvāya asaṃpramoṣāya paripūraṇāya cchandaṃ janayati/anutpannānāṃ punarutpāda; T. dge ba skyes pa spel ba; C. yisheng shan ling zengzhang 已生善令增長)

four seals. (S. mudrā; T. phyag rgya; C. yin 印)

1. pledge seal (S. samayamudrā; T. dam tshig phyag rgya; C. sanmoye yin 三摩耶印)
2. dharma seal (S. dharmamudrā; T. chos kyi phyag rgya; C. fa yin 法印)
3. action seal (S. karmamudrā; T. las kyi phyag rgya; C. jiemo yin 羯磨印)
4. great seal (S. mahāmudrā; T. phyag rgya chen po; C. da yin 大印)

four seals indicative of the Buddhist view. (S. caturmudrā/dṛṣṭinimittamudrā; T. phyag rgya bzhi/bka’ rtags kyi phyag rgya; C. siyin/fayin 四印/法印)

1. all that is compounded is impermanent (S. sarvasaṃskārā anityatāḥ; T. ’dus byas thams cad mi rtag pa; C. zhuxing wuchang 諸行無常)
2. all that is contaminated is suffering (S. sarvasaṃskārā duḥkhāḥ; T. zag cas thams cad sdug bsngal ba; C. yiqie jie ku 一切皆苦)
3. all phenomena are without self (S. sarvadharmā anātmānaḥ; T. chos thams cad bdag med pa; C. zhufa wuwo 諸法無我)
4. nirvāṇa is peace (S. nirvāṇaśānta; T. mya ngan las ’das pa zhi ba; C. niepan jijing 涅槃寂靜)

four tantra classes. (S. tantra; T. rgyud sde)

1. action tantra (S. kriyātantra; T. bya ba’i rgyud)
2. performance tantra (S. caryātantra; T. spyod pa’i rgyud)
3. yoga tantra (S. yogatantra; T. rnal ’byor gyi rgyud)
4. unexcelled yoga tantra (S. anuttarayogatantra; T. rnal ’byor bla na med pa’i rgyud)

FIVES

five acts that bring immediate retribution. (S. ānantaryakarman; T. mtshams med pa; C. wujian ye [nizui/zhongzui] 無間業 [逆罪/重罪])

1. matricide (S. mātṛghāta; T. ma gsod pa; C. hai mu/sha mu 害母/殺母)
2. patricide (S. pitṛghāta; T. pha gsod pa; C. hai fu/sha fu 害父/殺父)
3. killing an arhat (S. arhadghāta; T. dgra bcom pa gsod pa; C. hai aluohan/sha aluohan 害阿羅漢/殺阿羅漢)
4. maliciously spilling a buddha's blood (S. tathāgatasyāntike duṣṭacittarudhirotpādanam; T. de bzhin gshegs pa'i sku la ngan sems kyis khrag 'byin pa; C. [exin] chu foshen xie [惡心]出佛身血)
5. creating a schism in the order (S. saṃghabheda; T. dge 'dun gyi dbyen byas pa; C. poseng 破僧)

five aggregates. (S. skandha; T. phung po; C. yun/yin 蘊/陰)

1. aggregate of materiality (S. rūpaskandha; T. gzugs kyi phung po; C. se yun/se yin 色蘊/色陰)
2. aggregate of sensation (S. vedanāskandha; T. tshor ba'i phung po; C. shou yun/shou yin 受蘊/受陰)
3. aggregate of perception (S. saṃjñāskandha; T. 'du shes kyi phung po; C. xiang yun/xiang yin 想蘊/想陰)
4. aggregate of conditioning factors (S. saṃskāraskandha; T. 'du byed kyi phung po; C. xing yun/xing yin 行蘊/行陰)
5. aggregate of consciousness (S. vijñānaskandha; T. rnam shes kyi phung po; shi yun/shi yin 識蘊/識陰)

five aids to liberation. (S. mokṣabhāgīya; T. thar pa cha mthun; C. shunjietuofen 順解脫分)

1. faith (S. śraddhā; T. dad pa; C. xin 信)
2. effort (S. vīrya; T. brtson 'grus; C. jingjin/qin 精進/勤)
3. mindfulness (S. smṛti; T. dran pa; C. nian 念)
4. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
5. wisdom (S. prajñā; T. shes rab; C. hui 慧)

five buddha families. (S. pañcakula; T. rigs lnga; C. wu bu/jia 五部/家)

1. tathāgata family (S. tathāgatakula; T. de bzhin gshegs pa'i rigs; C. rulai bu 如來部)
2. vajra family (S. vajrakula; T. rdo rje'i rigs; C. jingang bu 金剛部)
3. jewel family (S. ratnakula; T. rin chen rigs; C. bao bu 寶部)
4. lotus family (S. padmakula; T. padma rigs; C. lianhua bu 蓮華部)
5. action family (S. karmakula; T. las kyi rigs; C. ye bu 業部)

five buddhas. (S. pañcatathāgata; T. de bzhin gshegs pa lnga; C. wuzhi rulai/wu fo 五智如來/五佛)

1. Vairocana (T. Rnam par snang mdzad; C. Dari rulai/Piluzhena 大日如來/毗盧遮)
2. Akṣobhya (T. Mi bskyod pa; C. Achu fo 阿閦佛)
3. Ratnasambhava (T. Rin chen 'byung gnas; C. Baosheng rulai 寶生如來)
4. Amitābha (T. 'Od dpag med; C. Amituo fo/Wuliangshou fo 阿彌陀佛/無量壽佛)
5. Amoghasiddhi (T. Don yod grub pa; C. Bukong Chengjiu rulai fo 不空成就如來佛)

five destinies [of rebirth]. (S. gati; T. 'gro ba; C. qu/dao 趣/道)

1. divinities (S. deva; T. lha; C. tian 天)
2. humans (S. manuṣya; T. mi; C. ren 人)
3. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
4. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
5. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

five effects. (S. pañcaphala; T. 'bras bu lnga; C. wu guo 五果)

1. correlative effect (S. niṣyandaphala; T. rgyu mthun gyi 'bras bu; C. dengliu guo 等流果)
2. retributive effect (S. vipākaphala; T. rnam smin gyi 'bras bu; C. yishu guo 異熟果)
3. separation effect (S. visaṃyogaphala; T. bral ba'i 'bras bu; C. liji guo 離繫果)
4. effect caused by human action (S. puruṣakāraphala; T. skyes bus byed pa'i 'bras bu; C. shiyong guo 士用果)
5. predominant effect (S. adhipatiphala; T. bdag po'i 'bras bu; C. zengshang guo 增上果)

five elements. (S. mahābhūta/dhātu; T. 'byung po chen po; C. da[zhong] 大[種])

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. air/mobility (S. vāyu; T. rlung; C. feng 風)
5. space (S. ākāśa; T. nam mkha'; C. kong 空)

five eyes. (S. cakṣus; T. spyan; C. yan 眼)

1. fleshly eye (S. māṃsacakṣus; T. sha'i spyan; C. rouyan 肉眼)
2. divine eye/clairvoyance (S. divyacakṣus; T. lha'i spyan; C. tianyan 天眼)
3. wisdom eye (S. prajñācakṣus; T. shes rab kyi spyan; C. huiyan 慧眼)
4. dharma eye (S. dharmacakṣus; T. chos kyi spyan; C. fayan 法眼)
5. buddha eye (S. buddhacakṣus; T. sangs rgyas kyi spyan; C. foyan 佛眼)

five factors of meditative absorption. (S. dhyānāṅga; T. bsam gtan gyi yan lag; C. chanzhi/dingzhi 禪支/定支)

1. applied thought/initial application of attention (S. vitarka; T. rtog pa; C. xun 尋)
2. sustained thought/sustained attention (S. vicāra; T. dpyod pa; C. si 伺)
3. physical rapture (S. prīti; T. dga' ba; C. xi 喜)
4. mental ease (S. sukha; T. bde ba; C. le 樂)
5. one-pointedness (S. cittaikāgratā; T. sems rtse gcig pa; C. xin yijing xing 心一境性)

five faculties/dominants. (S. indriya; T. dbang po; C. gen 根)

1. faith (S. śraddhā; T. dad pa; C. xin 信)
2. effort (S. vīrya; T. brtson 'grus; C. jingjin/qin 精進/勤)
3. mindfulness (S. smṛti; T. dran pa; C. nian 念)
4. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
5. wisdom (S. prajñā; T. shes rab; C. hui 慧)

five hindrances [to dhyāna]. (S. nīvaraṇa; T. sgrib pa; C. gai 蓋)

1. sensual desire (S. kāmacchanda; T. 'dod pa la 'dun pa ; C. tanyu 貪欲)
2. malice (S. vyāpāda; T. gnod sems; C. chenhui 瞋恚)
3. sloth and torpor (S. styānamiddha; T. rmugs pa dang gnyid; C. shuimian/huanchen 睡眠/昏沈)
4. restlessness and worry (S. auddhatyakaukṛtya; T. rgod pa dang 'gyod pa; C. diaoju/sanluan/ezuo/hui 掉舉/散亂/惡作/悔)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)

Five Huayan classifications of the teachings. (C. Huayan wujiao 華嚴五教)
Earlier division, according to Dushun and Fazang:

1. hīnayāna teachings/śrāvakayāna teachings (C. xiaosheng jiao/shengwensheng jiao 小乘教/聖聞乘教)
2. elementary teachings [of Mahāyāna] (C. shijiao 始教)
3. advanced/final teachings [of Mahāyāna] (C. zhongjiao 終教)
4. sudden teachings (C. dunjiao 頓教)
5. perfect teachings/consummate teachings C. yuanjiao 圓教)

Later division, according to Guifeng Zongmi:

1. teachings for divinities and humans (C. rentian jiao 人天教)
2. hīnayāna teachings (C. xiaosheng jiao 小乘教)
3. dharma-characteristics teachings of Mahāyāna (C. dasheng faxiang jiao 大乘法相教)
4. characteristics-negating teachings of Mahāyāna (C. dasheng poxiang jiao 大乘破相教)
5. The nature-revealing teaching of the one vehicle (C. yisheng xianxing jiao 一乘顯性教)

five lineages. (S. gotra; T. rigs pa; C. zhongxing 種姓/性)

1. tathāgata lineage (S. tathāgatayānābhisamayagotra; T. de bzhin gshegs pa'i theg pa mngon par rtogs pa'i rigs; C. rulai sheng zhongxing 如來乘種性)
2. pratyekabuddha lineage (S. pratyekabuddhayānābhisamayagotra; T. rang rgyal gyi theg pa mngon par rtogs pa'i rigs; C. dujue sheng zhongxing 獨覺乘種性)
3. śrāvakayāna lineage (S. śrāvakayānābhisamayagotra; T. nyan thos kyi theg pa mngon par rtogs pa'i rigs; C. shengwen sheng zhongxing 聲聞乘種性)
4. uncertain lineage (S. aniyatagotra; T. ma nges pa'i rigs; C. buding zhongxing 不定種性)
5. no lineage [viz. icchantika] (S. agotraka; T. rigs med pa; C. wu zhongxing 無種性)

five nectars. (S. amṛta; T. bdud rtsi; C. ganlu 甘露)

1. semen (S. bodhicitta; T. byang sems; C. nanjing 男精)
2. blood (S. rakta; T. rak ta; C. nüxie 女血)
3. urine (S. mūtra; T. dri chu; C. niao 尿)
4. excrement (S. purīṣa; T. dri chen; C. shi 屎)
5. flesh (S. māṃsa; T. sha; C. gusui 骨髓)

five paths. (S. pañcamārga; T. lam lnga; C. wuwei 五位)

1. path of equipment/accumulation (S. saṃbhāramārga; T. tshogs lam; C. ziliang wei 資糧位)
2. path of preparation (S. prayogamārga; T. sbyor lam; C. jiaxing wei 加行位)
3. path of vision (S. darśanamārga; T. mthong lam; C. jiandao wei 見道位)
4. path of cultivation (S. bhāvanāmārga; T. bsgom lam; C. xiudao wei 修道位)
5. adept path (where there is nothing more to learn) (S. aśaikṣamārga; T. mi slob lam; C. wuxue wei 無學位)

five periods and eight teachings. [according to the Tiantai school] (C. wushi bajiao 五時八教)
The five major chronological periods of the Buddha's teaching (C. wushi 五時):

1. Huayan period (C. Huayan shiqi 華嚴時期)
2. āgamas/Deer Park period (C. ahan shiqi 阿含時期/Luyuan shiqi 鹿苑時期)
3. expansive (vaipulya) Mahāyāna period (C. Fangdeng shiqi 方等時期)
4. perfection of wisdom (prajñāpāramitā) period (C. bore shiqi 般若時期)
5. Lotus (*Saddharmapuṇḍarīkasūtra*) and Nirvāṇa (*Mahāparinirvāṇasūtra*) scriptures period (C. Fahua Niepan shiqi 法華涅槃時期)

Fourfold division of the teaching according to means of conversion (C. huayi sijiao 化儀四教):

1. sudden [Huayan jing] (C. dunjiao 頓教)
2. gradual [āgamas, vaipulya, prajñāpāramitā] (C. jianjiao 漸教)

3. indeterminate (C. puding jiao 不定教)
4. secret/esoteric (C. mimi jiao 祕密教)

Fourfold division of the teaching according to content [*and based on the capacity of the audience*] (C. huafa sijiao 化法四教):

1. tripiṭaka, viz., hīnayāna (C. sanzang jiao 三藏教)
2. common/shared [by both hīnayāna and Mahāyāna] (C. tongjiao 通教)
3. distinct/separate [Mahāyāna] (C. biejiao 別教)
4. perfect/consummate [Lotus and Nirvāṇa sutras] (C. yuanjiao 圓教)

five powers. (S. bala; T. stobs; C. li 力)

1. power of faith (S. śraddhābala; T. dad pa'i stobs; C. xin li 信力)
2. power of effort (S. vīryabala; T. brtson 'grus kyi stobs; C. jingjin li/qin li 精進力/勤力)
3. power of mindfulness (S. smṛtibala; T. dran pa'i stobs; C. nian li 念力)
4. power of concentration (S. samādhibala; T. ting nge 'dzin gyi stobs; C. ding li 定力)
5. power of wisdom (S. prajñābala; T. shes rab kyi stobs; C. hui li 慧力)

five precepts. [of the laity] (S. pañcaśīla; T. tshul khrims lnga; C. wujie 五戒)

1. to abstain from killing living creatures (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng/li shasheng 不殺生/離殺生)
2. to abstain from taking what is not given (S. adattādāna-virati; T. ma byin par len pa spong ba; C. bu toudao/li buyu qu 不偷盜/離不與取)
3. to abstain from engaging in sexual misconduct (S. kāmamithyācāra-virati; T. 'dod pas log par g.yem pa spong ba; C. bu xieyin/li yu xiexing 不邪婬/離欲邪行)
4. to abstain from lying (often explained as lying about the possession of high states of attainment or superhuman powers) (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangyu/li xukuang yu 不妄語/離虛誑語)
5. to abstain from intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu/li yinjiu 不飲酒/離飲酒)

five pure abodes. (S. śuddhāvāsa; T. gtsang gnas; C. jing jutian 淨居天)

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)
2. not burning/without torment (S. atapa; T. mi gdung ba; C. wure tian 無熱天)
3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)
5. highest (S. akaniṣṭha; T. 'og min; C. se jiujing tian 色究竟天)

five royal treasure revealers. (T. gter ston rgyal po lnga)

1. Nyang ral Nyi ma 'od zer
2. Guru Chos kyi dbang phyug
3. Rdo rje gling pa
4. Pad ma gling pa
5. 'Jam dbyang mkhyen brtse dbang po

five sciences. (S. pañcavidyā; T. rig pa lnga; C. wuming 五明)

1. manual arts (S. śilpakarma[vidyā]; T. bzo gnas kyi rig pa; C. gongqiao ming 工巧明)
2. grammar (S. śabdavidyā; T. sgra'i rig pa; C. shengming 聲明)
3. medicine (S. cikitsāvidyā; T. gso ba'i rig pa; C. yifangming 醫方名)
4. logic (S. hetuvidyā; T. gtan tshigs kyi rig pa; C. yinming 因明)
5. inner knowledge (S. adhyātmavidyā; T. nang gi rig pa; C. neiming 內明)

five supranormal powers. (S. abhijñā; T. mngon shes; C. shentong 神通)

1. psychic powers (S. ṛddhividhābhijñā; T. rdzu 'phrul gyi bya ba shes pa; C. shenjing zhizheng tong 神境智證通)
2. "the divine eye"/clairvoyance (S. divyacakṣus; T. lha'i mig; C. tianyan 天眼)
3. "the divine ear"/clairaudience (S. divyaśrotra; T. lha'i rna ba; C. tian'er 天耳)
4. knowledge of others' minds (S. paracittajñāna; T. pha rol gyi sems shes pa; C. taxin tong 他心通)
5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rje su dran pa; C. suzhu suinian/suming tong 宿住隨念/宿命通)

five turbidities/degenerations. (S. kaṣāya; T. snyigs ma; C. zhuo 濁)

1. turbidity of the lifespan (S. ayuḥkaṣāya; T. tshe'i snyigs ma; C. min zhuo 命濁)
2. turbidity of views (S. dṛṣṭikaṣāya; T. lta ba'i snyigs ma; C. jian zhuo 見濁)
3. turbidity of afflictions (S. kleśakaṣāya; T. nyon mongs kyi snyigs ma; C. fannao zhuo 煩惱濁)
4. turbidity of sentient beings (S. sattvakaṣāya; T. sems can gyi snyigs ma; C. zhongsheng zhuo 衆生濁)
5. turbidity of the age (S. kalpakaṣāya; T. dus kyi snyigs ma; C. jie zhuo 劫濁)

five wheels/cakras. (S. cakra; T. 'khor lo; C. lun 輪)

1. great bliss wheel [at the forehead] (S. mahāsukhacakra; T. spyi bde chen gyi 'khor lo; C. dalelun/dinglun 大樂輪/頂輪)

2. enjoyment wheel [at the throat] (S. sambhogacakra; T. mgrin pa longs spyod kyi ’khor lo; C. baolun/shouyonglun/houlun 報輪/受用輪/喉輪)
3. dharma wheel [at the heart] (S. dharmacakra; T. snying ka chos kyi ’khor lo; C. falun/xinlun 法輪/心輪)
4. emanation wheel [at the navel] (S. nirmāṇacakra; T. lte ba sprul pa’i ’khor lo; C. huanhualun/qilun 幻化輪/臍輪)
5. bliss protecting wheel [at the perineum] (S. sukhapālacakra; T. bde skyong gi ’khor lo; C. hulelun 護樂輪)

five wisdoms/knowledges. (S. pañcajñāna; T. ye shes lnga; C. wuzhi 五智)

1. wisdom of the dharmadhātu (S. dharmadhātujñāna; T. chos dbyings kyi ye shes; C. fajie tixing zhi 法界體性智)
2. mirror-like wisdom/great perfect mirror wisdom (ādarśajñāna/mahādarśajñāna; T. me long gi ye shes; C. da yuanjing zhi 大圓境智)
3. wisdom of equality/knowledge of impartiality (S. samatājñāna; T. mnyam nyid kyi ye shes; C. pingdeng xing zhi 平等性智)
4. wisdom of specific knowledge (S. pratyavekṣaṇājñāna; T. so sor rtog pa’i ye shes; C. miao guancha zhi 妙觀察智)
5. wisdom of having accomplished what was to be done (S. kṛtyānuṣṭhānajñāna; T. bya ba grub pa’i ye shes; C. cheng suozuo zhi 成所作智)

SIXES

six aspects [of all phenomena in Huayan]. (C. liuxiang 六相)

1. generic/universal aspect (C. zongxiang 總相)
2. constituent/particular aspect (C. biexiang 別相)
3. identity/similarity aspect (C. tongxiang 同相)
4. differentiated aspect (C. yixiang 異相)
5. integrated/collective aspect (C. chengxiang 成相)
6. disintegration/instantiated aspect (C. huaixiang 壞相)

six causes. (S. ṣaḍhetu; T. rgyu drug; C. liu yin 六因)

1. efficient cause (S. kāraṇahetu; T. byed pa’i rgyu; C. nengzuo yin 能作因)
2. coexistent cause (S. sahabhūhetu; T. lhan cig ’byung ba’i rgyu; C. juyou yin 俱有因)
3. conjoined cause (S. saṃprayuktahetu; T. mtshungs ldan gyi rgyu; C. xiangying yin 相應因)
4. homogeneous cause (S. sabhāgahetu; T. skal mnyam gyi rgyu; C. tonglei yin 同類因)
5. all-pervasive cause (S. sarvatragahetu; T. kun gro’i rgyu; C. bianxing yin 遍行因)
6. retributive cause (S. vipākahetu; T. rnam smin gyi rgyu; C. yishu yin 異熟因)

six consciousnesses. (S. vijñāna; T. rnam par shes pa; C. shi 識)

1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam shes; C. yanshi 眼識)
2. auditory consciousness (S. śrotravijñāna; T. rna ba’i rnam shes; C. ershi 耳識)
3. olfactory consciousness (S. ghrāṇavijñāna; T. sna’i rnam shes; C. bishi 鼻識)
4. gustatory consciousness (S. jihvāvijñāna; T. lce’i rnam shes; C. sheshi 舌識)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi rnam shes; C. shenshi 身識)
6. mental consciousness (S. manovijñāna; T. yid kyi rnam shes; C. yishi 意識)

six destinies. [of rebirth] (S. gati; T. ’gro ba; C. dao/qu 道/趣)

1. divinities (S. deva; T. lha; C. tian 天)
2. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
3. humans (S. manuṣya; T. mi; C. ren 人)
4. animals (S. tiryak; T. dud ’gro; C. chusheng 畜生)
5. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)
6. hell denizens (S. nāraka; T. dmyal ba; C. diyu 地獄)

six doctrines of Nāropa. (S. Nādapādadharma; T. Nā ro chos drug)

1. inner heat (S. caṇdaliyoga; T. gtum mo)
2. illusory body (S. māyākāyayoga; T. sgyu lus)
3. dreams (S. svapanayoga; T. rmi lam)
4. clear light (S. prabhāsvarayoga; T. ’od gsal)
5. intermediate state (S. antarābhavayoga; T. bar do)
6. transference (S. saṃkrāntiyoga; T. ’pho ba)

six elements. (S. dhātu; T. khams; C. da/jie 大/界)

1. earth/solidity (S. pṛthivī; T. sa; C. di 地)
2. water/cohesion (S. āpas; T. chu; C. shui 水)
3. fire/warmth (S. tejas; T. me; C. huo 火)
4. wind/mobility (S. vāyu; T. rlung; C. feng 風)
5. space (S. ākāśa; T. nam mkha’; C. kong 空)
6. consciousness (S. vijñāna; T. rnam shes; C. shi 識)

six heavens of the sensuous realm. (S. kāmadhātu-deva; T. ’dod pa’i khams kyi lha; C. Yujie tian 欲界天)

1. four great kings (S. cāturmahārājika; T. rgyal chen rigs bzhi; C. siwang tian 四王天)
2. divinities of the thirty-three (S. trāyastriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian 忉利天/三十三天)
3. free from conflict (S. yāma; T. ’thab bral; C. yemo tian 夜摩天)
4. contented (S. tuṣita; T. dga’ ldan; C. doushuai[tuo] tian 兜率[陀]天)
5. enjoyment of creation (S. nirmāṇarati; T. ’phrul dga’; C. huale tian 化樂天)

6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian 他化自在天)

six intermediate states. (S. antarābhava; T. bar do)

1. intermediate state of the present lifetime (S. jatyantarābhava; T. skye gnas rang bzhin gyi bar do)
2. intermediate state of absorption (S. samādhyantarābhava; T. bsam gtan gyi bar do)
3. intermediate state of dreams (S. svapanāntarābhava; T. rmi lam gyi bar do)
4. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. 'chi kha'i bar do)
5. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos nyid bar do)
6. intermediate state of existence (S. bhavāntarābhava; T. srid pa bar do)

six-limbed yoga [of the *Kālacakratantra*]. (S. ṣaḍaṅgayoga; T. sbyor drug)

1. retraction (T. sor sdud)
2. concentration (T. bsam gtan)
3. breath control (T. srog 'dzin)
4. retention of the complete deity (T. sku ril bur 'dzin pa)
5. recollection (T. rjes su dran pa)
6. contemplation (T. ting nge 'dzin)

six non-Buddhist teachers. (S. tīrthika-śāstṛ; T. mu stegs can gyi ston pa; C. waidaoshi 外道師)

1. Pūraṇa-Kāśyapa (T. 'Od srung rdzogs byed; C. Fulanna jiashe 富蘭那迦葉)
2. Maskarin Gośālīputra (T. Kun tu rgyu gnag lhas kyi bu; C. Moqieli jusheli/Moqieli jushelizi 末伽梨拘舍梨/末伽梨拘賒梨子)
3. Ajita Keśakambala (T. Mi pham sgra'i la ba can; C. Aqiduo chishe qinpoluo 阿耆多翅舍欽婆羅)
4. Kakuda Kātyāyana (T. Ka tya'i bu nog can; C. Jialuo jiutuo jiazhanyan 迦羅鳩馱迦旃延)
5. Nirgrantha-Jñātīputra (T. Gcer bu pa gnyen gyi bu; C. Nijiantuo Ruotizi 尼乾陀若提子/尼揵陀若提子)
6. Sañjaya Vairāṭīputra (T. Smra 'dod kyi bu mo'i bu yang dag rgyal ba can; C. Shanduye pilyu zhizi 珊闍耶毗羅胝子)

six ornaments of the world. (T. 'dzam gling rgyan drug)

1. Nāgārjuna (T. Klu sgrub)
2. Āryadeva (T. 'Phags pa lha)
3. Asaṅga (T. Thogs med)
4. Vasubandhu (T. Dbyig gnyen)
5. Dignāga (T. Phyogs glang)
6. Dharmakīrti (T. Chos kyi grags pa)

six perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/boluomi 度/波羅蜜)

1. giving/generosity (S. dāna, T. sbyin pa; C. bushi/tan 布施/檀)
2. morality (S. śīla; T. tshul khrims; C. chijie/shiluo 持戒/尸羅)
3. patience/forbearance (S. kṣānti; T. bzod pa; C. renru/chanti 忍辱/羼提)
4. effort/vigor (S. vīrya; T. brtson 'grus; C. jingjin/piliye 精進/毗梨耶)
5. meditative absorption (S. dhyāna; T. bsam gtan; C. jinglü/chan 靜慮/禪)
6. wisdom (S. prajñā; T. shes rab; C. zhihui/bore 智慧/般若)

six recollections. (S. anusmṛti; T. rjes su dran pa; C. nian 念)

1. recollection of the buddha (S. buddhānusmṛti; T. sangs rgyas rjes su dran pa; C. nianfo 念佛)
2. recollection of the dharma (S. dharmānusmṛti; T. chos rjes su dran pa; C. nianfa 念法)
3. recollection of the saṃgha (S. saṃghānusmṛti; T. dge 'dun rjes su dran pa; C. nianseng 念僧)
4. recollection of morality (S. śīlānusmṛti; T. tshul khrims rjes su dran pa; C. nianjie 念戒)
5. recollection of charity (S. tyāgānusmṛti; T. gtong ba rjes su dran pa; C. nianshi 念施)
6. recollection of the divinities (S. devatānusmṛti; T. lha rjes su dran pa; C. niantian 念天)

six sense faculties/sense bases. (S. indrya; T. dbang po; C. gen 根)

1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
6. mental faculty (S. manendriya; T. yid kyi dbang po; C. yigen 意根)

six superknowledges/supramundane powers. (S. abhijñā; T. mngon par shes pa; C. shentong 神通)

1. psychic powers (S. ṛddhividhi; T. rdzu 'phrul gyi bya ba shes pa'i mngon shes; C. shenjing/shenzu [zhizheng] tong 神境/神足[智證]通)
2. "the divine eye"/clairvoyance (S. divyacakṣus; T. lha'i mig gi mngon shes; C. tianyan [zhizheng] tong 天眼[智證]通)

3. “the divine ear”/clairaudience (S. divyaśrotra; T. lha’i rna ba’i mngon shes; C. tian’er [zhizheng] tong 天耳[智證]通)
4. knowledge of other’s minds (S. paracittājñāna; T. pha rol gyi sems shes pa’i mngon shes; C. taxin [zhizheng] tong 他心[智證]通)
5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gyi gnas rje su dran pa’i mngon shes; C. suzhu suinian zhizheng tong/suming [zhizheng] tong 宿住隨念[智證]通/宿命[智證]通)
6. knowledge of the extinction of the contaminants (S. āsravakṣayajñāna; T. zag pa zad pa’i mngon shes; C. loujin [zhizheng] tong 漏盡[智證]通)

six tantras. (T. rgyud sde drug; C. dateluo 怛特羅)

1. kriyātantra (T. bya rgyud)
2. caryātantra (T. spyod rgyud)
3. yogatantra (T. rnal ’byor rgyud)
4. mahāyogatantra (T. rnal ’byor chen po’i rgyud)
5. anuyogatantra (T. rje su rnal ’byor rgyud)
6. atiyogatantra (T. shin tu rnal ’byor rgyud)

SEVENS

seven-branch service. (S. saptāṅgavidhi; T. yan lag bdun pa; C. qizhi zuofa 七支作法)

1. obeisance (S. vandanā; T. phyag ’tshal ba; C. lijing zhufo 禮敬諸佛)
2. offerings (S. pūjana; T. mchod pa phul ba; C. guangxiu gongyang 廣修供養)
3. confession of transgressions (S. pāpadeśanā; T. sdig pa bshags pa; C. chanhui yezhang 懺悔業障)
4. admiration/joy (S. anumodana; T. rjes su yi rang ba; C. suixi gongde 隨喜功德)
5. request [to turn the wheel of dharma] (S. saṃcodana; T. bskul ba; C. qing zhuan falun 請轉法輪)
6. request [to remain in the world] (S. prārthanā; T. gsol ba; C. qingfo zhushi 請佛住世)
7. dedication of merit (S. pariṇāmanā; T. bsngo ba; C. pujie huixiang 普皆廻向)

seven buddhas [of the past]. (S. saptatathāgata; T. sangs rgyas rabs bdun; C. qifo 七佛)

1. Vipaśyin (T. Rnam gzigs; C. Piposhi[fo] 毘婆尸[佛])
2. Śikhin (T. Gtsug gtor can; C. Shiqi[fo] 尸棄[佛])
3. Viśvabhū (T. Kun skyobs; C. Pishepo[fo] 毘舍婆[佛])
4. Krakucchanda (T. Log pa dang sel; C. Juliusun[fo] 拘留孫[佛])
5. Kanakamuni (T. Gser thub; C. Junahanmouni[fo] 拘那含牟尼[佛])
6. Kāśyapa (T. ’Od srung; C. Jiashe[fo] 迦葉[佛]
7. Śākyamuni (T. Shākya thub pa; C. Shijiamouni 釋迦牟尼)

seven factors of enlightenment/limbs of awakening. (S. bodhyaṅga; T. byang chub yan lag; C. juezhi/putifen 覺支/菩提分)

1. mindfulness (S. smṛti; T. dran pa; C. nian 念)
2. investigation of states (S. dharmapravicaya; T. chos rab tu rnam par ’byed pa; C. zefa 擇法)
3. perseverance/energy (S. vīrya; T. brtson ’grus; C. jingjin 精進)
4. rapture/bliss (S. prīti; T. dga’ ba; C. xi 喜)
5. tranquility (S. praśrabdhi; T. shin yu sbyangs pa; C. qingan 輕安)
6. concentration (T. samādhi; T. ting nge ’dzin; C. ding 定)
7. equanimity (S. upekṣā; T. btang snyoms; C. she 捨)

seven jewels [of a cakravartin]. (S. ratna; T. rin chen; C. [lunwang]bao [輪王]寶)

1. wheel [chariot] (S. cakraratna; T. ’khor lo rin po che; C. lunbao 輪寶)
2. precious jewel (S. maṇiratna; T. nor bu rin po che; C. [moni]zhubao [末尼]珠寶)
3. queen (S. strīratna; T. btsun mo rin po che; C. nübao 女寶)
4. minister (S. pariṇāyakaratna; T. blon po rin po che; C. jushi bao/zhuzang bao 居士寶/主藏寶)
5. elephant (S. hastiratna; T. glang po rin po che; C. xiangbao 象寶)
6. general (S. senāpatiratna; T. dmag dpon rin po che; C. zhubingchen bao/jiangjun bao 主兵臣寶/將軍寶)
7. horse (S. aśvaratna; T. rta mchog rin po che; C. mabao 馬寶)

seven men who were tested. (T. sad mi mi bdun)
The first monks ordained in Tibet:

1. Sba khri gzigs, ordained as Śrīghoṣa (Dpal dbyangs)
2. Sba gsal snang, ordained as Jñānendra (Ye shes dbang po)
3. Sba khri bzher/bzhir
4. Ba gor Vairocana, or Vairocanarakṣita
5. Rma rin chen mchog
6. Rgyal ba mchog dbyangs
7. ’Khon Klu’i dbang po srung ba, or Nāgendrarakṣita

seven-point posture of Vairocana. (T. Rnam snang gi chos bdun)

1. legs in the vajra posture (T. rkang ba skyil krung)
2. hands in the positions of equipoise (T. lag pa mnyam bzhag)
3. spine straight (T. sgal tshigs drang por bsrang ba)
4. neck slightly bent (T. mgrin cung zad gug pa)
5. shoulders spread like the wings of a vulture (T. dpung ba rgod gshog ltar brkyangs pa)
6. gaze resting at the tip of the nose (T. mig sna rtser phabs pa)
7. tongue touching the palate (T. lce ya rkan la sbyar ba)

seven riches/prizes. (S. saptadhana; T. 'phags pa'i nor bdun; C. qi cai 七財)

1. faith/confidence (S. śraddhā; T. dad pa; C. xin 信)
2. vigor/effort (S. vīrya; T. brtson 'grus; C. jingjin 精進)
3. morality (S. śīla; T. tshul khrims; C. jie 戒)
4. shame and fear of blame/decency and modesty (S. hrī-apatrāpya; T. ngo tsha shes pa khrel yod pa; C. cankui 慚愧)
5. learning (S. śruta; T. thos pa; C. wen 聞)
6. relinquishment/renunciation (S. prahāṇa/tyāga; T. spang ba/gtong ba; C. duan/shi 斷/施)
7. wisdom (S. prajñā; T. shes rab; C. hui 慧)

EIGHTS

eight classes of non-human beings. (S. aṣṭasenā; T. lha srin sde brgyad/mi ma yin; C. tianlong babu 天龍八部)

1. divinities (S. deva; T. lha; C. tian 天)
2. serpents (S. nāga; T. klu; C. long 龍)
3. demons (S. yakṣa; T. gnod sbyin; C. yecha 夜叉)
4. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
5. divine musicians (S. gandharva; T. dri za; C. gantapo 乾闥婆)
6. mythical birds (S. garuḍa; T. khyung, mkha' lding; C. jialouluo 迦樓羅
7. half-horse, half-human beings (S. kiṃnara; T. mi 'am ci; C. jinnaluo 緊那羅)
8. great snakes (S. mahorāga; T. lto 'phye chen po; C. mohouluojia 摩睺羅迦)

eight close sons. See EIGHT GREAT BODHISATTVAS.

eight common accomplishments. (S. sādhāraṇasiddhi; T. thun mong gi dngos grub; C. gongtong chenjiu 共同成就)

1. medicinal pills (S. gulikā; T. ril bu; C. miaodan 妙丹)
2. eye medicine (S. añjana; T. mig sman; C. yanyao 眼藥)
3. swift-footedness (S. jaṅghākara; T. rkang mgyogs; C. tuzu 塗足)
4. going beneath the earth (S. pātāla; T. sa 'og; C. tuxing 土行)
5. enchanted sword (S. khaḍga; T. ral gri; C. baojian 寶劍)
6. traveling through the sky (S. khecara; T. rnam mkha' phur ba; C. kongxing 空行)
7. invisibility (S. antardhāna; T. mi snang ba; C. yinxing 隱形)
8. immortality (S. amṛta; T. 'chi med; C. busi 不死)

eight consciousnesses. (S. vijñāna; T. rnam shes; C. shi 識)

1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam shes; C. yanshi 眼識)
2. auditory consciousness (S. śrotravijñāna; T. rna ba'i rnam shes; C. ershi 耳識)
3. olfactory consciousness (S. ghrāṇavijñāna; T. sna'i rnam shes; C. bishi 鼻識)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i rnam shes; C. sheshi 舌識)
5. tactile consciousness (S. kāyavijñāna; T. lus kyi rnam shes; C. shenshi 身識)
6. mental consciousness (S. manovijñāna; T. yid kyi rnam shes; C. yishi 意識)
7. afflicted mental consciousness (S. kliṣṭamanas; T. nyon yid; C. mona shi 末那識)
8. storehouse consciousness (S. ālayavijñāna; T. kun gzhi'i rnam shes; C. alaiye shi 阿賴耶識)

eight episodes in the life of a buddha. (S. aṣṭabuddhakārya, T. sangs rgyas kyi mdzad pa brgyad; C. baxiang 八相)

1. descending from tuṣita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi 兜率降世)
2. entry into the womb (T. lhums su zhugs pa; C. rutai 入胎)
3. birth (T. sku bltams pa; C. chutai 出胎)
4. renouncing the world (T. rab tu byung ba; C. chujia 出家)
5. subjugating Māra (T. bdud btul ba; C. xiangmo 降魔)
6. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao 成道)
7. turning the wheel of the dharma (dharmacakrapravartana) (T. chos kyi 'khor lo bskor ba; C. zhuan falun 轉法輪)
8. passing into parinirvāṇa (T. mya ngan las 'das pa; C. ru niepan 入涅槃)

eightfold noble path. (S. āryāṣṭāṅgamārga; T. lam yan lag brgyad; C. bazhengdao/bashengdao 八正道/八聖道)

1. right views (S. samyagdṛṣṭi; T. yang dag pa'i lta ba; C. zhengjian 正見)
2. right intention (S. samyaksaṃkalpa; T. yang dag pa'i rtog pa; C. zhengzhi/zhengsiwei 正志/正思維)
3. right speech (S. samyagvāk; T. yang dag pa'i ngag; C. zhengyu 正語)
4. right action (S. samyakkarmānta; T. yang dag pa'i las kyi mtha'; C. zhengye 正業)
5. right livelihood (S. samyagājīva; T. yang dag pa'i 'tsho ba; C. zhengming 正命)
6. right effort (S. samyagvyāyāma; T. yang dag pa'i rtsol ba; C. zhengqin/zheng jingjin 正勤/正精進)
7. right mindfulness (S. samyaksmṛti; T. yang dag pa'i dran pa; C. zhengnian 正念)
8. right concentration (S. samyaksamādhi; T. yang dag pa'i ting nge 'dzin; C. zhengding 正定)

eight great bodhisattvas. (S. mahā-upaputra; T. nye sras; C. bada suifo dizi/bada fozi 八大隨佛弟子/八大佛子)

1. Mañjuśrī (T. 'Jam dpal; C. Wenshu pusa 文殊菩薩)
2. Vajrapāṇi (T. Phyag na rdo rje; C. Jingan shou pusa 金剛手菩薩)

3. Avalokiteśvara (T. Spyan ras gzigs dbang phyug; C. Guanyin pusa 觀音菩薩)
4. Kṣitigarbha (T. Sa'i snying po; C. Dizang pusa 地藏菩薩)
5. Sarvanīvaraṇaviṣkambhin (T. Sgrib pa thams cad rnam par sel ba; C. Chu gaizhang pusa 除蓋障菩薩)
6. Ākāśagarbha (T. Nam mkha'i snying po; C. Xukongzang pusa 虛空藏菩薩)
7. Maitreya (T. Byams pa; C. Mile pusa 彌勒菩薩)
8. Samantabhadra (T. Kun tu bzang po; C. Puxian pusa 普賢菩薩)

eight great chariots of the practice lineage. (T. sgrub brgyud shing rta chen po brgyad)

1. ancient translation tradition (T. sna' 'gyur rnying ma)
2. tradition of precepts and instructions (T. bka' gdams)
3. tradition of the path and result (T. lam 'bras)
4. tradition of the transmitted precepts of Marpa (T. Mar pa bka' brgyud)
5. tradition of the transmitted precepts of the Shang Valley (T. Shangs pa bka' brgyud)
6. traditions of pacification and severence (T. zhi byed gcod)
7. tradition of vajrayoga (T. rdo rje'i rnal 'byor)
8. propitiation and attainment of the three adamantine states (T. rdo rje gsum gyi bsnyen sgrub)

eight great charnel grounds. (S. mahāśmaśāna, śmaśāna; T. dur khrod chen po; C. da shilin/ da hanlin 大尸林/大寒林)

1. most fierce (S. caṇḍogrā; T. gtum drag; C. baonue hanlin 暴虐寒林)
2. dense thicket (S. gahvara; T. tshang tshing 'khrigs pa; C. micong hanlin 密叢寒林)
3. blazing vajra (S. vajrajvala; T. rdo rje bar pa; C. jingangyan hanlin 金剛焰寒林)
4. endowed with skeletons (S. karaṅkin; T. keng rus can; C. gusuo hanlin 骨鎖寒林)
5. cool grove (S. śītavana; T. bsil bu tshal; C. hanlin 寒林)
6. black darkness (S. ghorāndhakāra; T. mun pa nag po; C. youan hanlin 幽暗寒林)
7. resonant with "kilikili" (S. kilikilārava; T. ki li ki lir sgra sgrog pa; C. jiujiu hanlin 啾啾寒林)
8. cries of "ha ha" (S. aṭṭahāsa; T. ha ha rgod pa; C. kuangxiao hanlin 狂笑寒林)

eight great fears. (S. mahābhaya; T. 'jigs pa chen po; C. nan 難)

1. lions (S. siṃha; T. seng ge; C. shi nan 獅難)
2. elephants (S. hastināga; T. glang po che; C. xiang nan 象難)
3. fire (S. agni; T. me; C. huo nan 火難)
4. snakes (S. sarpa; T. sbrul ; C. duchong nan 毒蟲難)
5. thieves (S. taskara; T. rkun po; C. zei nan 賊難)
6. violent waters (S. jalārṇava; T. chu bo; C. shui nan 水難)
7. imprisonment (S. nigaḍa; T. lcags sgrog; C. lao[yu] nan 牢[獄]難)
8. demons (S. piśāca; T. sha za; C. feiren nan/mo nan 非人難/魔難)

eight liberations. (S. vimokṣa; T. rnam thar ; C. jietuo/beishe 解脫/背捨)

1. embodied, one sees forms [of the realm of subtle materiality] (S. rūpī rūpāṇi paśyati; T. gzugs can gzugs rnams la lta ba'i rnam thar; C. neiyou sexiang guan zhuse 內有色想觀諸色)
2. without perceiving inward form [viz., one's own physical body], one sees outward forms [of the realm of subtle materiality] (S. adhyātmarūpasamjñī bahirdhā rūpāṇi paśyati; T. nang gzugs med par 'du shes las phyi rol gyi gzugs rnams la lta ba'i rnam thar; C. nei wusexiang guan waise 內無色想觀外色)
3. one develops determination by contemplating the beautiful/one becomes resolved on what is lovely (S. śubham ity evādhimukto bhavati; T. sdug pa'i rnam thar; C. jing jietuo shenzuozheng juzu zhu 淨解脫身作證具足住)
4. the sphere of infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched kyi rnam thar; C. ru wubiankong kong wubianchu juzu zhu/kong wubianchu juzu zhu 入無邊空空無邊處具足住/空無邊處具足住)
5. the sphere of infinite consciousness (S. vijñānāntyāyatana; T. rnam shes mtha' yas skye mched kyi rnam thar; C. ru wubian shi shiwubian chu juzu zhu/shi wubianchu juzu zhu 入無邊識識無邊處具足住/識無邊處具足住)
6. the sphere of nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched kyi rnam thar; C. ru wusuoyou wu suoyouchu juzu zhu/wusuoyouchu juzu zhu 入無所有無所有處具足住/無所有處具足住)
7. the sphere of neither perception nor nonperception (S. naivasaṃjñānāsaṃjñāyatana; T. 'du shes med 'du shes med min skye mched kyi rnam thar; C. ru feixiang feifeixiangchu juzu zhu/feixiang feifeixiangchu juzu zhu 入非想非非想處具足住/非想非非想處具足住)
8. the cessation of perception and sensation (S. samjñāvedayitanirodha; T. 'du shes dang tshor ba 'gog pa'i rnam thar; C. ru shouxiangmie shenzuozheng juzu zhu/miexiangshouding juzu zhu 入受想滅身作證具足住/滅想受定具足住)

eight manifestations of the Guru [Rin po che]. (T. guru mtshan brgyad)

1. Padmākara
2. Padmasambhava
3. Blo ldan mchog sred
4. Shākya Seng ge
5. Seng ge sgra grogs
6. Padma rgyal po
7. Rdo rje gro lod
8. Nyi ma 'od zer

eight noble persons. (S. aṣṭāryapudgala; T. ’phags pa’i gang zag brgyad; C. baxiansheng 八賢聖)

1. candidate for the fruit of stream-enterer (S. srotaāpannaphalapratipannaka; T. rgyun du zhugs pa’i ’bras bu la zhugs pa; C. yuliu xiang 預流向)
2. recipient of the fruit of stream-enterer (S. srotaāpannaphalastha; T. rgyun du zhugs pa’i ’bras bu la gnas pa; C. zheng yuliu guo 證預流果)
3. candidate for the fruit of once-returner (S. sakṛdāgāmiphalapratipannaka; T. phyir ’ong gi ’bras bu la zhugs pa; C. yilai xiang 一來向)
4. recipient of the fruit of once-returner (S. sakṛdāgāmiphalastha; T. phyir ’ong gi ’bras bu la gnas pa; C. zheng yilai guo 證一來果)
5. candidate for the fruit of non-returner (S. anāgāmiphalapratipannaka; T. phyir mi ’ong gi ’bras bu la zhugs pa; C. buhuan xiang 不還向)
6. recipient of the fruit of non-returner (S. anāgāmiphalastha; T. phyir mi ’ong gi ’bras bu la gnas pa; C. zheng buhuan guo 證不還果)
7. candidate for worthy one (S. arhatphalapratipannaka; T. dgra bcom pa’i ’bras bu la zhugs pa; C. aluohan xiang 阿羅漢向)
8. worthy one (S. arhat; T. dgra bcom pa; C. zheng aluohan guo 證阿羅漢果)

eight opportune births. (S. kṣaṇa; T. dal ba; C. yuanli banan/yuanli ba wuxia 遠離八難/遠離八無暇)

Freedom from rebirth:

1. as a denizen of the hells (S. nāraka; T. dmyal ba; C. zai diyu nan 在地獄難)
2. as a ghost (S. preta; T. yi dwags; C. zai egui nan 在餓鬼難)
3. as an animal (S. tiryak; T. dud ’gro; C. zai chusheng nan 在畜生難)
4. as a long-lived divinity (S. dīrghāyurdeva; T. lha tshe ring bo; C. zai changshou tian nan 在長壽天難)
5. in a border region (S. pratyantajanapada; mtha’ ’khob kyi mi; C. zai biandi zhi yudanyue nan 在邊地之鬱單越難)
6. with impaired sense faculties (S. indriyavaikalya; T. dbang po ma tshang ba; C. manglong yinya nan 盲聾瘖瘂難)
7. holding erroneous views (S. mithyādarśana; T. log par lta ba; C. shizhi congbian nan 世智聰辯難)
8. in a land where a tathāgata has not appeared (S. tathāgatānutpāda; T. de bzhin gshegs pa ma byung ba; C. shengzai foqian fohou nan 生在佛前佛後難)

eight precepts. [of the laity on upoṣadha days] (S. aṣṭāṅgasamanvāgatam upavāsam/poṣadhaśīla; T. bsnyen gnas yan lag brgyad; C. baguan zhai jie/ba zhaijie/ba guan zhai/ba jiezhai 八關齋戒/八齋戒/八關齋/八戒齋)

1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. li shasheng 離殺生)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. li buyu qu 離不與取)
3. not to engage to sexual activity (S. abrahmacarya-virati; T. mi tshangs par spyod pa spong pa; C. li feifanxing 離非梵行)
4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. li xukuangyu 離虛誑語)
5. not to use intoxicants (S. madyapāna-virati; T. myos par ’gyur ba’i btung ba spong pa; C. li yin zhujiu 離飲諸酒)
6. not to eat at improper times [viz. after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa’i kha zas spong pa; C. li feishi shi 離非時食)
7. not to use perfumes, garlands, or cosmetics and not to sing, dance, play music, or attend entertainments (S. gandhamālyavilepanavarṇakadhāraṇa-virati [nṛtyagīta-virati]; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa [glu gar spong pa]; C. li tushi xingman[li gewu guanting] 離塗飾香鬘[離歌舞觀聽])
8. not to sleep on high and luxurious beds (S. uccaśayana-mahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. li yanzuo gaoguang yanli chuangzuo 離眠坐高廣嚴麗牀座)

eight similes of illusion. (S. aṣṭamāyopamā; T. sgyu ma’i dpe brgyad; C. ruhuan yu 如幻喻)

Dharmas lack inherent nature (svabhāva), because they are like a:

1. dream (S. svapna; T. rmi lam; C. meng 夢)
2. illusion (S. māyā; T. sgyu ma; C. huanjing 幻景)
3. optical illusion (S. pratibhāsa; T. mig yor; C. guangying 光影)
4. mirage (S. marīci; T. smig rgyu; C. yangyan 陽燄)
5. reflection of the moon in water (S. udakacandra; T. chu zla; C. shui zhong yue 水中月)
6. echo (S. pratiśabda; T. brag cha; C. yuxiang 谷響)
7. city of the gandharvas (S. gandharvanagara; T. dri za’i grong khyer; C. xunxiang cheng/gantapo cheng 尋香城/乾闥婆城)
8. phantom (S. nirmita; T. sprul pa; C. huashen 化身)

eight stūpas. (S. stūpa; T. mchod rten; C. dalingta 大靈塔)

1. heap of lotuses stūpa (T. pad spungs mchod rten), commemorating the Buddha’s birth at Lumbinī
2. enlightenment stūpa (T. byang chub mchod rten) at Bodhgayā
3. many auspicious doors stūpa (bkra shis sgo mang mchod rten), commemorating the first turning of the wheel of the dharma at Ṛṣipatana/Sārnāth

4. display of miracles stūpa (T. cho ’phrul mchod rten), commemorating the Buddha’s display of the paired miracles at Śrāvastī
5. divine descent stūpa (T. lha babs mchod rten), commemorating the Buddha’s descent from the trāyastriṃśa heaven at Saṃkāśya.
6. settling of disputes stūpa (T. dbyen bsdums mchod rten), commemorating the Buddha’s healing of the schism caused by Devadatta
7. victory stūpa (T. rnam rgyal mchod rten), commemorating the Buddha’s extension of his life by three months at the Cāpālacaitya
8. nirvāṇa stūpa (T. myang ’das mchod rten), commemorating the Buddha’s passage into parinirvāṇa at Kuśinagarī.

eight sufferings. (S. aṣṭaduḥkha; T. sdug bsngal rgyad; C. baku 八苦)

1. birth (S. jāti; T. skye ba; C. shengku 生苦)
2. aging (S. jarā; T. rga ba; C. laoku 老苦)
3. sickness (S. vyādhi; T. na ba; C. bingku 病苦)
4. death (S. maraṇa; T. ’chi ba; C. siku 死苦)
5. separation from what is dear (S. priyaviprayoga; T. sdug pa dang bral ba; C. ai bieli ku 愛別離苦)
6. encountering what is not dear (S. apriyasaṃprayoga; T. mi sdug pa dang phrad pa; C. yuanzeng hui ku 怨憎會苦)
7. not finding what one seeks (S. yad apīcchayā paryeṣamāṇo na labhate; T. ’dod pa btshal gyang ma rnyed pa; C. qiu bude ku 求不得苦)
8. the five aggregates that are objects of clinging (S. pañcopādānaskandha; T. nye bar len pa’i phung po; C. wu quyun ku 五取蘊苦)

eight vidyādharas. (T. rig ’dzin brgyad)

1. Vimalamitra
2. Hūṃkara
3. Mañjuśrīmitra
4. Nāgārjuna
5. Padmasambhava
6. Dhanasaṃskṛta
7. Rambuguhya-Devacandra
8. Śāntigarbha

eight worldly concerns. (S. lokadharma; T. ’jig rten chos; C. [shi]feng [世]風)

1. gain (S. lābha; T. rnyed pa; C. li 利)
2. loss (S. alābha; T. ma rnyed pa; C. shuai 衰)
3. pleasure (S. sukha; T. bde ba; C. le 樂)
4. pain (S. duḥkha; T. sdug bsnyal; C. ku 苦)
5. fame (S. yaśas; T. snyan grags; C. yu 譽)
6. disgrace (S. ayaśas; T. ma grags pa; C. hui 毀)
7. praise (S. praśaṃsā; T. bstod pa; C. cheng 稱)
8. blame (S. nindā; T. smad pa; C. ji 譏)

NINES

nine attainments of successive stations of equipoise. (S. anupūrvavihārasamāpatti; T. mthar gyis gnas pa’i snyoms par ’jug pa; C. ru jiujing chan/cidi ding 入究竟禪/次第定)

(1–4) the four absorptions of the realm of subtle materiality (S. dhyāna/rūpāvacaradhyāna; T. bsam gtan bzhi; C. sichan/ding 四禪/定)
(5–8) the four absorptions of the immaterial realm (S. ārūpyāvacaradhyāna; T. gzhugs med bzhi; C. si wuse ding 四無色定)
(9) attainment of the cessation of perception and sensation/equipoise of cessation (S. saṃjñāvedayitanirodha/alt. nirodhasamāpatti; T. ’gog pa’i snyoms par ’jug pa; C. xiangshou mie[jin] ding/ shouxiang mie[jin] ding 想受滅[盡]定/受想滅[盡]定)

nine categories of scripture. (BHS. navāṅga[pravacana]; T. gsung rab yan lag dgu; C. jiu bu jing 九部經)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang 契經/長行)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong 應頌)
3. prophetic teachings (S. vyākaraṇa; T. lung bstan; C. jibie/shouji 記別/授記)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi 諷頌/孤起)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 自說)
6. framing stories (S. nidāna/itivṛttaka; T. gleng gzhi; C. yinyuan 因緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fangguang 方廣)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bensheng 本生)
9. marvelous events (S. adbhutadharma; T. rmad du byung ba; C. xifa 希法)

nine foulness contemplations/nine contemplations on the impure. (S. aśubhabhāvanā/aśubhasaṃjñā; T. mi sdug pa’i ’du shes; C. bujing guan/bujing xiang 不淨觀/不淨想)

Contemplation of:

1. a swollen corpse [bloating and tumefaction] (S. vyādhmātakasaṃjñā; T. rnam par bam pa’i ’du shes; C. zhangxiang 脹想)
2. a worm-eaten, rotting corpse (S. vipadumakasaṃjñā; T. rnam par ’bus gzhig pa’i ’dus shes; C. huaixiang 壞想)
3. a festering corpse [discharging pus] (S. vipūyakasaṃjñā; T. rnam par rnags pa’i ’dus shes ; C. nonglan xiang 膿爛想)
4. a bloody corpse (S. vilohitakasaṃjñā; T. rnam par dmar ba’i ’du shes; C. xietu xiang 血塗想)

5. a blueish corpse [mottled discoloration] (S. vinīlakasaṃjñā; T. rnam par bsngos pa'i 'du shes; C. qingyu xiang 青瘀想)
6. a corpse being devoured by worms and maggots (S. vikhāditakasaṃjñā; T. rnam par zos ba'i 'du shes; C. danxiang 噉想)
7. a scattered corpse [dissolution of flesh and exposure of bones and sinews] (S. vikṣiptakasaṃjñā; T. rnam par mthor ba'i 'du shes; C. sanxiang 散想)
8. a burned corpse [cremated remains] (S. vidagdhakasaṃjñā; T. rnam par tshig pa'i 'du shes; C. shaoxiang 燒想)
9. a skeleton (S. asthisaṃjñā; T. rus gong gi 'du shes; C. guxiang 骨想)

nine similes [for the presence of the tathāgatagarbha]. (S. navodāharaṇāni; T. dpe dgu; C. jiu yu 九喻)

The tathāgatagarbha is present:

1. like a statue of the buddha in a soiled lotus (S. buddhaḥ kupadme; T. sangs rgyas pad ngan; C. weihua zhong zhufo 萎華中諸佛)
2. like honey in beehives (S. madhu makṣikāsu; T. sbrang rtsi sbrang ma la; C. zhongfeng zhong meimi 衆蜂中美蜜)
3. like kernels in husks (S. tuṣeṣu sārāṇi; T. sbun pa snying po; C. pi deng zhong shi 皮等中實)
4. like gold in filth (S. aśucau suvarṇam; T. mi gtsang nang na gser; C. fenhui zhong zhenjin 糞穢中真金)
5. like treasure under the ground (S. nidhiḥ kṣitau; T. sa la gter; C. di zhong zhenbao zang 地中珍寶藏)
6. like the stages beginning with the sprout in a tiny seed (S. alpaphale 'ṅkurādi; T. myug sogs 'bras chung; C. zhu guozi zhong ya 諸果子中芽)
7. like a conqueror's body in sodden clothes (S. praklinnavastreṣu jinātmabhāvaḥ; T. gos hrul nang na rgyal ba'i sku; C. xiugu bihuai yi changuo zhenjin xiang 朽故弊壞衣纏裹真金像)
8. like royalty in the womb of a common woman (S. jaghanyanārījaṭhare nṛpatvaṃ; T. bud med ngan ma'i lto na mi bdag; C. pinjian choulou nü huai zhuanlun shengwang 貧賤醜陋女懷轉輪聖王)
9. like a precious image buried in the mud (S. mṛtsu ca ratnabimbam; T. sa la rin chen gzugs; C. jiaohei nimo zhong youshang miaobao xiang 焦黑泥模中有上妙寶像)

nine vehicles. (S. yāna; T. theg pa dgu)

1. śrāvakayāna (T. nyan thos kyi theg pa)
2. pratyekabuddhayāna (T. rang rgyal gyi theg pa)
3. bodhisattvayāna (T. byang sems kyi theg pa)
4. kriyātantra (T. bya rgyud kyi theg pa)
5. caryātantra (T. spyod pa'i rgyud kyi theg pa)
6. yogatantra (T. rnal 'byor gyi rgyud kyi theg pa)
7. mahāyogatantra (T. rnal 'byor chen po'i rgyud kyi theg pa)
8. anuyogatantra (T. rjes su rnal 'byor gyi rgyud kyi theg pa)
9. atiyogatantra (T. shin tu rnal 'byor gyi rgyud kyi theg pa)

TENS

ten dharma activities. (S. dharmacarya; T. chos spyod; C. faxing 法行)

1. writing (S. lekhana; T. yi ge 'bri pa; C. shuxie 書寫)
2. worship (S. pūjā; T. mchod pa; C. gongyang 供養)
3. charity (S. dāna; T. sbyin pa; C. shita 施他)
4. listening/learning (S. śravaṇa; T. nyan ba; C. tingwen 聽聞)
5. reading (S. vācana; T. klog pa; C. pidu 披讀)
6. comprehending (S. udgrahaṇa; T. 'dzin pa; C. shouchi 受持)
7. instructing (S. prakāśana; T. rab tu ston pa; C. kaiyan 開演)
8. reciting (S. svādhyāya; T. kha 'don byed pa; C. fengsong 諷誦)
9. contemplation (S. cintana; T. sems pa; C. siwei 思惟)
10. meditation (S. bhāvanā; T. sgom pa; C. xiuxi 修習)

ten directions. (S. daśadiś; T. phyogs bcu; C. shifang 十方)

1. east (S. pūrvā; T. shar; C. dong 東)
2. southeast (S. pūrvadakṣiṇā; T. shar lho; C. dongnan 東南)
3. south (S. dakṣiṇā; T. lho; C. nan 南)
4. southwest (S. dakṣiṇapaścimā; T. lho nub; C. xinan 西南)
5. west (S. paścimaḥ; T. nub; C. xi 西)
6. northwest (S. paścimōttarā; T. nub byang; C. xibei 西北)
7. north (S. uttaraḥ; T. byang; C. bei 北)
8. northeast (S. uttarapūrvā; T. byang shar; C. dongbei 東北)
9. zenith (S. ūrdhvam; T. bla ma; C. shang 上)
10. nadir (S. adhaḥ; T. 'og; C. xia 下)

ten endowments. (T. 'byor ba bcu)

One has taken rebirth:

1. as a human (T. mi)
2. in a central land (T. yul dbus)
3. with complete sense faculties (T. dbang po tshang ba)
4. not engaging in mistaken actions (T. las kyi mtha' ma log pa)
5. having faith (T. gnas la dad pa)

and when:

1. a buddha has appeared in the world (T. sangs rgyas 'jig rten du byon pa)
2. he has taught the dharma (T. des dam pa'i chos ston pa)
3. his teaching remains (T. bstan pa gnas pa)

4. it has followers (T. de'i rjes su 'jug pa)
5. they kindly act on behalf of others (T. gzhan phyir snying brtse ba)

ten fetters. (S. saṃyojana; T. kun tu sbyor ba; C. jie 結)

1. view of a perduring self (S. satkāyadṛṣṭi; T. 'jig lta; C. shenjian 身見)
2. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims brtul zhugs mchog 'dzin; C. jiejin qu 戒禁取)
3. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
4. craving for sensual gratification (S. kāmacchanda; T. 'dod pa'i 'dun pa; C. tanyu 貪欲)
5. malice (S. vyāpāda; T. zhe sdang; C. chenhui 瞋恚)
6. craving for the realm of subtle materiality (S. rūparāga; T. gzugs kyi sred pa; C. seai 色愛)
7. craving for the immaterial realm (S. ārūpyarāga; T. gzugs med pa na spyod pa'i sred pa; C. wuseai 無色愛)
8. conceit (S. māna; T. nga rgyal; C. man 慢)
9. delusion (S. moha; gti mug; C. wuming 無明)
10. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉舉)

ten fundamental afflictions. (S. mūlakleśa; T. rtsa nyon; C. shi/huo/genben fannao 使/惑/根本煩惱)

1. sensuality/greed (S. rāga; T. 'dod chags; C. tan 貪)
2. anger (S. pratigha; T. khong khro; C. chen 瞋)
3. conceit (S. māna; T. nga rgyal; C. man 慢)
4. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
6. view of a perduring self (S. satkāyadṛṣṭi; T. 'jig lta; C. shenjian 身見)
7. extreme views (S. antagrāhadṛṣṭi; T. mthar lta; C. bianjian 邊見)
8. attachment to one's own point of view (S. dṛṣṭiparāmarśa; T. lta ba mchog 'dzin; C. jianqu jian 見取見)
9. wrong views (S. mithyādṛṣṭi; T. log lta; C. xiejian 邪見)

ten masteries. (S. vaśitā; T. dbang; C. zizai 自在)

1. lifespan (S. āyuḥ; T. tshe; C. ming zizai 命自在)
2. actions (S. karman; T. las; C. ye zizai 業自在)
3. necessities of life (S. pariṣkāra; T. yo byad; C. cai zizai 財自在)
4. determination (S. adhimukti; T. mos pa; C. shengjie zizai 勝解自在)
5. aspiration (S. praṇidhāna; T. smon lam; C. yuan zizai 願自在)
6. psychic powers (S. ṛddhi; T. rdzu 'phrul; C. shentong zizai 神通自在)
7. birth (S. upapatti; T. skye ba; C. sheng zizai 生自在)
8. phenomena/teachings (S. dharma; T. chos; C. fa zizai 法自在)
9. mind (S. citta; T. sems; C. xin zizai 心自在)
10. wisdom (S. jñāna; T. ye shes; C. zhi zizai 智自在)

ten meanings [of unimpeded interpenetration in the Huayan school]. (C. Huayan shiyi 華嚴十義)

1. teachings and their meanings/significance (C. jiaoyi 教義)
2. principle and phenomena (C. lishi 理事)
3. understanding and implementation (C. jiexing 解行)
4. causes and fruitions (C. yinguo 因果)
5. the "persons" who expound the dharma and the "dharma" they expound (C. renfa 人法)
6. the "distinction" and "unity" between discrete things (C. fenqi jingwei 分齊境位)
7. the "teacher," his "disciple," the "dharma" that is imparted, and the "wisdom" that the disciple develops (C. shidi fazhi 師弟法智)
8. the "dominant" and "subordinate," "primary" and "secondary" relations that pertain between things (C. zhuban yizheng 主伴依正)
9. the enlightened sages who "respond" to the spiritual maturity of their audiences and the audiences whose spiritual maturity "solicited" the appearance of the enlightened sages in the world (C. suishenggen yushixian 遂生根欲示現)
10. "autonomy" with regard to spiritual "obstacles" and their "antidotes," the "essence" of phenomena and their "functions" (C. nishun tiyong zizai 逆順體用自在).

ten perfections. (S. pāramitā; T. pha rol tu phyin pa; C. du/boluomi 度/波羅蜜)

1. perfection of generosity/giving (S. dānapāramitā; T. sbyin pa'i pha rol tu phyin pa; C. [bu]shi [布]施)
2. perfection of morality (S. śīlapāramitā; T. tshul khrims kyi pha rol tu phyin pa; C. [chi]jie [持]戒)
3. perfection of patience/forbearance (S. kṣāntipāramitā; T. bzod pa'i pha rol tu phyin pa; C. ren[ru] 忍[辱])
4. perfection of effort/vigor (S. vīryapāramitā; T. brtson 'grus kyi pha rol tu phyin pa; C. jinjing 精進)
5. perfection of meditative absorption (S. dhyānapāramitā; T. bsam gtan gyi pha rol tu phyin pa; C. chan[ding] 禪[定])
6. perfection of wisdom (S. prajñāpāramitā; T. shes rab kyi pha rol tu phyin pa; C. bore 般若)
7. perfection of skillful means (S. upāyapāramitā; T. thabs kyi pha rol tu phyin pa; C. fangbian 方便)
8. perfection of aspiration (S. praṇidhānapāramitā; T. smon lam gyi pha rol tu phyin pa; C. yuan 願)
9. perfection of powers (S. balapāramitā; T. stobs kyi pha rol tu phyin pa; C. li 力)
10. perfection of knowledge (S. jñānapāramitā; T. ye shes kyi pha rol tu phyin pa; C. zhi 智)

ten powers of a bodhisattva. (S. bala; T. byang chub sems dpa'i stobs; C. pusa li 菩薩力)

1. power of reflection (S. āśayabala; T. bsam pa'i stobs; C. shenxin li/zhixin li 深心力/直心力)

2. power of superior aspiration (S. adhyāśayabala; T. lhag bsam pa'i stobs; C. zengshang shenxin li 增上深心力)
3. power of application (S. prayogabala; T. sbyor ba'i stobs; C. fangbian li 方便力)
4. power of wisdom (S. prajñābala/jñānabala; T. shes rab/ye shes stobs; C. zhi[hui] li 智[慧]力)
5. power of their vow (S. praṇidhānabala; T. smon lam gyi stobs; C. yuanli 願力)
6. power of vehicle (S. yānabala; T. theg pa'i stobs; C. shengli 乘力)
7. power of conduct (S. caryābala; T. spyod pa'i stobs; C. xingli 行力)
8. power of transformation (S. vikurvaṇabala; T. rnam par 'phrul pa'i stobs; C. shenbian li/youxi shentong li 神變力/遊戲神通力)
9. power of enlightenment (S. bodhibala; T. byang chub kyi stobs; C. puti li 菩提力)
10. power of turning the wheel of the dharma (S. dharmacakrapravartanabala; T. chos kyi 'khor lo bskor ba'i stobs; C. zhuan falun li 轉法輪力)

ten powers of a tathāgata. (S. tathāgatabala; T. de bzhin gshegs pa'i stobs; C. rulai li 如來力)

1. power of knowing the positive and negative contingencies of things (S. sthānāsthānajñānabala; T. gnas dang gnas ma yin pa mkhyen pa'i stobs; C. chu feichu zhili 處非處智力)
2. power of knowing the maturation of deeds (S. karmavipākajñānabala; T. las kyi rnam smin mkhyen pa'i stobs; C. ye yishou zhili 業異熟智力)
3. power of knowing diverse aspirations (S. nānādhimuktijñānabala; T. mos pa sna tshogs mkhyen pa'i stobs; C. zhongzhong shengjie zhili 種種勝解智力)
4. power of knowing diverse dispositions (S. nānādhātujñānabala; T. khams sna tshogs mkhyen pa'i stobs; C. zhongzhong jie zhili 種種界智力)
5. power of knowing those who are of superior acumen and those who are not (S. indriyaparāparajñānabala; T. dbang po mchog dang mchog ma yin pa mkhyen pa'i stobs; C. gen shangxia zhili 根上下智力)
6. power of knowing the paths going everywhere (S. sarvatragāmanīpratipajjñāna; T. thams cad du 'gro ba'i lam mkhyen pa'i stobs; C. bianquxing zhili 遍趣行智力)
7. power of knowing absorption, liberation, concentration, trance, affliction, purification, and acquisition (S. sarvadhyānavimokṣasamādhisamāpattisaṃkleśavyavadānavyutthānajñānabala; T. bsam gtan dang rnam thar dang ting nge 'dzin dang snyoms par 'jug pa dang kun nas nyon mongs pa dang rnam par byang ba dang ldan pa thams cad mkhyen pa'i stobs; C. jinglü jietuo dengchi dengzhi zhili 靜慮解脫等持等至智力)
8. power of recollecting past lives (S. pūrvanivāsānusmṛtijñānabala; T. sngon gyi gnas rjes su dran pa mkhyen pa'i stobs; C. suzhu suinian zhili/suming zhili 宿住隨念智力/宿命智力)
9. power of knowing death and rebirth (S. cyutyupattijñānabala; T. 'chi 'pho bo dang skye ba mkhyen pa'i stobs; C. sisheng zhili 死生智力)
10. power of knowing the cessation of the contaminants (S. āsravakṣayajñānabala; T. zag pa zad pa mkhyen pa'i stobs; C. loujin zhili 漏盡智力)

ten precepts. [of novices] (*daśaśīla/śrāmaṇerasaṃvara; T. dge tshul gyi sdom pa; C. [shami] shijie [沙彌]十戒)

1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng jie 不殺生戒)
2. not to steal (S. adattādāna-virati; T. ma byin par len pa spong ba; C. bu toudao jie 不偸盜戒)
3. not to engage in sexual activity (S. kāmamithyācāra-virati/abrahmacarya-virati; T. 'dod pas log par g.yem pa spong ba/mi tshangs par spyod pa spong pa; C. bu xieyin jie/li fei fanxing jie 不邪婬戒/離非梵行戒)
4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangyu jie 不妄語戒)
5. not to use intoxicants (S. madyapāna-virati; T. myos par 'gyur ba'i btung ba spong pa; C. bu yinjiu jie 不飲酒戒)
6. not to eat at improper times [after twelve noon] (S. vikālabhojana-virati; T. dus ma yin pa'i kha zas spong pa; C. bu feishi shi jie 不非時食戒)
7. not to use perfumes, garlands, or cosmetics (S. gandhamālyavilepanavarṇakadhāraṇa-virati; T. spos dang kha dog dang byug pa dang phreng ba thogs pa spong pa; C. bu tushi xiangman jie 不塗飾香鬘戒)
8. not to sing, dance, play music, or attend entertainments (S. nṛtyagīta-virati; T. glu gar spong pa; C. bu gewu guanting jie 不歌舞觀聽戒)
9. not to sleep on high and luxurious beds (S. uccaśayana-mahāśayana-virati; T. khri stan mthon po dang khri stan chen po spong pa; C. bu zuo gaoguang dachuang jie 不坐高廣大牀戒)
10. not to handle gold and silver/money (S. jātarūparajata-pratigrahaṇa-virati; T. gser dang dngul la reg pa spong pa; C. bu xu jinyinbao jie 不蓄金銀寶戒)

ten realms of reality [dharmadhātu]. (C. shi fajie 十法界)

1. divinities (S. deva; T. lha; C. tian 天)
2. demigods (S. asura; T. lha ma yin; C. axiuluo 阿修羅)
3. humans (S. manuṣya; T. mi; C. ren 人)
4. animals (S. tiryak; T. dud 'gro; C. chusheng 畜生)
5. ghosts (S. preta; T. yi dwags; C. egui 餓鬼)

6. hell denizens (S. nāraka; T. dmyal ba; diyu 地獄)
7. disciples (S. śrāvaka; T. nyan thos; C. shengwen 聲聞)
8. solitary buddhas (S. pratyekabuddha; T. rang rgyal; C. yuanjue 緣覺)
9. bodhisattvas (T. byang chub sems dpa'; C. pusa 菩薩)
10. buddhas (T. sang rgyas; C. fo 佛)

ten recollections. (S. anusmṛti; T. rjes su dran pa; C. nian/suinian 念/隨念)

1. the Buddha (T. sangs rgyas rjes su dran pa; C. nianfo/fo suinian 念佛/佛隨念)
2. the dharma (T. chos rjes su dran pa; C. nianfa/fa suinian 念法/法隨念)
3. the saṃgha (T. dge 'dun rjes su dran pa; C. nianseng/seng suinian 念僧/僧隨念)
4. morality (S. śīla; T. tshul khrims rjes su dran pa; C. nianjie/jie suinian 念戒/戒隨念)
5. renunciation/generosity (S. tyāga; T. gtong ba rjes su dran pa; C. nianshi/shi suinian 念施/施隨念)
6. the divinities (S. devatā; T. lha rjes su dran pa; C. niantian/tian suinian 念天/天隨念)
7. breathing (S. ānāpāna; T. dbugs phyi nang du rgyu ba rjes su dran pa; C. nian anban/ruchuxi suinian 念安般/入出息隨念)
8. disgust (S. udvega; T. skyo ba rjes su dran pa; C. yan sui nian 厭隨念)
9. death (S. maraṇa; T. 'chi ba rjes su dran pa; C. niansi/si suinian 念死/死隨念)
10. what concerns the body (S. kāyagatā; T. lus kyi rnam pa rjes su dran pa; C. nianshen/shen suinian 念身/身隨念)

ten stages [of the bodhisattva path]. (S. daśabhūmi; T. sa bcu; C. shidi 十地)

1. joyful (S. pramuditā; T. rab tu dga' ba; C. jixidi/huanxi di 極喜地/歡喜地)
2. immaculate/stainless (S. vimalā; T. dri ma med pa; C. ligou di/wugou di 離垢地/無垢地)
3. luminous (S. prabhākarī; T. 'od byed pa; C. faguang di 發光地)
4. radiant (S. arciṣmatī; T. 'od 'phro ba; C. yanhui di 焰慧地)
5. invincible (S. sudurjayā; T. sbyang dka' ba; C. [ji] nansheng di [極]難勝地)
6. immediacy/coming face-to-face (S. abhimukhī; T. mngon du byed pa; C. xianqian di 現前地)
7. far-reaching/transcendent (S. dūraṅgamā; T. ring du song ba; C. yuanxing di 遠行地)
8. immovable/steadfast (S. acalā; T. mi g.yo ba; C. budong di 不動地)
9. eminence/auspicious intellect (S. sādhumatī; T. legs pa'i blo gros; C. shanhui di 善慧地)
10. cloud of dharma (S. dharmameghā; T. chos kyi sprin pa; C. fayun di 法雲地)

ten unwholesome courses of action. (S. akuśala-karmapatha; T. mi dge ba; C. e yedao 惡業道)

1. killing (prāṇātipāta; T. srog bcod pa; C. sha[sheng] 殺[生])
2. stealing (S. adattādāna; T. ma byin par len pa; C. [tou] dao [偷]盜)
3. sexual misconduct (kāmamithyācāra; T. 'dod pas log par g.yem pa; C. xieyin 邪淫)
4. lying (S. mṛṣāvāda; T. rdzun du smra ba; C. wangyu 妄語)
5. malicious speech (paiśunyavāda; T. phra ma; C. liangshe 兩舌)
6. verbal abuse (pārūṣyavāda; T. tshig rtsub; C. ekou 惡口)
7. frivolous prattle/idle gossip (saṃbhinnapralāpa; T. ngag 'khyal ba; C. qiyu 綺語)
8. covetousness (S. abhidhyā; T. brnab sems; C. tan[yu]/qiantan 貪[欲]/慳貪)
9. malice/ill-will (S. vyāpāda; T. gnod sems; C. chen[hui] 瞋恚)
10. wrong views (S. mithyādṛṣṭi; T. log lta; C. xiejian/yuchi 邪見/愚痴)

ten visualization devices. (S. *kṛtsnāyatana; P. kasiṇa; T. zad par gyi skye mched; C. bianchu 遍處)

1. earth (S. pṛthivī; T. sa; C. di 地)
2. water (S. āpas; T. chu; C. shui 水)
3. fire (S. tejas; T. me; C. huo 火)
4. wind (S. vāyu; T. rlung; C. feng 風)
5. empty-space (S. ākāśa; T. nam mkha'; C. kong 空)
6. blue (S. nīla; T. sngon po; C. qing 青)
7. yellow (S. pīta; T. ser po; C. huang 黃)
8. red (S. lohita; T. dmar po; C. chi 赤)
9. white (S. avadāta; T. dkar po; C. bai 白)
10. light (S. āloka/tejas; T. 'od/me; C. guangming/huo 光明/火)/[alt.] consciousness (S. vijñāna; T. rnam shes; C. shi 識)

ten wholesome courses of action. (S. kuśala-karmapatha; T. dge ba bcu; C. shanyedao 善業道) Abstention from the TEN UNWHOLESOME COURSES OF ACTION (s.v.).

ELEVENS

eleven cognitions. (S. jñāna; T. shes pa; C. zhi 智)

1. of suffering (S. duḥkhajñāna; T. sdug bsngal shes pa; C. kuzhi 苦智)
2. of origination (S. samudayajñāna; T. kun 'byung ba shes pa; C. jizhi 集智)
3. of cessation (S. nirodhajñāna; T. 'gog pa shes pa; C. miezhi 滅智)
4. of the path (S. mārgajñāna; T. lam shes pa; C. daozhi 道智)
5. of extinction (S. kṣayajñāna; T. zad pa shes pa; C. jinzhi 盡智)

6. of nonproduction (S. anutpādajñāna; T. mi skye ba shes pa; C. wusheng zhi 無生智)
7. of factors (S. dharmajñāna; T. chos shes pa; C. fazhi 法智)
8. of subsequent cognition (S. anvayajñāna; T. rjes su rtogs par shes pa; C. leizhi 類智)
9. of worldly conventions (S. saṃvṛtijñāna; T. kun rdzob shes pa; C. shisu zhi 世俗智)
10. of others' minds (S. paracittajñāna; T. gzhan gyi sems shes pa; C. taxin zhi 他心智)
11. of things-as-they-are (S. yathābhūtajñāna; T. yang dag pa ji lta ba bzhin du yongs su shes pa; C. rushi zhi 如實智)

TWELVES

twelve ascetic practices. (S. dhūtaguṇa; P. dhutaṅga; T. sbyangs pa'i yon tan; C. shi'er toutuo xing 十二頭陀行)

1. wears rag clothing from dust-heaps (S. pāṃśukūlika; T. phyag dar khrod pa; C. zhuo fensao yi/zhuo bina yi 著糞掃衣/著弊納衣)
2. possesses only three robes (S. traicīvarika; T. chos gos gsum pa; C. dan sanyi 但三衣)
3. does not eat after midday (S. khalupaścādbhaktika; T. zas phyis mi len pa; C. zhonghou bude yinjiang 中後不得飲漿)
4. eats only alms (S. paiṇḍapātika; T. bsod snyoms pa; C. cidi qishi 次第乞食)
5. eats one meal in a single sitting (S. aikāsanika; T. stan gcig pa; C. shou yishi fa 受一食法)
6. restricts the amount of food consumed (S. nāmantika; T. 'phyings pa pa; C. jieliang shi 節量食)
7. dwells in isolation in the forest (S. āraṇyaka; T. dgon pa ba; C. alanruo chu zhu 阿蘭若處住)
8. dwells at the foot of a tree (S. vṛkṣamūlika; T. shing drung pa; C. shuxia zhi 樹下止)
9. dwells in open, unsheltered places (S. ābhyavakāśika; T. bla gab med pa; C. ludi zuo 露地坐)
10. dwells in charnel grounds (S. śmāśānika; T. dur khrod pa; C. zhongjian zhu 塚間住)
11. never lies down to sleep (S. naiṣyadika; T. cog bu pa; C. changzuo buwo 長坐不臥)
12. does not omit any house on the almsround (S. yathāsaṃstarika; T. gzhi ji bzhin pa; C. changxing qishi 常行乞食)

twelve categories of scripture. (S. dvādaśāṅga[pravacana]; T. gsung rab yan lag bcu gnyis; C. shi'erbu jing/shi'erfen jiao 十二部經/十二分教)

1. discourses (S. sūtra; T. mdo; C. qijing/changhang 契經/長行)
2. aphorisms in mixed prose and verse (S. geya; T. dbyangs bsnyad; C. yingsong 應頌)
3. prophecies (S. vyākaraṇa; T. lung bstan; C. jibie/shouji 記別/授記)
4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi 諷頌/孤起)
5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo 自說)
6. framing stories (S. nidāna; T. gleng gzhi; C. yinyuan 因緣)
7. expanded teachings (S. vaipulya; T. shin tu rgyas pa; C. fangguang 方廣)
8. tales of previous lives (S. jātaka; T. skyes rabs; C. bensheng 本生)
9. marvelous events (S. adbhutadharma; T. rmad du byung; C. xifa 希法)
10. narratives (S. avadāna; T. rtogs pa brjod pa; C. piyu 譬喻)
11. fables (S. itivṛttaka; T. de lta bu byung ba; C. benshi 本事)
12. instructions (S. upadeśa; T. gtan phab; C. lunyi 論議)

twelve deeds of a buddha. (S. dvādaśabuddhakārya; T. sangs rgyas kyi mdzad pa bcu gnyis; C. shi'er xiang chengdao 十二相成道)

1. descent from tuṣita heaven (T. dga' ldan gyi gnas nas 'pho ba; C. doushuai jiangshi 兜率降世)
2. entry into the womb (T. lhums su zhugs pa; C. rutai 入胎)
3. taking birth (T. sku bltams pa; C. chutai 出胎)
4. proficiency in the arts (T. bzo yi gnas la mkhas pa; C. shanxian jiyi 善嫻技藝)
5. enjoyment of consorts (T. btsun mo'i 'khor dgyes rol ba; C. shouyong feijuan 受用妃眷)
6. renouncing the world (T. rab tu byung ba; C. chujia 出家)
7. practicing asceticism (T. dka' ba spyad pa; C. xiu kuxing 修苦行)
8. going to the bodhimaṇḍa (T. byang chub snying por gshegs pa; C. qu jingang zuo 趨金剛座)
9. subjugating Māra (T. bdud btul ba; C. xiangmo 降魔)
10. attaining enlightenment (T. mngon par rdzogs par sangs rgyas pa; C. chengdao 成道)
11. turning the wheel of the dharma (S. dharmacakrapravartana; T. chos kyi 'khor lo bskor ba; C. zhuan falun 轉法輪)
12. passing into parinirvāṇa (T. mya ngan las 'das pa; C. ru niepan 入涅槃)

twelvefold chain of dependent origination. (S. pratītyasamutpāda; T. rten cing 'brel bar 'byung ba; C. yuanqi 緣起)

1. ignorance (S. avidyā; T. ma rig pa; C. wuming 無明)
2. predispositions/habituations (S. saṃskāra; T. 'du byed; C. xing 行)
3. consciousness (S. vijñāna; T. rnam shes; C. shi 識)

4. name and form/mentality and materiality (S. nāmarūpa; T. ming gzugs; C. mingse 名色)
5. six sense-bases (S. ṣaḍāyatana; T. skye mched drug; C. liuru 六入)
6. sensory contact (S. sparśa; T. reg pa; C. chu 觸)
7. sensations (S. vedanā; T. tshor ba; C. shou 受)
8. craving/thirst (S. tṛṣṇā; T. sred pa; C. ai 愛)
9. clinging (S upādāna; T. len pa; C. qu 取)
10. existence/process of becoming (S. bhava; T. srid pa; C. you 有)
11. [re]birth (S. jāti; T. skye ba; C. sheng 生)
12. old age and death (S. jarāmaraṇa; T. rga shi; C. laosi 老死)

twelve sense-fields/bases of cognition. (S. āyatana; T. skye mched; C. ru/chu/ruchu 入/處/入處)

1. the sense-field of the visual sense-base (S. cakṣurāyatana; T. mig gi skye mched; C. yan 眼)
2. the sense-field of visual objects (S. rūpāyatana; T. gzugs kyi skye mched; C. se 色)
3. the sense-field of the auditory sense-base (S. śrotrāyatana; T. rna ba'i skye mched; C. er 耳)
4. the sense-field of auditory objects (S. śabdāyatana; T. sgra'i skye mched; C. sheng 聲)
5. the sense-field of the olfactory sense-base (S. ghrāṇāyatana; T. sna'i skye mched; C. bi 鼻)
6. the sense-field of olfactory objects (S. gandhāyatana; T. dri'i skye mched; C. xiang 香)
7. the sense-field of the gustatory sense-base (S. jihvāyatana; T. lce'i skye mched; C. she 舌)
8. the sense-field of gustatory objects (S. rasāyatana; T. ro'i skye mched; C. wei 味)
9. the sense-field of the tactile sense-base (S. kāyāyatana; T. lus kyi skye mched; C. shen 身)
10. the sense-field of tactile objects (S. spraṣṭavyāyatana; T. reg bya'i skye mched; C. chu 觸)
11. the sense-field of the mental sense-base (S. manāyatana; T. yid kyi skye mched; C. yi 意)
12. the sense-field of mental objects (S. dharmāyatana; T. chos kyi skye mched; C. fa 法)

FOURTEENS

fourteen indeterminates/unanswerable questions. (S. avyākṛta; T. lung du ma bstan pa'i chos; C. wuji 無記)

1. Is the world eternal? (S. śāśvato lokaḥ; T. 'jig rten rtag pa; C. shi chang 世常)
2. Is the world not eternal? (S. aśāśvato lokaḥ; T. 'jig rten mi rtag pa; C. shi wuchang 世無常)
3. Is the world both eternal and not eternal? (S. śāśvataś cāśāsvataś ca; T. 'jig rten rtag kyang rtag la mi rtag kyang mi rtag pa; C. shi yi chang yi wuchang 世亦常亦無常)
4. Is the world neither eternal nor not eternal? (S. naiva śāśvato nāśāśvataś ca; T. 'jig rten rtag pa yang ma yin mi tag pa yang ma yin; C. shi feichang feiwuchang 世非常非無常)
5. Is the world endless (viz. infinite)? (S. antavānlokaḥ; T. 'jig rten mtha' yod pa; C. shi youbian 世有邊)
6. Is the world not endless (viz. finite)? (S. anantavānlokaḥ; T. 'jig rten mtha' yod pa ma yin; C. shi wubian 世無邊)
7. Is the world both endless and not endless? (S. antavāṃś cānantavānlokaś ca; T. 'jig rten mtha' yod kyang yod la mtha' med kyang med; C. shi yi youbian yi wubian 世亦有邊亦無邊)
8. Is the world neither endless nor not endless? (S. naivāntavān nānantavāṃś ca; T. 'jig rten mtha' yod pa yang ma yin med pa yang ma yin; C. shi feiyoubian feiwubian 世非有邊非無邊)
9. Does the tathāgata exist after death? (S. bhavati tathāgataḥ paraṃ maranāt; T. de bzhin gshegs pa zhi nas yod; C. rulai sihou weiyou 如來死後爲有)
10. Does the tathāgata not exist after death? (S. na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas med; C. rulai sihou feiyou 如來死後非有)
11. Does the tathāgata both exist and not-exist after death? (S. bhavati ca na bhavati ca tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas yod kyang yod la med kyang med; C. rulai sihou yi you yi feiyou 如來死後亦有亦非有)
12. Does the tathāgata neither exist nor not-exist after death? (S. naiva bhavati na na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas yod pa yang ma yin med pa yang ma yin; C. rulai sihou feiyou fei feiyou 如來死後非有非非有)
13. Are the life-force and the body identical? (S. sa jīvas tac charīram; T. srog de lus yin; C. mingzhe jishen 命者即身)
14. Are the life-force and the body different? (S. anyo jīvo 'nyac charīram; T. srog kyang gzhan la lus kyang gzhan; C. mingzhe yishen 命者異身)

fourteen root violations of the tantric commitments.

1. contradicting one's guru
2. contradicting or denigrating the teachings of the Buddha or one's guru
3. quarreling with others on the same path
4. violating the bodhisattva vows (in action, word, or thought)
5. violating the sacred drops in the heart cakra through illicit sexual activity
6. denigrating the teachings and paths of other systems
7. revealing secrets to non-initiates or those not ready to receive them
8. viewing the five aggregates that compose the psychophysical continuum as impure
9. doubting one's entrance into the path

10. having the ability to perceive the mental continuum of others and recognizing that someone will commit great harm to others, but not taking action
11. holding either of the extreme views of eternalism or annihilationism
12. refusing to teach someone who asks for teachings and is qualified to receive those teachings
13. superficial or dualistic clinging to appearances of pure/impure; good/bad, etc.
14. verbally or mentally denigrating women

SIXTEENS

sixteen arhats. (S. ṣoḍaśasthavira; T. gnas brtan bcu drug; C. shiliu luohan 十六羅漢)

According to the East Asian tradition:

1. Piṇḍola Bhāradvāja (T. Bha ra dhwa dza bsod snyoms len; C. Bintoulu Baluoduo 賓頭盧跋羅墮)
2. Kanakavatsa (T. Gser gyi be'u; C. Jianuojiafacuo 迦諾迦伐蹉)
3. Kanaka Bhāradvāja (T. Bha ra dhwa dza gser can; C. Jianuojiabaliduoshe 迦諾迦跋釐墮闍)
4. Subinda [alt. Suvinda]/Abheda (T. Mi phyed pa; C. Supintuo 蘇頻陀)
5. Bakkula [alt. Nakula/Vakula] (T. Ba ku la; C. Bojuluo 薄拘羅)
6. Bhadra (T. Bzang po; C. Batuoluo 跋陀羅)
7. Kālika [alt. Karīka] (T. Dus ldan; C. Jialijia 迦里迦)
8. Vajraputra (T. Rdo rje mo'i bu; C. Fasheluofuduoluo 伐闍羅弗多羅)
9. Jīvaka (T. 'Tsho byed; C. Qipo/Shubojia 耆婆/戍博迦)
10. Panthaka [alt. Mahāpanthaka] (T. Lam chen bstan; C. Bantuojia 半託迦)
11. Rāhula (T. Sgra gcan 'dzin; C. Luohouluo 羅睺羅)
12. Nāgasena (T. Klu sde; C. Naqiexina 那伽犀那)
13. Aṅgaja (T. Yan lag 'byung; C. Yinjietuo 因揭陀)
14. Vanavāsin (T. Nags na gnas; C. Fanaposi 伐那婆斯)
15. Ajita (T. Ma pham pa; C. Ayiduo 阿逸多)
16. Cūḍapanthaka [alt. Cūḷapantha] (T. Lam phran bstan; C. Zhutubantuojia 注荼半托迦)

sixteen aspects of the four noble truths. (S. ākāra; T. bden bzhi'i rnam pa; C. xingxiang 行相)

1. impermanence (S. anitya; T. mi rtag pa; C. wuchang 無常)
2. suffering (S. duḥkha; T. sdug bsngal ba; C. ku 苦)
3. emptiness (S. śūnyatā; T. stong pa nyid; C. kong 空)
4. selflessness (S. anātmaka; T. bdag med pa; C. wuwo/feiwo 無我/非我)
5. origination (S. samudaya; T. kun 'byung ba; C. ji 集)
6. production/process (S. prabhava; T. rab tu skye ba; C. sheng 生)
7. cause (S. hetu; T. rgyu; C. yin 因)
8. conditions (S. pratyaya; T. rkyen; C. yuan 緣)
9. cessation (S. nirodha; T. 'gog pa; C. mie 滅)
10. serenity (S. śānta; T. zhi ba; C. jing 靜)
11. sublimity (S. praṇīta; T. gya nom pa; C. miao 妙)
12. deliverance (niḥsaraṇa; T. nges par 'byung ba; C. li 離)
13. path (S. mārga; T. lam; C. dao 道)
14. correctness (S. nyāya; T. rigs pa; C. ru 如)
15. achievement (S. pratipatti; T. sgrub pa; C. xing 行)
16. release (S. nairyāṇika; T. nges par 'byin pa; C. chu 出)

sixteen elders. (S. ṣoḍaśasthavira; T. gnas brtan bcu drug; C. shiliu zunzhe 十六尊者). See SIXTEEN ARHATS.

sixteen emptinesses. (S. śūnyatā; T. stong pa nyid; C. kong 空)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內空)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong 外空)
3. emptiness of both the internal and external (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內外空)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong 空空)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong 大空)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong 勝義空)
7. emptiness of the compounded (S. saṃskṛtaśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong 有爲空)
8. emptiness of the uncompounded (S. asaṃskṛtaśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong 無爲空)
9. emptiness of the infinite (S. atyantaśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong 畢竟空)
10. emptiness of the beginningless and endless (S. anavarāgraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong 無際空)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong 無散空)
12. emptiness of essential nature (S. prakṛtiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong 本性空)
13. emptiness of all dharmas (S. sarvadharmaśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefa kong 一切法空)
14. emptiness of intrinsic marks (S. lakṣaṇaśūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong 自相空)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不可得空)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuzixing zixing kong 無自性自性空)

sixteen moments of the path of vision. (S. darśanamārgakṣaṇa; T. mthong lam shes bzod skad cig ma; C. [jiandao wei] shiliu xin [見道位]十六心)

1. acquiescence to the cognition of dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānakṣāntiḥ; T. sdug bsngal chos bzod; C. kufa ren 苦法忍)
2. cognition of dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānam; T. sdug bsngal chos shes; C. kufa zhi 苦法智)
3. acquiescence to the subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe ’nvayajñānakṣāntiḥ; T. sdug bsngal rjes bzod; C. kulei ren 苦類忍)
4. subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe ’nvayajñānam; T. sdug bsngal rjes shes; C. kuleizhi 苦類智)
5. acquiescence to the cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānakṣāntiḥ; T. kun ’byung chos bzod; C. jifa ren 集法忍)
6. cognition of dharma with regard to origination in the sensuous realm (S. samudaye dharmajñānam; T. kun ’byung chos shes; C. jifa zhi 集法智)
7. acquiescence to the subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye ’nvayajñānakṣāntiḥ; T. kun ’byung rjes bzod; C. jilei ren 集類忍)
8. subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samudaye ’nvayajñānam; T. kun ’byung rjes shes; C. jilei zhi 集類智)
9. acquiescence to the cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānakṣāntiḥ; T. ’gog pa chos bzod; C. miefa ren 滅法忍)
10. cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānam; T. ’gog pa chos shes; C. miefa zhi 滅法智)
11. acquiescence to subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (S. nirodhe ’nvayajñānakṣāntiḥ; T. ’gog pa rjes bzod; C. mielei ren 滅類忍)
12. subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (nirodhe ’nvayajñānam; T. ’gog pa rjes shes; C. mielei zhi 滅類智)
13. acquiescence to the cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānakṣāntiḥ; T. lam chos bzod; C. daofa ren 道法忍)
14. cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānam; T. lam chos shes; C. daofa zhi 道法智)
15. acquiescence of subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge ’nvayajñānakṣāntiḥ; T. lam rjes bzod; C. daolei ren 道類忍)
16. subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge ’nvayajñānam; T. lam rjes shes; C. daolei zhi 道類智)

SEVENTEENS

seventeen heavens of the realm of subtle materiality. (S. rūpadhātunivāsa; T. gzugs khams gnas ris; C. sejie shiqi tian 色界十七天)

FIRST DHYĀNA:

1. Brahmā’s retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian 梵衆天)
2. Brahmā’s ministers (S. brahmapurohita; T. tshangs pa mdun na ’don; C. fanfu tian 梵輔天)
3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian 大梵天)

SECOND DHYĀNA:

1. lesser radiance (S. parīttābha; T. ’od chung; C. shaoguang tian 少光天)
2. immeasurable radiance (S. apramāṇābha; T. tshad med ’od; C. wuliangguang tian 無量光天)
3. ultimate radiance (S. ābhāsvara; T. ’od gsal; C. guangyin tian/jiguangjing tian 光音天/極光淨天)

THIRD DHYĀNA:

1. lesser purity (S. parīttaśubha; T. dge chung; C. shaojing tian 少淨天)
2. immeasurable purity (S. apramāṇaśubha; T. tshad med dge; C. wuliangjing tian 無量淨天)
3. pervasive purity (S. śubhakṛtsna; T. dge rgyas; C. bianjing tian 遍淨天)
4. cloudless (S. anabhraka; T. sprin med; C. wuyun tian 無雲天)
5. meritorious birth (S. puṇyaprasava; T. bsod nams ’phel; C. fusheng tian 福生天)
6. extensive fruition (S. bṛhatphala; T. ’bras bu che; C. guangguo tian 廣果天)

FOURTH DHYĀNA (THE FIVE PURE ABODES, ŚUDDHĀVĀSA):

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)
2. not burning/without torment (S. atapa; T. mi gdung pa; C. wure tian 無熱天)
3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)
5. highest (S. akaniṣṭha; T. ’og min; C. sejiujing tian 色究竟天)

EIGHTEENS

eighteen elements/bases of cognition. (S. dhātu; T. khams bco brgyad; C. jie 界)

1. visual sense-base (S. cakṣurdhātu; T. mig gi khams; C. yan 眼)
2. visual sense-object (S. rūpadhātu; T. gzugs kyi khams; C. se 色)

3. visual consciousness (S. cakṣurvijñānadhātu; T. mig gi rnam par shes pa'i khams; C. yanshi 眼識)
4. auditory sense-base (S. śrotradhātu; T. rna ba'i khams; C. er 耳)
5. auditory sense-object (S. śabdadhātu; T. sgra'i khams; C. sheng 聲)
6. auditory consciousness (S. śrotravijñānadhātu; T. rna ba'i rnam par shes pa'i khams; C. ershi 耳識)
7. olfactory sense-base (S. ghrāṇadhātu; T. sna'i khams; C. bi 鼻)
8. olfactory sense-object (S. gandhadhātu; T. dri'i khams; C. xiang 香)
9. olfactory consciousness (S. ghrāṇavijñānadhātu; sna'i rnam par shes pa'i khams; C. bishi 鼻識)
10. gustatory sense-base (S. jihvādhātu; T. lce'i khams; C. she 舌)
11. gustatory sense-object (S. rasadhātu; T. ro'i khams; C. wei 味)
12. gustatory consciousness (S. jihvāvijñānadhātu; T. lce'i rnam par shes pa'i khams; C. sheshi 舌識)
13. tactile sense-base (S. kāyadhātu; T. lus kyi khams; C. shen 身)
14. tactile sense-object (S. spraṣṭavyadhātu; T. reg bya'i khams; C. chu 觸)
15. tactile consciousness (S. kāyavijñānadhātu; T. lus kyi rnam par shes pa'i khams; C. shenshi 身識)
16. mental sense-base (S. manodhātu; T. yid kyi khams; C. yi 意)
17. mental sense-object (S. dharmadhātu; T. chos kyi khams; C. fa 法)
18. mental consciousness (S. manovijñānadhātu; T. yid kyi rnam par shes pa'i khams; C. yishi 意識)

eighteen emptinesses. (S. śūnyatā; T. stong pa nyid bco brgyad; C. kong 空)

1. emptiness of the internal (S. adhyātmaśūnyatā; T. nang stong pa nyid; C. nei kong 內空)
2. emptiness of the external (S. bahirdhāśūnyatā; T. phyi stong pa nyid; C. wai kong 外空)
3. emptiness of both the internal and external emptiness (S. adhyātmabahirdhāśūnyatā; T. phyi nang stong pa nyid; C. neiwai kong 內外空)
4. emptiness of emptiness (S. śūnyatāśūnyatā; T. stong pa nyid stong pa nyid; C. kongkong 空空)
5. emptiness of the great (S. mahāśūnyatā; T. chen po stong pa nyid; C. dakong 大空)
6. emptiness of the ultimate (S. paramārthaśūnyatā; T. don dam pa stong pa nyid; C. shengyi kong 勝義空)
7. emptiness of the compounded (S. saṃskṛtaśūnyatā; T. 'dus byas stong pa nyid; C. youwei kong 有爲空)
8. emptiness of the uncompounded (S. asaṃskṛtaśūnyatā; T. 'dus ma byas stong pa nyid; C. wuwei kong 無爲空)
9. emptiness of the infinite (S. atyantaśūnyatā; T. mtha' las 'das pa stong pa nyid; C. bijing kong 畢竟空)
10. emptiness of the beginningless and endless (S. anavarāgraśūnyatā; T. thog ma dang mtha' ma med pa stong pa nyid; C. wuji kong 無際空)
11. emptiness of what cannot be repudiated (S. anavakāraśūnyatā; T. dor ba med pa stong pa nyid; C. wusan kong 無散空)
12. emptiness of essential nature (S. prakṛtiśūnyatā; T. rang bzhin stong pa nyid; C. benxing kong 本性空)
13. emptiness of all dharmas (S. sarvadharmaśūnyatā; T. chos thams cad stong pa nyid; C. yiqiefa kong 一切法空)
14. emptiness of intrinsic marks (S. lakṣaṇaśūnyatā; T. mtshan nyid stong pa nyid; C. zixiang kong 自相空)
15. emptiness of the unobservable (S. anupalambhaśūnyatā; T. mi dmigs pa stong pa nyid; C. bu kede kong 不可得空)
16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūnyatā; T. dngos po med pa'i ngo bo nyid stong pa nyid; C. wuxing zixing kong 無性自性空)
17. emptiness of existence (S. bhāvaśūnyatā; T. dngos bo'i stong pa nyid; C. youxing kong 有性空)
18. emptiness of nonexistence (S. abhāvaśūnyatā; T. dngos po med pa'i stong pa nyid; C. wuxing kong 無性空)

eighteen mainstream Buddhist schools. (S. aṣṭadaśanikāya; T. sde pa bco brgyad; C. shiba bupai 十八部派)

1. Sarvāstivāda (T. Thams cad yod par smra ba; C. Shuo yiqie you bu 說一切有部)
    1. Mūlasarvāstivāda (T. Gzhi thams cad yod par smra ba'i sde; C. Genben shuo yiqie you bu 根本說一切有部)
    2. Kāśyapīya (T. 'Od srung pa'i sde; C. Yinguang bu 飲光部)
    3. Mahīśāsaka (T. Sa ston sde; C. Huadi bu 化地部)
    4. Dharmaguptaka (T. Chos srung sde; C. Fazang bu 法藏部)
    5. Bahuśrutīya (T. Mang du thos pa'i sde; C. Duowen bu 多聞部)
    6. Tāmraśāṭīya (T. Gos dmar sde; C. Tongxie bu 銅鍱部)
    7. Vibhajyavādin (T. Rnam par phye ste smra ba'i sde; C. Fenbieshuo bu 分別說部)
2. Saṃmitīya (T. Kun gyis bkur ba; C. Zhengliang bu 正量部)
    1. Kaurukullaka (T. Sar sgrog rigs kyi sde; C. Julujuluo bu/Xuandi bu 拘屡拘羅部/宣地部)
    2. Avantaka (T. Bsrung ba pa'i sde; C. Bukeqi bu 不可棄部)
    3. Vātsīputrīya (T. Gnas ma bu pa'i sde; C. Duzi bu 犢子部)
3. Mahāsāṃghika (T. Dge 'dun phal chen; C. Dazhong bu 大衆部)
    1. Pūrvaśaila (T. Shar gyi ri bo'i sde; C. Dongshanzhu bu 東山住部)
    2. Aparaśaila (T. Nub kyi ri bo'i sde; C. Xishanzhu bu 西山住部)
    3. Haimavata (T. Gang ri bo'i sde; C. Xueshan bu 雪山部)

    4. Lokottaravāda (T. 'Jig rten 'das smra'i sde; C. Shuo chushi bu 說出世部)
    5. Prajñaptivāda (T. Btags par smra ba'i sde; C. Shuojia bu 說假部)
4. *Sthaviranikāya (T. Gnas brtan sde; C. Shangzuo bu 上座部)
    1. Mahāvihāravāsa (T. Gtsug lag khang chen gnas sde; C. Dasizhu bu 大寺住部)
    2. Jetavanīya (T. Rgyal byed tshal gnas pa'i sde; C. Zhiduolin zhu bu 祇多林住部)
    3. Abhayagirivāsa (T. 'Jigs med ri gnas sde; C. Wuweishan zhu bu 無畏山住部)

eighteen sciences. (S. vidyāsthāna; T. rig gnas)

1. music (S. gandharva; T. rol mo)
2. erotic arts (S. vaiśika; T. 'khrig thabs)
3. livelihood (S. vārttā; T. 'tsho chas)
4. accounting (S. saṃkhya; T. grangs can)
5. grammar (S. śabda; T. sgra)
6. medicine (S. cikitsitā; T. gso dpyad)
7. law (S. nīti; T. chos lugs)
8. the arts (S. śilpa; T. bzo)
9. archery (S. dhanurveda; T. 'phong dpyad)
10. reasoning (S. hetu; T. gtan tshigs)
11. yoga (T. rnal 'byor)
12. learning (S. śruti; T. thos pa)
13. memorization (S. smṛti; T. dran pa)
14. astronomy (S. jyotiṣa; T. skar ma'i dpyad)
15. astrology (S. gaṇita; T. rtsis)
16. magic (S. māyā; T. mig 'phrul)
17. legend (S. purāṇa; T. sngon gyi rabs)
18. history (S. itihāsaka; T. sngon byung)

eighteen unshared factors [distinct attributes] of the buddhas. (S. āveṇikabuddhadharma; T. sangs rgyas kyi chos ma 'dres pa bco brgyad/ma 'dres pa'i chos; C. bugong[fo]fa 不共[佛]法)

1. their actions are without error (S. nāsti [tathāgatasya] skhalitam; T. 'khrul pa med pa; C. shen wushi 身無失)
2. their speech is not noisy (S. nāsti ravitam; T. ca co med pa; C. kou wushi 口無失)
3. they are never forgetful (S. nāsti muṣitasmṛtitā; T. bsnyel ba med pa; C. nian wushi 念無失)
4. their mind is never not in equipoise (S. nāsty asamāhitacittam; T. sems mnyam par ma gzhag pa med pa; C. wu yixiang 無異想)
5. their perception is free from discursiveness (S. nāsti nānātvasaṃjñā; T. tha dad pa'i 'du shes med pa; C. wu buding 無不定)
6. their equanimity is not due to a lack of discernment (S. nāsty apratisaṃkhyāyopekṣā; T. so sor ma rtogs pa'i btang snyoms med pa; C. wu buzhi she 無不知捨)
7. they do not regress in their zeal (S. nāsti cchandasya hāniḥ; T. 'dun pa nyams pa med pa; C. yu wumie 欲無滅)
8. they do not regress in their effort (S. nāsti vīryasya hāniḥ; T. brtson 'grus nyams pa med pa; C. jingjin wumie 精進無滅)
9. they do not regress in their recollection (S. nāsti smṛtihāniḥ; T. dran pa nyams pa med pa; C. nian wumie 念無滅)
10. they do not regress in their concentration (s. nāsti samādhihāniḥ; T. ting nge 'dzin nyams pa med pa; C. ding wumie 定無滅)
11. they do not regress in their wisdom (S. nāsti prajñāhāniḥ; T. shes rab nyams pa med pa; C. hui wumie 慧無滅)
12. they do not regress in their liberation (S. nāsti vimuktihāniḥ; T. rnam par grol ba nyams pa med pa; C. jietuo zhijian wumie 解脱知見無滅)
13. all their physical actions are preceded by gnosis and remain in conformity with gnosis (S. sarvakāyakarmajñānapūrvagamaṃ jñānānuparivarti; T. lus kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie shenye sui zhihui xing 一切身業隨智慧行)
14. all their verbal actions are preceded by gnosis and remain in conformity with gnosis (S. sarvavākkarmajñānapūrvagamaṃ jñānānuparivarti; T. ngag gi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie kouye sui zhihui xing 一切口業隨智慧行)
15. all their mental actions are preceeded by gnosis and remain in conformity with gnosis (S. sarvamanaḥkarmajñānapūrvagamaṃ jñānānuparivarti; T. yid kyi las thams cad ye shes kyi sngon du 'gro shing ye shes kyi rjes su 'brang ba; C. yiqie yiye sui zhihui xing 一切意業隨智慧行)
16. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the past (S. atīte 'dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. 'das pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi guoqushi wu'ai 智慧知過去世無礙)
17. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the future (S. anāgate 'dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. ma 'ongs pa'i dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi weilaishi wu'ai 智慧知未來世無礙)
18. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the present (S. pratyutpanne 'dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. da ltar gyi dus la ma chags ma thogs pa'i ye shes gzigs par 'jug pa; C. zhihui zhi xianzaishi wu'ai 智慧知現在世無礙)

TWENTIES

twenty-eight classes of divinities. (S. deva; T. lha; C. tian 天)
SENSUOUS REALM (KAMADHĀTU):

1. four great kings (S. cāturmahārājakāyika; T. rgyas chen rigs bzhi; C. siwang tian 四王天)
2. divinities of the thirty-three (S. trāyastriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian 忉利天/三十三天)
3. free from conflict (S. yāma; T. 'thab bral; C. yemo tian 夜摩天)
4. contented (S. tuṣita; T. dga' ldan; C. doushuai[tuo] tian 兜率[陀]天)
5. enjoyment of creation (S. nirmāṇarati; T. 'phrul dga'; C. huale tian 化樂天)
6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan 'phrul dbang byed; C. tahua zizai tian 他化自在天)

REALM OF SUBTLE MATERIALITY (RŪPADHĀTU):
FIRST DHYĀNA:

1. Brahmā's retainers (S. brahmakāyika; T. tshangs ris; C. fanzhong tian 梵衆天)
2. Brahmā's ministers (S. brahmapurohita; T. tshangs pa mdun na 'don; C. fanfu tian 梵輔天)
3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian 大梵天)

SECOND DHYĀNA

1. lesser radiance (S. parīttābha; T. 'od chung; C. shaoguang tian 少光天)
2. immeasurable radiance (S. apramāṇābha; T. tshad med 'od; C. wuliang guang tian 無量光天)
3. ultimate radiance (S. ābhāsvara; T. 'od gsal; C. guangyin tian/jiguangjing tian 光音天/極光淨天)

THIRD DHYĀNA

1. lesser purity (S. parīttaśubha; T. dge chung; C. shaojing tian 少淨天)
2. immeasurable purity (S. apramāṇaśubha; T. tshad med dge; C. wuliangjing tian 無量淨天)
3. pervasive purity (S. śubhakṛtsna; T. dge rgyas; C. bianjing tian 遍淨天)
4. cloudless (S. anabhraka; T. sprin med; C. wuyun tian 無雲天)
5. meritorious birth (S. puṇyaprasava; T. bsod nams 'phel; C. fusheng tian 福生天)
6. extensive fruition (S. bṛhatphala; T. 'bras bu che; C. guangguo tian 廣果天
7. nonperception (S. asaṃjñisattva; T. 'du shes med pa'i lha; C. wuxiang tian 無想天) [Note: This heaven is sometimes added to the list of seventeen heavens of the realm of subtle materiality and is included on this list for comprehensiveness.]

FOURTH DHYĀNA (THE FIVE PURE ABODES, ŚUDDHĀVĀSA)

1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian 無煩天)
2. without torment (S. atapa; T. mi gdung pa; C. wure tian 無熱天)
3. perfect form (S. sudṛśa; T. gya nom snang ba; C. shanxian tian 善現天)
4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian 善見天)
5. highest (S. akaniṣṭha; T. 'og min; C. sejiujing tian 色究竟天)

IMMATERIAL REALM (ĀRŪPYADHĀTU)

1. infinite space (S. ākāśānantyāyatana; T. nam mkha' mtha' yas skye mched; C. kong wubian chu tian 空無邊處天)
2. infinite consciousness (S. vijñānānantyāyatana; T. rnam shes mtha' yas skye mched; C. shi wubian chu tian 識無邊處天)
3. nothingness (S. ākiñcanyāyatana; T. ci yang med pa'i skye mched; C. wusuoyou chu tian 無所有處天)
4. neither perception nor nonperception (S. naivasamjñānāsamjñāyatana; T. 'du shes med 'du shes med min skye mched; C. feixiang feifeixiang tian 非想非非想天)

twenty varieties of the saṃgha. (S. viṃśatiprabhedasaṃgha; T. dge 'dun nyi shu; C. ershi sengqie/shengwen cidi, 二十僧伽/聲聞次第)

1. srotaāpanna (T. rgyun du zhugs pa; C. yuliu [guo]/xutuohuan 預流[果]/須陀洹)
2. one who takes up to seven existences (S. saptakṛdbhavaparama; T. re ltar thogs na srid pa lan bdun pa; C. jiqi fanyou 極七返有)
3. one who goes from family to family (S. kulaṃkula; T. rigs nas rigs su skye ba; C. wang tianshang/jiajia 往天上/家家)
4. once-returner (S. sakṛdāgāmin; T. lan gcig phyir 'ong ba; C. yilai/situohan 一來/斯陀含)
5. one who has a single obstacle (S. ekavīcika; T. bar chad gcig pa; C. yijian, 一間)
6. non-returner (S. anāgāmin; T. phyir mi 'ong ba; C. bu huan/bu lai/anahan 不還/不來/阿那含)
7. one who achieves nirvāṇa in the intermediate state (S. antarāparinirvāyin; T. bar ma dor yongs su mya ngan las 'das ba; C. zhong ban/zhong banniepan 中般/中般涅槃)
8. one who achieves nirvāṇa at birth (S. upapadyaparinirvāyin; T. skyes nas yongs su mya ngan las 'das ba; C. sheng ban/sheng banniepan 生般/生般涅槃)
9. one who achieves nirvāṇa through effort (S. sābhisaṃskāraparinirvāyin; T. mngon par 'du byed dang bcas pas yongs su mya ngan las 'das ba; C. youxing ban/youxing banniepan 有行般/有行般涅槃)

10. one who achieves nirvāṇa without effort (S. anabhisaṃskāraparinirvāyin; T. mngon par ’du byed pa med par yongs su mya ngan las ’das ba; C. wuxing ban/wuxing banniepan 無行般/無行般涅槃)
11. one who goes higher/upstreamer (S. ūrdhvasrotas; T. gong du ’pho ba; C. shangliu ban/shangliu banniepan 上流般/上流般涅槃)
12. bodily witness (S. kāyasākṣin; T. lus kyi mngon sum du byed pa; C. shenzheng 身證)
13. follower through faith (S. śraddhānusārin; T. dad pa’i rjes su ’brang ba; C. suixin xing 隨信行)
14. follower through doctrine (S. dharmānusārin; T. chos kyi rjes su ’brang ba; C. suifa xing 隨法行)
15. one who aspires through faith (S. śraddhādhimukta; T. dad pas lhag par mos pa; C. xinjie 信解)
16. one who attains through seeing (S. dṛṣṭiprāpta; T. mthong bas thob pa; C. jianzhi/jiande 見至/見得)
17. one who is liberated dependent upon a specific occasion (S. samayavimukta; T. dus dang sbyor bar rnam par grol ba; C. shi jietuo 時解脫)
18. one who is liberated regardless of occasion (S. asamayavimukta; T. dus dang mi sbyor bar rnam par grol ba; C. bushi jietuo 不時解脫)
19. one who is liberated through wisdom (S. prajñāvimukta; T. shes rab kyis rnam par grol ba; C. hui jietuo 慧解脫)
20. one who is liberated both ways (S. ubhayatobhāgavimukta; T. gnyis ga’i cha las rnam par grol ba; C. ju jietuo 俱解脫)

THIRTIES

thirty-two marks of a great man. (S. mahāpuruṣalakṣaṇa; T. skyes bu chen po’i mtshan sum bcu rtsa gnyis/mtshan bzang so gnyis; C. daren xiang 大人相)

1. his feet stand firmly on the ground (S. supratiṣṭhitapāda; T. zhabs shin tu gnas pa; C. zu shan anzhu xiang 足善安住相)
2. he has thousand-spoked wheels on the palms of his hands and the soles of his feet (S. cakrāṅkitahastapādatala; T. phyag dang zhabs kyi mthil ’khor lo’i mtshan dang ldan pa; C. shouzu lunxiang 手足輪相)
3. the heels of his feet are broad (S. āyatapādapārṣṇi; T. zhabs kyi mthil rting pa yangs pa; C. zugen fuchang xiang 足跟趺長相)
4. he has long fingers (S. dīrghāṅguli; T. sor mo ring ba; C. xianzhang zhi xiang 纖長指相)
5. his hands and feet are smooth (S. mṛdutaruṇahastapāda; T. phyag dang zhabs kyi mthil ’jam shing gzhon sha chags pa; C. shouzu xiruan xiang 手足細軟相)
6. his hands and feet are webbed (S. jālahastapāda; T. phyag dang zhabs dra bas ’brel ba; C. shouzu wangman xiang 手足網縵相)
7. his legs are long [alt. his ankles are not prominent] (S. utsaṅgapāda; T. zhabs kyi long bu mi mngon pa; C. zufu gaoman xiang 足趺高滿相)
8. he has thighs like an antelope (S. aiṇeyajaṅgha; T. byin pa ri dwags e na ya’i ’dra; C. yiniye chuai xiang 瑿泥耶踹相)
9. his arms extend below the knees (S. sthitānavanatapralambabāhu; T. bzhengs bzhin du ma btud par phyag pus mor slebs pa; C. lishou moxi xiang 立手摩膝相)
10. his penis is retracted (S. kośopagata-vastiguhya; T. ’doms kyi sba ba sbubs su nub pa; C. shifeng zangmi xiang 勢峰藏密相)
11. his brow is broad and even (S. samalalāta; T. dpral ba’i dbyes mnyams pa; C. e guangping qi 額廣平齊)
12. his skin is smooth and golden (S. sūkṣmasuvarṇacchavi; T. pags pa srab cing mdog gser ’dra ba; C. pifu xihua xiang 皮膚細滑相)
13. he has one hair in each pore of his body (S. ekaikaroma; T. spu re re nas skyes shing g.yas su ’khyil ba; C. shenzhu maokong yiyi maosheng xiang 身諸毛孔一一毛生相)
14. the hairs of his body stand erect (S. ūrdhvāgraroma; T. sku’i spu gyen du phyogs pa; C. shenmao shangmi xiang 身毛上靡相)
15. his thighs are well rounded (S. suvartitoru; T. brla legs par zlum pa; C. tui meiyuan xiang 腿美圓相)
16. the seven parts of his body are well-proportioned (S. saptotsada; T. bdun mtho ba; C. qichu jieman xiang 七處皆滿相)
17. the upper part of his body is like a lion’s (S. siṃhapūrvārdhakāya; T. ro stod seng ge’i ’dra ba; C. shen shang ban ru shiziwang xiang 身上半如師子王相)
18. he has broad shoulders (S. citāntarāṃsa; T. thal gong rgyas pa; C. bojian chongshi xiang 髆間充實相)
19. his body and limbs are perfectly proportionate and thus shaped like a fig tree (S. nyagrodhaparimaṇḍala; T. shing nya gro dha ltar chu zheng gab pa; C. shenxiang yuanman runuojutuo 身相圓滿如諾瞿陀)
20. he has full, round shoulders (S. susaṃvṛttaskandha; T. dpung mgo shin tu zlum pa; C. jianshan yuanman xiang 肩善圓滿相)
21. he has an excellent sense of taste (S. rasarasāgra; T. ro bro ba’i mchog dang ldan pa; C. yu zhuwei zhong de zui shangwei 於諸味中得最上味)
22. he has a jaw like a lion’s (S. siṃhahanu; T. ’gram pa seng ge’i ’dra ba; C. han ru shizi xiang 頷如師子相)
23. he has forty teeth (S. catvāriṃśaddanta; T. tshems bzhi bcu mnga’ ba; C. jusishichi 具四十齒)
24. his teeth are even (S. samadanta; T. thems mnyam pa; C. chi qiping 齒齊平)
25. his teeth are evenly spaced (S. aviraladanta; T. tshems thags bzang ba; C. chi wuxi 齒無隙)
26. his teeth are white (S. suśukladanta; T. tshems shin tu dkar ba; C. chi xianbai 齒鮮白)

27. his tongue is long and broad (S. prabhūtatanujihva; T. ljags shin tu ring zhing srab pa; C. she guangbo 舌廣薄)
28. his voice is like Brahmā's (S. brahmasvara; T. tshangs pa'i dbyangs; C. da fanyin 大梵音)
29. his eyes are deep blue with eyelashes like a bull (S. abhinīlanetragopakṣma; T. spyan mthon mthing la ba'i rdzi ma lta bu; C. mu ganqing jie ru niuwang 目紺青睫如牛王)
30. he has a white tuft of hair between his eyebrows (S. ūrṇākeśa; T. mdzod spu; C. meijian baihao xiang 眉間白毫相)
31. the hair on his head turns to the right (S. pradakṣiṇāvarttakeśa; T. dbu skra g.yas su 'khyil ba; C. toufa youxuan 頭髮右旋)
32. he has a protrusion on the crown of the head (S. uṣṇīṣaśīrṣa; T. dbu gtsug tor dang ldan pa; C. dingshang xian wusenisha 頂上現烏瑟膩沙)

thirty-seven wings of enlightenment/factors pertaining to awakening. (S. bodhipākṣikadharma; T. byang chub kyi phyogs kyi chos; C. daopin/puti fen 道品/菩提分)

1. four applications of mindfulness (S. smṛtyupasthāna; T. dran pa nye bar bzhag pa bzhi; C. si nianchu 四念處)
2. four right efforts (S. samyakpradhāna/samyakprahāṇa; T. yang dag par spong ba bzhi; C. si zhengqin 四正勤)
3. four bases of psychic power (S. ṛddhipāda; T. rdzu 'phrul gyi rkang pa bzhi; C. si shenzu/si ruyi zu 四神足/四如意足)
4. five [spiritual] faculties/dominants (S. indriya; T. dbang po lnga; C. wugen 五根)
5. five powers (S. bala; T. stobs lnga; C. wuli 五力)
6. seven factors of enlightenment (S. bodhyaṅga; T. byang chub yan lag bdun; C. qi puti fen/qi juezhi 七菩提分/七覺支)
7. eightfold [noble] path (S. āryāṣṭāṅgamārga; T. 'phags lam yan lag brgyad; C. ba zhengdao 八正道)

FIFTIES

fifty-one/fifty-two mental concomitants. (S. caitta; P. cetasika; T. sem byung lnga bcu rtsa gcig; C. xin suoyou fa 心所有法). See EIGHTY-TWO DHAMMAS OF THE STHAVIRANIKĀYA/THERAVĀDA SCHOOL; ONE-HUNDRED DHARMAS OF THE YOGĀCĀRA SCHOOL.

SEVENTIES

seventy-five dharmas of the Sarvāstivāda school. (S. pañcasaptatidharma; T. chos don lnga; C. qishiwu fa 七十五法)

1. eleven material factors (S. rūpa; T. gzugs; C. sefa 色法)
    1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
    2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
    3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
    4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
    5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
    6. visual objects (S. rūpa; T. gzugs; C. se 色)
    7. sound (S. śabda; T. sgra; C. sheng 聲)
    8. scent (S. gandha; T. dri; C. xiang 香)
    9. flavor (S. rasa; T. ro; C. mei 味)
    10. contact (S. spraṣṭavya; T. reg bya; C. chu 觸)
    11. unmanifest materiality (S. avijñaptirūpa; T. rnam par rig byed ma yin pa'i gzugs; C. wubiao se 無表色)
2. mind (S. citta; T. sems; C. xinwang 心王)
3. forty-six mental concomitants (S. caitta; T. sems byung; C. xin suoyou fa 心所有法)
    1. ten omnipresent mental factors (S. mahābhūmika; T. sems kyi sa mang; C. dadi fa 大地法)
        1. sensation (S. vedanā; T. tshor ba; C. shou 受)
        2. perception (S. saṃjñā; T. 'du shes; C. xiang 想)
        3. volition/intention (S. cetanā; T. sems pa; C. si 思)
        4. sensory contact (S. sparśa; T. reg pa; C. chu 觸)
        5. zeal/desire-to-act (S. chanda; T. 'dun pa; C. yu 欲)
        6. discernment (S. mati; T. shes rab; C. hui 慧)
        7. mindfulness/memory (S. smṛti; T. dran pa; C. nian 念)
        8. attention (S. manaskāra; T. yid la byed pa; C. zuoyi 作意)
        9. determination (S. adhimokṣa; T. mos pa; C. shengjie 勝解)
        10. concentration (S. samādhi; T. ting nge 'dzin; C. ding 定)
    2. ten omnipresent wholesome factors (S. kuśalamahābhūmika; T. dge ba'i sa mang; C. da shan di fa 大善地法)
        1. faith (S. śraddhā; T. dad pa; C. xin 信)
        2. heedfulness/vigilance (S. apramāda; T. bag yod pa; C. bu fangyi 不放逸)
        3. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [輕]安)
        4. equanimity (S. upekṣā; T. btang snyoms; C. xingshe 行捨)
        5. shame/decency/propriety (S. hrī; T. ngo tsha shes pa; C. can 慚)
        6. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui 愧)
        7. absence of craving (S. alobha; T. ma chags pa; C. wu tan 無貪)
        8. absence of ill-will (S. adveṣa; T. zhe sdang med pa; C. wu chen 無瞋)
        9. absence of harmful intentions (S. avihiṃsā; T. rnam par mi 'tshe ba; C. bu hai 不害)
        10. effort/vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin 勤/精進)

   3. six omnipresent afflicted factors (S. kleśamahābhūmika; T. nyon mongs chen po'i sa mang; C. da fannao di fa 大煩惱地法)
      1. delusion (S. moha; T. ma rig pa; C. chi 癡)
      2. heedlessness (S. pramāda; T. bag med pa; C. fangyi 放逸)
      3. lassitude (S. kausīdya; T. le lo; C. xiedai 懈怠)
      4. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin 不信)
      5. sloth (S. styāna; T. rmugs pa; C. [hun]shen [惛]沈)
      6. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉擧)
   4. two major omnipresent unwholesome factors (S. akuśalamahābhūmika; T. mi dge ba'i sa mang; C. da bushan di fa 大不善地法)
      1. lack of shame/decency/propriety (S. āhrīkya; T. ngo tsha med pa; C. wucan 無慚)
      2. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui 無愧)
   5. ten minor afflicted factors of wide extent (S. parīttakleśabhūmika; T. nyon mongs chung ngu'i sa mang; C. xiao fannao di fa 小煩惱地法)
      1. anger (S. krodha; T. khro ba; C. fen 忿)
      2. disparagement/hypocrisy/concealing (S. mrakṣa; T. 'chab pa; C. fu 覆)
      3. selfishness/stinginess (S. mātsarya; T. ser sna; C. qian 慳)
      4. envy (S. īrṣyā; T. phrag dog; C. ji 嫉)
      5. vexation (S. pradāśa; T. 'tshig pa; C. nao 惱)
      6. hostility (S. vihiṃsā; T. rnam par 'tshe ba; C. hai 害)
      7. enmity/resentment (S. upanāha; T. 'khon 'dzin; C. hen 恨)
      8. deception (S. śāṭhya; T. g.yo; C. chan 諂)
      9. deceit (S. māyā; T. sgyu; C. kuang 誑)
      10. arrogance (S. mada; T. rgyags pa; C. jiao 憍)
   6. eight indeterminate mental factors (S. aniyata; T. gzhan 'gyur; C. buding 不定)
      1. applied thought (S. vitarka; T. rtog pa; C. xun 尋)
      2. sustained thought (S. vicāra; T. dpyod pa; C. si 伺)
      3. worry (S. kaukṛtya; T. 'gyod pa; C. ezuo 惡作)
      4. torpor (S. middha; T. gnyid; C. shuimian 睡眠)
      5. sensuality (S. rāga; T. 'dod chags; C. tan 貪)
      6. hatred (S. pratigha; T. khong khro; C. chen 瞋)
      7. pride (S. māna; T. nga rgyal; C. man 慢)
      8. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
4. fourteen conditioned forces dissociated from thought (S. cittaviprayuktasaṃskāra; T. ldan min 'du byed; C. xin bu xiangying xing fa 心不相應行法)
   1. possession (S. prāpti; T. 'thob pa; C. de 得)
   2. nonpossession (S. aprāpti; T.'thob pa med pa; C. feide 非得)
   3. homogeneity (S. sabhāgatā/nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen 衆同分)
   4. state of nonperception (S. āsaṃjñika; T. 'du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi 無想果/無想報/無想事)
   5. equipoise of nonperception (S. asaṃjñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding 無想定)
   6. equipoise of cessation (S. nirodhasamāpatti; T. 'gog pa'i snyoms 'jug; C. mie jin ding 滅盡定)
   7. vitality (S. jīvitendriya; T. srog gi dbang po; C. ming gen 命根)
   8. origination/birth (S. jāti; T. skye ba; C. sheng 生)
   9. continuance/maturation (S. sthiti; T. gnas pa; C. zhu 住)
   10. senescence/decay (S. jarā; T. rga ba; C. yi/lao 異/老)
   11. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang 滅/無常)
   12. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen 名身)
   13. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen 句身)
   14. syllable set (S. vyañjanakāya; T. yi ge'i tshogs; C. wen shen 文身)
5. three uncompounded factors (S. asaṃskṛta; T. 'dus ma byas kyi chos; C. wuwei [fa] 無爲[法])
   1. space (S. ākāśa; T. nam mkha'; C. xukong 虛空)
   2. analytical cessation (S. pratisaṃkhyānirodha; T. so sor brtags 'gog pa; C. zemie 擇滅)
   3. nonanalytical suppression (S. apratisaṃkhyānirodha; T. so sor brtags min gyi 'gog pa; C. feizemie 非擇滅)

EIGHTIES

eighty secondary marks [of a mahāpuruṣa]. (S. anuvyañjana; T. dpe byad bzang po; C. bashi zhong hao 八十種好)

1. copper-colored nails (S. ātāmranakhaḥ; T. sen mo zangs kyi mdog lta bu; C. zhizhao hongtong xiang/zhizhao chitong se 指爪紅銅相/指爪赤銅色)
2. glossy nails (S. snigdhanakhaḥ; T. sen mo mdog snum pa; C. zhise huaze 指色滑澤)
3. raised nails (S. tuṅganakhaḥ; T. sen mo mtho ba; C. zhizhao gao 指爪高)
4. rounded fingers and toes (S. vṛttāṅguliḥ; T. sor mo rnams zlum pa; C. zhuzhi yuanxiang/zhichang xianyuan 諸指圓相/指長纖圓)
5. tapered fingers and toes (S. anupūrvāṅguliḥ; T. sor mo byin gyis phra ba; C. zhuzhi xirou (xiang)/zhuzhi jianxi 諸指細柔(相)/諸指漸細)
6. full fingers and toes (S. citāṅguliḥ; T. sor mo rnams rgyas pa; C. zhuzhi fengman xiang 諸指豐滿相)
7. veins are not visible (S. nigūḍhaśiraḥ; T. rtsa mi mngon pa; C. maijin bulou 脈筋不露)
8. veins are free from knots (S. nirgranthiśiraḥ; T. rtsa mdud med pa; C. erwu maijie/jinmai wujie 而無脈結/筋脉無結)

9. anklebones do not protrude (S. gūḍhagulphaḥ; T. long bu mi mngon pa; C. zu buxian gu/huai buxian 足不顯骨/踝不現)
10. feet [and hands] do not differ in size (S. aviṣamapādaḥ; T. zhabs mi mnyam pa med pa; C. zu wubuping/shouzu ruyi 足無不平/手足如意)
11. walks with the stride of a lion (S. siṃhavikrāntagāmī; T. seng ge'i stabs su gshegs pa; C. xing ru shizi/weiyi ru shizi 形如獅子/威儀如獅子)
12. walks with the stride of an elephant (S. nāgavikrāntagāmī; T. glang po che'i stabs su gshegs pa; C. xingan ru xiang/jinzhi ru xiangwang 形安如象/進止如象王)
13. walks with the stride of a goose (S. haṃsavikrāntagāmī; T. ngang pa'i stabs su gshegs pa; C. xing ru e/xingfa ru ewang 形如鵝/行法如鵝王)
14. walks with the stride of a bull (S. vṛṣabhavikrāntagāmī; T. khyu mchog gi stabs su gshegs pa; C. xing ru shengqun/jinzhi ru niuwang 形如勝群/進止如牛王)
15. walks turning toward the right side (S. pradakṣiṇāvartagāmī; T. g.yas phyogs su ldog cing gshegs pa; C. xiangyou/huishen gushi bijie youxuan 向右/回身顧視必皆右旋)
16. walks elegantly (S. cārugāmī; T. mdzes par gshegs pa; C. weimiao xiang/xingxiang mei/xingbu yansu 微妙相/行相美/行步嚴肅)
17. walks without swaying (S. avakragāmī; T. mi g.yo bar gshegs pa; C. bu waixie/xingbu duanzheng 不歪邪/行步端正)
18. well-rounded body (S. vṛttagātraḥ; T. sku 'khril bag chags pa; C. shen zhongxi/shen zichi weiyi 身重習/身自持透迤)
19. cleansed body (S. mṛṣṭagātraḥ; T. sku byi dor byas pa; C. shen guangze ru diaozhuo/guangze ming ligou 身光澤如彫琢/光澤明離垢)
20. well-proportioned body (S. anupūrvagātraḥ; T. sku rim par 'tsham pa; C. shen jubei/shenti xiangcheng 身具備/身體相稱)
21. clean body (S. śucigātraḥ; T. sku gtsang ba; C. shen jiejing/shenti qingjie 身潔淨/身體清潔)
22. supple body (S. mṛdugātraḥ; T. sku 'jam pa; C. shen rouruan 身柔軟)
23. pure body (S. viśuddhagātraḥ; T. sku rnam par dag pa; C. qingjing shen/shen qingjing 清淨身/身清淨)
24. has perfect genitals (S. paripūrṇavyañjanaḥ; T. mtshan yong su rdzogs pa; C. juzu xiang/shen manzu 具足相/身滿足)
25. broad and magnificent frame (S. pṛthucārumaṇḍalagātraḥ; T. sku kho lag yangs shing bzang ba; C. shenzhi qimiao/shen runze/miao guangxia xiangcheng 身肢奇妙/身潤澤/妙廣狹相稱)
26. walks with an even pace (S. samakramaḥ; T. gom pa snyoms pa; C. xingbu zhengzhi 行步正直)
27. youthful body (S. sukumāragātraḥ; T. sku shin tu gzhon mdog can; C. shense nenruan/rongyan qimiao changruo shaonian 身色嫩軟/容顏奇妙常若少年)
28. unimpaired body (S. adīnagātraḥ; T. sku zhum pa med pa; C. shen wu tuiqu/shenti buqu 身無退屈/身體不曲)
29. broad body (S. unnatagātraḥ; T. sku rgyas pa; C. shen fengman/ruyi fengman 身豐滿/如意豐滿)
30. firm body (S. susaṃhitagātraḥ; T. sku shin tu grims pa; C. shenzhi anshang buqing/zhuchu wu nengdong zhe/shenzhi jianshi 身肢安上不傾/住處無能動者/身肢堅實)
31. limbs and features are well-proportioned (S. suvibhaktāṅgapratyaṅgaḥ; T. yan lag dang nying lag shin tu rnam par 'byed pa; C. zhijie junping/gujie ru gousuo 支節均平/骨節如鉤鎖)
32. sight is free from disease and clear (S. vitimiraviśuddhālokaḥ; T. gzigs pa rab rib med cing rnam par dag pa; C. mu qingjing wu buming 目清淨無不明)
33. round belly (S. vṛttakukṣiḥ; T. dku zlum pa; C. fu yuan 復圓)
34. clean belly (S. mṛṣṭakukṣiḥ; T. dku skabs phyin pa; C. shen wu buxiu 身無不修)
35. belly is free from defects (S. abhugnakukṣiḥ; T. dku ma rnyongs pa; C. fu wu aotu 服無凹凸)
36. flat belly (S. kṣāmodaraḥ; T. phyal phyang nge ba; C. fu yuanxiang 復圓相)
37. deep navel (S. gambhīranābhiḥ; T. lte ba zab pa; C. qi shen/qi shen yuanhao 臍深/臍深圓好)
38. navel turns to the right (S. pradakṣiṇāvartanābhiḥ; T. lte ba g.yas phyogs su 'khyil ba; C. qi youxuan 臍右旋)
39. beautiful from all sides (S. samantaprāsādikaḥ; T. kun nas mdzes pa; C. guan wuyan zu 觀無厭足)
40. conduct is pure (S. śucisamācāraḥ; T. kun tu spyod pa gtsang ba; C. xingshi jiejing 行事潔淨)
41. body has no black moles (S. vyapagatatilakakālagātraḥ; T. sku la sme ba dang gnag bag med pa; C. shen wu zhidian 身無痣點)
42. hands are soft like cotton (S. tūlasadṛśasukumārapāṇiḥ; T. phyag shing bal ltar shin tu 'jam pa; C. shouruan ru mian 手軟如綿)
43. lustrous lines on his hands (S. snigdhapāṇilekhaḥ; T. phyag gi ri mo mdangs yod pa; C. shouwen juguang[se] 手文具光[色])
44. deep lines on his hands (S. gambhīrapāṇilekhaḥ; T. phyag gi ri mo zab pa; C. shouwen sheshen 手文甚深)
45. long lines on his hands (S. āyatapāṇilekhaḥ; phyag gi ri mo ring ba; C. shouwen chang 手文長)
46. face is not too long (S. nātyāyatavadanaḥ; T. shal ha cang yang mi ring ba; C. mian bu changda 面不長大)
47. lips the color of a bimba fruit (S. bimboṣṭhi; T. mchu bim ba ltar dmar ba; C. chun hong ru xiangxiangsi guo 唇紅如相想思果)
48. supple tongue (S. mṛdujihvaḥ; T. ljags mnyen pa; C. she ruanmei/she meiruan 舌軟美/舌美軟)
49. slender tongue (S. tanujihvaḥ; T. ljags srab pa; C. she ruan/she boguang 舌軟/舌薄廣)

50. red tongue (S. raktajihvaḥ; T. ljags dmar ba; C. she xianhong/she sechi 舌鮮紅/舌色赤)
51. voice resonates like an elephant and like thunder (S. gajagarjitajīmūtaghoṣaḥ; T. glang po che'i nga ro dang 'brug gi sgra dang ldan pa; C. ju xiangyu leiyin/xiangsheng longyin 具象語雷音/象聲龍音)
52. sweet, pleasing, and gentle voice (S. madhuracārumañjusvaraḥ; T. gsung snyan cing mnyen la 'jam pa; C. yinyun meihao/yinyun hechang 音韻美好/音韻和暢)
53. round canine teeth (S. vṛttadaṃṣṭraḥ; T. mche ba zlum pa; C. ya yuan 牙圓)
54. sharp canine teeth (S. tīkṣṇadaṃṣṭraḥ; T. mche ba rno ba; C. ya kuaili 牙快利)
55. white canine teeth (S. śukladaṃṣṭraḥ; T. mche ba dkar ba; C. ya bai 牙白)
56. even canine teeth (S. samadaṃṣṭraḥ; T. mche ba mnyam pa; C. ya fang/ya pingzheng 牙方/牙平正)
57. tapered canine teeth (S. anupūrvadaṃṣṭraḥ; T. mche ba byin gyis phra ba; C. ya jianxi 牙漸細)
58. high nose (S. tuṅganāsaḥ; T. shangs mtho ba; C. bi gao/bikong buxian 鼻高/鼻孔不現)
59. clean nose (S. śucināsaḥ; T. shangs gtsang pa; C. bi qingjing 鼻清淨)
60. clear eyes (S. viśuddhanetraḥ; T. spyan rnam par dag pa; C. mu qingjing 目清淨)
61. wide eyes (S. viśālanetraḥ; T. spyan yangs pa; C. mu guang 目廣)
62. thick eyelashes (S. citrapakṣmāḥ; T. rdzi ma stug pa; C. yanmao meihao 眼毛美好)
63. the iris and sclera of his eyes contrast like the petals and stamen of a blue lotus (S. sitāsitakamaladalaśakalanayanaḥ; T. spyan dkar nag 'byes shing pad ma'i 'dab ma'i mdangs pa lta bu; C. mu heibai fenqingmei ru lianhua xingxiang/mu heibai mei ru lianhua xingxiang 目黑白分清美如蓮華形相/目黑白美如蓮華形相)
64. long eyebrows [like a young crescent moon] (S. āyatabhrūḥ; T. smin tshugs ring ba; C. meimao xiuchang/mei ru chuyue 眉毛修長/眉如初月)
65. soft eyebrows (S. ślakṣṇabhrūḥ; T. smin ma 'jam pa; C. shuangmei nenruan 雙眉嫩軟)
66. eyebrows with even hairs (S. samaromabhrūḥ; T. smin ma spu mnyam pa; C. meimao pingqi 眉毛平齊)
67. lustrous eyebrows (S. snigdhabhrūḥ; T. smin ma snum pa; C. meimao run 眉毛潤)
68. full and long ears (pīnāyatakarṇaḥ; T. snyan shal stug cing ring ba; C. er hou xiuchang 耳厚修長)
69. even ears (S. samakarṇaḥ; T. snyan mnyam pa; C. er qiping 耳齊平)
70. unimpaired sense of hearing (S. anupahatakarṇendriyaḥ; T. snyan gyi dbang po ma nyams pa; C. ergen pingjun 耳根平均)
71. well-developed forehead (S. supariṇatalalāṭaḥ; T. dpral ba legs par dbyes pa; C. e guang yuanman 額廣圓滿)
72. broad forehead (S. pṛthulalāṭaḥ; T. dpral ba dbyes che ba; C. e kuan pingzheng 額寬平正)
73. large head (S. suparipūrṇa-uttamāṅgaḥ; T. dbu shin tu rgyas pa; C. tou ru motuona guo 頭如摩陀那果)
74. hair on the head is black as a bee (S. bhramarasadṛśakeśaḥ; T. dbu skra bung ba ltar gnag pa; C. fa se ganqing ru fengwang 髮色紺青如蜂王)
75. thick hair on the head (S. citakeśaḥ; T. dbu skra stug pa; C. fa mei 髮美)
76. soft hair on the head (S. ślakṣṇakeśaḥ; T. dbu skra 'jam pa; C. fa nenruan 髮嫩軟)
77. hair on the head is not disheveled (S. asaṃlulitakeśaḥ; T. dbu skra ma 'dzings pa; C. fa buluan 髮不亂)
78. hair on the head is not rough (S. aparuṣakeśaḥ; T. dbu skra mi gshor ba; C. shoufa zhengqi 首髮整齊)
79. fragrant hair on the head (S. surabhikeśaḥ; T. dbu skra dri zhim pa; C. shoufa xiangfu 首髮香馥)
80. hands and feet are adorned with such auspicious symbols as the śrīvatsa [endless knot]; svastika [swastika]; and nandyāvarta [elaborated swastika form] (S. śrīvatsasvastikanandyāvartalalitapāṇipādaḥ; T. phyags dang zhabs dpal gyi be'u dang bkra shis g.yung drung 'khyil bas brgyan pa; C. shouzu youru xiangdu jiangu/shouzu jixiang dexiang miaohao juzu 手足猶如祥犢堅固/手足吉祥德相妙好具足)

eighty-two dhammas of the *Sthaviranikāya/Theravāda school.

1. twenty-eight material factors (P. rūpa)
    1. four primary elements (P. mahābhūta)
        1. earth/solidity (P. paṭhavī[dhātu])
        2. water/cohesion (P. āpo[dhātu])
        3. fire/heat (P. tejo[dhātu])
        4. air/mobility (P. vāyo[dhātu])
    2. twenty-four types of derived materiality (P. upādārūpa)
        1. eye/visual faculty (P. cakkhu)
        2. ear/auditory faculty (P. sota)
        3. nose/olfactory faculty (P. ghāna)
        4. tongue/gustatory faculty (P. jivhā)
        5. body/tactile faculty (P. kāya)
        6. visual objects (P. rūpa)
        7. sound (P. sadda)
        8. scent (P. gandha)
        9. flavor (P. rasa)
        10. femininity (P. itthindrya)
        11. masculinity (P. purisindriya)
        12. [physical] vitality/life-force (P. jīvita, [rūpa]jīvitindriya)
        13. heart [as the physical basis of mentality] (P. hadaya [vatthu])
        14. bodily intimation (P. kāyaviññatti)
        15. verbal intimation (P. vacīviññatti)
        16. limitation/space element (P. paricchedha, ākāsadhātu)

        17. lightness/buoyancy (P. lahutā)
        18. malleability (P. mudutā)
        19. wieldiness (P. kammaññatā)
        20. birth/development (P. upacaya)
        21. continuity (P. santati)
        22. senescence/decay (P. jaratā)
        23. desinence/extinction/impermanence (P. aniccatā)
        24. nutriment (P. āhāra)
2. mind (citta)
    1. mind/consciousness/mentality (P. citta, viññāṇa, manas)
3. fifty-two mental concomitants (P. cetasika)
    1. thirteen morally indeterminate (P. avyākata)
        1. seven general/universal (P. sabbacittasādhāraṇa)
            1. contact (P. phassa)
            2. sensation (P. vedanā)
            3. perception (P. saññā)
            4. intention (P. cetanā)
            5. one-pointedness (P. ekaggatā)
            6. [mental] vitality/life-force (P. jīvita, [nama] jīvitindriya)
            7. attention (P. manasikāra)
        2. six secondary (P. pakiṇṇaka)
            1. applied thought (P. vittaka)
            2. sustained thought (P. vicāra)
            3. determination/resolution (P. adhimokkha)
            4. energy (P. viriya)
            5. rapture (P. pīti)
            6. zeal (P. chanda)
    2. twenty-five wholesome (P. kusala)
        1. nineteen sobhanasādhāraṇa (universal splendid mental factors)
            1. faith/confidence (P. saddhā)
            2. mindfulness (P. sati)
            3. shame/propriety/decency (P. hiri)
            4. fear of blame/modesty (P. ottappa)
            5. nongreed (P. alobha)
            6. nonhatred (P. adosa)
            7. equanimity (P. tatramajjhattatā)
            8. tranquillity of mental body (P. kāyapassaddhi)
            9. tranquillity of consciousness (P. cittapassaddhi)
            10. lightness of mental body (P. kāyalahutā)
            11. lightness of consciousness (P. cittalahutā)
            12. malleability of mental body (P. kāyamudutā)
            13. malleability of consciousness (P. cittamudutā)
            14. wieldiness of mental body (P. kāyakammaññatā)
            15. wieldiness of consciousness (P. cittakammaññatā)
            16. proficiency of mental body (P. kāyapāguññatā)
            17. proficiency of consciousness (P. cittapāguññatā)
            18. rectitude of mental body (P. kāyujjukatā)
            19. rectitude of consciousness (P. cittujjukatā)
        2. three abstinences (virati)
            1. abstinence from physical misconduct (P. kāyaduccaritavirati); alt. right action (P. sammākammanta)
            2. abstinence from verbal misconduct (P. vacīduccaritavirati); alt. right speech (P. sammāvācā)
            3. abstinence from mental misconduct (P. manoduccaritavirati); alt. abstinence from wrong livelihood (P. ājīvaduccaritavirati), viz. right livelihood (P. sammājīva)
        3. two illimitables (appamañña)
            1. compassion (P. karuṇā)
            2. empathetic joy (P. muditā)
        4. one wisdom faculty (P. paññindriya)
            1. wisdom (P. paññā)
    3. fourteen unwholesome (P. akusala)
        1. delusion (P. moha)
        2. lack of shame or lack of decency (P. ahirika)
        3. lack of fear of blame or lack of modesty (P. anottappa)
        4. restlessness (P. uddhacca)
        5. greed (P. lobha)
        6. wrong view (P. diṭṭhi)
        7. pride/conceit (P. māna)
        8. hatred (P. dosa)
        9. envy (P. issā)
        10. selfishness/stinginess (P. macchariya)
        11. worry/remorse (P. kukkucca)
        12. sloth (P. thīna)
        13. torpor (P. middha)
        14. skeptical doubt (P. vicikicchā)
4. uncompounded (P. asaṅkhata)
    1. nirvāṇa (P. nibbāna)

eighty-four mahāsiddhas. (T. grub thob brgyad bcu rtsa bzhi)

When the Tibetan is not provided, the Tibetan typically transliterates the Indic name.

1. Lūyipa (T. Nya'i rgyu ma za ba)
2. Līlapa (T. Sgeg pa)
3. Virūpa
4. Ḍombipa
5. Śavaripa
6. Saraha (T. Mda' snun)
7. Kankaripa
8. Mīnapa (T. Nya bo pa)
9. Gorakṣa (T. Ba glang bsrung)
10. Caurāṅgi (T. Chom rkun gyu yan lag)
11. Vīnapa (T. Pi vang pa)
12. Śāntipa
13. Tantipa (T. Thags mkhan)
14. Camaripa (T. Lham mkhan)
15. Khaḍgapa (T. Ral gri pa)
16. Nāgārjuna (T. Klu sgrub)
17. Kāṇhapa (T. Nag po spyod pa)
18. Karṇaripa/Āryadeva ('Phags pa lha)
19. Thagnapa (T. Rdzun smra ba)
20. Nāropa (T. Rtsa bshad pa)
21. Śalipa (T. Spyan ki pa)

22. Tilopa (T. Snum pa)
23. Catrapa
24. Bhadrapa (T. Bzang po)
25. Dhukhandi (T. Gnyis gcig tu byed pa)
26. Ajokipa (T. Le lo can)
27. Kalapa (T. Smyon pa)
28. Dhombipa (T. Khrus khan)
29. Kaṅkana (T. Gdu bu can)
30. Kambala (T. Lwa ba pa)
31. Ṭeṅgipa (T. ’Bras rdung ba)
32. Bhandhepa (T. Nor la ’dzin pa)
33. Tandhepa (T. Cho lo pa)
34. Kukkuripa
35. Kucipa (T. Ltag lba can)
36. Dharmapa (T. Thos pa’i shes rab bya ba)
37. Mahipa (T. Ngar rgyal can)
38. Acinta (T. Bsam mi khyab pa)
39. Babhahi (T. Chu las ’o ma len)
40. Nalina (T. Pad ma’i rtsa ba)
41. Bhusuku (T. Zhi lha)
42. Indrabhūti (T. Dbang po’i blo)
43. Mekopa
44. Koṭali (T. Tog rtse zhabs)
45. Kaṃparipa (T. Mgar pa)
46. Jālandhari (T. Dra ba ’dzin pa)
47. Rāhula
48. Dharmapa (T. Chos pa)
49. Dhokaripa (T. Rdo ka ri)
50. Medhina (T. Thang lo pa)
51. Paṅkaja (T. ’Dam skyes)
52. Ghaṇḍhapa (T. Dril pu pa)
53. Yogipa
54. Caluki
55. Gorura (T. Bya ba)
56. Lucika
57. Niguṇa (T. Yon tan med pa)
58. Jayānanda (T. Rgyal ba mtha’ med)
59. Pacari (T. ’Khur ba ’tsong ba)
60. Campaka
61. Bhikṣana (T. So gnyis pa)
62. Telopa (T. Mar nag ’tshong mkhan)
63. Kumaripa (T. Rdza mkhan)
64. Caparipa
65. Maṇibhadrā
66. Mekhalā
67. Kanakhalā
68. Kalakala (T. Ku co can)
69. Kantali (T. Tshem bu pa)
70. Dhahuli (T. Rtswa thag can)
71. Udheli (T. Phur pa)
72. Kapalapa (T. Thod pa can)
73. Kirava (T. Rnam rtog spang ba)
74. Sakara (T. Mtsho skyes)
75. Sarvabhakṣa (T. Thams cad za ba)
76. Nāgabodhi (T. Klu’i byang chub)
77. Dārika (T. Smad ’tshong can)
78. Putali (T. Rgyan slang ba)
79. Panaha (T. Mchil lham can)
80. Kokali (T. Ko la la’i skad du chags)
81. Anaṅga
82. Lakṣmīnkarā (Legs smin kara)
83. Samudra (T. Rgya mtsho nas nor bu len mkhan)
84. Vyali

HUNDREDS

one-hundred dharmas of the Yogācāra school. (S. śatadharma; T. chos brgya; C. baifa 百法)

1. eight consciousnesses (S. vijñāna; T. rnam par shes pa; C. xinfa/shi 心法/識)
   1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam par shes pa; C. yanshi 眼識)
   2. auditory consciousness (S. śrotravijñāna; T. rna ba’i rnam shes pa; C. ershi 耳識)
   3. olfactory consciousness (S. ghrāṇavijñāna; T. sna’i rnam par shes pa; C. bishi 鼻識)
   4. gustatory consciousness (S. jihvāvijñāna; T. lce’i rnam par shes pa; C. sheshi 舌識)
   5. tactile consciousness (S. kāyavijñāna; T. lus kyi rnam par shes pa; C. shenshi 身識)
   6. mental consciousness (S. manovijñāna; T. yid kyi rnam par shes pa; C. yishi 意識)
   7. afflicted mental consciousness (S. kliṣṭamanas; T. nyon yid rnam par shes pa; C. mona shi 末那識)
   8. storehouse consciousness (S. ālayavijñāna; T. kun gzhi rnam shes pa; C. alaiye shi 阿賴耶識)
2. fifty-one mental concomitants (S. caitta; T. sem byung; C. xin suoyou fa 心所有法)
   1. five omnipresent mental functions (S. sarvatraga; T. kun ’gro; C. bianxing[xinsuo] 遍行[心所])
      1. sensation (S. vedanā; T. tshor ba; C. shou 受)
      2. perception (S. saṃjñā; T. ’du shes; C. xiang 想)
      3. volition (S. cetanā; T. sems pa; C. si 思)
      4. attention (S. manaskāra; T. yid la byed pa; C. zuoyi 作意)
      5. sensory contact (S. sparśa; T. reg pa; C. chu 觸)

      3. fear of blame/modesty (S. apatrāpya; T. khrel yod pa; C. kui 愧)
      4. lack of craving (S. alobha; T. ma chags pa; C. wu tan 無貪)
      5. lack of ill-will (S. adveṣa; T. zhe sdang med pa; C. wu chen 無瞋)
      6. lack of delusion (S. amoha; T. gti mug med pa; C. wu chi 無癡)
      7. vigor (S. vīrya; T. brtson 'grus; C. qin/jingjin 勤/精進)
      8. tranquillity/serenity (S. praśrabdhi; T. shin tu sbyangs pa; C. [qing] an [輕]安)
      9. vigilance (S. apramāda; T. bag yod pa; C. bu fangyi 不放逸)
      10. equanimity (S. upekṣā; T. btang snyoms; C. xingshe 行捨)
      11. absence of harmful intentions (S. avihiṃsā; T. rnam par mi 'tshe ba; C. bu hai 不害)
   4. six root afflictions (S. mūlakleśa; T. rtsa nyon; C. genben fannao 根本煩惱)
      1. sensuality/lust (S. rāga; T. 'dod chags; C. tan 貪)
      2. anger (S. pratigha; T. khong khro; C. chen 瞋)
      3. ignorance (S. avidyā; T. ma rig pa; C. chi/wuming 癡/無明)
      4. pride (S. māna; T. nga rgyal; C. man 慢)
      5. skeptical doubt (S. vicikitsā; T. the tshom; C. yi 疑)
      6. wrong views (S. dṛṣṭi; T. lta ba nyon mongs can; C. jian 見)
   5. twenty secondary afflictions (S. upakleśa; T. nye nyon; C. sui fannao 隨煩惱)
      1. anger (S. krodha; T. khro ba; C. fen 忿)
      2. resentment (S. upanāha; T. 'khon 'dzin; C. hen 恨)
      3. vexation/maliciousness (S. pradāśa; T. 'tshig pa; C. nao 惱)
      4. disparagement/hypocrisy (S. mrakṣa; T. 'chab pa; C. fu 覆)
      5. deception (S. māyā; T. sgyu; C. kuang 誑)
      6. deceit (S. śāṭhya; T. g.yo; C. chan 諂)
      7. arrogance (S. mada; T. rgyags pa; C. jiao 憍)
      8. hostility (S. vihiṃsā; T. rnam par 'tshe ba; C. hai 害)
      9. envy (S. īrṣyā; T. phrag dog; C. ji 嫉)
      10. selfishness/stinginess (S. mātsarya; T. ser sna; C. qian 慳)
      11. lack of shame/decency/propriety (S. āhrīkya; T. ngo tsha med pa; C. wucan 無慚)
      12. lack of fear of blame/lack of modesty (S. anapatrāpya; T. khrel med pa; C. wukui 無愧)
      13. lack of faith (S. āśraddhya; T. ma dad pa; C. bu xin 不信)
      14. lassitude (S. kausīdya; T. le lo; C. xiedai 懈怠)
      15. heedlessness (S. pramāda; T. bag med pa; C. fangyi 放逸)
      16. sloth (S. styāna; T. rmugs pa; C. hunchen 惛沈)
      17. restlessness (S. auddhatya; T. rgod pa; C. diaoju 掉舉)
      18. forgetfulness (S. muṣitasmṛtitā; T. brjed nges pa; C. shinian 失念)
      19. lack of circumspection (S. asaṃprajanya; T. shes bzhin ma yin pa; C. bu zhengzhi 不正知)
      20. distraction (S. vikṣepa; T. rnam par g.yeng ba; C. sanluan 散亂)
   6. four indeterminate factors (S. aniyata; T. gzhan 'gyur; C. buding [fa] 不定[法])
      1. torpor/drowsiness (S. middha; T. gnyid; C. shuimian 睡眠)
      2. worry/remorse (S. kaukṛtya; T. 'gyod pa; C. ezuo 惡作)
      3. applied thought (S. vitarka; T. rtog pa; C. xun 尋)
      4. sustained thought (S. vicāra; T. dpyod pa; C. si 伺)
3. eleven material factors (S. rūpa; T. gzugs; C. shiyi sefa 色法)
   1. visual faculty (S. cakṣurindriya; T. mig gi dbang po; C. yangen 眼根)
   2. auditory faculty (S. śrotrendriya; T. rna ba'i dbang po; C. ergen 耳根)
   3. olfactory faculty (S. ghrāṇendriya; T. sna'i dbang po; C. bigen 鼻根)
   4. gustatory faculty (S. jihvendriya; T. lce'i dbang po; C. shegen 舌根)
   5. tactile faculty (S. kāyendriya; T. lus kyi dbang po; C. shengen 身根)
   6. visual objects (S. rūpa; T. gzugs; C. se 色)
   7. sound (S. śabda; T. sgra; C. sheng 聲)
   8. scent (S. gandha; T. dri; C. xiang 香)
   9. flavor (S. rasa; T. ro; C. mei 味)
   10. contact (S. spraṣṭavya; T. reg bya; C. chu 觸)
   11. materiality associated with the sphere of mental factors [e.g.; materiality generated in meditative states] (S. dharmāyatanarūpa; T. chos kyi skye mched pa'i gzugs; C. fachu suoshe se 法處所攝色)
4. twenty-four conditioned forces dissociated from thought (S. cittaviprayuktasaṃskāra; T. ldan min 'du byed; C. xin bu xiangying xing fa 心不相應行法)
   1. possession (S. prāpti; T. 'thob pa; C. de 得)
   2. vitality (S. jīvitendriya; T. srog gi dbang po; C. ming gen 命根)
   3. homogeneity (S. nikāyasabhāga; T. rigs 'thun pa; C. zhong tongfen 衆同分)
   4. nature of ordinary people (S. pṛthagjanatva; T. so so skye bo nyid; C. yisheng xing 異生性)
   5. equipoise of nonperception (S. asaṃjñāsamāpatti; T. 'du shes med pa'i snyoms 'jug; C. wuxiang ding 無想定)

   6. equipoise of cessation (S. nirodhasamāpatti; T. ’gog pa’i snyoms ’jug; C. mie jin ding 滅盡定)
   7. state of nonperception (S. āsaṃjñika; T. ’du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi 無想果/無想報/無想事)
   8. name set (S. nāmakāya; T. ming gi tshogs; C. ming shen 名身)
   9. phrase set (S. padakāya; T. tshig gi tshogs; C. ju shen 句身)
   10. syllable set (S. vyañjanakāya; T. yi ge’i tshogs; C. wen shen 文身)
   11. origination/birth (S. jāti; T. skye ba; C. sheng 生)
   12. continuance/maturation (S. sthiti; T. gnas pa; C. zhu 住)
   13. senescence/decay (S. jarā; T. rga ba; C. yi/lao 異/老)
   14. desinence/extinction (S. anityatā; T. mi rtag pa; C. mie/wuchang 滅/無常)
   15. continuity (S. pravṛtti; T. ’jug pa; C. liuzhuan 流轉)
   16. distinction (S. pratiniyama; T. so sor nges pa; C. dingyi 定異)
   17. association (S. yoga; T. ’byor ’grel; C. xiangying 相應)
   18. instantaneity (S. jāva; T. ’gyogs pa; C. shisu 勢速)
   19. order (S. anukrama; T. go rim; C. cidi 次第)
   20. direction/area (S. deśa; T. yul; C. fang 方)
   21. time (S. kāla; T. dus; C. shi 時)
   22. number (S. saṃkhyā; T. grangs; C. shu 数)
   23. complete assemblage [of the causes and conditions that lead to the production of dharmas] (S. sāmagrī; T. tshogs pa; C. hehe xing 和合性)
   24. incomplete assemblage (S. asāmagrī; T. ma tshogs pa; C. bu hehe xing 不和合性)

5. six uncompounded factors (S. asaṃskṛtadharma; T. ’dus ma byas kyi chos; C. wuwei fa 無爲法)
   1. space (S. ākāśa; T. nam mkha’; C. xukong 虛空)
   2. analytical cessation (S. pratisaṃkhyānirodha; T. so sor brtags ’gog pa; C. zemie 擇滅)
   3. nonanalytical suppression (S. apratisaṃkhyānirodha; T. so sor brtags min gyi ’gog pa; C. feizemie 非擇滅)
   4. motionlessness (S. āniñjya; T. mi g.yo ba; C. budong 不動)
   5. cessation of perception and sensation (S. saṃjñāvedayitanirodha; T. ’du shes dang tshor ba ’gog pa; C. xiangshou mie 想受滅)
   6. suchness (S. tathatā; Tib. de bzhin nyid; C. zhenru 眞如)

Ibushūrinron 異部宗輪論. *See* Samayabhedoparacanacakra

Ichigyō 一行. *See* Yixing

ichigyōzanmai 一行三昧. *See* yixing sanmei

ichijikan 一字關. *See* yizi guan

ichijō 一乘. *See* ekayāna

ichinen sanzen 一念三千. *See* yinian sanqian

ichirai 一來. *See* sakṛdāgāmin

ichiraikō 一來向. *See* sakṛdāgāmiphalapratipannaka

Idaike 韋提希. *See* Vaidehī

Idaten 韋駄天. *See* Weituo tian

igi 威儀. *See* iryāpatha

igō 意業. *See* manaskarman

igon 意言. *See* manojalpa

Igyōshū 潙仰宗. *See* Guiyang zong

ihon 異品. *See* vipakṣa

ijin 威神. *See* anubhāva

ijugenryō 意受現量. *See* manonubhavapratyakṣa

ijuku 異熟. *See* vipāka

ijukuin 異熟因. *See* vipākahetu

ijukuka 異熟果. *See* vipākaphala

ikken 一間. *See* ekavīcika

ikon 意根. *See* manendriya

Ikuga chōjae 郁伽長者會. *See* Ugraparipṛcchā

Ikuga/Ikuka 郁伽. *See* Ugra

in 因. *See* hetu

in 印. *See* mudrā

ina [alt. ino] 維那. *See* weinuo

Indara 因陀羅. *See* Indra

Indaramō 因陀羅網. *See* Indrajāla

Ingen Ryūki 隠元隆琦. *See* Yinyuan Longqi

injō/inzei nenbutsu 引聲念佛. *See* yinsheng nianfo

inju 院主. *See* wŏnju

inka 印可. *See* yinke

inka shōmyō 印可證明. *See* yinke zhengming, yinke

Inkatsuda 因揭陀. *See* Aṅgaja

Inkō 印光. *See* Yinguang

Inmyō nisshōriron 因明入正理論. *See* Nyāyapraveśa

innen 因緣. *See* hetupratyaya, nidāna

Isan Kyōsaku [alt. Keisaku] 潙山警策. *See* Guishan jingce

Isan Reiyū 潙山靈祐. *See* Guishan Lingyou

ishiki 意識. *See* manovijñāna

ishin denshin 以心傳心. *See* yixin chuanxin

isho 意處. *See* manāyatana

ishōshin 意生身. *See* manomayakāya

ishu 意趣. *See* abhiprāya

issaichi 一切智. *See* sarvajñatā

issaichichi 一切知智. *See* sarvajñatājñāna

Issaikyō ongi 一切經音義. *See* Yiqie jing yinyi

Issainyorai kongōsangōsaijōhimitsu daikyōōgyō 一切如來金剛三業最上秘密大教王經. *See* Guhyasamājatantra

Issainyorai shinjitsushō daijōgenshōzanmai daikyōōgyō 一切如來眞實攝大乘現證三昧大教王經. *See* Sarvatathāgata-tattvasaṃgraha

issaishuchi 一切種智. *See* sarvākārajñatā

issaisōchi 一切相智. *See* vastujñāna
Issan Ichinei 一山一寧. *See* Yishan Yining
issendai 一闡提. *See* icchantika
Issetsubu 一說部. *See* Ekavyavahārika
isshin 一心. *See* yixin
isshin sangan 一心三觀. *See* sanguan

J

jachi 邪智. *See* mithyājñāna
jain 邪淫. *See* kāmamithyācāra
jaken 邪見. *See* akuśaladṛṣṭi, mithyādṛṣṭi
jakumoku 寂默. *See* pratisaṃlayana
jakunijōshō 寂而常照. *See* ji er changzhao

THE PRINCETON DICTIONARY OF
Buddhism

Robert E. Buswell Jr.
Donald S. Lopez Jr.

"This is without a doubt the most comprehensive, authoritative, and useful dictionary of Buddhism that there is. In reading it, I learned more about my field, in a serendipitous way, than I have from any other single book."

—John S. Strong, Bates College

"This will become the new standard reference in the field. Every scholar and graduate student in Buddhist studies will want a copy, as will every college instructor assigned to teach an introduction to Buddhism course. I wish I had had a work like this when I first began teaching. This is a truly monumental contribution to the field."

—Lori Meeks, University of Southern California

- The most comprehensive dictionary of Buddhism ever produced in English
- More than 5,000 entries totaling over a million words
- The first dictionary to cover terms from all of the canonical Buddhist languages and traditions—Sanskrit, Pāli, Tibetan, Chinese, Japanese, and Korean
- Detailed entries on the most important terms, concepts, texts, authors, deities, schools, monasteries, and geographical sites in the history of Buddhism
- Cross-references and appendixes allow readers to find related and equivalent terms in multiple Buddhist languages
- Includes an appendix of Buddhist lists, a timeline, and maps
- Also contains selected terms and names in Thai, Burmese, Vietnamese, Lao, Khmer, Sinhalese, Newar, and Mongolian
